Every bank and bank employee shall maintain the confidentiality of qualification examinations and shall not remove from an examination center, reproduce, disclose, receive from or pass to any person, or use for study or any other purposes, any portion of an examination, whether of a present or past series, that would compromise the integrity of the examinations, or use in any manner and at any time the questions or answers to the examination.

Dated: December 10, 1996.

Eugene A. Ludwig,

Comptroller of the Currency.

Federal Reserve System

12 CFR Part 208

For the reasons set forth in the preamble, the Board proposes to amend 12 CFR Parts 208 and 211 as follows:

PART 208—MEMBERSHIP OF STATE BANKING INSTITUTIONS IN THE FEDERAL RESERVE SYSTEM (REGULATION H)

1. The authority citation for part 208 is revised to read as follows:

Authority: 12 U.S.C. 36, 248, 321–338a, 371d, 461, 481–486, 601, 611, 1814, 1816, 1818, 1823(j), 1828(o), 1831p–1, 1831p–1(a)(2), 1831r–1, 2901–2907, 3105, 3310, 3331–3351, and 3906–3909; 15 U.S.C. 78b, 78l(b), 78l(g), 78l(l), 78o–4(c)(5), 78q, 78q–1, and 78w; 31 U.S.C. 5318; 42 U.S.C. 4012a, 4104a, 4104b, 4106, and 4128.

2. A new § 208.25 is added at the end of Subpart A to read as follows:

§ 208.25 Qualification requirements for transactions in certain securities.

(a) *Scope.* This section contains rules prescribing operational and managerial standards for state member banks, prescribes training and qualification requirements for bank employees making retail solicitations, recommendations, purchases, or sales of certain securities on behalf of a state member bank. It applies to all state member banks that engage through bank employees in bank-direct retail solicitations, recommendations, purchases, or sales of certain securities.

(b) *Definitions.* For purposes of this section:

(1) *Appropriate qualification examination* means either the Investment Company/Variable Contracts Products Limited Representative Qualification Examination (Series 6 Examination) or the General Securities Registered Representative Examination (Series 7 Examination), both of which are administered by the National Association of Securities Dealers, Inc. (NASD). The Series 6 Examination is the appropriate qualification examination for a bank employee engaged solely in covered transactions of open-end investment company shares, original distribution closed-end investment company shares, unit investment trusts, or variable contracts, including variable life insurance contracts and variable annuity contracts. The Series 7 Examination is the appropriate qualification examination for a bank employee soliciting, recommending, purchasing, or selling any other covered product.

(2) *Bank* means any state member bank. The term *bank* shall not include a branch of a bank located outside of any State, as defined in section 3(a)(3) of the Federal Deposit Insurance Act, as amended, 12 U.S.C. 1813(a)(3).

(3) *Bank securities representative* means any bank officer, director, or employee (collectively referred to as employee) who engages in a covered transactions or is designated as the supervisor of a bank securities representative who engages in a covered transaction.

(4) *Continuing education requirements* means the course of study specified in paragraph (g) of this section.

(5) *Covered product* has the same meaning as "security" as defined at section 3(a)(10) of the Securities Exchange Act, 15 U.S.C. 78c(a)(10). The term shall not include any product that is a deposit as defined in section 3(l) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(l), or any "government security" as defined at section 3(a)(42) of the Securities Exchange Act, 15 U.S.C. 78c(a)(42).

(6) *Covered transaction* means a retail solicitation, recommendation, purchase, or sale of a covered product by a bank through its employee regardless of the means through which the solicitation, recommendation, purchase, or sale occurs. The term shall not include a such a transaction in a covered product to a fiduciary account administered by a bank, a sale of a municipal security by a municipal securities dealer bank registered under section 15B of the Securities Exchange Act, 15 U.S.C. 78o–4, or a transaction by a bank in its own securities consistent with the conditions set forth in Securities Exchange Act Rule 3a4–1(a)(4), 17 CFR 240.3a4–1(a)(4).

(7) *Disciplinary action* means an action resulting in:

(i) An individual being *subject to disqualification* as defined in paragraph (b)(10) of this section;

(ii) A civil money penalty or fine of $5,000 or more by the Securities and Exchange Commission (SEC) or a securities self-regulatory organization (SSRO) as defined in section 3(a)(26) of the Securities Exchange Act, 15 U.S.C. 78c(a)(26);

(iii) A civil money penalty of $5,000 or more by a Federal banking agency pursuant to section 8 of the Federal Deposit Insurance Act, 12 U.S.C. 1818, for a securities law violation, or an unsafe or unsound practice related to a covered transaction;

(iv) An agreement with the SEC, an SSRO, Federal banking agency, in connection with a disciplinary proceeding; or

(v) An order by the SEC, an SSRO, or a Federal banking agency to enter the continuing education program.

(8) *NASD* means the National Association of Securities Dealers, Inc., which is an SSRO registered under section 15A of the Securities Exchange Act, 15 U.S.C. 78o, and NASD Regulation, Inc., the regulatory subsidiary of the NASD.

(9) *Sponsoring bank* means a bank that engages in or seeks to engage in the business of effecting covered transactions.

(10) *Subject to disqualification* means subject to:

(i) A "statutory disqualification" as that term is used in section 3(a)(39) of the Securities Exchange Act, 15 U.S.C. 78c(a)(39);

(ii) An order of removal, prohibition, or suspension by a Federal banking agency pursuant to 12 U.S.C. 1818 (e) or (g);

(iii) An order or temporary order pursuant to 12 U.S.C. 1818 (b) or (c) that restricts the fiduciary or securities activities of a bank or individual; or

(iv) A prohibition pursuant to 12 U.S.C. 1829(a).

(c) *Qualification requirements*—(1) *Disqualifications.* (i) A bank shall not engage in a covered transaction if it is, or becomes, subject to disqualification, unless it has applied for and received approval to engage in covered transactions from the Board pursuant to paragraph (h) of this section.

(ii) No bank securities representative shall engage in a covered transaction if he or she is, or becomes, subject to disqualification, unless the bank that employs the bank securities representative has applied for and received approval from the Board pursuant to paragraph h of this section for that person to qualify as a bank securities representative.

(2) *Sponsoring bank notices.* (i) A bank seeking to engage in covered transactions shall file a completed Uniform Notice for Sponsoring Bank (Form SB).

(ii) A bank seeking to terminate its status as a Sponsoring Bank shall file a Uniform Request for Sponsoring Bank Withdrawal (Form SBW).

(3) *Sponsoring bank requirements.* (i) A bank seeking to sponsor an employee as a bank securities representative shall:

(A) Make independent inquiry into the individual's employment history, including contacting the employee's previous employers for the past three years and investigating the character, business reputation, qualifications and experience of the individual;

(B) Review, complete as appropriate, and file the Uniform Application for Bank Securities Representative Registration or Transfer (Form U–4B) and amendments thereto on behalf of the employee; and

(C) File a fingerprint record for the employee.

(ii) A bank may not sponsor an employee to qualify as a bank securities representative or permit a previously qualified bank securities representative to engage in covered transactions if the individual is, or becomes, subject to disqualification unless the sponsoring bank has applied and received approval for the individual to engage in covered transactions from the Board under paragraph (h) of this section. A bank shall not sponsor an employee to qualify as a bank securities representative if it does not intend for the employee to engage in or supervise covered transactions or participate in one of the activities enumerated in paragraph (e) of this section.

(iii) A sponsoring bank shall file a Uniform Termination Notice for Bank Securities Representative Registration (Form U–5B) when the employment of a bank securities representative terminates or when a bank securities representative ceases to engage in covered transactions on behalf of the bank. The Form U–5B shall be filed within 30 days of such termination or cessation and a copy of the Form U–5B, and of any amendments to the Form U–5B, shall be provided to the former bank securities representative.

(iv) A sponsoring bank shall designate one or more bank securities representatives to supervise the sponsoring bank's covered transactions. A supervisor designated under this section shall pass the appropriate qualification examination for any bank securities representative(s) under his or her supervision.

(4) *Bank securities representative requirements.* (i) A bank employee seeking to qualify as a bank securities representative shall complete the designated sections of the Form U–4B, provide a fingerprint record, and pass the appropriate qualification examination.

(ii) A bank employee who is eligible for an examination exemption under paragraph (c)(5)(i) of this section must complete a Form U–4B and receive approval under paragraph (c)(6) of this section prior to being qualified as a bank securities representative.

(iii) A bank employee who fails to pass the appropriate qualification examination may take the examination again after a period of 30 calendar days has elapsed from the date of the prior examination. However, any bank employee who fails to pass an examination three or more times in succession may not take the examination until 180 days has elapsed from the date of his or her last attempt to pass the examination.

(iv) A bank employee shall advise the sponsoring bank within 30 days of any event or occurrence that causes any information on the Form U–4B or Form U–5B to become inaccurate or incomplete and shall cooperate with the sponsoring bank in filing an amendment to the relevant form.

(v) A bank securities representative who does not engage in or supervise covered transactions for a period of two years must retake and pass the appropriate qualification examination prior to acting as a bank securities representative. A bank securities representative is deemed to be engaging in covered transactions if the employee acts in one of the capacities listed in paragraph (e) of this section.

(5) *Examination exemptions.* (i) A bank employee is not required to take the appropriate qualification examination if he or she already has qualified by taking that examination pursuant to the rules of an SSRO and remains qualified as a registered representative.

(ii) Upon written request from a sponsoring bank, the Board may, in exceptional cases and where good cause is shown, waive the appropriate qualification examination requirement for a bank employee and may accept other evidence of the employee's qualifications to act as a bank securities representative. Advanced age, physical infirmity, or experience in fields ancillary to the investment banking or securities business generally are insufficient for the Board to waive the examination requirement.

(6) *Approval of bank securities representative qualifications.* No sponsoring bank may permit any bank employee to, and no bank employee shall, act as a bank securities representative until the Board has approved the bank employee's application for registration or transfer on Form U–4B.

(7) *Grace period.* These qualification requirements apply to all banks and bank employees with respect to covered transactions transacted after Date One Year After Effective Date of the Final Rule. Any bank or bank employee that is not in compliance with this section after the grace period shall cease engaging in covered transactions until the requirements are met.

(d) *Filing requirements, amendments, and record retention.* (1) All filings required under this section shall be filed with the Board at the NASD.

(2) All information submitted under this section must be true, current, complete, and not misleading at the time and in light of the circumstances under which it is reported.

(3) A bank shall file an amendment no later than 30 days after learning of facts or circumstances causing a filing to be inaccurate or incomplete.

(4) A bank shall retain copies of all filings:

(i) Made on Forms U–4B and U–5B, including amendments, for not less than three years after the employee terminates employment with the sponsoring bank or ceases to act as a bank securities representative; and

(ii) Made on Forms SB and SBW and any applications under paragraph (f) of this section including amendments for not less than three years after the bank terminates its status as a sponsoring bank.

(e) *Optional designation as a bank securities representative.* A bank may sponsor an employee who is engaged in legal, compliance, internal audit, or similar responsibilities related to covered transactions or who provides administrative support functions for a bank securities representative, and who is not subject to disqualification (unless a waiver is granted pursuant to paragraph (f) of this section), to take the appropriate qualification examination. Such sponsored employee must meet all filing and continuing education requirements of this section in order to be deemed to be a bank securities representative for purposes of this section.

(f) *Applications by banks and bank employees "subject to disqualification."* A sponsoring bank may seek, by written application to the Board on behalf of itself or an employee, relief from being subject to disqualification and permission to engage in covered transactions or to qualify as a bank securities representative, as appropriate. The Board may, consistent with safety and soundness, the public interest, and the protection of investors, grant such relief consistent with its enforcement powers and on such terms and conditions as the Board considers necessary or appropriate.

(g) *Continuing education and training requirements.* A bank securities representative and a sponsoring bank shall comply with the following continuing education requirements:

(1) *Bank securities representative requirements.* (i) Each bank securities representative shall complete, within 120 days of the second, fifth, and tenth anniversaries of passing the appropriate qualification examination, the Continuing Education Program administered by the NASD.

(ii) The required training intervals for bank securities representatives who were registered with an SSRO prior to being employed by the sponsoring bank are measured from the date of SSRO registration. The bank securities representative requirements of the continuing education requirement will be met as of the tenth anniversary of a bank securities representative's registration with a banking agency and/or SSRO, provided the bank securities representative is not subject to paragraph (g)(1)(iv) of this section.

(iii) If a bank securities representative has been subject to a disciplinary action within the ten years prior to the effective date of this section, or at any time since that effective date, the bank securities representative must complete the Continuing Education Program administered by the NASD within 120 days of the disciplinary action and no later than the second, fifth, and tenth anniversaries of the disciplinary action.

(iv) Unless otherwise determined by the Board, any bank securities representative who does not complete the requirements within the prescribed time frames may not perform any bank securities representative duties. The Board may, upon application and a showing of good cause, allow additional time for a bank securities representative to satisfy the Continuing Education program requirements of the bank securities representative requirements.

(2) *Sponsoring bank requirements.* (i) A sponsoring bank shall not permit any employee to act as a bank securities representative unless the employee has complied with the requirements set forth in paragraph (g)(1) of this section.

(ii) A sponsoring bank shall maintain a continuing education program for its bank securities representatives. A sponsoring bank, at least annually, shall evaluate and prioritize its training needs and develop or update, as appropriate, a written training plan. The plan must take into consideration the bank's size, organizational structure, and scope of business activities. Programs used to implement a sponsoring bank's training plan must be appropriate for the business of that bank and, at a minimum, must cover the following matters concerning securities products, services, and strategies offered by the bank:

(A) General investment features and associated risk factors;

(B) Suitability and sales practice considerations;

(C) Applicable regulatory requirements; and

(D) Bank policies and procedures for covered transactions.

(iii) A sponsoring bank shall administer its continuing education programs in accordance with its annual evaluation and written plan and must maintain records documenting the content of the programs and completion of the programs by its bank securities representatives.

(h) *Confidentiality of qualification examinations.* Every bank and bank employee shall maintain the confidentiality of qualification examinations and shall not remove from an examination center, reproduce, disclose, receive from or pass to any person, or use for study or any other purposes, any portion of an examination, whether of a present or past series, that would compromise the integrity of the examinations, or use in any manner and at any time, the questions or answers to the examination.

PART 211—INTERNATIONAL BANKING OPERATIONS (REGULATION K)

1. The authority citation for Part 211 continues to read as follows:

Authority: 12 U.S.C. 221 *et seq.*, 1818, 1841 *et seq.*, 3101 *et seq.*, 3901 *et seq.*

2. Section 211.28 is amended as follows:

a. The section heading is revised;

b. Paragraphs (a) and (b) are redesignated as paragraphs (a)(1) and (a)(2) respectively;

c. A heading is added to paragraph (a);

d. All references to "paragraph (a)" and "paragraph (b)" are revised to read "paragraph (a)(1)" and "paragraph (a)(2)" respectively; and,

e. A new paragraph (b) is added.

The revisions and additions read as follows:

§ 211.28 Provisions applicable to state branches and agencies.

(a) *Limitation on loans to one borrower*—(1) *Limitation.* * * *

* * * * * *

(b) *Retail securities transactions*—(1) *Requirements.* To the extent that an uninsured state branch or a state agency is excluded from the definition of "broker" under section 3(a)(4) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(4)) and engages in an activity that would constitute a covered transaction as defined in § 208.25 of the Board's Regulation H (12 CFR 208.25) for a state member bank, the state branch or agency shall be subject to the

requirements of 12 CFR 208.25 in the same manner that such requirements apply to a state member bank.

(2) *Exception.* Nothing in paragraph (b)(1) of this section is intended to apply the requirements of 12 CFR 208.25 to the lawful deposit-taking activities of an uninsured state branch or state agency.

By order of the Board of Governors of the Federal Reserve System, December 11, 1996.

William W. Wiles,

Secretary of the Board.

Federal Deposit Insurance Corporation

12 CFR Part 342

Authority and Issuance

For the reasons set forth in the joint preamble, part 342 of title 12 of the Code of Federal Regulations is proposed to be added as follows:

PART 342—QUALIFICATION REQUIREMENTS FOR TRANSACTIONS IN CERTAIN SECURITIES

Sec.

342.1 Scope.
342.2 Definitions.
342.3 Qualification requirements.
342.4 Filing requirements, amendments, and record retention.
342.5 Optional designation as a bank securities representative.
342.6 Applications by banks and bank employees "subject to disqualification."
342.7 Continuing education and training requirements.
342.8 Confidentiality of qualification examinations.

Authority: 12 U.S.C. 1818 and 1831p–1(a)(2)

§ 342.1 Scope.

This part is issued by the Federal Deposit Insurance Corporation (the Corporation) pursuant to 12 U.S.C. 1818 and 1831p–1(a)(2). It contains rules prescribing operational and managerial standards for state nonmember insured banks (except a District bank) or a foreign bank having an insured branch, and prescribes training and qualification requirements for bank employees making retail solicitations, recommendations, purchases, or sales of certain securities on behalf of a state nonmember insured bank (except a District bank) or a foreign bank having an insured branch. It applies to all state nonmember insured banks (except a District bank) or a foreign bank having an insured branch that engage through bank employees in bank-direct retail solicitations, recommendations, purchases, or sales of certain securities.

§ 342.2 Definitions.

For purposes of this part:

(a) *Appropriate qualification examination* means either the Investment Company/Variable Contracts Products Limited Representative Qualification Examination (Series 6 Examination) or the General Securities Registered Representative Examination (Series 7 Examination), both of which are administered by the NASD. The Series 6 Examination is the appropriate qualification examination for a bank employee engaged solely in covered transactions of open-end investment company shares, original distribution closed-end investment company shares, unit investment trusts, or variable contracts, including variable life insurance contracts and variable annuity contracts. The Series 7 Examination is the appropriate qualification examination for a bank employee soliciting, recommending, purchasing, or selling any other covered product.

(b) *Bank* means any State nonmember insured bank (except a District bank) or a foreign bank having an insured branch. The term "bank" shall not include a branch of a bank located outside of any State, as defined in section 3(a)(3) of the Federal Deposit Insurance Act, as amended, 12 U.S.C. 1813(a)(3).

(c) *Bank securities representative* means any bank officer, director, or employee (collectively referred to as "employee") who engages in a covered transaction or is designated as the supervisor of a bank securities representative who engages in a covered transaction.

(d) *Continuing education requirements* means the course of study specified in § 342.7.

(e) *Covered product* has the same meaning as "security" as defined at section 3(a)(10) of the Securities Exchange Act, 15 U.S.C. 78c(a)(10). The term shall not include any product that is a deposit as defined in section 3(l) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(l), or any "government security" as defined at section 3(a)(42) of the Securities Exchange Act, 15 U.S.C. 78c(a)(42).

(f) *Covered transaction* means a retail solicitation, recommendation, purchase, or sale of a covered product by a bank through its employee regardless of the means through which the solicitation, recommendation, purchase, or sale occurs. The term shall not include a covered transaction involving a fiduciary account administered by a bank, a sale of a municipal security by a municipal securities dealer bank registered under section 15B of the Securities Exchange Act, 15 U.S.C. 78o-4, or a transaction by a bank in its own securities consistent with the conditions set forth in Securities Exchange Act Rule 3a4–1(a)(4), 17 CFR 240.3a4–1(a)(4).

(g) *Disciplinary action* means an action resulting in:

(1) An individual being "subject to disqualification" as defined in this part;

(2) A civil money penalty or fine of $5,000 or more by the Securities and Exchange Commission (SEC) or a securities self-regulatory organization (SSRO) as defined in section 3(a)(26) of the Securities Exchange Act, 15 U.S.C. 78c(a)(26);

(3) A civil money penalty of $5,000 or more by a Federal banking agency pursuant to section 8 of the Federal Deposit Insurance Act, 12 U.S.C. 1818, for a securities law violation, or an unsafe or unsound practice related to a covered transaction;

(4) An agreement with the SEC, an SSRO, or Federal banking agency, in connection with a disciplinary proceeding; or

(5) An order by the SEC, an SSRO, or a Federal banking agency to enter the continuing education program.

(h) *NASD* means the National Association of Securities Dealers, Inc., which is an SSRO registered under section 15A of the Securities Exchange Act, 15 U.S.C. 78o, and NASD Regulation, Inc., the regulatory subsidiary of the NASD.

(i) *Sponsoring bank* means a bank that engages in or seeks to engage in the business of effecting covered transactions.

(j) *Subject to disqualification* means:

(1) a "Statutory disqualification" as that term is used in section 3(a)(39) of the Securities Exchange Act, 15 U.S.C. 78c(a)(39);

(2) An order of removal, prohibition, or suspension by a Federal banking agency pursuant to 12 U.S.C. 1818(e) or (g);

(3) An order or temporary order pursuant to 12 U.S.C. 1818 (b) or (c) that restricts the fiduciary or securities activities of a bank or individual; or

(4) A prohibition pursuant to 12 U.S.C. 1829(a).

§ 342.3 Qualification requirements.

(a) *Disqualifications.* (1) A bank shall not engage in a covered transaction if it is, or becomes, subject to disqualification, unless it has applied for and received approval to engage in covered transactions from the Corporation pursuant to § 342.6.

(2) No bank securities representative shall engage in a covered transaction if he or she is, or becomes, subject to disqualification, unless the bank that employs the bank securities representative has applied for and received approval from the Corporation

VOL 61 ISS 251 DE 30 1996 UMI

pursuant to § 342.6 for that person to qualify as a bank securities representative.

(b) *Sponsoring bank notices.* (1) A bank seeking to engage in covered transactions shall file a completed Uniform Notice for Sponsoring Bank (Form SB).

(2) A bank seeking to terminate its status as a Sponsoring Bank shall file a Uniform Notice for Sponsoring Bank Withdrawal (Form SBW).

(c) *Sponsoring bank requirements.* (1) A bank seeking to sponsor an employee as a bank securities representative shall:

(i) Make independent inquiry into the individual's employment history, including contacting the employee's previous employers for the past three years and investigating the character, business reputation, qualifications, and experience of the individual;

(ii) Review, complete as appropriate, and file the Uniform Application for Bank Securities Representative Registration or Transfer (Form U–4B) and amendments thereto on behalf of the employee; and

(iii) File a fingerprint record for the employee.

(2) A bank may not sponsor an employee to qualify as a bank securities representative or permit a previously qualified bank securities representative to engage in covered transactions if the individual is, or becomes, subject to disqualification unless the sponsoring bank has applied and received approval for the individual to engage in covered transactions from the Corporation under § 342.6. A bank shall not sponsor an employee to qualify as a bank securities representative if it does not intend for the employee to engage in or supervise covered transactions or participate in one of the activities enumerated in § 342.5.

(3) A sponsoring bank shall file a Uniform Termination Notice for Bank Securities Representative Registration (Form U–5B) when the employment of a bank securities representative terminates or when a bank securities representative ceases to engage in covered transactions on behalf of the bank. The Form U–5B shall be filed within 30 days of such termination or cessation and a copy of the Form U–5B, and of any amendments to the Form U–5B, shall be provided concurrently to the former bank securities representative.

(4) A sponsoring bank shall designate one or more bank securities representatives, as necessary, to supervise the sponsoring bank's covered transactions. A supervisor designated under this part shall pass the appropriate qualification examination for any bank securities representative(s) under his or her supervision.

(d) *Bank securities representative requirements.* (1) A bank employee seeking to qualify as a bank securities representative shall complete the Form U–4B, provide a fingerprint record, and pass the appropriate qualification examination.

(2) A bank employee who is eligible for an examination exemption under paragraph (e) of this section must complete a Form U–4B and receive approval under paragraph (f) of this section prior to being qualified as a bank securities representative.

(3) A bank employee who fails to pass the appropriate qualification examination may take the examination again after a period of 30 calendar days has elapsed from the date of the prior examination. However, any bank employee who fails to pass an examination three or more times in succession may not take the examination until 180 days has elapsed from the date of his or her last attempt to pass the examination.

(4) A bank employee shall advise the sponsoring bank within 30 days of any event or occurrence that causes any information on the Form U–4B or Form U–5B to become inaccurate or incomplete and shall cooperate with the sponsoring bank in filing an amendment to the relevant form.

(5) A bank securities representative who does not engage in or supervise covered transactions for a period of two years must retake and pass the appropriate qualification examination prior to acting as a bank securities representative. A bank securities representative is deemed to be engaging in covered transactions if the employee acts in one of the capacities listed in § 342.5.

(e) *Examination exemptions.* (1) A bank employee is not required to take the appropriate qualification examination if he or she already has qualified by taking that examination pursuant to the rules of an SSRO and remains qualified as a registered representative.

(2) Upon written request from a sponsoring bank, the Corporation may, in exceptional cases and where good cause is shown, waive the appropriate qualification examination requirement for a bank employee and may accept other evidence of the employee's qualifications to act as a bank securities representative. Advanced age, physical infirmity, or experience in fields ancillary to the investment banking or securities business generally are insufficient for the Corporation to waive the examination requirement.

(f) *Approval of bank securities representative qualifications.* No sponsoring bank may permit any bank employee to, and no bank employee shall, act as a bank securities representative until the Corporation has approved the bank employee's application for registration or transfer on Form U–4B.

(g) *Grace period.* These qualification requirements apply to all banks and bank employees with respect to covered transactions transacted after Date one year after effective date of the Final Rule. Any bank or bank employee that is not in compliance with this part after the grace period shall cease engaging in covered transactions until the requirements are met.

§ 342.4 Filing requirements, amendments, and record retention.

(a) All filings required under this part shall be filed with the Corporation at the NASD.

(b) All information submitted on any filing required under this part must be true, current, complete, and not misleading at the time and in light of the circumstances under which it is reported.

(c) A bank shall file an amendment no later than 30 days after learning of facts or circumstances causing a filing to be inaccurate or incomplete.

(d)(1) A bank shall retain copies of all filings made on Forms U–4B and U–5B, including amendments, for not less than three years after the employee terminates employment with the sponsoring bank or ceases to act as a bank securities representative.

(2) A bank shall retain copies of all filings made on Forms SB and SBW and any applications under § 342.6, including amendments, for not less than three years after the bank terminates its status as a sponsoring bank.

§ 342.5 Optional designation as a bank securities representative.

A bank may sponsor an employee who is engaged in legal, compliance, internal audit, or similar responsibilities related to covered transactions or who provides administrative support functions for a bank securities representative, and who is not subject to disqualification (unless a waiver is granted pursuant to § 342.6), to take the appropriate qualification examination. Such sponsored employee must meet all filing and continuing education requirements in order to be deemed to be a bank securities representative for purposes of this part.

§ 342.6 Applications by banks and bank employees "subject to disqualification."

A sponsoring bank may seek, by written application to the Corporation on behalf of itself or an employee, relief from being subject to disqualification and permission to engage in covered transactions or to qualify as a bank securities representative, as appropriate. The Corporation may, consistent with safety and soundness, the public interest, and the protection of investors, grant such relief consistent with its enforcement powers and on such terms and conditions as the Corporation considers necessary or appropriate.

§ 342.7 Continuing education and training requirements.

A bank securities representative and a sponsoring bank shall comply with the following continuing education requirements:

(a) *Bank securities representative requirements.* (1) Each bank securities representative shall complete, within 120 days of the second, fifth, and tenth anniversaries of passing the appropriate qualification examination, the Continuing Education Program administered by the NASD.

(2) The required training intervals for bank securities representatives who were registered with an SSRO prior to being employed by the sponsoring bank are measured from the date of SSRO registration. The bank securities representative requirements of the continuing education requirement will be met as of the tenth anniversary of a bank securities representative's registration with a banking agency and/or SSRO, provided the bank securities representative is not subject to paragraph (a)(4) of this section.

(3) If a bank securities representative has been subject to a disciplinary action within the ten years prior to the effective date of this part, or at any time since that effective date, the bank securities representative must complete the Continuing Education Program administered by the NASD within 120 days of the disciplinary action and no later than the second, fifth, and tenth anniversaries of the disciplinary action.

(4) Unless otherwise determined by the Corporation, any bank securities representative who does not complete the requirements within the prescribed time frames may not perform any bank securities representative duties. The Corporation may, upon application and a showing of good cause, allow additional time for a bank securities representative to satisfy the program requirements.

(b) *Sponsoring bank requirements.* (1) A sponsoring bank shall not permit any employee to act as a bank securities representative unless the employee has complied with the requirements set forth in paragraphs (a)(1) through (a)(4) of this section.

(2) A sponsoring bank shall maintain a continuing education program for its bank securities representatives. A sponsoring bank, at least annually, shall evaluate and prioritize its training needs and develop or update, as appropriate, a written training plan. The plan must take into consideration the bank's size, organizational structure, and scope of business activities. Programs used to implement a sponsoring bank's training plan must be appropriate for the business of that bank and, at a minimum, must cover the following matters concerning securities products, services, and strategies offered by the bank:

(i) General investment features and associated risk factors;

(ii) Suitability and sales practice considerations;

(iii) Applicable regulatory requirements; and

(iv) Bank policies and procedures for covered transactions.

(3) A sponsoring bank shall administer its continuing education programs in accordance with its annual evaluation and written plan and must maintain records documenting the content of the programs and completion of the programs by its bank securities representatives. A bank may choose to use commercial training material and outside vendors to assist in meeting this education requirement if it ensures that the training material or program meets the content standards set forth in paragraph (b)(2) of this section.

§ 342.8 Confidentiality of qualification examinations.

Every bank and bank employee shall maintain the confidentiality of qualification examinations and shall not remove from an examination center, reproduce, disclose, receive from or pass to any person, or use for study or any other purposes, any portion of an examination, whether of a present or past series, that would compromise the integrity of the examinations, or use in any manner and at any time the questions or answers to the examination.

By Order of the Board of Directors.

Dated at Washington, D.C., this 11th day of December, 1996.

Federal Deposit Insurance Corporation.

Jerry L. Langley,

Executive Secretary.

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

FEDERAL RESERVE SYSTEM

FEDERAL DEPOSIT INSURANCE CORPORATION

Proposed Collection; Comment Request

AGENCIES: Office of the Comptroller of the Currency, Treasury; Board of Governors of the Federal Reserve System; and Federal Deposit Insurance Corporation.

ACTION: Notice and request for comments.

SUMMARY: The Office of the Comptroller of the Currency (OCC), the Board of Governors of the Federal Reserve System (Board), and the Federal Deposit Insurance Corporation (FDIC) (collectively, the Agencies), as part of their continuing efforts to reduce paperwork and respondent burden, invite the general public and other Federal agencies to comment on proposed information collections, as required by the Paperwork Reduction Act of 1995. Currently, the Agencies are soliciting comments concerning an information collection titled (MA)—Financial Institutions Securities Qualifications Forms.

DATES: Written comments should be submitted by February 28, 1997.

ADDRESSES: Direct all written comments to:

OCC: Communications Division, Attention: 1557–FISQ, Third Floor, Office of the Comptroller of the Currency, 250 E Street, SW, Washington, DC 20219. In addition, comments may be sent by facsimile transmission to (202) 874–5274, or by electronic mail to REGS.COMMENTS@OCC.TREAS.GOV.

Board: Mr. William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, N.W., Washington, D.C. 20551, or delivered to the Board's mail room between 8:45 and 5:15 p.m., and to the security control room outside of those hours. Both the mail room and the security control room are accessible from the courtyard entrance on 20th Street between Constitution Avenue and C Street, N.W. Comments received may be inspected in room M–P–500 between 9:00 a.m. and 5:00 p.m., except as provided in section 261.8 of the Board's Rules Regarding Availability of Information, 12 CFR 261.8(a).

FDIC: Office of the Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, N.W., Washington, D.C. 20429. Comments may be hand-delivered to room F–402, 1776 F Street, N.W., Washington, D.C. 20429, on business days between 8:30 a.m. and 5:00 p.m. Comments may be sent through facsimile to (202) 898–3838 or by the Internet to: COMMENTS@FDIC.GOV. Comments will be available for inspection at the FDIC Public Information Center, room 100, 801 17th Street, N.W., Washington, D.C., between 9:00 a.m. and 4:30 p.m. on business days.

A copy of the comments may also be submitted to the OMB desk officer for the agencies: Alexander Hunt, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the collection may be obtained by contacting:

OCC: Jessie Gates or Dionne Walsh, (202) 874–5090, Legislative and Regulatory Activities Division (1557–FISQ), Office of the Comptroller of the Currency, 250 E Street, SW, Washington, DC 20219. Internet address: REGS.COMMENTS@OCC.TREAS.GOV.

Board: Mary M. McLaughlin, Board Clearance Officer, (202) 452–3829, Division of Research and Statistics, Board of Governors of the Federal Reserve System, 20th & C Streets, N.W., Washington, D.C. 20551. For the hearing impaired only, Telecommunications Device for the Deaf (TDD), Dorothea Thompson, (202) 452–3544, Board of Governors of the Federal Reserve System, 20th & C Streets, N.W., Washington, D.C. 20551.

FDIC: Steven F. Hanft, FDIC Clearance Officer, (202) 898–3907, Office of the Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, N.W., Washington, D.C. 20429. Internet address: COMMENTS@FDIC.GOV.

SUPPLEMENTARY INFORMATION:

Title: (MA)—Financial Institutions Securities Qualifications Forms OMB Number: Not yet assigned.

Form Number: Forms SB, SBW, U–4B, and U–5B.

Abstract: This information collection covers the securities qualifications forms for banks and bank employees involved in retail securities sales programs. This information will promote safe and sound operations of financial institution-sponsored securities sales programs and will enhance customer protection. Additionally, the collection will be instrumental in preventing unqualified or disqualified individuals from recommending or selling retail securities on behalf of financial institutions regulated by the OCC, Board, and FDIC.

Type of Review: New Collection.

Affected Public: Businesses or other for-profit.

OCC

Number of Respondents: 120.
Total Annual Responses: 1,248.
Frequency of Response: Occasionally.
Total Annual Burden Hours: 2,184.

Board

Number of Respondents: 100.
Total Annual Responses: 754.
Frequency of Response: Occasionally.
Total Annual Burden: 2,142.

FDIC

Number of Respondents: 70.
Total Annual Responses: 523.
Frequency of Response: Occasionally.
Total Annual Burden Hours: 1,483.

Comments

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;

(b) The accuracy of the agency's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: December 16, 1996.

Karen Solomon,

Director, Legislative and Regulatory Activities Division.

By order of the Board of Governors of the Federal Reserve System, December 16, 1996.

William W. Wiles,

Secretary of the Board.

By Order of the Board of Directors.

Dated at Washington, D.C., this 11th day of December, 1996.

FORM SB INSTRUCTIONS

I. GENERAL INSTRUCTIONS

1. **FORM SB** - The Uniform Notice for Sponsoring Banks. Sponsoring Banks are required to file this form with their primary federal banking agency. Filing of the Form is to be made with the Central Registration Depository ("CRD") system which is operated by the National Association of Securities Dealers, Inc. ("NASD"). Sponsoring Banks will be assigned a unique CRD identification number which will be used to identify banks engaged in covered transactions and to identify bank securities representatives. The CRD is also used to track customer complaints and movement of bank securities representatives/registered representatives from one broker-dealer/sponsoring bank employer to the next.

   The NASD is acting as agent for each of the federal banking agencies for purposes of receiving filings from Sponsoring Banks. These instructions apply both to electronic filing with the CRD System as well as filing of paper copies with the NASD.

2. **UPDATING** - By regulation, the Sponsoring Bank must update promptly Form SB information by submitting amendments whenever the information on file becomes materially inaccurate or incomplete for any reason.

3. **CONTACT EMPLOYEE** - The individual listed as the contact employee must be authorized to receive all compliance information, communications, and mailings, and be responsible for disseminating it within the Sponsoring Bank.

4. **FEDERAL INFORMATION LAW AND REQUIREMENTS** - The information in this form is required by the federal banking agencies. See 12 CFR, Part 12 Subpart B (OCC); 12 CFR, Part 208 (FRB); and 12 CFR Part 342 (FDIC). The information is used for regulatory purposes, including deciding whether to grant registration. The federal banking agencies maintain files of the information on this form and, through the NASD, intend to make it publicly available. Sponsoring Banks are not required to file Form SB with the federal banking agencies if the form does not have a current OMB number.

A. PAPER FILING INSTRUCTIONS

1. FORMAT

a. Attach the Execution Page (Page 5) with original manual signatures to the initial Form SB filing and each amendment to the Form. Complete all amended pages in full.

b. Give the name of the Sponsoring Bank and date on each page.

c. Use only the current version or photocopy of Form SB.

I. GENERAL INSTRUCTIONS (Cont'd)

B. ELECTRONIC FILING INSTRUCTIONS

Contact the NASD's CRD ((301) 590-6500) for information and software concerning electronic access to the CRD.

1. FORMAT

a. A full paper Form SB is required when the Sponsoring Bank is filing with the federal banking agency for the first time.

b. All items must be answered and all fields requiring a response must be completed before the filing will be accepted.

c. A Sponsoring Bank must complete the execution screen certifying that Form SB and amendments thereto have been executed properly and that the information contained therein is accurate and complete.

d. To amend information, the Sponsoring Bank must update the appropriate Form SB screens.

e. A paper copy, with original manual signatures, of the initial Form SB filing and amendments must be retained by the Sponsoring Bank and made available for inspection by the bank's federal banking agency.

The mailing address for the federal banking agencies for questions and correspondence regarding Form SB is:

Federal Deposit Insurance Corporation
Office of the Comptroller of the Currency, or
Board of Governors for the Federal Reserve System
c/o NASD Central Registration Depository
P.O. Box 9401
Gaithersburg, Maryland 20898-9401

VOL 61 ISS 251 DE 30 1996 UMI

II. DISCLOSURE REPORTING PAGE (DRP)

Information concerning the Sponsoring Bank that relates to the occurrence of an event reportable under Item 5 must be provided on the Sponsoring Bank's appropriate DRP (SB).

EXPLANATION OF TERMS

(The following terms are italicized throughout this form)

List of Defined Terms

1. GENERAL

Applicant - The Sponsoring Bank applying on or amending this form.

Bank - any insured depository institution, as defined at 12 U.S.C. 1813(c)(2). Bank shall not include a branch of a bank located outside of any state as defined at 12 U.S.C. 1813 (a)(3).

Central Registration Depository (CRD) - database operated by the NASD.

Covered Sale - means a retail solicitation, recommendation, purchase, or sale of a covered product by a bank through its employees regardless of the means through which the solicitation, recommendation, purchase or sale occurs. The term shall not include a covered transaction involving a fiduciary account administered by a bank, a transaction involving a municipal security by a municipal securities dealer bank registered under section 15B of the Securities Exchange Act of 1934, 15 U.S.C. 78o-4, or a transaction by a bank of its own securities consistent with the conditions set forth in Securities Exchange Act Rule 3a4-1(a)(4), 17 CFR 240.3a4-1(a)(4).

Covered Transaction - has the same meaning as "security" as defined at section 3(a)(10) of the Securities Exchange Act, 15 U.S.C. 78c(a)(10). The term shall not include any product that is a deposit as defined in section 3(1) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(1), or any "government security" as defined at section 3(a)(42) of the Securities Exchange Act of 1934, 15 U.S.C. 78c(a)(42).

Self-Regulatory Organization ("SRO") - means any national securities and commodities exchange, any national securities association (e.g., the NASD), or any registered clearing agency.

Sponsoring Bank - means a bank that engages in or seeks to engage in "covered transactions."

2. FOR THE PURPOSE OF ITEM 5 AND THE CORRESPONDING DISCLOSURE REPORTING PAGES (DRPs):

Charged - Being accused of a crime in a formal complaint, information, or indictment (or equivalent formal charge).

Enjoined - Includes being subject to a mandatory injunction, prohibitory injunction, preliminary injunction or a temporary restraining order.

II. FOR THE PURPOSE OF ITEM 5 AND THE CORRESPONDING DISCLOSURE REPORTING PAGES (DRPs): (Cont'd)

Felony - For *jurisdictions* that do not differentiate between a *felony* or *misdemeanor*, is an offense punishable by a sentence of at least one year imprisonment and/or a fine of at least $1,000.

Foreign Financial Regulatory Agency - Includes (1) a foreign securities authority; (2) other governmental body or foreign equivalent of a *self-regulatory organization* empowered by a foreign government to administer or enforce its laws relating to the regulation of *investment-related* activities; or (3) a foreign membership organization, a function of which is to regulate the participation of its members in *investment-related* activities listed above.

Found - Includes adverse final actions, including consent decrees in which the respondent has neither admitted nor denied the findings, but does not include agreements, deficiency letters, examination reports, memoranda of understanding, letters of caution, admonishments, and similar informal resolutions of matters.

Investment or Investment-Related - Pertaining to securities, commodities, banking, insurance or real estate (including, but not limited to, acting as or being associated with a broker-dealer, issuer, investment company, investment adviser, futures sponsor, bank or savings association).

Involved - Doing an act or aiding, abetting, counseling, commanding, inducing, conspiring with or failing reasonably to supervise another in doing an act.

Jurisdiction - A state, the District of Columbia, any Territory of the United States, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, or any subdivision or regulatory body thereof.

Minor Rule Violation - A violation of a *self-regulatory organization* rule which has been designated as "minor" pursuant to a plan approved by the U.S. Securities and Exchange Commission. A rule violation may be designated as "minor" under a plan if the sanction imposed consists of a fine of $2,500.00 or less, and if the sanctioned person does not contest the fine. Check with the appropriate *self-regulatory organization* to determine if a particular rule violation has been designated as "minor" for these purposes.

Misdemeanor - For jurisdictions that do not differentiate between a *felony* or *misdemeanor*, is an offense punishable by a sentence of less than one year imprisonment and/or a fine of less than $1,000.

Order - A written directive issued pursuant to statutory authority and procedures, including orders of denial, suspension, or revocation; does not include special stipulations, undertakings or agreements relating to payments, limitations on activity or other restrictions unless they are included in an order.

Proceeding - Includes a formal administrative or civil action initiated by a governmental agency, *self-regulatory organization* or *foreign financial regulatory authority*, a *felony* criminal indictment or information (or equivalent formal charge), or a *misdemeanor* criminal information (or equivalent formal charge), but does not include an arrest or similar charge effected in the absence of a formal

criminal indictment or information (or equivalent formal charge). NOTE: *Investment-related* civil litigation, other than that specified above, is reportable under Item 5H on Form U-4B. An *investigation* is reportable under Item 5G on Form U-4B.

EXECUTION:

The undersigned, states that he/she has executed this form on behalf of, and with the authority of, said Sponsoring Bank. The undersigned and the Sponsoring Bank represent that the information and statements contained herein, including exhibits attached hereto, and other information filed herewith, all of which are made a part hereof, are current, true and complete. The undersigned and Sponsoring Bank further represent that to the extent any information previously submitted is not amended such information is currently accurate and complete.

CIVIL JUDICIAL ACTION DISCLOSURE REPORTING PAGE (SB)

General Instructions

This Disclosure Reporting Page (DRP SB) is an ☐ initial or ☐ amended response used to report details for affirmative responses to items 5H of Form SB:

Check item(s) being responded to:

5H(1) Has any domestic or foreign court:

☐ (a) in the past ten years, enjoined the applicant in connection with any investment-related activity?

☐ (b) ever found that the applicant was involved in a violation of investment-related statutes or regulations?

☐ (c) ever dismissed, pursuant to a settlement agreement, an investment-related civil action brought against the applicant by a state or foreign financial regulatory authority?

5H(2) ☐ Is the applicant now the subject of any civil proceeding that could result in a yes answer to any part of 5H?

One event may result in more than one affirmative answer within each of the above items. Use only one DRP to report details related to the same event. Unrelated civil judicial actions must be reported on separate DRPs.

PART I

Name of Applicant

Applicant CRD Number

PART II

1. Court Action Initiated by: *(Name the regulator, foreign financial regulatory authority, SRO, commodities exchange, Agency, Firm, Private Plaintiff, etc.)*

2. Relief Sought: *(Temporary Restraining Order, Mandatory Injunction, Preliminary Injunction, etc.)*

3. Filing Date of Court Action: MM/DD/YY

4. Product Type(s):

5. Court formal action was brought in: *(Name of federal, military, state or foreign court)*

6. Location of Court: *(City or County and State or Country)*

7. Docket/Case Number:

8. Not Applicable

9. Describe allegations relating to this court action: *(use reverse side of this sheet for additional comments if necessary.)*

10. Is action currently: *(check one)*
☐ pending ☐ on appeal ☐ final

11. If pending, date notice was served: *(MM/DD/YY)*

12. If on appeal, action requested to: *(provide name of court)*

13. If on appeal, date filed: *(MM/DD/YY)*

IF FINAL OR ON APPEAL, COMPLETE ALL ITEMS BELOW. FOR PENDING ACTIONS, COMPLETE ITEM 21 ONLY.

14. How was the matter resolved? *(Dismissed, Consent, Judgment Rendered, etc.)*

15. Resolution Date: *(MM/DD/YY)*

16. Sanctions: *(Suspended, Censured, etc.)*

17. If Suspended, Enjoined or Barred:

Is suspension/injunction/bar of a fixed duration? *(If no, provide details in Item 21.)* ☐ Yes ☐ No

Suspension/Injunction/Bar Start Date: *(MM/DD/YY)*

Suspension/Bar Injunction/Duration:

Suspension/Injunction/Bar capacity affected: *(Registered Securities Principal, Financial & Operations Principal, Options Trading, etc.)*

18. If requalification by examination was a condition of the disposition:

Is requalification/retraining time-related?

If yes, length of time given to requalify/retrain: *(If no, provide details in Item 21.)*

Type of exam required for requalification:

Has condition been satisfied? ☐ Yes ☐ No

19. If disposition resulted in a fine, penalty, restitution, disgorgement or monetary compensation: *(Fill in amount on appropriate line)*

Penalty/Fine:	$	Date Paid *(MM/DD/YY)*
Restitution:	$	Date Paid *(MM/DD/YY)*
Disgorgement:	$	Date Paid *(MM/DD/YY)*
Other:	$	Date Paid *(MM/DD/YY)*

20. Not Applicable

21. Provide a brief summary of circumstances related to action(s), allegation(s), disposition(s) and/or finding(s) disclosed above. *(Use reverse side of this sheet for additional comments if necessary.)*

CRIMINAL DISCLOSURE REPORTING PAGE (SB)

General Instructions

This Disclosure Reporting Page (DRP SB) is an ☐ initial or ☐ amended response used to report details for affirmative responses to Items 5A or 5B of Form SB:

Check item(s) being responded to:

5A In the past ten years has the applicant:

☐ (1) been convicted or pled guilty or nolo contendere *("no contest")* in a domestic, foreign, or military court to any felony?

☐ (2) been charged with any felony?

5B In the past ten years has the applicant:

☐ (1) been convicted or pled guilty or nolo contendere *("no contest")* in a domestic, foreign or military court to a misdemeanor involving: investments or an investment-related business, or any fraud, false statements or omissions, wrongful taking of property, bribery, perjury, forgery, counterfeiting, extortion, or a conspiracy to commit any of these offenses?

☐ (2) been charged with a misdemeanor specified in 5B(1)?

Multiple counts of the same charge arising out of the same event(s) should be reported on the same DRP. Unrelated criminal actions, including separate cases arising out of the same event, must be reported on separate DRPs. Use this DRP to report all charges arising out of the same event. One event may result in more than one affirmative answer to the above items.

Applicable court documents (i.e., criminal complaint, information or indictment as well as judgement of conviction or sentencing documents) must be provided to the CRD if not previously submitted.

PART I

Name of Applicant

Applicant CRD Number

PART II

1. Formal charge(s) were brought in:

Court: *(Name of Federal, Military, State or Foreign Court)* Location of Court: *(City or County and State or Country)* Docket / Case Number:

2. Charge Detail Disclosure: *(Continue on additional Criminal Disclosure Reporting Page SB if more than three charges arise out of the same event.)*

Formal Charge(s) Description:	Charge Date : (MM/DD/YY)	No. of counts	Charge Type (Check one only) Misdemeanor	Charge Type (Check one only) Felony	Plea (Guilty, Not Guilty, etc.)	Charge is currently (check one only)	Appeal Date (MM/DD/YY)	Product Type (If charge is investment related)
1.						☐ Pending ☐ On Appeal ☐ Pre-trial Intervention ☐ Final

VOL 61 ISS 251 DE 30 1996 UMI

REGULATORY ACTION DISCLOSURE REPORTING PAGE (SB)

General Instructions

This Disclosure Reporting Page (DRP BD) is an ☐ initial or ☐ amended response used to report details for affirmative responses to Item 5A and 5B of Form SB:

Check items being responded to:

5c Has the US Securities and Exchange Commission or the Commodity Futures Trading Commission ever:
- ☐ (1) Found the applicant to have made a false statement or omission?
- ☐ (2) Found the applicant to have been involved in a violation of its regulations or statutes?
- ☐ (3) Found the applicant to have been a cause of an investment-related business having its authorization to do business denied, suspended, revoked, or restricted?
- ☐ (4) Entered an order against the applicant in connection with investment-related activity?
- ☐ (5) Imposed a civil money penalty on the applicant, or ordered the applicant to cease and desist from any activity?

5d Has any other federal regulatory agency, any state regulatory agency or foreign financial regulatory authority:
- ☐ (1) Ever found the applicant to have made a false statement, or omission, or been dishonest, unfair, or unethical?
- ☐ (2) Ever found the applicant to have been involved in a violation of investment-related regulations or statutes?
- ☐ (3) Ever found the applicant to have been a cause of an investment-related business having its authorization to do business denied, suspended, revoked or restricted?
- ☐ (4) In the past ten years, entered an order against the applicant in connection with an investment-related activity?
- ☐ (5) Ever denied, suspended or revoked the applicant's registration or license or otherwise, by order, prevented it from associating with an investment-related business or restricted its activities?

5e Has any self-regulatory organization or commodities exchange ever:
- ☐ (1) Found the applicant to have made a false statement or omission?
- ☐ (2) Found the applicant to have been involved in a violation of its rules (other than a violation designated as a "minor rule violation" under a plan approved by the US Securities and Exchange Commission)?
- ☐ (3) Found the applicant to have been the cause of an investment-related business having its authorization to do business denied, suspended, revoked or restricted?
- ☐ (4) Disciplined the applicant by expelling or suspending it from membership, barring or suspending its association with other members, or otherwise restricting its activities?

5f Has the applicant's authorization to act as an attorney, accountant or federal contractor ever been revoked or suspended?

5g Is the applicant now the subject of any regulatory proceedings that could result in a yes answer to any part of 5C, D, or E?

One event may result in more than one affirmative answer within each of the above items. Use only one DRP to report details related to the same event. If an event gives rise to actions by more than one regulator, provide details to each action on a separate DRP.

Part I

Name of Applicant _____ Applicant CRD Number _____

Part II

1. Regulatory action initiated by: *(Name the regulator, foreign financial regulatory authority, SRO or commodities exchange, etc.)*
2. Regulatory action type:
3. Date Initiated: *(MM/DD/YY)*
4. Docket / Case Number:
5. Employing Firm when events occurred:
6. Product Type(s):
7. Describe the allegations related to this regulatory action: *(Use reverse side of this sheet for additional comments if necessary.)*
8. Is regulatory action currently: *(check one)* ☐ pending ☐ on appeal ☐ final
9. If on appeal, regulatory action appealed to: *(SEC, SRO, US Court of Appeals, etc.)*
10. If on appeal, date filed: *(MM/DD/YY)*

IF FINAL OR ON APPEAL, COMPLETE ALL ITEMS BELOW. FOR PENDING ACTIONS, COMPLETE ITEM 19 ONLY.

11. How was the matter resolved? *(settled, consent, etc.)*
12. Resolution date: *(MM/DD/YY)*
13. Sanctions: *(suspended, censured, barred, requalification, etc.)*
14. If Suspended, Enjoined or Barred: Is suspension/injunction/bar of a fixed duration? *(If no, provide details in Item 19.)* ☐ Yes ☐ No; Suspension/Injunction/Bar Start Date: *(MM/DD/YY)*; Suspension/Bar Injunction/Duration:; Suspension/Injunction/Bar capacity affected: *(General Securities Principal, Financial & Operations Principal, Options Trading, etc.)*
15. If requalification by exam/retraining was a condition of the sanction: Is requalification/retraining time-related? If yes, length of time given to requalify/restrain: *(If no, provide details in Item 19.)* Type of exam required for requalification: Has condition been satisfied? ☐ Yes ☐ No
16. If disposition resulted in a fine, penalty, restitution, disgorgement or monetary compensation: (Fill in amount on appropriate line)

Penalty/Fine:	$	Date Paid *(MM/DD/YY)*
Restitution:	$	Date Paid *(MM/DD/YY)*
Disgorgement:	$	Date Paid *(MM/DD/YY)*
Other:	$	Date Paid *(MM/DD/YY)*

17. Not Applicable.
18. Was payment of all or any part of a monetary award, penalty or fine waived? ☐ Yes ☐ No *(If yes, provide details of Waiver in 19 below.)*
19. Provide summary of details related to the action status and (or) disposition and include relevant terms, conditions and dates. *(Use reverse side of this sheet for additional comments if necessary.)*

FOR SPONSORING BANK

WITHDRAWAL

OCC (12/96)
FDIC (12/96)
FRB (12/96)

VOL 61 ISS 251 DE 30 1996 UMI

GENERAL INSTRUCTIONS

Filing Requirements

File Form SBW when a Sponsoring Bank ceases to engage in covered sales. Form SBW is to be filed with the appropriate federal banking agency by submitting Form SBW to the NASD's CRD.

Written Submissions:

- Each copy of this Form must be manually signed by the contact employee.
- Type all information.
- Use only the Form SBW or a reproduction of it.
- The mailing address for the Federal Banking Agencies for questions and correspondence regarding Form SB is:

  Federal Deposit Insurance Corporation
  Office of the Comptroller of the Currency, or
  Board of Governors for the Federal Reserve System
  c/o NASD Central Registration Depository
  P.O. Box 9401
  Gaithersburg, Maryland 20898-9401

Electronic Submissions:

Contact the NASD's CRD ((301) 590-6500) for information and software concerning electronic access to the CRD.

- Each submission must be certified by Sponsoring Bank's contact employee.

Definitions

Contact Employee - The individual identified by the Sponsoring Bank on its Form SB who is authorized to receive all compliance information, communications, and mailings, and be responsible for disseminating it within the Sponsoring Bank.

Covered Sale - means a retail solicitation, recommendation, purchase, or sale of a covered product by a bank through its employees regardless of the means through which the solicitation, recommendation, purchase or sale occurs. The term shall not include a covered transaction involving a fiduciary account administered by a bank, a transaction involving a municipal security by a municipal securities dealer bank registered under section 15B of the Securities Exchange Act of 1934, 15 U.S.C. 78o-4, or a transaction by a bank of its own securities consistent with the conditions set forth in Securities Exchange Act Rule 3a4-1(a)(4), 17 CFR 240.3a4-1(a)(4).

Covered Transaction - has the same meaning as "security" as defined at section 3(a)(10) of the Securities Exchange Act, 15 U.S.C. 78c(a)(10). The term shall not include any product that is a deposit as defined in section 3(1) of the Federal Deposit Insurance Act, 12 U.S.C. 1813(1), or any "government security" as defined at section 3(a)(42) of the Securities Exchange Act of 1934, 15 U.S.C. 78c(a)(42).

Sponsoring Bank - means a bank that engages in or seeks to engage in "covered transactions."

FORM SBW Revised X-XX	UNIFORM NOTICE FOR WITHDRAWAL FROM SPONSORING BANK REGISTRATION	OFFICIAL USE

WARNING: Intentional misstatements or omissions of facts may constitute criminal violations

1. (A) Full name of Sponsoring Bank: (B) Sponsoring Bank CRD No.:

(C) Bank's main address: (D) Mailing address, if different:

(E) Area Code/Telephone No.:

2. Date Sponsoring Bank ceased covered transactions:

3. Does the Sponsoring Bank owe any money or securities to any customer or broker-dealer? Yes___ No___
If "yes":

(A) Number of customers owned fund or securities _____

(B) Amount of money owed to: Customers $_____ broker-dealer $ _____

(C) Market value of securities owned to: Customers $_____ broker-dealer $ _____

(D) Arrangements made for payment:

4. Is Sponsoring Bank now the subject of any:
(A) reportable complaint, investigation, or proceeding not reported on Form SB?.....Yes___ No___
(B) unsatisfied judgments or liens not reported on Form SB?.....Yes___ No___
(C) unsatisfied customer claims for funds or securities nor reported under item 3?.....Yes___ No___

Furnish full details for all "yes" answers on an attachment sheet. For any court or regulatory action, give: (1) the sponsoring bank and individual's name, (2) the title and date of the action, (3) the court or body taking the action, and (4) a description of the action.

5. (A) Name, address and telephone number of the person who will have custody of books and records:

(B) Address where books and records will be located, if different:

6. EXECUTION: I swear or affirm that all of the information I am filing is correct, that I am authorized to execute this form for the Sponsoring Bank, and that the Sponsoring Bank's books and records will be preserved and available for inspection as required by law.

FORM U-4B

UNIFORM APPLICATION FOR BANK SECURITIES REPRESENTATIVE REGISTRATION OR TRANSFER

Public reporting burden for this information collection is estimated to vary from X.X to X,XXX hours per response, with an average of XX.XX hours per response, including time to gather and maintain data in the required form and to review instructions and complete the information collection. Comments regarding this burden estimated or any other aspect of this information collection, including suggestions for reducing the burden, amy be sent to:

Secretary
Board of Governors of the Federal Reserve System
20th and C Streets, NW
Washington, DC 20551

and

Office of Management and Budget
Paperwork Reduction Project (7100-0XXX)
Washington, DC 20503.

GENERAL INSTRUCTIONS

The Form U-4B is the Uniform Application for Bank Securities Representatives Registration or Transfer. The Form is similar, but not identical to, the Form U-4 used to register representatives of broker-dealers, investment advisers or issuers of securities. The Form U-4B is to be used by employees of state and nationally chartered banks which are not required to register as broker/dealers under the Securities Exchange Act of 1934, but which have filed Form SB, Uniform Notice for Sponsoring Bank. These instructions apply to filing Form U-4B with the Federal Banking Agencies.

As noted below, the term "Federal Banking Agency", as used in the Form U-4B, means the Federal Deposit Insurance Corporation (FDIC), the Board of Governors of the Federal Reserve System (FRS) and the Office of the Comptroller of the Currency (OCC). In addition, the term "Sponsoring Bank" shall mean those banks which have filed Form SB, Uniform Notice for Sponsoring Bank.

Where applicable, applicants must complete items 1–22 and all fields requiring a response must be completed before the filing is accepted. Enter "none" or "N/A" (not applicable) where appropriate.

A full, complete Form U-4B is required when filing for the first time.

Use the Disclosure Reporting Pages (DRPs U-4B) to provide details to "Yes" answers to Item 22.

An applicant and the Sponsoring Bank are under a continuing obligation to update information required by Form U-4B as changes occur. Sponsoring Banks are not required to submit a complete Form U-4B when submitting amendments. Rather, the Sponsoring Bank should update only the appropriate sections of Form U-4B and file the applicable pages. Amendments are to be filed promptly and normally no more than 30 days after the occurrence of the event which triggers the requirement to file an amendment.

Filings and amendments must be signed and submitted by the Sponsoring Bank on behalf of the applicant. A paper copy with original manual signatures of the initial Form U-4B and of amendments to the Disclosure Reporting Pages (DRPs U-4B) must be retained by the filing Sponsoring Bank and must be made available for inspection upon regulatory request.

The Federal Banking Agencies mailing address for Filings and correspondence relating to filings is:

Federal Deposit Insurance Corporation,
Federal Reserve System, or
Office of the Comptroller of the Currency (as appropriate)
c/o NASD Central Registration Depository
P.O. Box 9401
Gaithersburg, Maryland 20898-9401

EXPLANATION OF TERMS

The following terms are italicized throughout this form.

For purposes of filing this Form U-4B:

The term **Federal Banking Agency** means the Federal Deposit Insurance Corporation, the Board of Governors of the Federal Reserve System, or the Office of the Comptroller of the Currency, Department of the Treasury, as appropriate.

The term **Bank Securities Representative** means an employee of a state or nationally chartered bank who has, or will be, engaged in the retail solicitation, recommendation, purchase or sale of covered products as defined in the Federal Bank Agency regulations—12 CFR 342, 12 CFR 208, and 12 CFR 12.

The term **Sponsoring Bank** means a state or nationally chartered bank that engages in the retail solicitation, recommendation, purchase or sale of covered products without registering as a broker/dealer under the Securities and Exchange Act of 1934, and has filed a Form SB Uniform Notice for Sponsoring Bank with the appropriate Federal Banking Agency.

The term **Jurisdiction** means a state, the District of Columbia, the Commonwealth of Puerto Rico, or any subdivision or regulatory body thereof.

The term **Self-Regulatory Organization** ("SRO") means any national securities and commodities exchange, any national securities association (e.g., the NASD), or any registered clearing agency.

The term **Control** means the power to direct or cause the direction of the management or policies of a company, whether through ownership of securities, by contract, or otherwise. Any individual or firm that is a director, partner, or officer exercising executive responsibility (or having similar status or functions) or that directly or indirectly has the right to vote 25 percent or more of the voting securities or is entitled to 25 percent or more of the profits is presumed to control that company.

The term **Appropriate Signatory** means the individual designated by the Sponsoring Bank who is authorized to execute Form U-4B on its behalf. Such individual must meet the criteria, if any, for acting as the "appropriate signatory" as established by the Federal Banking Agency requiring this form to be filed.

The term **Investment-Related** pertains to securities, commodities, banking, insurance, or real estate (including, but not limited to, acting as or being associated with a broker-dealer, issuer, investment company, investment adviser, futures sponsor, bank or savings association).

For purposes of Item 22:

The term **Charged** means being accused of a crime in a formal complaint, information, or indictment (or equivalent formal charge).

The term **Involved** means doing an act or aiding, abetting, counseling, commanding, inducing, conspiring with or failing reasonably to supervise another in doing an act.

The term **Foreign Financial Regulatory Authority** includes a foreign securities authority; other governmental body or foreign equivalent of a *self-regulatory organization* empowered by a foreign government to administer or enforce its laws relating to the regulation of *investment-related* activities; or membership organization, a function of which is to regulate the participation of its members in *investment-related* activities listed above.

The term **Order** means a written directive issued pursuant to statutory authority and procedures, including orders of denial, suspension, or revocation; does not include special stipulations, undertakings or agreements relating to payments, limitations on activity or other restrictions unless they are included in an order.

For the purposes of Items 22.A and 22.B and the corresponding DRP (U-4B):

The term **Felony**, for jurisdictions that do not differentiate between a *felony* or *misdemeanor*, is an offense punishable by a sentence of at least one year imprisonment and/or a fine of at least $1,000. The term also includes a general court martial.

The term **Misdemeanor**, for jurisdictions that do not differentiate between a *felony* or *misdemeanor*, is an offense punishable by a sentence of less than one year imprisonment and/or a fine of less than $1,000. The term also includes a special court martial.

For the purposes of Item 22.E and the corresponding DRP (U-4B):

A **Minor Rule Violation** is a violation of a *self-regulatory organization* rule which has been designated as "minor" pursuant to a plan approved by the U.S. Securities and Exchange Commission. A rule violation may be designated as "minor" under a plan if the sanction imposed consists of a fine of $2,500.00 or less, and if the sanctioned person does not contest the fine. Check with the appropriate *self-regulatory organization* to determine if a particular rule violation has been designated as "minor" for these purposes.

For the purposes of Item 22.G and the corresponding DRP (U-4B):

The term **Investigation** includes grand jury investigations, U.S. Securities and Exchange Commission investigations after the

VOL 61 ISS 251 DE 30 1996 UMI

"Wells" notice has been given, formal investigations by *SROs* or actions or procedures designated as investigations by *jurisdictions*, but does not include subpoenas, preliminary or routine regulatory inquiries or requests for information, deficiency letters, "blue sheet" requests or other trading questionnaires, or examinations.

The term **Proceeding** includes a formal administrative or civil action initiated by a *Federal Banking Agency*, governmental agency, *self-regulatory organization* or *foreign financial regulatory authority*, a *felony* criminal indictment or information (or equivalent formal charge), or a *misdemeanor* criminal information (or equivalent formal charge), but does not include an arrest or similar charge effected in the absence of a formal criminal indictment or information (or equivalent formal charge). NOTE: *Investment-related* civil litigation, other than that specified above, is reportable under Item 22.H on Form U-4B. An *investigation* is reportable under Item 22.G on Form U-4B.

For the purposes of Item 22.H and the corresponding DRP (U-4B):

The term **Enjoined** includes being subject to a mandatory injunction, prohibitory injunction, preliminary injunction or a temporary restraining order.

For the purposes of Item 22.J and the corresponding DRP (U-4B):

The terms **Resign** or **Resigned** relate to separation from employment with any employer and are not restricted to *investment-related* employment. Include any termination in which the allegations are a proximate cause of the separation, even if the separation was initiated by you.

SPECIFIC INSTRUCTIONS

1. **Last Name.** The applicant's last name will include punctuation(s) when and where appropriate. An entry is required for processing initial and amended Form U-4B filings.

First Name. Do not use nicknames, abbreviations, or modifications to the applicant's first name. An entry is required for processing initial and amended Form U-4B filings.

Middle Name. If the applicant does not have a middle name specify "NONE". Do not leave this field blank. Do not include nicknames, abbreviations, or modifications to the applicant's middle name. This term is required for processing initial and amended Form U-4B filings.

2. **Applicant's CRD #.** The Applicant's CRD number is assigned to the applicant by the Central Registration Depository (CRD) system. If the applicant's CRD number is not known, leave this item blank. New applicants will receive a unique CRD number that is permanently assigned and remains with the individual throughout his or her registration history, regardless of employment changes. It is not necessary to include leading zeros. An entry is not required for processing an initial Form U-4B filing but is required for amended U-4B filings.

Applicant's SS #. Enter the applicant's social security number. Completion of the applicant's SSN is voluntary. However, failure to complete the applicant's SSN may result in confusion regarding who the applicant is and may delay or prevent the processing of the Form U-4B. If the form is being filed on behalf of a foreigner who has not been issued a social security number, indicate "FOREIGNER" in this item. Entry is required in this field for processing of the initial and amended Form U-4B filings.

3. **Sponsoring Bank CRD #.** Sponsoring Banks are assigned a unique CRD number. This number is system generated and uniquely identifies the organization. An entry is required in this field for processing initial and amended Form U-4B filings.

4. **Sponsoring Bank.** This is the Sponsoring Bank's complete name as listed on Form SB. Do not abbreviate, shorten, or modify the name. An entry is required in this field for processing initial and amended Form U-4B filings.

5. **Employment Date.** The filing of the U-4B assumes that the individual is employed with your Sponsoring Bank; therefore, this item requires the month, day, and year of hire rather than the application for registration date. The format should be numeric (e.g., 01/01/1995 equals January 1, 1995). This is a required field for processing the initial Form U-4B filing.

6. **CRD Branch #.** Not applicable for Form U-4B filings.

7. **Billing Code.** The Billing Code is an alpha/numeric value consisting of up to eight characters. It is the responsibility of the Sponsoring Bank to establish and maintain its own set of unique billing codes. If your Sponsoring Bank doe not use CRD billing codes, leave this field blank. This is not a required field.

8. **Office of Employment Address.** Not applicable for Form U-4B filings.

9. **Dual Registration.** Check the appropriate "Yes" or "No" box regarding whether the applicant will maintain dual registration with another broker-dealer or another investment adviser that is not under common ownership or control with the Sponsoring Bank. If you choose "Yes", consult the rules and statutes of the appropriate *Self Regulatory Organization(s)* and *jurisdiction(s)* for prohibitions and liability provisions. Employment with other broker-dealers or investment advisers must be listed in the Employment and Personal History (Item 20.A) on Page 2 of the Form U-4B.

10. **Affiliated Firms.** Not applicable for Form U-4B filings.

11. **Federal Banking Agency.** Check the appropriate Federal Banking Agency box(es) with which the applicant wishes to register. Applicable fees should be submitted with the filing unless the Federal Banking Agency maintains sufficient funds in its CRD account. If an examination is required for registration, the exam will be automatically scheduled and fee(s) charged appropriately. Registration applications will not be processed unless the Sponsoring Bank has filed Form SB or has an application pending.

12. **Mark Registration Category(ies).** Check all appropriate registration categories desired. If the applicant is not qualified for a category of registration requested, the appropriate examination(s) will be scheduled automatically, and the examination fee(s) deducted from the firm's CRD account.

13. **Complete this section only if you are scheduling or rescheduling an exam or continuing education session.** The purpose of this item is to schedule or reschedule examinations or Continuing Education sessions. Checking an exam box will not generate a registration request/approval but will schedule the appropriate examination even if the applicant has previously passed the examination. Check the S101 (Continuing Education session) box will request an unscheduled session even if the applicant has previously satisfied the Continuing Education requirement. An unscheduled session will not fulfill the applicant's Continuing Education requirement.

Signatory Area

Date. This date represents the date the form was signed by the appropriate signatory. The correct format for the date entry is "MM/DD/YYYY." This is required field for U-4B Page 1 amended filings.

Signature of *Appropriate Signatory*. U-4B Page 1 need not be signed on initial or transfer filings. A signature is required when filing U-4B Page 1 as an amendment. If a U-4B Page 1 is being filed to schedule or reschedule an examination, complete Items 1, 2, 3, 4, and 13 only. (If any other items are completed, a signature is required.) NOTE: "Signature" includes a manual signature or an electronically transmitted equivalent.

Type or Print Name. The signatory's full legal name must be displayed under the signature. The name must be typed or printed as it appears in the signature form.

CRD Use Only. Do not mark inside this box. This area is used for administrative purposes only.

14. **Sponsoring Bank CRD #.** Sponsoring Banks are assigned a unique CRD number. This number is system generated and uniquely identifies the organization. An entry is required in this field for processing initial and amended Page 2 Form U-4B filings.

Applicant's Social Security #. Enter the applicant's social security number. Completion of the applicant's SSN is voluntary. However, failure to complete the applicant's SSN may result in confusion regarding who the applicant is and may delay or prevent the processing of the Form U-4B. If the form is being filed on behalf of a foreigner who has not been issued a social security number, indicate "FOREIGNER" in this item. Entry is required in this field for processing of the initial and amended Page 2 Form U-4B filings.

Applicant's CRD #. The Applicant's CRD is assigned to the applicant by the CRD system. If the applicant's CRD number is not known, leave this item blank. New applicants will receive a unique CRD number that is permanently assigned and remains with the individual throughout his or her registration history. It is not necessary to include leading zeros. An entry is required in this field for U-4B Page 2 amended filings.

Personal Data

The name inserted must be the applicant's full legal name.

15. **Last Name.** The applicant's last name will include punctuation(s) when and where appropriate. An entry is required for processing initial and Page 2 Form U-4B amended filings.

First Name. Do not use nicknames, abbreviations, or modifications to the applicant's first name. An entry is required for processing initial and amended Page 2 Form U-4B filings.

Middle Name. If the applicant does not have a middle name specify "NONE". Do not leave this field blank. This item is required for processing initial and amended Form U-4B filings. Do not include nicknames, abbreviations, or modifications to the applicant's middle name.

16. **Maiden/Other Name(s) Known By.** This item is used to record names used, currently or in the past, by the applicant other than the legal name. The field should include other names (maiden, married, alias, or nickname) used by the applicant since adulthood. This is not a required field.

17. **Date of Birth.** The date format should be MM/DD/YYYY. An entry must be in this field to process the initial Form U-4B.

State/Country of Birth. This field is used to record the applicant's place of birth. This is a required field for initial Form U-4B filings.

18. **Sex.** Indicate the appropriate box for gender. This is a required field for initial Form U-4B filings.

Height. The applicant's height must be measured in feet (ft) and inches (in). This is a required field for initial Form U-4B filings.

VOL 61 ISS 251 DE 30 1996 UMI

Weight. The applicant's weight must be measured in pounds (lbs). This is a required field for initial Form U-4B filings.

Hair Color. This is a two character item. This item is required for processing of the initial Form U-4B.

Eye Color. This is a two character item. This item is required for processing of the initial Form U-4B.

19. **Residential History**

Provide residential addresses for the past file years. The dates "From–To" must be such that there are no gaps greater than three months. Begin with your current residential address. Report changes as they occur. Do ot use Post Office boxes. Use attachment sheet if annitional space is needed.

From Month/Year. The month/year is MM/YYYY. This is a required field for each residence.

To Month/Year. The month/year is MM/YYYY. This is a required field for all residences except the current address.

Street. This item is used to capture the mailing description of the applicant's residence. P.O. Box addresses are not acceptable. Include street name, building #, unit #, apartment #, suite #, slip #, etc.

City. This item is used to capture the name of the city in which the applicant currently, or previously resided. This is a required field for all address history.

State/Country. This item identifies the state code where the applicant resides or resided in the past. Enter the two digit state abbreviation where the applicant resided for each address. If this is a foreign address indicate the country.

ZIP. Enter the applicant's residence nine digit ZIP Code or postal code if a foreign address.

20.A. **Employment and Personal History**

Provide the applicant's employment and personal history for the past ten years. The dates "From–To" must be such that there are no gaps greater than three months. Exclude the firm(s) noted in Items 4 and 10. Include all firm(s) in Item 9. Entries must include the start and end dates, the full name of the company, city and state/country. Account for all time including full and part-time employments, self employment, military service, and homemaking. Also include statuses such as unemployment, full-time education, or travel that lasted for at least one month.

From Month/Year. The month/year format is MM/YYYY. This is a required field for each employment.

To Month/Year. The month/year format is MM/YYYY. This is a required field for all employments.

Name. Enter employment/personal history. Do not abbreviate, shorten, or modify the name. Ten years of employment history is required. Exclude the firms noted in Items 4 and 10 on Page 1 of Form U-4B. This is a required field for each employment and personal history.

***Investment-Related* Business.** Indicate "Yes" or "No" as to whether employer is (was) an *investment-related* business, regardless of the position held by applicant.

City. This item is used to capture the name of the city in which the applicant was employed. This is a required field for all employment and personal history.

State/Country. This item identifies the state or country where the applicant was employed. Enter the two digit state abbreviation where the applicant was employed for each address. If this is a foreign address indicate the country.

Position Held. Provide the applicant's last title or position held with each employer. Provide both functional and administrative titles when possible (e.g., vice president and director).

20.B. **Other Business.** The "Yes" or "No" boxes refer to whether an applicant is currently engaged in any other business either as a proprietor, partner, officer, director, employee, trustee, agent, or otherwise. Exclude non-*investment-related* activity which is exclusively charitable, civic, religious or fraternal and is recognized as tax exempt. If "Yes", complete the Other Business Disclosure Reporting Page included in the Form U-4B.

Signatory Area

Date. This date represents the date the U-4B Page 2 was signed by the *appropriate signatory*. The correct format for the date entry is "MM/DD/YYYY". This is a required field for U-4B Page 2 amended filings.

Signature of *Appropriate Signatory*. Enter the applicant's signature. Signatures are required on Page 2 when the Form U-4B is an amended filing. U-4B Page 2 need not be signed for initial filings. NOTE: "Signature" includes a manual signature or an electronically transmitted equivalent.

Type or Print Name. The signatory's full legal name must be displayed under the signature. The name must be typed as it appears in signature form.

CRD Use Only. Do not mark inside this box. This space is used for administrative purposes only.

21. **Sponsoring Bank CRD #.** Sponsoring Banks are assigned a unique CRD number. This number is system generated and uniquely identifies the organization. An entry is required in this field for processing amended Page 3 Form U-4B filings.

Applicant's Social Security #. Enter the applicant's social security number. Completion of the applicant's SSN is voluntary. However, failure to complete the applicant's SSN may result in confusion regarding who the applicant is and may delay or prevent the processing of the Form U-4B. If the form is being filed on behalf of a foreigner who has not been issued a social security number, indicate "FOREIGNER" in this item. Entry is required in this field for processing of initial and amended Page 3 Form U-4B filings.

Applicant's CRD #. The Applicant's CRD number is assigned to the applicant by the CRD system. If the applicant's CRD number is not known, leave this item blank. New applicants will receive a unique CRD number that is permanently assigned and remains with the individual throughout his or her registration history. It is not necessary to include leading zeros. An entry is not required for processing an initial Form U-4B filing but is required for amended U-4B Page 3 filings.

22. **Disclosure Information.** Check the appropriate "Yes" or "No" response for each question. Complete details explaining any "Yes" answers must be provided on the appropriate Disclosure Reporting Pages (DRPs).

22.A.–M. **Disclosure**

Criminal Disclosure
- 22.A.—Felony Criminal Disclosure
- 22.B.—Misdemeanor Criminal Disclosure

Regulatory Action Disclosure
- 22.C.—Regulatory Action by SEC or CFTC
- 22.D.—Regulatory Action by Federal Banking Agency, other federal regulator, state regulatory, or foreign financial regulator
- 22.E.—Regulatory Action by *SRO* or commodities exchange
- 22.F.—Professional Suspension
- 22.G.—Formal Pending Action/Investigation

Civil Judicial Actions
- 22.H.—Civil/Judicial Actions

Customer Complaints
- 22.I.—Customer Complaints

Terminations
- 22.J.—Terminations for Cause

Financial Page 1
- 22.K.—Bankruptcy and SIPC

Financial Page 2
- 22.L.—Bonding Payouts or Revocations
- 22.M.—Unsatisfied Judgments and Liens

22.N. **Disclosure Certification (Optional).** The certification language contained in Item 22.N allows applicant to certify that all disclosable information on the individual's record has been previously reported on Form U-4B or Form U-5B DRPs. Certification should be used for full Form U-4B filings only, not amended filings. Applicants who have not been previously registered with the NASD, or who have not submitted DRPs for all disclosable information, may not take advantage of the certification option. Use of the certification is optional, and, if chosen, "Yes" answers to the appropriate questions in Items 22.A through M must be provided.

Signatory Area

"Signature" includes a manual signature or an electronically transmitted equivalent.

Date. This represents the date the form was signed by the *appropriate signatory*. The correct format for the date entry is "MM/DD/YYYY". Both the applicant and *appropriate signatory* must date this page only when it is being submitted as an amended filing.

Signature of Applicant. Page 3 need not be signed on initial or transfer filings. A signature is required when filing U-4B Page 3 as an amendment. Enter the applicant's full legal signature as it appears in typed or printed form.

Type or Print Name of Applicant. The applicant's full legal name must be displayed under the signature. The name must be typed or printed as it appears in signature form.

Signature of *Appropriate Signatory*. A signatory entry is not required for initial or transfer filings. This is a required field only when submitting as a U-4B Page 3 amendment.

Type or Print Name of *Appropriate Signatory*. The appropriate signatory's full legal name must be displayed under the signature. The name must be typed or printed as it appears in signature form.

(3) based upon events that occurred while you exercised *control* over it, has a broker or dealer been the subject of an involuntary bankruptcy petition, or had a trustee appointed, or had a direct payment procedure initiated under the Securities Investor Protection Act?			37
L. Has a bonding company ever denied, paid out on, or revoked a bond for you?			38
M. Do you have any unsatisfied judgments or liens against you?			39

DISCLOSURE CERTIFICATION (OPTIONAL)

You may only certify to the accuracy and completeness of the disclosure information in your file if it has been fully provided in DRP format. If DRP(s) are not on file, do not answer these certification boxes. Provide full details of all matters on DRP(s). All appropriate questions in Item 22 must be answered, regardless of whether the certification is being utilized. Refer to the Form U-4B instructions for additional information on the utilization of the certification language.

N. I have received a copy of my disclosure file taken from the CRD system, I acknowledge that all information contained therein is fully disclosed, accurate and in DRP format. I further certify the following:		
(1) I have no new information to add to my disclosure file		40
(2) I have new information to add to my disclosure file which is reported on the appropriate DRP(s)		41
(3) I have updated information, reported on the appropriate DRP(s), which was previously reported		42

PRIVACY ACT NOTICE

The Applicant's SSN is requested to differentiate among applicants with the same name. Providing the Applicant's SSN is voluntary. However, failure to provide the Applicant's SSN may result in confusion regarding who the Applicant is and may delay or prevent processing of this application for registration. The information you provide will be for the use of the appropriate Federal banking agency and for other State and Federal agencies and SROs. Maintenance of the information is authorized by sections 8, 9 and 31 of the Federal Deposit Insurance Act (12 U.S.C. 1818, 1819 and 1831).

PRIVACY ACT NOTICE

The Applicant's SSN is requested to differentiate among applicants with the same name. Providing the Applicant's SSN is voluntary. However, failure to provide the Applicant's SSN may result in confusion regarding who the Applicant is and may delay or prevent processing of this application for registration. The information you provide will be for the use of the appropriate Federal banking agency and for other State and Federal agencies and SROs. Maintenance of the information is authorized by sections 8, 9 and 31 of the Federal Deposit Insurance Act (12 U.S.C. 1818, 1819 and 1831).

APPLICANT AFFIRMATION:

1. I swear or affirm that I have read and understand the items and instructions on this form and that my answers (including attachments) are true and complete to the best of my knowledge. I understand that I am subject to administrative, civil and/or criminal penalties if I give false or misleading answers.

2. I apply for registration with the Federal Banking Agency indicated in Item 11.

3. I authorize all my employers and any other person to furnish to any Federal Banking Agency, jurisdiction, SRO, employer, prospective employer, or any agent acting on its behalf, any information they have, including my creditworthiness, character, ability, business activities, educational background, general reputation, history of my employment and, in the case of former employers, complete reasons for my termination. Moreover, I release each employer, former employer, and each other person from any and all liability, of whatever nature, by reason of furnishing any of the above information, including information reported on the Uniform Termination Notice for Bank Securities Representatives Registration (Form U-5B). I recognize that I may be the subject of any investigative consumer report and waive any requirement of notification with respect to any investigative consumer report ordered by any Federal Banking Agency, jurisdiction, SRO, employer or prospective employer of the nature and scope of the requested investigative consumer report.

4. I authorize the Federal Banking Agency to give any information on the Central Registration Depository to any employer or prospective employer, any federal, state or municipal agency, or any other SRO and I release the Federal Banking Agency and any person acting on their behalf from any and all liability of whatever nature by reason of furnishing such information.

5. I authorize the Federal Banking Agency and any person acting on their behalf to give certain information on the Central Registration Depository concerning me to any person, including the general public. I specifically authorize the release of information regarding my name, CRD #, employment and personal history, and registration categories to any person. In addition, I specifically authorize the release of information regarding criminal and civil actions as well as consumer complaints (both resolved and unresolved), terminations and certain financial disclosure information to any person. I understand the Federal Banking Agency will not disclose social security numbers, residential information, date and location of birth, or gender, but will release all other information in the Central Registration Depository to any person. I release the Federal Banking Agency and any person acting on their behalf from any and all liability of whatever nature by reason of furnishing such information to any person.

6. I understand and certify that the representations in this form apply to all employers with whom I seek registration as indicated in Item 4 of the form. I agree to update this form by causing an amendment to be filed within 30 days of the event occurring which causes any information to become incomplete, misleading or inaccurate. Further, I represent that, to the extent any information previously submitted is not amended, the information provided in this form is currently accurate and complete.

7. I authorize any employer or prospective employer to file on my behalf any information required in this form or any amendment thereto; I certify that I have reviewed and approved the information to be submitted to any Federal Banking Agency on this Form U-4B application; I agree that I will review and approve all disclosure information that will be filed on my behalf; I further agree to waive any objection to the admissibility of the filed records in any criminal, civil, or administrative proceeding.

(All applicants must execute this page.)

PRIVACY ACT NOTICE

The Applicant's SSN is requested to differentiate among applicants with the same name. Providing the Applicant's SSN is voluntary. However, failure to provide the Applicant's SSN may result in confusion regarding who the Applicant is and may delay or prevent processing of this application for registration. The information you provide will be for the use of the appropriate Federal banking agency and for other State and Federal agencies and SROs. Maintenance of the information is authorized by sections 8, 9 and 31 of the Federal Deposit Insurance Act (12 U.S.C. 1818, 1819 and 1831).

THE SPONSORING BANK MUST COMPLETE THE FOLLOWING:

To the best of my knowledge and belief, the applicant is currently bonded where required, and, at the time of approval, will be familiar with the statutes, rules, regulations, policies and supervisory guidance, and by-laws of the appropriate Federal banking agency with which this application is being filed, and the rules governing bank securities representatives, and will be fully qualified for the position for which application is being made herein. I agree that I will not permit the applicant to act as a bank securities representative without first receiving the approval of the appropriate Federal banking agency.

This Sponsoring Bank has communicated with all of the applicant's previous employers for the past three years and has documentation on file with the names of the persons contacted and the date of contact. In addition, I have taken appropriate steps to verify the accuracy and completeness of the information contained in and with this application.

I have provided the applicant an opportunity to review the information contained herein and the applicant has approved this information and signed the Form U-4B.

The appropriate signatory area must be completed on all initial or amendment filings.

CRIMINAL DISCLOSURE REPORTING PAGE

GENERAL INSTRUCTIONS

This Disclosure Reporting Page (DRP U-4B) is an ☐ INITIAL *OR* ☐ AMENDED response used to report details for affirmative responses to *Items 22.A and 22.B* on Page 3 of the Form U-4B.

Check ☐ item(s) you are responding to:

22. A. (1) Have you ever:
- ☐ (a) been convicted of or pled guilty or nolo contendere (no contest) in a domestic, foreign, or military court to any *felony*?
- ☐ (b) been charged with any *felony*?

(2) Based upon activities that occurred while you exercised *control* over it, has an organization ever:
- ☐ (a) been convicted of or pled guilty or nolo contendere (no contest) in a domestic or foreign court to any *felony*?
- ☐ (b) been *charged* with any *felony*?

22. B. (1) Have you ever:
- ☐ (a) been convicted of or pled guilty or nolo contendere (no contest) in a domestic, foreign or military court to a *misdemeanor involving*: investments or an *investment-related* business or any fraud, false statements or omissions, wrongful taking of property, bribery, perjury, forgery, counterfeiting, extortion, or a conspiracy to commit any of these offenses?
- ☐ (b) been *charged* with a *misdemeanor* specified in 22.B.(1)(a)?

(2) Based upon activities that occurred while you exercised *control* over it, has an organization ever:
- ☐ (a) been convicted of or pled guilty or nolo contendere (no contest) in a domestic or foreign court to a *misdemeanor* specified in 22.B.(1)(a)?
- ☐ (b) been charged with a *misdemeanor* specified in 22.B.(1)(a)?

Use the DRP to report all charges arising out of the same event. One event may result in more than one affirmative answer to the above items.

Multiple counts of the same charge arising out of the same event(s) should be reported on the same DRP. Unrelated criminal actions, including separate cases arising out of the same event, must be reported on separate DRPs.

Applicable court document (i.e., criminal complaint, information or indictment as well as judgment of conviction or sentencing documents) must be provided to the CRD if not previously submitted.

Applicant's Name (last, first, middle (specify if none), (Jr., Sr., etc.))		
Applicant's CRD No.	Social Security No.	Sponsoring Bank CRD No.

1. If charge(s) were brought against an organization over which you exercise(d) control:

Organization Name	Investment-Related Business? ☐ Yes ☐ No	Your Position, Title, or Relationship

2. Formal charge(s) were brought in:

Court *(Name of Federal Military, State or Foreign Court)*	Location of Court *(City or County and State or Country)*	Docket/Case Number

3. Charge Detail Disclosure: (Continue on additional Criminal Disclosure Reporting Page U-4B if more than three charges arise out of the same event.)

Chg#	Formal Charge(s) Description	Charge Date (MM/DD/YYYY)	Number of Counts	Charge Type (check one only)		Plea (Guilty, Not Guilty, etc.)	Charge is Currently (check one only)	Appeal Date (MM/DD/YYYY)	Product Type (if charge is investment-related)
				Misdemeanor	Felony				
1.							☐ Pending ☐ Final ☐ On Appeal ☐ Pre-Trial Intervention		
2.							☐ Pending ☐ Final ☐ On Appeal ☐ Pre-Trial Intervention		
3.							☐ Pending ☐ Final ☐ On Appeal ☐ Pre-Trial Intervention		

IF FINAL, ON APPEAL, OR PRE-TRIAL INTERVENTION, COMPLETE ITEMS 4 AND 5. FOR EACH CHARGE THAT IS PENDING, COMPLETE ONLY ITEM

4. Disposition Detail Disclosure: (Continue on another Criminal Disclosure Reporting Page U-4B if more than three charges.)

Chg#	Disposition Type: (Convicted, Acquitted, Dismissed, Pre-Trail Intervention, etc.)	Disposition Date (MM/DD/YYYY)	Disposition Detail Sentance/Penalty (if applicable)	Duration (if sentence, suspension, probation, etc.)	Start Date (MM/DD/YYYY)	Penalty/Fine Amount (if applicable)	Date Paid (MM/DD/YYYY)
1.							
2.							
3.							

5. Provide a brief summary of circumstances leading to the charge(s) as well as the disposition. Include the relevant dates when the conduct which was subject of the charge(s) occurred. (Use reverse side of this sheet for additional comments if necessary.)

REGULATORY REPORTING DISCLOSURE REPORTING PAGE

GENERAL INSTRUCTIONS

This Disclosure Reporting Page (DRP U-4B) is an ☐ INITIAL OR ☐ AMENDED response used to report details for affirmative responses to *Items 22.C, 22.D, 22.E, 22.F and 22.G(1)* on Page 3 of the Form U-4B.

Check ☐ item(s) you are responding to:

22. C. Has the U.S. Securities and Exchange Commission or the Commodity Futures Trading Commission ever:
- ☐ (1) *found* you to have made a false statement or omission?
- ☐ (2) *found* you to have been *involved* in a violation of its regulations or statutes?
- ☐ (3) *found* you to have been a cause of an *investment-related* business having its authorization to do business denied, suspended, revoked, or restricted?
- ☐ (4) entered an *order* against you in connection with *investment-related* activity?
- ☐ (5) imposed a civil money penalty on you or ordered you to cease and desist from any activity?

D. Has any Federal banking agency or other Federal regulatory agency or any state regulatory agency or *foreign financial regulatory authority* ever:
- ☐ (1) *found* you to have made a false statement or omission or been dishonest, unfair or unethical?
- ☐ (2) *found* you to have been *involved* in a violation of *investment-related* regulations(s) or statute(s)?
- ☐ (3) *found* you to have been a cause of an *investment-related* business having its authorization to do business denied, suspended, revoked or restricted?
- ☐ (4) entered an order against you in connection with *investment-related* activity?
- ☐ (5) denied, suspended, or revoked your registration or license or otherwise, by *order*, prevented you from associating with an *investment-related* business or restricted you activities?

E. Has any *self-regulatory organization* or commodities exchange ever:
- ☐ (1) *found* you to have made a false statement or omission?
- ☐ (2) *found* you to have been *involved* in a violation of its rules (other than a violation designated as a *"minor rule violation"* under a plan approved by the U.S. Securities and Exchange Commission)?
- ☐ (3) *found* you to have been the cause of an *investment-related* business having its authorization to do business denied, suspended, revoked or restricted?
- ☐ (4) disciplined you by expelling or suspending you from membership, barring or suspending your association with its members, or restricting your activities?

F. ☐ Has your authorization to act as an attorney, accountant or federal contractor ever been revoked or suspended?

G. Have you been notified, in writing, that you are now the subject of any:
- ☐ (1) regulatory complaint or proceeding that could result in a "yes" answer to any part of 22.C, D, or E? *(If this matter has not yet reached a formal pending action, complete the Investigation Disclosure Reporting Page.)*

One event may result in more than one affirmative answer within each of the above items. Use only one DRP to report details related to the same event. If an event gives rise to actions by more than one regulator, provide details to each action on a separate DRP.

Applicant's Name (last, first, middle (specify if none), (Jr., Sr., etc.))		
Applicant's CRD No.	Social Security No.	Sponsoring Bank CRD No.
1. Regulatory Action Initiated by (Name the regulator, foreign financial regulatory authority, SRO or commodities exchange, etc.)	2. Regulatory Action Type	3. Date Initiated MM/DD/YYYY
4. Docket/Case Number	5. Employing Firm when events occurred	6. Product Type(s)
7. Describe the allegations related to this regulatory action (Use reverse side of this sheet for additional comments if necessary.)		
8. Is regulatory action currently (check one) ☐ Pending ☐ On Appeal ☐ Final	9. If on appeal, regulatory action appealed to (SEC, SRO, U.S. Court of Appeals, etc.)	10. If on appeal, date filed (MM/DD/YYYY)

IF FINAL OR ON APPEAL, COMPLETE ALL ITEMS BELOW. FOR PENDING ACTIONS, COMPLETE ITEM 19 ONLY.

11. How was the matter resolved? (Settled, Consent, etc.)	12. Resolution Date (MM/DD/YYYY)	13. Sanctions (Suspended, Censured, Barred, Requalification, etc.)

14. If Suspended, Enjoined or Barred:

Is suspension/injunction/bar of a fixed duration? ☐ Yes ☐ No (If No, provide details in Item 19)	Suspension/Injunction Bar Start Date (MM/DD/YYYY)	Suspension/Injunction Bar Duration	Suspension/Injunction/Bar capacity affected (General Securities Principal, Financial, & Operations Principal, etc.)

15. If requalification by exam/retraining was a condition of the sanction:

Is requalification/retraining time-related? ☐ Yes ☐ No	If yes, length of time given to requalify/retrain: (If No, provide details in Item 19)	Type of exam required for requalification	Has condition been satisfied? ☐ Yes ☐ No

16. If disposition resulted in a fine, penalty, restitution, disgorgement or monetary compensation: (Fill in amount and MM/DD/YYYY in appropriate box)

Penalty/Fine $	Date Paid	Restitution $	Date Paid	Disgorgement $	Date Paid	Other $	Date Paid

17. Were you required to pay any part of the monetary items disclosed in 16: ☐ Yes ☐ No (If yes, fill in amount and MM/DD/YYYY in appropriate box)

Penalty/Fine $	Date Paid	Restitution $	Date Paid	Disgorgement $	Date Paid	Other $	Date Paid

18. Was payment of all or any part of a monetary award, penalty or fine waived? ☐ Yes ☐ No If yes, provide details of Waiver in 19 below.

19. Provide summary of details related to the action status and(or) disposition and include relevant terms, conditions and dates. (Use reverse side of this sheet for additional comments if necessary.)

FINANCIAL DISCLOSURE REPORTING PAGE 1

GENERAL INSTRUCTIONS

This Disclosure Reporting Page (DRP U-4B) is an ☐ INITIAL *OR* ☐ AMENDED response used to report details for affirmative responses to *Items 22.K.(1), 22.K.(2), and 22.K.(3)* on Page 4 of the Form U-4B.

Check ☐ item(s) you are responding to:

22. K. Within the past 10 years:

☐ (1) have you made a compromise with creditors, filed a bankruptcy petition or been the subject of an involuntary bankruptcy petition? (Please fill out SECTION I below.)

☐ (2) based upon events that occurred while you exercised *control* over it, has an organization made a compromise with creditors, filed a bankruptcy petition or been the subject of an involuntary bankruptcy petition? (Please fill out SECTION I below.)

☐ (3) based upon events that occurred while you exercised *control* over it, has a broker or dealer been the subject of an involuntary bankruptcy petition, or had a trustee appointed, or had a direct payment procedure initiated under the Securities Investor Protection Act? (Please fill out SECTION II below.)

If events result in affirmative answers to both 22.K.(1) and 22.K.(2), details to each must be provided on separate DRPs. You must complete Section I and/or Section II as well as Item 18 to complete this DRP.

Applicant's Name (last, first, middle (specify if none), (Jr., Sr., etc.))		
Applicant's CRD No.	Social Security No.	Sponsoring Bank CRD No.

SECTION I

If within the past 10 years you have made a compromise with creditors, filed a bankruptcy petition or been the subject of an involuntary bankruptcy petition or; if within the past 10 years based upon events that occurred while you exercised control over it, an organization made a compromise with creditors, filed a bankruptcy petition or been the subject of an involuntary bankruptcy petition:

1. Action Type (Compromise, Bankruptcy, Declaration, etc.)	2. Action Date (MM/DD/YYYY)

If the financial action relates to an organization over which you exercised(d) control:

3. Organization Name	4. Investment-Related Business? ☐ Yes ☐ No	5. Your Position, Title, Relationship (if applicable)
6. Court (Name of Federal, State, or Foreign Court)		7. Location of Court (City or County and State or Country)
8. Docket/Case Number	9. Chapter Number (if Federal Bankruptcy Filing)	10. Is action currently pending? ☐ Yes ☐ No
11. Disposition Type (Discharged, Released, Dismissed, etc.)		12. Disposition Date (MM/DD/YYYY)
13. Provide brief summary of events leading to action. If not dismissed or closed, explain (Use reverse side of this sheet for additional comments if necessary.)		

SECTION II

If within the past 10 years based upon events that occurred while you exercised control over it, a broker or dealer has been the subject of an involuntary bankruptcy petition, or had a trustee appointed, or had a direct payment procedure initiated under the Securities Investor Protection Act:

1. Action Type (Compromise, Bankruptcy, Declaration, etc.)		2. Action Date (MM/DD/YYYY)
3. Organization Name		4. Your Position, Title, Relationship (if applicable)
5. Court (Name of Federal, State, or Foreign Court)		6. Location of Court (City or County and State or Country)
7. Docket/Case Number	8. Chapter Number (if Federal Bankruptcy Filing)	9. Is action currently pending? ☐ Yes ☐ No
10. Disposition Type (Discharged, Released, Dismissed, etc.)		11. Disposition Date (MM/DD/YYYY)
12. Provide brief summary of events leading to action. If not dismissed or closed, explain (Use reverse side of this sheet for additional comments if necessary.)		

If a SIPA trustee was appointed, complete items 13, 16, and 17. If a direct payment procedure was begun, complete items 13, 14, and 15.

13. Currently Open? ☐ Yes ☐ No	14. The amount paid of agreed to be paid by you $	15. Date Initiated or Filed (MM/DD/YYYY)
16. Trustee Name		17. Trustee Appointment Date (MM/DD/YYYY)

18. Please provide details as to any status disposition. Include details as to creditors, terms, conditions, amounts due and settlement schedule (if applicable). (Use reverse side of this sheet for additional comments if necessary.)

and

Office of Management and Budget
Paperwork Reduction Project (7100-0XXX)
Washington, DC 20503.

GENERAL INSTRUCTIONS

The Form U-5B is the Uniform Termination Notice for Bank Securities Representative Registration. The form is similar, but not identical, to the Form U-5 used by broker-dealers, investment advisers, and issuers of securities to terminatre registration of an individual in the various self-regulatory organizations and jurisdictions. These instructions apply to filing Form U-5B with the Federal Banking Agencies.

Items 1—18 must be answered and all fields requiring a response must be completed before the filing is accepted. Enter "none" or "N/A" (not applicable) where appropriate.

Use the Disclosure Reporting Page(s) (DRPs U-5B) to provide details to "yes" answers to items 14—18. Although documents are not required with the DRP (U-5B), you may wish to include them as the appropriate Federal banking agency may request them as part of the review process.

Former Bank Securities Representatives are under the continuing jurisdiction of the Federal banking regulators and mya hve to provide information about their activities while associated with the Sponsoring bank. Individuals are required to forward any residential address changes–item 8–for two years following termination or last Form U-5B filing.

Sponsoring Banks have a continuing obligation to amend and update items 14—18 until final disposition, reportable matters that occur and become known after initial submission of this form. A paper copy, with an original manual signature, of the Form U-5B and amendments to Disclosure Reporting Page (DRPs U-5B) may be required to be retained by the filing Sponsoring Bank and may be required to be made available for inspection upon regulatory request.

Amendments to items other than 5 and 14—18 are probilited.

To amend items 14—18, complete only items 1—4 and the item(s) being amended. If additional information relates to the amendment, submit the details on fully completed DRP(s) (U-5B).

The Federal banking agency's mailing address for questions and correspondence is:

Federal Deposit Insurance Corporation,
The Board of Governors of the Federal Reserve System,
and
Office of the Comptroller of the Currency
c/o NASD Central Registration Depository
P.O. Box 9401
Gaithersburg, Maryland 20898-9401

EXPLANATION OF TERMS

The following terms are italicized throughout this form.

For purposes of filing this Form U-5B:

The term **Federal Banking Agency** means the Federal Deposit Insurance Corporation for state nonmember banks, the Board of Governors of the Federal Reserve System for state member banks, and the Office of the Comptroller of the Currency, Department of the Treasury for national banks.

The term **Bank Securities Representative** means an employee of a Sponsoring Bank who is, or was, engaged in the solicitation recommendation purchase or sale of certain securities to retail bank customers.

The term **Sponsoring Bank** means a state or nationally chartered bank which is using the bank exemption in the Securities Exchange Act of 1934, as amended, to solicit, recommend, purchase or sell certain securities through Bank Securities Representatives to retail bank customers.

The term **Jurisdiction** means a state, the District of Columbia, the Commonwealth of Puerto Rico, or any subdivision or regulatory body thereof.

The term **Self-Regulatory Organization ("SRO")** means any national securities and commodities exchange, any national securities association (e.g., the NASD), or any registered clearing agency.

The term **Full Termination** means the terminatin of registration with the appropriate Federal banking agency.

For purposes of item 9:

The term **Misdemeanor**, for jurisdictions that do not differentiate between a felony or misdemeanor, is an offense punishable by a sentence of less than one year imprisonment and/or a fine of less than $1,000. The term also includes a special court martial.

The term **Investment-Related** pertains to securities, commodities, banking, insurance, or real estate (including, but not limited to, acting as or being associated with a broker-dealer, investment comapny, investment banker, futures sponsor, bank, or savings association). Such term specifically includes actions taken by the Federal banking agencies pursuant to Sections 8 and 19 of the Federal Deposit Insurance Act, 12 U.S.C. § 1818 and 1829.

The term **Appropriate Signatory** means the individual designated by the Sponsoring bank who is authorized to execute Form U-5B on its behalf. Such individual must beem the criteria, if any, for acting as the "appropriate signatory" as established by the appropriate Federal banking agency.

For purposes of item 15 and the corresponding DRP (U-5B):

The term **Involved** means doing an act or aiding, abetting, counseling, commanding, inducing, conspiring with or failing reasonably to supervise another in doing an act.

The term **Disciplinary Action** includes a formal action such as a denial, revocation or suspension of a registration, or a censure, fine, cease and desist order, order of prohibition, temporary restraining order, injunction, bar or expulsion, but does not include a minor rule violation, deficency letter, examination report, memorandum of understanding, letter of caution, admonishment, and similar informal resolutions or matters.

The term **Foreign Financial Regulatory Authority** includes a foreign securities authority; any other governmental body or foreign equivalent or a self-regulatory organization empowered by a foreign government to administer or enforce its laws relating to the regulation of investment or investment-related activities; or a membership organization a fanction of which is to regulate the participation of ites members in the activities listed above.

For purposes of item 12:

The term **Date Terminated** means the effective date of the termiantion of the registration or, in the case where registration has not yet been made effective, the date the withdrawal of the application for registration.

For purposes of item 14 and the corresponding DRP (U-5B):

The term **Charged** means being accused of a crime in a formal complaint, information, or indictment, (or equivalent formal charge).

The term **Felony**, for jurisdictions that do not differentiate between a felony or misdemeanor, is an offense punishable by a sentence of at least one year imprisonment and/or a fine of at least $1,000. The term also includes a general court martial.

A **Minor Rule Violation** is a violation of a self-regulatory organization rule which has been designated as "minor" pursuant to a plan approved by the U.S. Securities and Exchange Commission. A rule violation may be designated as "minor" under a plan if the sanction imposed consists of a fine of $2,500.00 or less, and if the sanctioned person does not contest the fine. Check with the appropriate self-regulatory organization to determine if a particular rule violation has been designated as "minor" for these purposes.

For the purposes of Item 16 and the corresponding DRP (U-5B):

The term **Investigation** includes grand jury investigations, U.S. Securities and Exchange Commission investigations after the "Wells" notice has been given, formal investigations by SROs

VOL 61 ISS 251 DE 30 1996 UMI

or actions or procedures designated as investigations by jurisdictions, but does not include subpoenas, preliminary or routine regulatory inquiries or requests for information, deficiency letters, "blue sheet" requests or other trading questionnaires, or examinations.

The term **Proceeding** includes a formal administrative or civil action initiated by a Federal Banking Agency, governmental agency, self-regulatory organization or foreign financial regulatory authority, a felony criminal indictment or information (or equivalent formal charge), or a misdemeanor criminal information (or equivalent formal charge), but does not include an arrest or similar charge effected in the absence of a formal criminal indictment or information (or equivalent formal charge).

SPECIFIC INSTRUCTIONS

1. **Last Name.** The applicant's last name will include punctuation(s) when and where appropriate. An entry is required for processing initial and amended Form U-5B filings.

First Name. Do not use nicknames, abbreviations, or modifications to the applicant's first name. An entry is required for processing initial and amended Form U-5B filings.

Middle Name. If the applicant does not have a middle name specify "NONE". Do not leave this field blank. Do not include nicknames, abbreviations, or modifications to the applicant's middle name. This term is required for processing initial and amended Form U-5B filings.

2. **Applicant's CRD #.** The Applicant's CRD number is assigned to the applicant by the Federal banking agencies through the Central Registration Depository (CRD) system. It is not necessary to include leading zeros.

Applicant's SS #. Enter the applicant's social security number. Completion of the applicant's SSN is voluntary. However, failure to complete the applicant's SSN may result in confusion regarding who the applicant is and may delay or prevent the processing of the Form U-5B.

3. **Sponsoring Bank or Issuer Name.** This is the Sponsoring Bank's complete name as listed on Form SB, or the issuer's complete name. Do not abbreviate, shorten, or modify the name. An entry is required in this field for processing the initial and amended Form U-5B filings.

4. **Sponsoring Bank CRD #.** Sponsoring Banks are assigned a unique CRD number. An entry is required in this field for processing the initial and amended Form U-5B filings.

5. **Office of Employment Address.** Not applicable for Form U-5B filings.

6. **CRD Branch #.** Not applicable for Form U-5B filings.

7. **Billing Code.** The Billing Code is an alpha/numeric value consisting of up to eight characters. It is the responsibility of the Sponsoring Bank to establish and maintain its own set of unique billing codes. If your Sponsoring Bank doe not use CRD billing codes, leave this field blank. This is not a required field.

8. **Street.** This item is used to capture the physical location of the applicant's residence. Post office boxes are not acceptable. Include street name, building #, unit #, apartment #, suite #, slip #, etc. The applicant is required to update the information for two years after leaving the industry.

City. This item is used to capture the name of the city in which the applicant is currently residing. This is a required field for all address history.

State/Country. This item identifies the state code where the applicant resides or resided in the past. Enter the two digit state abbreviation for the street address provided above. If this is a foreign address indicate the country.

ZIP/Postal Code. Enter the applicant's residence nine digit ZIP Code or postal code if a foreign address.

9. **Affiliated Firms.** Not applicable for Form U-5B filings.

10. **Full Termination.** A "Yes" response will terminate the Bank Securities Representative's registration with the appropriate Federal banking agency.

11. **Federal Banking Agency Termination.** Check the appropriate Federal Banking agency box with which the individual is terminating registration categories.

12. **Date Terminated.** Enter the actual date the termination of registration is effective. The month, day and year are required.

13. **Reason for Termination.** Check the appropriate box. If "Permitted to Resign", "Discharged", or "Other" are checked, provide an explanation.

14.–18. **Disclosure.** Check the appropriate "Yes" or "No" response for each question. Refer to the Explanation of Terms at the front of these instructions. Complete details explaining any "Yes" answers must be provided on the appropriate Disclosure Reporting Pages (DRP U-5):

14 Criminal Disclosure
15 Regulatory Action Disclosure
16 Investigation/Internal Review Disclosure
17 Customer Complaint Disclosure
18 Investigation/Internal Review Disclosure

18. **Internal Review.** Generally, this item is used to report matters of a compliance nature, BUT NOT matters of a competitive nature. Responses should not include situations relating to disputes between the firm and the individual overownership or possession of information or records pertaining to business conducted by the individual.

If answered "Yes," the individual named in item 1 of this form is afforded the opportunity to respond by using Part II of the Investigation/Internal Review Disclosure Reporting Page (U-5B).

19. **Disclosure Certification (Optional).** This certification language contained in item 19 allows the firm to certify that all disclosable information on the individual's record has been previously reported on DRPs (U-4B) or DRPs (U-5B). Firms that have not filed DRPs (U-4B and DRPs (U-5B) for all disclosable information may not take advantage of the certification option. Use of the certification is optional, and, if chosen, "Yes" answers to the appropriate questions in Items 14—18 must be provided.

Signatory Area

"Signature" includes a manual signature or an electronically transmitted equivalent.

Date. This date represents the date the form was signed by the appropriate signatory. The correct format for the date entry is "MM/DD/YYYY."

Signature of Appropriate Signatory. A signatory entry is required for all filings. Enter the full signature as it appears in typed or printed form.

Type or Print Name of Appropriate Signatory. The appropriate signatory's full legal name must be displayed under the signature. The name must be typed or printed as it appears in the signature form.

Person to Contact for Further Information. Enter the name of the person to contact for additional information regarding the matters reported on this form. Include the telephone number for the person listed here.

Not Applicable

10. Is this a FULL TERMINATION
☐ Yes ☐ No

11. Federal Banking Agency Termination
A. Registratoin to be terminated with the following:
☐ OCC ☐ FDIC ☐ FRS

12. Date Terminated (MM/DD/YYYY) (This date represent the actual date that the termination of registration is effective.

13. Reason for Termination (Check one)
☐ Voluntary ☐ Deceased ☐ Permitted to Resign ☐ Discharged ☐ Other

Provide an explanation:

PRIVACY ACT NOTICE

The Applicant's SSN is requested to differentiate among applicants with the same name. Providing the Applicant's SSN is voluntary. However, failure to provide the Applicant's SSN may result in confusion regarding who the Applicant is and may delay or prevent processing of this application for registration. The information you provide will be for the use of the appropriate Federal banking agency and for other State and Federal agencies and SROs. Maintenance of the information is authorized by sections 8, 9 and 31 of the Federal Deposit Insurance Act (12 U.S.C. 1818, 1819 and 1831).

Uniform Termination Notice for Bank Securities Representative Registration (Form U-5B)—continued

Applicant's Name (Last, First, Middle)	Social Security No.	Applicant's CRD No.	Sponsoring Bank CRD No.

If the answer to any of the following questions in Items 14, 15, 16, 17 or 18 is "YES", and you cannot utilize the certification in Item 19 below, attach complete details of all events or proceedings on appropriate DRP U-5(s).

If the information in Items 14–18 has already been reported on Form U-4B or Form u-5B, do no resubmit DRPs for these items.

Refer to the explanation of terms section of Form U-5B instructions for explanations of italicized terms.

	YES	NO	
14. Criminal Disclosure			
While employed by or associated with your sponsoring bank, was the individual:			
A. convicted of or did the individual plead guilty or nolo contendere ("no contest") in a domestic, or foreign, or military court to any *felony*?			1
B. charged with any *felony*?			2
C. convicted of or did the individual plead guilty or nolo contendere ("no contest") in a domestic, foreign or military court to a *misdemeanor involving*: investments or an *investment-related* business or any fraud, false statements or omissions, wrongful taking of property, bribery, perjury, forgery, counterfeiting, extortion, or a conspiracy to commit any of these offenses?			3
D. charged with a *misdemeanor* specified in 14.C?			4
15. Regulatory Action Disclosure			
While employed by or associated with your sponsoring bank, was the individual *involved* in any *disciplinary* action by a Federal banking agency, domestic or foreign governmental body or *self regulatory organization* (other than those designated as a *"minor rule violation"* under a plan approved by the U.S. Securities and Exchange Commission) with jurisdiction over the *investment-related* businesses?			5
16. Investigation Disclosure			
Currently is, or at termination was, the individual the subject of an *investigation* or *proceeding* by a Federal banking agency, domestic or foreign governmental body or *self-regulatory organization* with jurisdiction over *investment-related* businesses?			6
17. Customer Complaint Disclosure			
While employed by or associated with you sponsoring bank was the individual the subject of an *investment-related*, consumer-initiated *complaint* or proceeding (even if such complaint was received after the individual was no longer employed with your firm) that:			
A. alleged compensatory damages of $10,000 or more, fraud, or wrongful taking of property?			7
B. was settled or decided against the individual for $5,000 or more, or found fraud or the wrongful taking of property?			8
18. Internal Review Disclosure			
Currently is, or at termination was, the individual under internal review for fraud or wrongful taking of property, or violating *investment-related* statutes, regulations, rules or industry standards or conduct?			9

DISCLOSURE CERTIFICATION (OPTIONAL)

You may only certify to the accuracy and completeness of the disclosure information in the individual's file if it has been fully provided in DRP format. If DRP(s) are not on file, do not answer these certification boxes. Provide full details of all matters on DRP U-5B(s). All appropriate questions in Items 14, 15, 16, 17 or 18 above must be answered, regardless of whether the certification is being utilized. Refer to the Form U-5B instructions for additional information on the utilization of the certification language.

This is to certify that details relating to the above answers to Items 14, 15, 16, 17 or 18 have been previously reported on amendments to Form U-4B or Form U-5B filed on behalf of this individual. Updated information will be provided, if needed, as it becomes available to the firm. This is to further certify the following:			
A. There is no additional information to be reported at this time			10
B. There is additional information to disclose that is reported on the appropriate DRP U-5B(s)			11
C. There is updated information, reported on the appropriate DRP U-5B(s), relating to disclosures previously reported			12

I verify the accuracy and completeness of the information contained in and with this form.

Date (MM/DD/YYYY) _____ Signature of *appropriate signatory* _____

Type or print name of *appropriate signatory* _____

Person to contact for further information _____ Telephone No. of person to contact _____

A copy of this form must be provided to the terminated individual.

CRIMINAL DISCLOSURE REPORTING PAGE

GENERAL INSTRUCTIONS

This Disclosure Reporting Page (DRP U-5B) is an ☐ INITIAL *OR* ☐ AMENDED response used to report details for affirmative responses to *Items 14.A, 14.B, 14.C and 14.D* on Page 2 of the Form U-5B.

Check ☐ item(s) being responded to:

14. While employed by or associated with your sponsoring bank, was the individual:
- ☐ A. convicted of or did the individual plead guilty or nolo contendere ("no contest") in a domestic, or foreign, or military court to any *felony*?
- ☐ B. *charged* with any *felony*?
- ☐ C. convicted of or did the individual plead guilty or nolo contendere ("no contest") in a domestic, foreign or military court to a *misdemeanor involving*: investments or an *investment-related* business or any fraud, false statements or omissions, wrongful taking of property, bribery, perjury, forgery, counterfeiting, extortion, or a conspiracy to commit any of these offenses?
- ☐ D. *charged* with a *misdemeanor* specified in 14.C?

Use the DRP to report all charges arising out of the same event. One event may result in more than one affirmative answer to the above items.

Multiple counts of the same charge arising out of the same event(s) should be reported on the same DRP. Unrelated criminal actions, including separate cases arising out of the same event, must be reported on separate DRPs.

Applicant's Name (last, first, middle (specify if none), (Jr., Sr., etc.))		
Applicant's CRD No.	Social Security No.	Sponsoring Bank CRD No.

2. Formal charge(s) were brought in:

Court *(Name of Federal Military, State or Foreign Court)*	Location of Court *(City or County and State or Country)*	Docket/Case Number

3. Charge Detail Disclosure: (Continue on additional Criminal Disclosure Reporting Page U-5B if more than three charges arise out of the same event.)

Chg#	Formal Charge(s) Description	Charge Date (MM/DD/YYYY)	Number of Counts	Charge Type (check one only)		Plea (Guilty, Not Guilty, etc.)	Charge is Currently (check one only)	Appeal Date (MM/DD/YYYY)	Product Type (if charge is investment-related)
				Misdemeanor	Felony				
1.							☐ Pending ☐ Final ☐ On Appeal ☐ Pre-Trial Intervention		
2.							☐ Pending ☐ Final ☐ On Appeal ☐ Pre-Trial Intervention		
3.							☐ Pending ☐ Final ☐ On Appeal ☐ Pre-Trial Intervention		

IF FINAL, ON APPEAL, OR PRE-TRIAL INTERVENTION, COMPLETE ITEMS 3 AND 4. FOR EACH CHARGE THAT IS PENDING, COMPLETE ONLY ITEM 4.

Chg#	Disposition Type: (Convicted, Acquitted, Dismissed, Pre-Trail Intervention, etc.)	Disposition Date (MM/DD/YYYY)	Disposition Detail Sentance/Penalty (if applicable)	Duration (If sentance, suspension, probation, etc.)	Start Date (MM/DD/YYYY)	Penalty/Fine Amount (If applicable)	DatePaid (MM/DD/YYYY)
1.							
2.							
3.							

4. Provide a brief summary of circumstances leading to the charge(s) as well as the disposition. Include the relevant dates when the conduct which was subject of the charge(s) occurred. (Use reverse side of this sheet for additional comments if necessary.)

REGULATORY ACTION DISCLOSURE REPORTING PAGE

GENERAL INSTRUCTIONS

This Disclosure Reporting Page (DRP U-5B) is an ☐ INITIAL *OR* ☐ AMENDED response used to report details for affirmative responses to *Item 15* on Page 2 of the Form U-5B.

15. While employed by or associated with your sponsoring bank, was the individual *involved* in any *disciplinary action* by a Federal banking agency, domestic or foreign governmental body or *self regulatory organization* (other than those designated as a *"minor rule violation"* under a plan approved by the U.S. Securities and Exchange Commission) with jurisdiction over the *investment-related* businesses?

One event may result in more than one affirmative answer to these items. Use only one DRP to report details related to the same event. If an event gives rise to actions by more than one regulator, provide details to each action on a separate DRP.

Applicant's Name (last, first, middle (specify if none), (Jr., Sr., etc.))		
Applicant's CRD No.	Social Security No.	Sponsoring Bank CRD No.

1. Regulatory Action Initiated by (Name the regulator, foreign financial regulatory authority, SRO or commodities exchange, etc.)		2. Regulatory Action Type	3. Date Initiated (MM/DD/YYYY)
4. Docket/Case Number	5. Employing Firm when events occurred	6. Product Type(s)	
7. Describe the allegations related to this regulatory action (Use reverse side of this sheet for additional comments if necessary.)			
8. Is regulatory action currently (check one) ☐ Pending ☐ On Appeal ☐ Final	9. If on appeal, regulatory action appealed to (SEC, SRO, U.S. Court of Appeals, etc.)	10. If on appeal, date filed (MM/DD/YYYY)	

IF FINAL OR ON APPEAL, COMPLETE ALL ITEMS BELOW. FOR PENDING ACTIONS, COMPLETE ITEM 19 ONLY.

11. How was the matter resolved? (Settled, Consent, etc.)	12. Resolution Date (MM/DD/YYYY)	13. Sanctions (Suspended, Censured, Barred, Requalification, etc.)

14. If Suspended, Enjoined or Barred:

Is suspension/injunction/bar of a fixed duration? ☐ Yes ☐ No (If No, provide details in Item 19)	Suspension/Injunction Bar Start Date (MM/DD/YYYY)	Suspension/Injunction Bar Duration	Suspension/Injunction/Bar capacity affected (General Securities Principal, Financial, & Operations Principal, etc.)

15. If requalification by exam/retraining was a condition of the sanction:

Is requalification/retraining time-related? ☐ Yes ☐ No	If yes, length of time given to requalify/retrain: (If No, provide details in Item 19)	Type of exam required for requalification	Has condition been satisfied? ☐ Yes ☐ No

16. If disposition resulted in a fine, penalty, restitution, disgorgement or monetary compensation: (Fill in amount and MM/DD/YYYY in appropriate box)

Penalty/Fine $	Date Paid	Restitution $	Date Paid	Disgorgement $	Date Paid	Other $	Date Paid

17. Were you required to pay any part of the monetary items disclosed in 16: ☐ Yes ☐ No (If yes, fill in amount and MM/DD/YYYY in appropriate box)

Penalty/Fine $	Date Paid	Restitution $	Date Paid	Disgorgement $	Date Paid	Other $	Date Paid

18. Was payment of all or any part of a monetary award, penalty or fine waived? ☐ Yes ☐ No If yes, provide details of Waiver in 19 below.

19. Provide summary of details related to the action status and(or) disposition and include relevant terms, conditions and dates. (Use reverse side of this sheet for additional comments if necessary.)

INVESTIGATION/INTERNAL REVIEW DISCLOSURE REPORTING PAGE

GENERAL INSTRUCTIONS

This Disclosure Reporting Page (DRP U-5B) is an ☐ INITIAL *OR* ☐ AMENDED response used to report details for affirmative responses to *Items 16 and 18* of the Form U-5B.

Check ☐ Item(s) you are responding to:

☐ 16. Currently is, or at termination was, the individual the subject of an *investigation* or *proceeding* by a Federal banking agency, domestic or foreign governmental body or *self-regulatory organization* with jurisdiction over *investment-related* businesses?

One event may result in more than one investigation. If more than one authority is investigating the individual, use a separate DRP to provide details.

☐ 18. Currently is, or at termination was, the individual under internal review for fraud or wrongful taking of property, or violating *investment-related* statutes, regulations, rules or industry standards or conduct?

If the individual has been notified that the investigation/internal review has been concluded without formal action, complete Items 1, 2, 3, and 4 of this DRP to update.

Applicant's Name (last, first, middle (specify if none), (Jr., Sr., etc.))		
Applicant's CRD No.	Social Security No.	Sponsoring Bank CRD No.

PART I

1. Notice received from (Name of Regulator, Agency, SRO, etc. initiating the investigation)	2. Notice date (MM/DD/YYYY)
3. Describe briefly the nature of the investigation/internal review, if known, or details of the resolution (Use reverse side of this sheet for additional comments if necessary.)	
4. Date Resolved (MM/DD/YYYY)	

(MM/DD/YYYY)	Signature of *appropriate signatory*

PART II

The individual subject may use this space for details to affirmative answers of Item 18 only.

The individual who is the subject of the internal review may provide a brief summary of this event. The summary must fit within the space provided below. This summary may be sent to: Appropriate Federal Banking Agency, c/o Central Registration Depository, Membership Department, 9513 Key West Ave., Rockville, Maryland 20850-3389.

CUSTOMER COMPLAINT DISCLOSURE REPORTING PAGE

GENERAL INSTRUCTIONS

This Disclosure Reporting Page (DRP U-5B) is an ☐ INITIAL *OR* ☐ AMENDED response used to report details for affirmative responses to *Item 17.A and 17.B* of the Form U-5B.

Check ☐ Item(s) you are responding to:

17. While employed by or associated with your firm, was the individual the subject of an *investment-related*, consumer-initiated complaint or *proceeding* that:

☐ A. alleged compensatory damages of $10,000 or more, fraud, or wrongful taking of property?

☐ B. was settled or decided against the individual for $5,000 or more, or found fraud or the wrongful taking of property

One event may result in more than one affirmative answer to the above items; use only one DRP to report all the details related to one customer complaint. Use a separate DRP for each customer complaint.

Applicant's Name (last, first, middle (specify if none), (Jr., Sr., etc.))		
Applicant's CRD No.	Social Security No.	Sponsoring Bank CRD No.
1. Customer Name(s)		2. Customer's State(s) of Residence (2-Letter Abbreviation)
3. Employing Firm or Sponsoring Bank when events giving rise to the complaint occurred:		4. Date complaint was received (MM/DD/YYYY)
5. Allegation(s)		
6. Provide a brief summary of events related to the allegation(s) including dates when activities leading to the allegation(s) occurred		
7. Product Type(s)		8. Alleged Compensatory Damage Amount $
9. Is complaint currently pending ☐ Yes ☐ No	If No, how was complaint resolved (No Action, Withdrawn, Denied, Settled, Arbitrated, Litigated, CFTC Reparation, etc.)	If No Action, Denied, or Withdrawn, give date (MM/DD/YYYY)

IF STATUS IS SETTLED, ANSWER 10 AND 13; IF ARBITRATED OR CFTC REEPARATION, ANSWER 11 AND 13; IF LITIGATED, ANSWER 12 AND 13

10. If SETTLED by you, or on your behalf, without Arbitration, Litigation or Reparation:

Settlement Date (MM/DD/YYYY)	Settlement Amount $	Your Contribution $

11. If ARBITRATED or CFTC REPARATION:

Arbitration/Reparation Claim was filed with (NASD, AAA, NYSE, CBOE, CFTC, etc.)	Date You Received Service (MM/DD/YYYY)
Case/Docket Number	Is Arbitration/Reparation currently pending? ☐ Yes ☐ No

If Status if FINAL:

Disposition (Settled, Dismissed, Award, Withdrawn, etc.)	Date of Disposition (MM/DD/YYYY)

If disposition resulted in monetary compensation:

Award Amount $	Award Amount $	Settlement Amount $	Individual's Contribution $	Date Paid (MM/DD/YYYY)

12. If CIVIL LITIGATION:

Court that case was filed in (Name of Federal, State or Foreign Court)	Location of Court (City or County and State or Country)	Docket/Case Number
Is Civil Litigation currently pending? ☐ Yes ☐ No		Date the Individual Received Service (MM/DD/YYYY)

If Status if FINAL:

Disposition (Settled, Dismissed, Judgment, Withdrawn, etc.)	Date of Disposition (MM/DD/YYYY)

If disposition resulted in monetary compensation:

Judgment Amount $	Judgment Amount $	Restitution Amount $	Individual's Contribution $	Date Paid (MM/DD/YYYY)

Is action currently on appeal? ☐ Yes ☐ No	If on appeal, date filed (MM/DD/YYYY)

13. Provide details as to any other limits or conditions to disposition. (Use reverse side of this sheet for additional comments if necessary.)

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Part 901

[Docket No. FR–3447–I–03]

RIN 2577–AA89

Public Housing Management Assessment Program

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Interim rule.

SUMMARY: This interim rule implements the proposed revision, published on May 6, 1996, of the Public Housing Management Assessment Program (PHMAP) at 24 CFR part 901. PHMAP applies to public housing agencies (PHAs) and resident management corporations (RMCs), and any other entities under contract to manage public housing, but does not apply to Indian housing authorities, nor to the Family Self-Sufficiency Program authorized under section 23. PHMAP provides policies and procedures to identify PHA management capabilities and deficiencies, and assists HUD State/Area Offices in accountability monitoring and risk management.

DATES: Effective Date: January 29, 1997. Assessments using the requirements of this rule will begin with PHAs whose fiscal years end on March 31, 1997, the final date of the quarter after this rule is published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: MaryAnn Russ, Deputy Assistant Secretary for Public and Assisted Housing Operations, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410, telephone (202) 708–1380. A telecommunications device for hearing or speech impaired persons (TTY) is available at (202) 708–0850. (These are not toll-free telephone numbers.)

SUPPLEMENTARY INFORMATION: On May 6, 1996, HUD published a proposed rule (61 FR 20358) to revise the entire PHMAP at 24 CFR part 901. Eighty-seven comments were received on the proposed rule. The public comments on the proposed rule and the resulting changes in this rule are discussed below in section II of this preamble.

I. Highlights of Changes From the Proposed Rule

A number of changes, more fully discussed in section II of this preamble, below, have been made to the proposed rule by this interim rule, including the following:

- The definition for "vacancy days: is modified to specify that it pertains to "dwelling" units.
- The definitions and methodologies for both the Performance Funding System (PFS) and PHMAP should be the same as long as feasible, and the language of the new rule reflects that.
- Definitions of the terms "effective lease date," "maintenance plan," and "move-out date" are added.
- The definition of "average turnaround time" is changed to read, ". . . the annual average of the total number of turnaround days between the latter of the legal expiration date of the immediate past lease or the actual move-out date of the former tenant (whenever that occurred, including in some previous fiscal year) and the date a new lease takes effect."
- The threshold for progress in reducing the vacancy rate that applies to a C grade has been changed from 30% to 15 percentage points.
- The term "Reduced Actual Vacancy Rate in Previous 3 Years" is clarified to include the fiscal year being assessed under PHMAP in the 3-year period.
- Dwelling units used for non-dwelling purposes with HUD approval, employee occupied units, and vacant units approved for demolition or disposition are not included as available units in the determination of occupancy/vacancy rates
- For purposes of indicator #2, Modernization, a minimum time is specified between the date HUD's monitoring report or audit is provided to the PHA and the end of the PHA's fiscal year in order to give the PHA sufficient time to correct all findings. The Department has revised components #3 and #4 to reflect a minimum time of 75 calendar days.
- The Department agrees that emergency CGP work does not require prior HUD approval and has revised component #5 of indicator #2, Modernization, to specifically exclude emergency work.
- The Department has added specific language to indicator #4, Work Orders, stating that all preventive maintenance work orders are to be tracked, as well as which type of work orders are exempted from the calculation of this indicator.
- The new resident services and community building indicator is now subdivided into four equally weighted components, and the indicator or the individual components are subject to exclusion based on the particular circumstances of each PHA. The name of this indicator has been renamed "Resident Services and Community Building" to place a more accurate emphasis upon the specific role of PHAs for these functions. PHA's with 100% elderly developments will not be assessed under this indicator. To avoid penalizing small PHAs with active programs, PHAs with fewer than 250 units or with 100% elderly developments may request to be assessed under the indicator at the time of PHMAP certification submission.
- The Resident Services and Community Building indicator has been revised in order to assess PHAs for the functions they perform in operating resident services programs and for resident management or TOP performance only when the PHA is the contract administrator for the program.
- The rule has been changed to state that indicator #8, Security, does not apply to PHAs with fewer than 250 units under management unless the PHA requests to be assessed under the indicator at the time of the PHMAP certification submission.
- Section 901.105(d)(3)(iv) has been clarified in the new rule to state that a PHA's score for indicators #1, #4 and/or #5, after any adjustment(s) for physical condition and/or neighborhood environment, may not exceed the maximum potential weighted points assigned to the respective indicator(s).
- Section 901.115(e) of the proposed rule read, "PHAs with more than 100 units that achieve a total weighted score of less than 60% on indicator (2), modernization, shall be designated as mod-troubled." The Department agrees that these "small" PHAs should also be assessed on their modernization program, and has amended this section accordingly.
- The posting of PHA PHMAP scores is now required at all offices, rather than in all developments.
- The rule makes clear that PHAs are only required to post and report out final PHMAP scores and do not have to post and report any score that is appealed in a timely basis and is under consideration by HUD.
- The rule now specifically permits an appeal from a State/Area Office rejection of a claim for additional scoring adjustment that is based on the physical condition or neighborhood environment of housing developments.
- In sections 901.220(b) and 901.225, the Department has changed the percentage in the new rule to require that 20% of the residents at a PHA in substantial default indicate to HUD their interest in participating in the competitive proposal process.
- The period has been extended to a 60, rather than 45, day submission period for certifications to be submitted following the end of a PHA's fiscal year.

II. Discussion of Public Comments

General Comments

Comment: One comment stated that PHAs should be monitored, but the PHMAP grading system is not the answer.

Response: Congress passed the amendments to the 1937 Act that authorize PHMAP, and it is the clear intent and purpose of Congress to require HUD to assess PHA management performance. The authorizing statute provides specific statutory indicators, and permits, as HUD deems appropriate, up to five additional ones to be used for this purpose.

Comment: Twenty-four comments stated that a truer assessment can be accomplished now than before; overall, the proposed rule is positive; generally pleased with the proposed revisions that eliminate the snapshot indicators; and the proposed rule is a vast improvement over the current PHMAP certification. Many of the commenters commended HUD's effort to streamline the certification process by reducing the number of indicators from 12 to eight and by providing standard definitions for critical terms. The first six indicators are measures of essential property management and a marked improvement over the current system.

Response: The comments are noted by the Department.

Comment: Five comments felt that there should be a transition period to allow adequate time to change computer programs. There should be at least one year to sample the new indicators to see how changes are going to affect individual PHAs. Any revision of the PHMAP should be made effective beginning with the next fiscal year after the new rule has been published. Two comments felt that if Congress has moved the authorization process forward, PHA's should have an "option year" implementation where a PHA has a choice to use either the current PHMAP or the new PHMAP. If the authorization process is stalled, the Department should not implement the new rule.

Response: Most of the data elements required to determine the grade or score for the new indicators are already being maintained by PHAs for reporting requirements for the current PHMAP rule or for other programs. Because of that, a long transition period is not needed. Therefore, assessment under this rule will begin with PHAs whose fiscal year ends the quarter after the publication of this rule (PHAs whose fiscal year ends in the quarter immediately following publication of this revised rule will be assessed under the "old" PHMAP rule). This transition period will permit PHAs to organize their data in order to respond to the new requirements. During the first year of implementation of the new rule, the Department will consider modification and exclusion requests based on special circumstances arising from the initial implementation process. A choice of which set of criteria to use (have PHAs choose under which PHMAP rule, old or new, to be assessed) is not feasible because all PHA's must be assessed using the same indicators for the same period of time (i.e., the same calendar year) in order for the scoring to be comparable and fair. HUD is moving forward with this rule because the implementation of the new PHMAP is not dependant upon Congressional authorization. The new rule is published as an interim rule to indicate HUD's intention to continue to refine and improve PHMAP.

Comment: Three Comments requested the Department not to establish a system which requires PHAs to retroactively retrieve information. The Commenters stated that in areas where "improvement over the last three years" is considered to calculate the grade, the information needed is not readily available to the PHAs in the new format required by the proposed rule. A transition process should be addressed in the new rule to deal with this.

Response: The PHMAP new rule does not require a PHA to retroactively retrieve information unless the PHA chooses to certify to the percentage of improvement within the prior three year period as permitted by some of the indicators. Since whether to make such a certification is the decision of each PHA, a PHA should factor in the additional time to retrieve the necessary information. A transitional period for this reason is deemed to be unnecessary.

Comment: Three Comments felt that with fewer indicators, it will be more difficult for small PHAs to achieve high performer status; a low score on one indicator will have a much greater impact on the total score.

Response: The reinvention and streamlining of the PHMAP process seeks to focus on the most significant management aspects of PHA management and reduce the burden of the PHMAP process while still producing a valid and reliable assessment. However, the use of fewer indicators does not result in a disproportionate impact from any one indicator. The use of modification and exclusion requests allows PHAs the opportunity to justify why they should not be penalized by a performance that does not exactly meet the requirements of an indicator. Even if additional, though less significant, indicators were used in PHMAP, the weighting of indicators according to their significance would reduce their individual impact on the score despite the additional assessment burden that would result.

Comment: One Comment stated that HUD has attempted to add compliance with specific directives to a program that is supposed to rate performance, and that including them in PHMAP waters down the focus and the results of the program. HUD should remove all non-essential components (Section 3 program at 24 CFR part 135, energy/utility management, etc.).

Response: HUD has attempted to limit PHMAP to examining essential aspects of PHA management. Of these, some that deal with compliance issues, such as the energy indicator, are essential because they are statutory. In other indicators, such as Resident Initiatives, which examines, among other subjects, implementation of Section 3 programs, the degree of successful implementation is regarded as a valid measure of a PHA's efforts to encourage partnerships with residents and the local community that help improve management operations at the PHA. However, compliance-related measures have been kept at a minimum in this rule.

Comment: One Comment felt that the State/Area Offices should be given the flexibility to correct shortcomings in the system which could not have been foreseen in advance.

Response: This rule does provide a high degree of the requested flexibility to State/Area Offices. The State/Area Offices assess each PHA within their jurisdiction on an annual basis, and make determinations for high-performing, standard, and troubled PHAs, and troubled PHAs with respect to the program under section 14 (mod-troubled) in accordance with a PHA's PHMAP weighted score. On-site confirmatory reviews may be conducted by the State/Area Offices, which may result in corrections to a PHAs total weighted score, if appropriate. In addition, State/Area Offices make determinations for exclusion and modification requests, perhaps the greatest area of flexibility in the PHMAP rule. At the same time, HUD must ensure that PHMAP is a truly nationwide assessment methodology and that comparable performance by PHAs in different State/Area Offices is rated without regard to the location.

Comment: One Comment stated that the Commenter has worked very hard to achieve high performer status, but cannot achieve it, under the proposed

VOL 61 ISS 251 DEC 30 1996 UMI

PHMAP ratings. Surely, a rating scheme can be formulated that would be equally fair to all PHAs, taking into consideration the huge differences between small and large PHAs, big city and rural PHAs, and the necessity for each to be operated differently.

Response: As indicated in the preamble of the proposed rule, the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1992 (92 App. Act) (approved October 28, 1991, Pub. L. 102–139) provided that the evaluation of PHAs must be administered flexibly to ensure that they are not penalized for circumstances beyond their control; and that the weights assigned to indicators must reflect the differences in management difficulty that result from physical condition and neighborhood environment. HUD implements this mandate, which also reflects the concerns expressed in the comment, by permitting PHAs to submit modification and exclusion requests, by limiting the applicability of certain indicators by PHA size, and by assigning additional adjustments to a PHA's PHMAP score based upon physical condition and neighborhood environment.

Comment: Two comments stated that PHMAP scores for PHAs and RMCs should be assessed and scored separately. The purpose of the RMC is to manage and maintain public housing units independent of the PHA. The RMC is an independent body that neither answers to, nor is required to follow the advice of the PHA. Resident groups are being given an enormous amount of responsibility, without the corresponding accountability which puts the PHA in an unfair and untenable position. To relieve the RMC of the necessity of being accountable creates a situation of "smoke and mirrors." Don't let resident management be an illusion; make it real. If the RMC has been deemed eligible and able to manage, it should also be deemed eligible to handle the corresponding success or failure. Do not combine RMC and PHA PHMAP scores.

Response: As discussed in the preamble to the proposed rule, because an RMC enters into a contract with a PHA to perform specific management functions on a development-by-development basis, and because the scope of the management that is undertaken varies, not every indicator that applies to a PHA would be applicable to each RMC. Even if an RMC were to assume all of the management functions for a particular development, 24 CFR 964.225(d), entitled, *Management contract,* and 24 CFR 964.225(h), entitled, *Prohibited activities,* provide that a PHA may enter into a management contract with a resident management corporation, but a PHA may not contract for assumption by the resident management corporation of the PHA's underlying responsibilities to the Department under the ACC. In addition, 24 CFR 964.225(k) requires a PHA to review, not less than annually, an RMC's performance to ensure that it complies with all applicable requirements and meets agreed-upon standards of performance. The ultimate responsibility for the management of all of its developments resides with the PHA, whether it contracts out management or other services to an RMC or any other contractor.

Comment: Two comments stated that the sample worksheet for indicator #6 and the PHMAP certification form are not exactly user friendly. One commenter suggested that HUD redesign these two forms so that they can be readily understood and computer formatted for those PHAs that have such capability. The other commenter stated that the new rule should include a standard questionnaire form for PHA use.

Response: The worksheet and certification form have been redesigned, as applicable, to make them more user friendly. HUD welcomes additional, specific recommendations to improve these documents further.

Comment: One comment felt that PHMAP should be aimed toward identifying a quality and reliable service delivery. Progress of development conditions, resident involvement in the solution of community affairs, as well as independent achievements by the residents should be evidence of growth and should be rewarded with high scores and additional benefits.

Response: Even with the reduction and streamlining of PHMAP to measure only the essential aspects of PHA management, as discussed in previous responses, the significance of resident involvement and achievement are recognized in this rule by maintaining resident involvement as a separate indicator. However, this is only one factor in a program that attempts to assess all of the significant areas of PHA management and a PHA must perform well in each area to receive a high score and additional benefits.

Comment: One comment maintained that the results in the quality of work and development conditions should be evaluated in connection with available resources versus market cost in the jurisdictions.

Response: The current PHMAP regulation contains substantial provisions to ensure that PHAs are not penalized for conditions beyond their control: (1) a PHA may request a modification of any indicator and/or component to compensate for conditions beyond its control; (2) a PHA may request the exclusion of an indicator and/or component for the same reason; (3) without requesting a modification, the current and new PHMAP regulations both allow PHAs to modify the scoring calculations for certain indicators by exempting certain units; and (4) there is a two-stage appeal process available if the PHA fails to find relief under items one, two and three, above. As discussed previously, exclusion and modification requests are processed by the local State/Area Office, which would have the greatest awareness of the resources and market conditions affecting a PHA. These procedures provide the appropriate mechanism to address special circumstances, such as area market costs, affecting a PHA's performance.

Comment: Two comments were concerned with revisions that would require the collection and management of new data when that data is needed solely for PHMAP and is not normally utilized in the management of housing. Such changes to the data collection and processing system are not easily accomplished.

Response: The Department's experience in implementing PHMAP so far has resulted in some refinement in the data necessary to assess management performance. The goal of this rule is to provide a more valid assessment process and HUD believes the data requested will produce this result. HUD will continue to evaluate the appropriateness and usefulness of the information it gathers in its implementation of this rule, and will make adjustments as warranted.

Comment: Three comments stated that the proposed rule should be delayed until Congress has completed action concerning the management assessment criteria of PHAs. Bills in the Senate and the House have provisions that would affect PHMAP. The Senate bill would add two indicators and the House bill would create an accreditation process for PHAs. It is not clear how these provisions may be reconciled. If the final bill contains significant changes, HUD should incorporate them into a new proposed rule re-issued for comment.

Response: HUD believes that this rule, incorporating nearly five years of experience and feedback on the rule first implemented in January 1992, represents an improvement over the existing process. The Department will

fully implement any statutory amendments to PHMAP when they are made, but is also continuing to go forward with this rule to avoid delay in implementing an improved process.

Comment: One comment stated that a PHA's ability to maintain its units will decline due to the budget cuts to all PHAs, thus affecting the PHMAP scores. With no funds for repairs, more units will fail HQS. How are PHAs suppose to improve and maintain housing units when funds are reduced, and PHAs are denied modernization funds?

Response: HUD recognizes that PHAs have not been fully funded. In FY 1996, for example, PHAs received only 89% of their funding eligibility under the Performance Funding System (PFS). To the extent that a PHA can demonstrate its management performance has been adversely affected by funding shortfalls, it should do so in an exclusion/modification request. PHAs are expected and encouraged to do their best, but they cannot be expected to do the impossible. In addition, alternative measures have been implemented such as minimum rents and the new focus on mixed-income housing, which provide PHAs with possible alternative income sources.

Comment: One comment stated that a system designed to measure performance of PHAs nationally must be flexible and accommodate local differences. PHMAP should give consideration to the conditions and level of difficulty involved in owning and operating public housing in poverty impacted and distressed urban areas.

Response: PHMAP is required by statute to take into account the physical condition of a PHA's developments and their neighborhood environment in assessing management. In the previous rule, PHMAP scores could be adjusted, based upon physical condition and neighborhood, by up to 10 points to raise a designation to the next status level. In this rule, the overall PHMAP score of a PHA will be adjusted by adding weighted points that reflect the differences in the difficulty of managing developments that result from the physical condition and/or the neighborhood environment of a PHA's developments.

Comment: Two comments felt that two indicators, Resident Services and Security, are troubling and display a tendency toward meddling and micromanagement. HUD has been trying to retreat from that tendency. Plus, Congress has been cutting funding for PHAs. The commenters felt that these indicators are non-management in nature and are not within the control of the PHA. PHMAP should grade only those indicators which are within the control of the management.

Response: A PHA's management efforts are directed toward developments, which are not just properties or structures, but which are housing: buildings that are people's homes. Because of this, there is a strong relationship between a PHA's management efforts and quality of life for a development's residents. While the PHA cannot mandate or control the positive interaction or advancement of its tenants, it can foster the environment and opportunity for such interaction and advancement. The resident involvement indicator attempts to measure a PHA's success in accomplishing this. On the other hand, a PHA is obligated to manage and respond to the unlawful behavior of tenants whose actions impede the peaceful enjoyment of other tenants. The security indicator addresses the PHA's success in managing this significant housing issue.

Comment: One comment supports extending coverage to alternative management entities.

Response: The Department appreciates this concurrence in its effort to assess and improve the management performance of every PHA.

Comment: One comment urges HUD to adopt those changes that help streamline the process of assessment and to use the simplest methods necessary to achieve a particular goal or outcome.

Response: As discussed above, it is HUD's intention to streamline and improve the PHMAP process with this new rule. Further, HUD is by no means closing the door on additional refinement, but will continue to consider and examine additional ways of improving PHMAP. To this end, this rule is being published as an interim rule.

Comment: One comment felt that it is equally important for PHAs to develop strong relationships with their surroundings and their neighbors. There should be points added or deducted to a PHA's final score based on the role a PHA assumes and its relationship with its surroundings.

Response: The resident involvement indicator in this rule, as did the previous resident initiatives indicator that is being replaced, assesses, in part, a PHA's efforts to involve residents to improve the community in which they live. Beyond this specific aspect of community involvement, it is likely that a well managed PHA, the general goal of PHMAP, is a positive community asset and a good neighbor. The recognition of outstanding individual community contributions and achievements by PHAs is important and receives attention from HUD in special ceremonies rather than in PHMAP, which focuses on the overall, day-to-day management aspects of PHAs.

Comment: One comment felt that there should be a simplified list of indicators to be used for smaller PHAs: vacancy rate; rents uncollected; inspections; and financial management.

Response: The authorizing statute for PHMAP lists seven indicators that must be used in assessing PHAs. This limits HUD's ability to differentiate between large and small PHAs in the indicators used for assessment. However, for indicators #7 and #8, PHAs with fewer than 250 units will not be assessed under these indicators unless they request to be assessed at the time of submission of the PHMAP certification.

Comment: Three comments stated that the proposed rule is more process-oriented and requires the tracking and/or collection of much more data. This is more burdensome and requires additional administrative responsibilities at a time when the level of public housing operating subsidy is being reduced.

Response: Although the Paperwork burden estimate for this rule exceeds the Paperwork burden estimate for the previous rule published on January 17, 1992, a substantial part of that increase results from HUD's recognition that a change in necessary data for assessment purposes will initially require more effort to compile. As was the case for the previous rule, it is expected that as the collection and organization of the data becomes more routine following the first submission, the associated burden will also decrease.

Comment: One comment felt that HUD should look for ways to eliminate regulations, not just change regulations.

Response: In the past year, HUD has undertaken an extensive effort to reinvent and streamline all of its rules, and hundreds of pages of regulations have been eliminated. The statute authorizing PHMAP requires its implementation by regulations, and HUD must follow this Congressional mandate.

Comment: Two comments stated that a continuing concern is that making the annual grade in PHMAP may become the true mission of many PHAs.

Response: HUD does not consider the prospect of PHA's refining their management practices to become high performers under PHMAP year after year to be distressing. The purpose of PHMAP is to assess the quality of PHA management, and in implementing this program, HUD intends for the score

VOL 61 ISS 251 DE 30 1996 UMI

achieved to be a valid measure of performance. To address situations in which the PHMAP score poorly corresponds to the actual conditions at a PHA, the rule permits the State/Area Office, in exceptional circumstances listed in the rule, to reinstate any review to address particular deficiencies, and to deny or rescind incentives or high performer status, even though a PHA has satisfied all of the indicators for high or standard performer designation. The purpose of this provision is to prevent PHMAP from being an empty, pro forma exercise.

Comment: One comment believes that PHMAP is but one way to evaluate a PHA's management and ultimately, the quality of its stock. PHMAP is not a comprehensive measure of PHA quality and it is too process oriented. Greater emphasis should be placed on key results which more accurately equate with the quality of the housing stock.

Response: The observation in this comment does not quite correspond to the parameters and purpose of PHMAP as established under the authorizing statute. PHMAP evaluates PHA management performance using seven indicators that are made mandatory under the statute, which permits the Department to use up to five additional indicators. These requirements establish limits on what must and what may be used to assess the quality of a PHA's management, and not the quality of its housing stock. The statute explicitly requires HUD to take into account the difficulty of managing developments that result from their physical condition, indicating the Congressional determination that, to some degree, the quality of the housing stock is independent of the PHA's management capability. HUD is obliged to implement PHMAP in a manner consistent with the statute, and attempts to do so in a manner that will produce a valid and reliable result. As the Department hopes this rule demonstrates, HUD is, and will continue to be, receptive to the refinement of PHMAP based upon its administrative experience and the input it receives from PHAs.

Comment: One comment encourages HUD to publish handbook guidance well in advance of the effective date of the new rule so that PHAs may make any planning, record keeping or operational changes required to ensure compliance and performance.

Response: The Department anticipates the issuance of a revised PHMAP Handbook 7460.5 and a new confirmatory review guidebook prior to the applicability date of the new rule.

Comment: One comment stated that the term "approved, funded, on-schedule annual modernization program" is defined in the rule and in the preamble under the discussion of indicator #1. But the term is not used in indicator #1. Is it intended that the term be applied to the exemption for "vacant units undergoing modernization?" If so, it should be made explicit. Is it intended that the term be used in connection with indicator #2? If so, then this term is contrary to the rule's discussion of indicator #2, which includes only CIAP and CGP.

Response: The comment is noted, and the definition for "approved, funded, on-schedule annual modernization program" is superseded by the definition for "vacant units undergoing modernization." The definition in this rule, which includes the Hope VI Program, the Vacancy Reduction Program (VRP), lead based paint risk assessment funding (1992–1995) and any successor program to the CGP or the CIAP, applies to indicators #1, #4 and #5, as appropriate. In addition, the Department intended for all modernization programs to be assessed under indicator #2. For this reason, lead based paint risk assessment funding will be assessed under all five components of indicator #2. However, due to the design of the Hope VI and the VRP, these program areas cannot be assessed under components #1 and #2 under the modernization indicator. Therefore, in completing a PHA's assessment for indicator #2, the State/Area Office will only examine components #3, #4 and #5 for the Hope VI and the VRP. Appropriate language has been added to indicator #2 in the new rule. A similar comment was made with respect to indicators #4 and #5, and this response is also applicable to those two indicators.

Section 901.10 Indicator #1, Vacancy Rate and Unit Turnaround

Component #1, Vacancy Rate

Comment: Many comments agreed with the changes proposed for the indicator and commended the Department for making the indicator a more representative measure of vacancies. Six comments commended the Department for allowing an adjusted vacancy rate to be used for grades above a C. Seven comments stated that this is a much better way to compare vacancy indicator grades and scores since all PHAs will be compared on the same basis. Several comments indicated that this is a more accurate measure of good management and concurred with the proposed rule combining these two indicators whereas currently they are separate. One comment stated that the changes made to indicator #1 are much more equitable than the current indicator requirements and two other comments indicated agreement with adjusting the vacancies by the conditions listed in the rule and with the grading scale for the vacancy rates. Three comments expressed strong support for the change indicating that it will allow HUD to more accurately judge a PHA's vacancy rate.

Response: The Department agrees that, since the adjusted vacancy rate is derived from valid exemptions, PHAs should be able to achieve grades above a C level based on an adjusted vacancy rate. The Department feels that the new component #1 will provide a more representative picture of PHA vacancies than the current indicator. The Department also agrees with the assumption that if a PHA scores C or above in the vacancy component it should not have a problem with turning around vacant units, and that combining current indicators #1 and #5 into the new indicator #1 is a correct decision.

Comment: Four comments stated that the new vacancy indicator is really a measure of the number of vacancies weighted equally to the turnover rate. The comments indicated that the new weighting of turnover will penalize PHAs that have successful programs for families that move out of public housing. Two comments stated that the proposed rule rewards process over product and activity over results, and that the proposal is far more process-oriented and less results-oriented than the present system for counting vacancies. The proposed rule states that vacancy rates should have greater significance than unit turnaround but proposes a scoring system that requires greater reliance on unit turnaround and unit turnover than on the number of units vacant at the end of each month. Eight comments indicated that a 12 month average of the number of units that are vacant at the end of each month should be used. This is normally what is expected in any rental market and the proposed method is too complicated and requires too much staff time to calculate. Another comment stated that the proposed method places as much emphasis on turnaround time as on actual vacancies and suggested using a twelve month average of the number of vacant units on the 10th day of each month to avoid the problem.

Three comments indicated that the new vacancy indicator would not reward actual occupancy. Instead of measuring the number of units vacant at the end of each month, it measures the number of units leased each month and the amount of time required to lease the

units to arrive at a vacancy rate which converts to an occupancy rate. The current method is an honest way to define occupancy levels. Computing the vacancy rate by calculating the ratio of unit vacancy days to unit days available places greater reliance on unit turnaround. It requires PHAs to calculate the vacancy days for all units leased in a given month plus the vacancy days for all units remaining vacant at the end of the month, divided by the total unit days available for occupancy that month.

Six comments stated that this method calculates vacancy days, which is a function of turnover, rather than the actual number of vacant units. For example, if two PHAs have the same number of units and turnaround time, but one has higher *turnover*, the latter will automatically have more vacant days than the former. The vacancy rate should be the average vacancy rate over the past twelve months. Three comments indicated that the current indicator allows PHAs to answer the question, "What is your vacancy rate?" The answer is, "Our vacancy rate is the number of units vacant at the end of the month compared with the number of units available for occupancy." Two comments stated that if a PHA has a high turnover rate because it is moving residents out for private lease-up or home ownership, this too, should be an allowable adjustment to the vacancy rate because PHAs with high move-out rates are adversely affected even though they may have no control over the reasons for the high move-out. Two comments suggested that the snapshot picture be retained.

Three comments indicated that the proposed rule penalizes high turnover rates and provided the following examples: PHA with a high turnover rate but the same unit turnaround time would get a higher vacancy rate than a PHA with lower turnover rate (same unit turnaround time): PHA "Y" with 100 units, and 20 units vacated and filled during the year (10 days average turnaround) would have a .55% vacancy rate; and PHA "Z" with 100 units, and 40 units vacated and filled during the year (10 days average turnaround) would have a 1.10% vacancy rate. A PHA with a high turnover rate and a lower unit turnaround time could get a higher vacancy rate than a PHA with lower turnover rate and a higher unit turnaround time: PHA "A" with 100 units, and 60 units vacated and filled during the year (20 days average turnaround) would have a 3.2% vacancy rate and a B grade. PHA "B" with 100 units, and only 30 units vacated and filled during the year (35 days average turnaround) would have a 2.8% vacancy rate and an A grade, even though it averaged a higher (35 vs. 20) vacancy turnaround rate. There is no basis for rewarding or penalizing a housing authority based on a higher or lower percentage of residents moving out during a year. Turnover rates depend on a variety of factors, many beyond the PHA's control. Some factors are: availability of alternative affordable housing; self-sufficiency programs; resident demographics; eligibility screening and lease enforcement; and HUD required transfers.

Response: The Department agrees that by using a methodology that takes into account circumstances and actions that impact on the occupancy/vacancy status of a unit over the entire course of the PHA's fiscal year, PHAs with high turnover rates will have more vacancy days than comparable PHAs with low turnover rates, assuming that the turnaround time is the same. The Department disagrees, however, with the conclusion that this makes the proposed methodology less useful than one based on taking a snapshot, either on a one-time basis, as is currently the case, or on a monthly basis over a year's time as suggested in some comments. The "snapshot" approach may be easier to implement but it grades the PHA performance based on a single-day measurement that may or may not be representative of the PHA performance in this area over the entire period of time being assessed. If an average based on 12 snapshots is better than one snapshot, then an average based on 365 snapshots will present the most accurate picture.

It is incorrect to state that the measure of vacancies and the measure of turnaround time have been given equal weight in the development of this indicator. The new rule combines the vacancy indicator and the turnaround indicator of the current § 901 into one single indicator that has two components. The first component (with a weight of x2) measures the vacancy rate and, if applicable, the progress a PHA has made in reducing the vacancy rate. The second component (with a weight of x1) measures turnaround time. Because the vacancy rate is a clear manifestation of management effort and reflects the essence of a PHA's mission, it has been weighted more heavily than the unit turnaround component. In addition, the proposed rule would use the second component only when a PHA scores below a C on the first component.

The proposed methodology provides ample opportunities for a PHA to adjust its vacancy days for turnover of units due to reasons such as modernization or that are due to circumstances and actions beyond the control of the PHA, such as court-ordered or HUD-approved desegregation efforts. A PHA also has the option of requesting a modification to the calculation of this component that would take into account any other special factor, such as self-sufficiency activities or security measures implemented by the PHA, that may contribute to a higher than normal turnover of units. The indicator should not be a deterrent or penalty to PHAs that have successful programs that encourage residents to move out of public housing to private market housing opportunities. Success builds upon success and a PHA that is able to work with residents and prepare them for home ownership or private market rental units should not have difficulties in attracting applicants for units that have been vacated.

The Department believes the proposed method of calculating this component to be the most accurate measure of a PHA's performance in this area. Also, contrary to some comments, the proposed method of calculation is the method commonly in use in the real estate industry.

Comment: One comment stated that the proposed rule requires more calculations than the current method and also requires tracking each unit for potential adjustments. This will be difficult for many PHAs and for HUD field staff to verify. The current occupancy rate calculation method is preferred. Three comments indicated that the indicator will take hours more in record keeping. HUD reduces PFS and modernization monies, but expects more and more in reports and record keeping. The proposed method is cumbersome, inconsistent with other HUD definitions for determining vacancy, and increases the difficulty level for calculating vacancy rates.

Two comments stated that the new method of calculating the vacancy rate is far more process-intensive than the previous methods. PHAs should be given the opportunity to take a simple average based upon end-of-month vacancies rather than using the far more complex calculation offered in the proposed rule. Two comments stated that it is poor management practice to calculate vacancy/occupancy percentages one way for the PFS and another way for a management assessment system. Two comments agreed with the expansion and clarification of the units that can be exempted from the adjusted vacancy rate and indicated that the nine

exemptions should remain consistent with reporting under the PFS.

One comment indicated concern with the need to maintain data on the cause of each vacancy, as in the examples presented in the preamble. For large PHAs the data collection and maintenance becomes very difficult. Maintenance of this data is doable, but HUD needs to recognize the impact on PHA data systems if the various categories for adjustment are revised from time to time.

Three other comments stated that this level of evaluating vacancies would be burdensome for large PHAs. To track the actual vacancy rate and have the ability to also accurately calculate an adjusted vacancy rate would require significant alterations to the mainframe computer system programs as well as to standard operating procedures, and large PHAs need ample time to implement these changes. One comment stated that the new component requires that PHAs analyze each vacant unit and in the absence of readily available industry software, this process could prove burdensome for large PHAs. Another comment stated that if HUD retains the methodology of the proposed rule it should provide PHAs with software that do the bulk of the calculation for them.

Response: The Department does not believe that the information collection requirements for this indicator represent an undue burden on PHAs. Most of the data elements required to determine the grade or score for the two components that comprise this indicator are already being maintained by PHAs and used in calculating operating subsidy eligibility under the PFS or used for reporting requirements of other programs. In fact, if PHAs have been maintaining turnaround time data accurately under the previous interim rule, no new data collection will be required, just a change in computation.

The Department understands that a well-run PHA should have a system in place for monitoring occupied units and vacant units and the duration of vacancies. Beyond simply being good business practice, PHAs must monitor turnaround time, both to evaluate the effectiveness of their maintenance and marketing and leasing efforts, and to develop information for the current PHMAP indicator on vacant unit turnaround time. This should pose no more onerous burden on large PHAs than on smaller institutions, and in fact, would probably be even more important to a large PHA, where remote monitoring of large-scale activities is the norm.

In response to the suggestion that HUD should provide software for this purpose, HUD has no plans to develop additional software at this time. In addition, as a matter of policy, HUD cannot be in a position of competing with private-sector software developers.

To a significant extent, the Department has also used definitions and methodologies in this section that are the same as those used in other programs. An example of this consistency is that the adjustment for units vacant for circumstances and actions beyond the PHA's control as defined in § 901.1(a)(9) is the same for both PHMAP and PFS. The Department will issue guidance to PHAs on how to use existing sources of data to calculate each component of this indicator.

Comment: Three comments stated that if HUD wants PHAs to calculate vacancy loss, then HUD should adjust the turnaround indicator to reflect that goal, rather than throwing out the existing common sense method of calculating vacancies. Three other comments indicated that HUD's justification for the new vacancy indicator is the need to calculate vacancy loss like the private sector does. The private sector can estimate dollar value of vacancy loss, but PHAs cannot because PHAs do not realize rental income until the unit is rented. The private sector can "go down their waiting list" or advertise in the paper to pick the tenant who can move in the day the unit is ready and PHAs can't do that. The information can be useful, but the private sector uses it to determine budgets, not to determine vacancy rate.

Response: The Department disagrees with these comments. Neither the current vacancy indicator nor the new vacancy indicator were developed to be a measure of rental revenue lost because of units becoming vacant. The vacancy indicator is not a measure of financial performance, but a measure of the ability of the PHA to maximize occupancy and minimize turnaround time within certain constraints recognized by the Department.

Comment: Several comments addressed the changes in the grading scale. One comment indicated that a vacancy rate of 3% for a grade C is too stringent. Another expressed support for the change from 1% to 3% vacancy rate in order to achieve an A grade, indicating that it makes sense with the national average vacancy rate of 7%. Two comments stated that the current 99% vacancy rate for an A is valid. Another comment expressed concern with the change indicating that a vacancy rate of 7% would yield a C grade and still exclude the unit turnaround component from consideration. One comment stated that it is not clear if the 3% vacancy threshold for not having to report unit turnaround was retained or not. Another comment stated its support for the provision that permits PHAs to choose between adjusted and actual vacancy rate calculation, but suggested that HUD retain the previous interim rule's alternative grade C for a reduction in vacancies of at least 30%.

One comment expressed support for the option that allows a PHA to achieve a C grade if it reduced its actual vacancy rate by at least 15 percentage points within the past three years and has an adjusted vacancy rate of between four and five percent. It also indicated support for somewhat lower grades for PHAs making slower progress. Another comment stated that a PHA can improve by at least 15% and still receive a lower grade by not matching the adjusted vacancy rate requirement.

Response: The Department agrees that a vacancy rate of 3% for a grade C is too stringent and changed that in the proposed rule. The Department believes that the new grading scale is reasonable and takes into account the national average vacancy rate and also takes into account the new method of calculating the vacancy rate, which is more representative of the true performance of PHAs in this area over the period of time being assessed.

The Department is also proposing a different threshold for not having to report unit turnaround. The second component, vacant unit turnaround time, will only apply to PHAs that score below a C grade on the first component. PHAs can achieve a C grade by meeting one of the following conditions: the PHA has an *actual* vacancy rate of greater than 5% and less than or equal to 7%; or an *adjusted* vacancy rate of greater than 3% and less than or equal to 4%; or the PHA reduced its actual vacancy rate by at least 15 percentage points within the past three years and has an adjusted vacancy rate of greater than 4% and less than or equal to 5%.

Regarding the threshold for progress in reducing the vacancy rate that applies to a C grade, the Department changed it from 30% to 15 percentage points. The Department agrees that it is important to recognize and reward significant progress. It also understands that the grade relief should not defeat the balance of the grading scale. The grading scale already provides for a somewhat lower grade (a D) for PHAs with adjusted vacancy rates between four and five percent that do not achieve the 15 percentage points decrease in the actual vacancy rate.

Comment: One comment requested that the term "Reduced Actual Vacancy

Rate in Previous 3 Years" be clarified in order to indicate if the fiscal year being assessed under PHMAP is the third year of that 3-year period or if the 3-year period is prior to the PHMAP year being assessed.

Response: The Department agrees with the comment and the new rule has been changed to state that the fiscal year being assessed is the third year of that three year period. An example will be provided in the revision to the PHMAP Handbook 7460.5.

Comment: One comment stated that the idea of measuring a PHA's performance over the previous three years seems to be unfair and generate inaccurate statistics because of diverse variables that would not remain constant over the years and suggested that each year be measured against its previous year. Another comment indicated that the PHA does not currently have a three-year history of the daily vacancy rate so it must have time to collect this data. It proposed to use the average rate on the last day of each month until it can get the actual daily and adjusted rates. One other comment indicated that it would be extremely difficult to track vacancy days and unit days available for the previous three years and requested that a more accurate and equitable method of calculation be sought so that comparison statistics can remain accurate and consistent.

Response: The Department agrees that due to the change in the method of computation, vacancy rates generated under the two systems cannot be compared unless an adjustment is made to the statistics for the previous two years. Only those PHAs interested in using this grading option (progress in reducing the vacancy rate during the previous three-year period) will have to recompute the vacancy rate for the two years prior to the year being assessed, using the new methodology. Most of the data needed for this will come from the records developed by the PHA to comply with the PHMAP reporting requirements for the current unit turnaround indicator.

Comment: One comment suggested that the five grades be condensed into a "satisfactory" rating (2% adjusted vacancy rate or below); "adequate" rating (2–4%); and "unsatisfactory" rating (over 4%); the five grades could be used as a mechanism for setting goals for troubled PHAs but need not be required for all PHAs.

Response: The Department has some sympathy for the suggestion that the number of evaluation levels be reduced and simplified, but we do not believe it appropriate to address that simplification issue at this time. The biggest reason for maintaining the larger number of evaluation categories is that beyond the pass/fail differentiation, the Department expects to be able to use PHMAP scores, and to some extent, individual indicators, to identify PHAs where performance is clearly superior and worthy of emulation, and at the other extreme, cases where performance indicates a need for the Department's intervention in PHA operations. Five or six "grades" may or may not be the perfect model for this kind of evaluation, but the existing structure appears to be working to date, and in the absence of demonstrable benefits of alternate approaches, HUD does not see a need to revisit this issue at this time.

Comment: One comment stated that it appears to be impossible for PHAs to obtain a grade of D or F if the adjusted vacancy rate is greater than 6%. This is not a true grading system and makes it impossible for PHAs with a high vacancy rate to realize any points for improvement. It would be unfair to compare a PHA with an older housing stock to a PHA which may have newer stock or modernized units.

Response: The comment is partially correct that under the proposed rule an adjusted vacancy rate greater than 6% will result in a PHA receiving a grade of F. If a PHA has an adjusted vacancy rate greater than 6% and less than or equal to 7%, and has reduced its actual vacancy rate by at least 5 percentage points during the past three years, then the PHA would get an E instead of an F. The grading system is not unfair to high vacancy PHAs because it does allow for adjustments in recognition that some types of vacancies are beyond the control of the PHA.

Comment: One comment stated that the actual vacancy rate does not exempt units occupied by employees, units used for resident services and units undergoing modernization. PHAs are penalized by an increase in the actual vacancy rate when these units are not exempted from the actual vacancy rate. This creates the potential for PHAs to eliminate needed resident services by eliminating space for these services in an effort to decrease the vacancy rate. Most PHAs will be prevented from ever using the actual vacancy rate if these units are not exempted.

Response: The Department disagrees with the comment. The rule has been clarified to indicate that units approved for non-dwelling use, employee occupied units and vacant units approved for deprogramming will be completely excluded from the computation of this indicator. Regarding the units undergoing modernization, PHAs are not penalized because these units can also be excluded under the adjusted vacancy rate computation. The grading scale for the vacancy indicator allows PHAs to get all possible grades, including an A, under the adjusted vacancy rate option. There is no real incentive for PHAs to cut back on resident services by eliminating space for these services in an effort to decrease the vacancy rate.

Comment: One comment stated that the increase in difficulty for calculating the vacancy rate will increase the cost of a PHA's annual audit.

Response: The Department believes that the increase in scope of work would not represent a substantial increase in the cost of the audit and that the additional expense, if any, will represent a good investment for the PHA. Since the Department reimburses a PHA for its audit costs, it will reimburse a PHA for any additional audit costs resulting from changes to any of the indicators.

Comment: One comment stated that the proposed calculation counts vacant units *both* during the month and at the end of the month, regardless of reoccupancy during the 30 days.

Response: The Department disagrees. The proposed calculation adds the number of vacant units each day of the year (adjusting for valid exemptions) and divides by the number of unit/days available.

Comment: Three comments proposed that PHAs should be able to choose either the current method or the new method for computing vacancy rates. One of the comments stated that there are currently two methods for calculating the vacancy rate and it seems a bit arbitrary to abolish this flexibility that PHAs utilize to reduce their paperwork requirements. Form HUD–51234 already is a requirement that must be submitted by PHAs and to require a duplication of effort for PHMAP purposes is contrary to good management practices. The comments recommend the use of form HUD–51234 or the new calculation methodology at the discretion of the PHA. This would enable PHAs to retain flexibility in the manner in which they choose to determine the vacancy rate without imposing any additional paperwork burden unless the PHAs elect to do so.

Response: While the Department favors maximum local flexibility, it is impractical to allow PHAs to be able to pick and choose among different methodologies for developing the data for this most important indicator. Allowing that would make it impossible to compare the vacancy rates for different PHAs (and even for the same

PHA over a period of time). The Department believes very strongly that all program participants need to be evaluated under the same basic procedures, especially the same definitions. To do otherwise is to invite complaints that the process compares apples with oranges; the process can't afford to permit the PHAs to elect whether to present "apples or oranges" for evaluation.

Comment: One comment stated that the Department should give consideration to reducing the vacancy standards for a period of time due to the One Strike policy. Improved screening standards will increase the amount of time to process an application. If the Department is seriously concerned about quality of life in PHAs, give the occupancy people time to do their jobs efficiently.

Response: The Department agrees that the implementation of the "One Strike and You're Out" policy and stricter security measures may temporarily increase vacancy and turnover rates at some PHAs. Adequate planning in the implementation of the security measures should help PHAs reduce these temporary problems. After the initial stages, these programs will have a positive impact on the vacancy and turnover rates of PHAs due to the increased security and stability of their public housing communities. Because these situations will greatly vary from PHA to PHA, it would not be proper to make any changes, even temporary ones, to the grading standards of the vacancy indicator. Instead, PHAs that believe that the implementation of stricter security measures related to the "One Strike and You're Out" policy negatively impacted their vacancy rate may submit a modification request along with their PHMAP certification.

Comment: One comment stated that because of the low weight (x1) of the turnaround component relative to the vacancy rate component, the turnaround component is almost unnecessary since it can't change the grade of the indicator in a significant way.

Response: The Department disagrees with the comment. Although the component would not have a big impact in determining the final grade of the indicator, this is in accordance with the position of the Department regarding the interrelation and relative weight of the two components. Because the vacancy rate is a clear manifestation of management effort and reflects the essence of a PHA's mission, it has been weighted more heavily than the vacant unit turnaround component. In addition, the new rule uses the second component only when a PHA scores below a C on the first component. The Department believes that if vacancies are at a C level or above, the PHA does not have a problem with turning around vacant units. It should be noted that the component would have at least a minor impact in the final grade of the indicator (may increase or decrease one grade level) and may add up to 6.66 points to the total PHMAP score.

Comment: One comment stated that the proposed rule requirement for vacant units undergoing modernization is inconsistent with scheduling adjustments that HUD permitted in the past in recognition of the realities that some PHAs face in soliciting bids from contractors for modernization funded work. The proposed time requirement would punish a PHA with few vacancies that may need to "stockpile" vacancies to accumulate sufficient volume of work to obtain competitive bids from contractors. It is recommended that all vacancies covered by a funded, on-schedule modernization program be excluded from the vacancy rate calculation.

Response: The Department disagrees because the small purchase procedure is a viable option for PHAs with few vacancies to accomplish modernization costing less than $100,000 (or a lesser amount as specified by State law). Under this method, PHAs solicit quotes from an adequate number (normally, no less than three) of sources and can award the contract to the offeror with the lowest quote. This method is significantly less time consuming than the normal sealed bid procedure where formal advertising is involved. It is also noted that contractors can be procured for utilization on an as-needed basis, allowing them to begin work immediately.

Comment: One comment stated that the proposed definition of and calculations concerning a vacant unit undergoing modernization seems to be counterproductive; a more equitable way of calculating vacant days would be to count only those vacant days between the completion of the modernization work and the day of tenant move-in or reoccupancy.

Response: The Department disagrees with the comment regarding the adjustment for vacant units undergoing modernization. The adjustments provided in the proposed rule are either activities that the Department wishes to support, such as modernization, or represent circumstances or actions that the Department considers to be beyond the PHA's control. In such cases where these definitions apply to vacant units before the units are included in a HUD-approved modernization budget, the units may be exempted for those other reasons. If the units were vacant prior to being included in the HUD-approved modernization budget for other than the exempted reasons in the rule, the vacancy days accumulated prior to the unit being included in the HUD-approved modernization budget must be included in the vacancy rate calculation as non-exempted vacancy days.

Comment: One comment stated that not excluding the vacancy days that accumulated prior to a unit being included in the HUD-approved modernization budget from the calculation of this indicator could result in substantial dollars wasted to make vacant units temporarily habitable until such time that a modernization plan has been approved by HUD. Dollars invested in temporary major rehabilitation of units located in buildings subsequently placed under modernization are lost because major replacements cannot be salvaged during/after modernization. In order to not provide PHAs with an unintentional PHMAP performance measure incentive to waste limited HUD dollars, vacancy days for units in a building included in a modernization budget which was approved by HUD during the PHMAP assessment year should be exempt regardless of whether or not some units in the building were vacant prior to HUD's approval of the plan.

Another comment recommended excluding from the vacancy calculation units that a PHA has scheduled to modernize but not yet included in the modernization budget, as well as vacant units that have been modernized and are scheduled to be reoccupied. These vacant units should be excluded because the vacancies are part of the normal modernization process and are not the result of poor performance. For example, this PHA has completed modernization of hundreds of apartments for people with mobility impairments, but HUD has not permitted us to rent accessible apartments to non-disabled families. These vacancy days should not be included in the vacancy rate calculation.

Response: The Department disagrees with the comments. The issue of whether to expand the preferential treatment for units undergoing modernization to include units scheduled for modernization but not yet under a modernization budget (for example, units scheduled for modernization in the second year of the CGP Five Year Plan) was discussed as part of the Vacancy Rule negotiated rulemaking proceedings but not adopted. The Department was part of

the consensus that developed the definition of vacant unit undergoing modernization and believes it to be appropriate. For the same reason, the Department does not believe that an adjustment should be given for the time between completion of modernization work and reoccupancy. Once a unit has been modernized, there is no reason to allow an adjustment for the time needed to lease the unit. Marketing and leasing of units is a normal function of a PHA.

The Department also disagrees with the second part of the comment. HUD does not control whether or not a PHA can admit non-disabled applicants to a unit designed for the disabled. If a PHA cannot lease units with accessible facilities to the persons with disabilities, they are free to lease those units to non-disabled applicants (see Handbook 7465.1 REV–2, paragraph 5–2c). The cited handbook urges that a PHA facing such a circumstance "* * * include a provision in the lease requiring the family to move if someone needing that size specially designed unit applies and there is an appropriate unit available for the family originally admitted."

Comment: One comment indicated that the PHA has a large number of competing subsidized units, and certain bedroom sizes and certain handicapped units are very difficult to rent to residents that are actually eligible for them. Another comment stated that the indicator does not accurately reflect the capabilities of a PHA to manage its units; such factors as market conditions greatly impact a PHA's score in this area. One other comment indicated that the rule does not provide enough information on what may be acceptable under changing market conditions and it does not define what constitutes "aggressive marketing and outreach measures" or provide standards by which such goals should be reached or judged.

Response: The Department feels that the new rule adequately addresses the issue of marketing difficulties at § 901.5 and § 901.10(b)(2)(iii). An adjustment may be made to a PHA's vacancy days because of market conditions. In order to justify the adjustment, the PHA will need to document the specific market conditions that exist and document marketing and outreach efforts. The PHA will need to describe when the downturn in market conditions occurred, the location(s) of the unit(s) effected, the likelihood that these circumstances will be mitigated or eliminated in the near term and why the market conditions are such that they are preventing the PHA from occupying, selling, demolishing, rehabilitating, reconstructing, consolidating, or modernizing the vacant units. The Department has provided examples of what constitutes changing market conditions in 24 CFR § 990.102 and will issue further guidance to PHAs on this circumstance in the revision of the PHMAP Handbook 7460.5.

Comment: One comment stated that the grading system for this indicator penalizes PHAs that are actively modernizing their housing stock. To require lower vacancy rates for PHAs actively improving their housing stock through modernization than for PHAs not undertaking the improvements is egregious at best. The scoring of actual and adjusted vacancies appears to be unnecessary since the adjusted vacancy rate only occurs for authorized reasons as defined by HUD. To allow for adjustments to be made and then apply a different scoring criteria is illogical and inconsistent.

Response: The Department disagrees with the comment. The proposed methodology provides ample opportunities for a PHA to adjust its vacancy days for turnover of units due to reasons that are accepted and supported by the Department such as modernization or are due to circumstances and actions beyond the control of the PHA, such as court-ordered or HUD-approved desegregation efforts. A PHA also has the option of requesting a modification to the calculation of this component that would take into account some other factor that is causing frequent turnover of units at the PHA. The Department believes the proposed method of calculating this component to be the most accurate measure of a PHA's performance in this area.

Exemptions

Comment: One comment stated that adjusted vacancies help a poorly performing PHA score better under the proposed rule, but generally will do nothing to assist high-performing PHAs because it is doing the things necessary to prevent these types of vacancies. A high-performing PHA with just normal vacancies is hurt by the proposed rule. Another comment stated that the proposed scoring range is looser and, therefore, objectionable and there are more exemptions. Vacancies have decreased since the advent of PHMAP, just because HUD is grading PHAs and they are concentrating on keeping vacancies low. HUD should not reduce its standards simply to satisfy PHAs who aren't getting the job done. There should be no changes to the current grading standards. HUD is going in the wrong direction by making PHMAP high-performance status so easy to attain as it compromises the credibility of the evaluation process.

Another comment stated that if a PHA chooses an adjusted vacancy rate, it has the potential to exempt vacancy days in nine different categories, some of which are very broad. Under this scenario, it is conceivable that some PHAs will assume responsibility for few vacancy days. One other comment stated that most exemptions are easy to determine or validate except for units uninhabitable "for reasons beyond the PHA's control." Two other comments indicated that "reasons beyond the PHA's control" is vague and may indirectly be within the control of the PHA. Because such an adjustment should be the exception rather than the rule, it should be eliminated. Such units fall into a murky area that some poorly run agencies may be tempted to exploit. It may be difficult to demonstrate that the conditions leading to condemnation by the health department were either within or outside of a PHA's control.

Response: The Department believes that the adjustments are not a function of whether a PHA is a high or poor performer, but a recognition that there are some circumstances and actions that impact on vacancies that are beyond the control of the PHA, such as a natural disaster, or that should be supported, such as modernization. The Department understands that there are often good reasons for unit vacancies, and that a blanket appraisal of unit vacancies as a bad condition glosses over some very real and explicable conditions that affect management of low-income properties in the real world.

The Department believes that it has defined the categories of vacancies completely enough that most of a PHA's vacancies can be clearly identified, and that a PHA has a fair opportunity to explain its situation. Where some number of unit vacancies cannot be adequately explained in terms of the acceptable or allowable categories, the PHA will be held strictly accountable, but where the unit vacancies are within the parameters established by HUD, under the negotiated rulemaking for the PFS vacancy rule, for example, the Department does not believe it fair or reasonable that the PHA should be penalized. The Department agrees that the exemption categories, as presented in the proposed rule, need some clarification and the new rule reflects that. The category mentioned by some of the comments is duplicated in the proposed rule and that duplication will be eliminated in the new rule. The exemptions will remain consistent with the nine exemption categories used under PFS.

Comment: Two comments stated that the language for exemption of units vacant for circumstances and actions beyond the PHA's control (§ 901.10(9)(v)) provides that insufficient funding for otherwise approvable applications made for CIAP funds (only PHAs with less than 250 units are eligible to apply and compete for CIAP funds) are exempted from the calculation of this component. It further provides that this definition will cease to be used if CIAP is replaced by a formula grant. The comments stated that this subsection should apply to CGP, particularly now with the budget reductions. Also, one of the comments stated that vacant units covered in proposed unit demolition and disposition applications should be excluded, even if the applications have yet to be acted upon by HUD.

Response: The Department disagrees and has retained this language in the new rule. The provisions referred to in the comments were taken directly from the new Vacancy Rule published in the **Federal Register** on February 28, 1996 (61 FR 7586). The rule incorporated recommendations of a regulatory negotiation advisory committee. The committee did discuss the issue of providing relief to PHAs (and RMCs) because of insufficient funding for the CIAP and CGP programs. The relief was limited, however, to insufficient funding for an otherwise approvable CIAP application (or failure of a PHA to fund an otherwise approvable RMC request for CGP funds from its PHA). The CIAP is a competitive program with insufficient funding to cover the needs of all approvable funding applications. When the funding program is competitive, a PHA either gets the funding applied for, or it doesn't. However, since the CGP is a formula grant program, with guaranteed yearly funding, a CGP PHA is better able to plan modernization activities in advance and make crucial repairs as necessary.

The Department does not agree with the suggestion that a PHA be able to assume HUD approval of a pending application for demolition or disposition, if the application has not been acted upon at the end of the fiscal year being assessed. There are significant differences between initiating the application process and receiving approval to dispose or demolish.

Comment: Six comments indicated that vacancy days for units that suffer casualty damage, especially by fire, should not be counted until the unit is turned back over to the PHA after the contractor completes the repairs, if applicable, instead of at the time of insurance claim settlement. It is more logical to include casualty-damaged units in the same exemption status as units undergoing modernization or units documented to be uninhabitable for reasons beyond the PHA's control. The exempted vacancy days for units that suffer casualty damage should change to read, "vacant units that have sustained casualty damage until the unit is ready to be leased or 90 days, whichever is earlier."

Response: The Department disagrees with the comment. The indicator retained the current provision that already allows a PHA to make an adjustment for the period of time during which the claim is being adjusted. Since the fire damage to the unit may be minimal or severe, it would not be appropriate for the Department to allow an automatic additional period of time of up to 90 days to repair the unit. PHAs may request a modification to the calculation if they believe they have a situation (severe damage) that warrants a special adjustment.

Comment: One comment recommended substituting the word "permits" for "requires" in § 901.10(a)(4) which exempts vacant units in which resident property has been abandoned, but only if State law requires the property to be left in the unit. The comment added that when a resident abandons a unit, leaving their personal property therein, many small PHAs have no other appropriate space to store such property during the period of time specified by State law before they can legally dispose of the abandoned property.

Response: The Department does not concur in the recommendation. The point of this provision is to limit the period of time when a vacant unit would be exempted from the vacancy count to the period of time that is beyond the PHA's control. The proposed change would expand the provision to cases in which State law "permits" a unit to remain encumbered by abandoned possessions. HUD believes that the existing language—"requires"—is more specific and more limiting, and is more consistent with the intent of this regulation and similar recent regulatory efforts to reduce unit vacancies.

The Department recognizes that some small PHAs might be inconvenienced by having to store abandoned effects for some period of time before disposition, but we are not convinced that such inconvenience is sufficient to justify holding a residential unit off-line. In most cases, laws on abandonment require that the landlord secure abandoned property, not necessarily that they leave such property in place in anticipation of the abandoning family's possible return. If storage space is at a premium, PHAs have the option of renting a storage locker and either deducting the cost of the rental from the proceeds of the sale of the goods, if any, or collecting that cost from the resident, should he/she re-appear.

Comment: One comment stated that the total available units should not include units that are being modernized as a result of Federally mandated work projects (such as a lead-based paint abatement project) that require that the residents be relocated while the work is being performed. All vacant units as a result of Federally mandated work that requires resident relocation should be considered not available for the period of time that the unit is vacant as a result of the required work, including the use of the unit to relocate residents during the course of the work. Another comment stated that the exemptions should include a category for units held to house residents relocated due to comprehensive modernization. When a large development undergoes comprehensive modernization, it is difficult to quickly find units to transfer all residents; a reasonable time limit should be included in the exemption.

Response: The Department partially agrees with the comment. The proposed methodology for calculating the vacancy rate component already permits a PHA to make an adjustment to its vacancy days for units undergoing modernization. A PHA also has the option of requesting a modification to the calculation of this component that would take into account any other special factors or special circumstances that are out of the control of the PHA. The Department does not agree with the suggestion that PHAs be allowed to adjust their vacancy days for units that are not undergoing modernization but are being held vacant for relocation purposes.

Comment: One comment stated that the exemption of units that are uninhabitable is valuable because it allows troubled PHAs to work on renovating units and getting them back into the occupied inventory without being penalized in the vacancy rate calculations.

Response: The Department agrees that this exemption category is valuable, but it should be noted that the category restricts the exempted units to those uninhabitable *for reasons beyond the PHA's control.* The rule further defines these reasons.

Comment: One comment suggested that the rule should be expanded to

specifically exempt vacant days due to transfer of residents resulting from overhoused/underhoused conditions and when for security reasons, a resident must be relocated under a witness protection program.

Response: The Department does not agree with the comment that the new rule include adjustments for vacancy days associated with relocation of residents because of over/underhoused circumstances. This is a situation that should be dealt with by the PHA as part of its normal operations. Adequate planning on the part of the PHA can greatly reduce the amount of time that the units involved in the transfer remain vacant. Vacancies arising as a result of relocation of residents for security reasons may be dealt with under the modification procedures.

Comment: One comment indicated that the rule should clarify whether the PHA can exclude units used for non-dwelling purposes, for resident services, or that are occupied by PHA employees even if HUD has not specifically approved their conversion for non-dwelling purposes.

Response: The Department believes that the relevant rules are sufficiently clear. PHAs may not use dwelling units for non-dwelling purposes without explicit authorization for the conversion, and there should be no expectation that HUD would permit exemption of vacant units used for unauthorized purposes.

Comment: One comment indicated that it appears that § 901.10(a)(3) requires that to be exempted under this item, units have to comply with the two conditions at the same time. The comment added that the exemption should apply if either one of the conditions: high/unsafe levels of toxic materials or structurally unsound, is present.

Response: The Department agrees with the comment that the exemption should apply when either one of the conditions is satisfied. The new rule has been modified to conform with the Vacancy Rule and the subject items are now covered under §§ 901.10(b)(2)(ii) and (b)(2)(iv).

Comment: Two comments observed that there are several categories of units exempted "off-the-top" when calculating adjusted vacancy rate and turnaround time. The comments indicated that HUD should clarify if the exemption of units vacant for circumstances beyond the PHA's control due to changing market conditions is determined by the PHA (self-certified) or reviewed and decided by HUD as a modification. The comments also requested HUD to clarify the exemption of units vacant for circumstances beyond the PHA control due to natural disasters as to who determines or declares the natural disaster condition.

The comments suggested that, because these are excluded "off-the-top" and using a PHA-certified figure, it is left entirely to the PHA to decide if these circumstances apply, when they apply, and then to subtract them out of the calculation. As currently structured, a PHA could unilaterally adjust the figures they report under "adjusted vacancy rate" and "turnaround time" because they believe that "changing market conditions" have caused their units to remain vacant, or because "insufficient CIAP funding" prevented the PHA from occupying the units. *All* market conditions are "changing" to some extent, and no CIAP-funded PHA ever receives "sufficient funding for otherwise approvable applications" to meet *all* of their needs. The real question is, when are these circumstances sufficiently unique and extensive to impact a PHA's ability to occupy its units?

The comments indicated that these two conditions are so subjective and judgmental that they should be addressed through the regular PHMAP modification process. The comments added that it is inappropriate for an allegedly objective assessment process such as PHMAP to allow the entity being assessed (i.e., the PHA) to exercise this degree of unilateral control over their own assessment. This may help to improve PHA grades, but it does nothing for the integrity of the PHMAP assessment process. One comment requested that exemptions be clearly defined, leaving as little subjective determination as possible to HUD field staff. Another comment requested HUD to clarify if the PHA may exempt the units listed when preparing the PHMAP certification or if it should request a modification.

Response: The Department disagrees with the proposition that the PHAs have free rein to define away unit vacancies as a function of natural calamities and/or market circumstances beyond control. These issues were a major source of discussion during the negotiation of the PFS Vacancy Rule, and the language upon which the negotiated rulemaking committee reached agreement is faithfully reproduced in this regulation. For example, the committee deemed the term "natural disaster" sufficiently precise for purposes of establishing a formula for determining PFS eligibility.

In the case of a claim for exemption under any of these "beyond-the-control" criteria, the PHAs can exclude the units when preparing the PHMAP certification, but HUD intends that the burden of proof should fall on the PHA to demonstrate that it has done what it can to remedy the reason(s) for the vacancy. In the case of a "natural disaster" claim, the PHA would be expected to point to a proclamation by the President or the Governor that the county or other local area in question has, in fact, been declared a disaster area. Where a PHA claims extraordinary market conditions, the PHA will be expected to document the market conditions to which it refers (the examples of changing population base and competing projects are the simplest) and the explicit efforts that the PHA has made to address those conditions.

The Department does not believe that it can draft a regulation that concretely defines and delimits all the circumstances that could affect a PHA's capacity to maintain high occupancy levels, nor does HUD deem it advisable to attempt to do so. The PHAs and their parent State and local governments are in the best position to recognize and appreciate specific local circumstances. In this regulation, and in the supporting handbook guidance, we will expect that PHAs will be able to provide data with which to support their self-certifications, and upon which HUD reviewers can verify such self-certifications, but HUD believes that it would be counter-productive to attempt to define further or to limit the scope of PHAs' capacity to describe their real-world situations.

Comment: One comment proposes that an adjustment factor be added for turnovers delayed because the applicant must give 30 to 60 days notice (by lease) to their current landlord before moving.

Response: The Department does not agree with the proposed addition. PHAs should know local conventions on requirements for notice, and plan their own management activities accordingly, projecting expected turnovers and providing notice to applicants that a unit is expected to become available, for example, far enough in advance to avoid delays in leasing. In those cases where special local circumstances make this unfeasible, the PHA may submit a modification request to the indicator.

Comment: One comment requested guidance on HUD's interpretation of units that are vacant "for reasons beyond the PHA's control" asking whether this category includes items such as termite damage, vandalism, or casualty loss that may not be covered by insurance if there is a high deductible. Two other comments asked if the exemption would include units delayed for reoccupancy as a result of heavy

VOL 61 ISS 251 DE 30 1996 UMI

vandalism since such vandalism is often beyond the PHA's control.

Response: The Department does not consider that the examples cited in the comment fall under the definition of units vacant for reasons beyond the PHA's control. Termite control is similar to other examples of pest control and is considered part of the normal maintenance operations of any standard performance PHA. A well managed PHA should also have insurance coverage for casualty loss (including vandalism) providing enough coverage to enable the PHA to repair the units in case of casualty damage. In cases where special local circumstances may make this unfeasible, the PHA should submit a modification request to the indicator.

Definitions

Comment: One comment stated that the definition of "under construction" as related to force account work should be changed to indicate that force account work has started in the block (as opposed to the specific unit).

Response: The new rule has been changed to indicate that force account work has started either in the unit(s) or in the building(s).

Comment: One comment stated that the term "units available for occupancy" needs to be clearly defined. Some troubled PHAs could argue that a certain number of their units are not available for occupancy because of the extremely poor condition of the units.

Another comment indicated that the term "dwelling unit" is not defined in the proposed rule. It should be defined as a unit that is either leased or available for lease to eligible low-income residents. Another comment stated that the term "available unit" is defined in the preamble and the rule but never used again. Instead, the term "unit" is used in connection to the terms "vacant unit" and "vacancy day". The term "unit days available" is used but no clear connection is ever drawn between it and "available units". HUD should clarify and substitute where necessary.

One comment stated that the term "vacant unit" in the rule is different from the term as used in the preamble. The preamble indicates that "units under lease for non-dwelling uses should not be included..." In other words, these units should be excluded. The rule definition states that units under lease for police substations, social service providers, etc., are treated the same as units under lease to eligible families. If an occupant vacates the unit, it is made available to another social service provider. These units are not available for lease to eligible low-income residents, and as such, should not be treated the same as units which are available in this definition. It should be clarified whether these units will be excluded from the computation of vacant units or if they will be counted as occupied units. Another comment stated that units used for non-dwelling purposes and dwelling units occupied by PHA employees and units used for resident services need to have additional parameters defined. This adjustment may encourage some poorly run PHAs to use these loopholes to get a better adjusted vacancy rate.

Response: The Department agrees that dwelling units used for non-dwelling purposes with HUD approval, employee occupied units, and vacant units approved for demolition or disposition should not be included as available units in the determination of occupancy/vacancy rates and the new rule reflects that change. We also agree with the definition of a "dwelling unit" as a unit that is either leased or available for lease to eligible low-income residents.

Comment: Two comments indicated that while the use of the total unit days available as the denominator in both the actual and adjusted vacancy rates provides a simple procedure, it tends to understate the adjusted vacancy rate. A more accurate calculation would exclude the adjusted vacant units from both the numerator and denominator.

Response: The calculation of the vacancy rate and the use of that rate to determine a given grade for PHMAP purposes has been and continues to be closely linked to the methodology and definitions used in the PFS. Under the PFS, a PHA, when calculating occupancy or vacancy rates, first determines the total number of dwelling units in its inventory (the denominator portion of the rate being calculated). Regulations then permit the PHA to exclude units that have been approved for deprogramming (e.g., demolition or disposition) as they become vacant and units approved for non-dwelling use. These exclusions reflect the permanent nature of the action. Units that are undergoing modernization or are vacant because of circumstances beyond the PHA's control are not excluded from the denominator because these actions are not permanent. By remaining in the denominator, they will continue to be eligible for operating subsidy.

The inclusion of units undergoing modernization or units vacant because of circumstances beyond the PHA's control in the denominator does not make the calculation of the PHMAP adjusted vacancy rate either "more" accurate or "less" accurate. What is necessary is that the two quantities that comprise the rate have a logical relationship to each other. In this case, the relationship is between a PHA's dwelling unit inventory and that portion of the inventory that is vacant during the PHA's fiscal year. Under both PHMAP and PFS, there are incentives to minimize the portion of the inventory that is vacant and both approaches start by looking at the proportion of total vacancies to the dwelling unit inventory. If that rate is low enough, the PHA will maximize its PHMAP grade and its operating subsidy eligibility.

Both PHMAP and PFS also recognize that not all vacancies are "equal." A PHA with a high number of vacant units may still maximize its PHMAP grade and PFS eligibility if it can show that most of the vacant units are undergoing modernization. When one makes an adjustment to the total number of vacancies to exclude those that are undergoing modernization, the PHA is not changing the fact that the unit is still part of the PHA's dwelling unit inventory. This is why the adjustment is only to the numerator portion of the rate and not to the denominator.

Comment: One comment indicated that the term "vacancy day" definition uses the qualifying statement "...unless the vacancy day is exempted for an eligible reason." A "vacancy day" does not lose its status as a "vacancy day" because it is exempted. It simply becomes a "vacancy day that is exempted". This should be clarified because other terms (like "actual vacancy rate" and "adjusted vacancy rate") make reference to it in their definitions. Another comment proposed that the definition for vacancy day should be modified to specify that it pertains to "dwelling" units.

Response: The Department agrees with the comments and the new rule reflects the changes.

Comment: One comment indicated that the term "units available for occupancy" is defined as the number of units identified on a PHA's ACC times the number of days available and asked then what number should be used for units acquired or built during the assessment year? Two comments asked whether occupied units that have not reached Date of Full Availability (DOFA) are counted or excluded until they reach DOFA date.

Response: The definition of number of "units available for occupancy" has been clarified to exclude three categories of units from the number of units identified in the PHA's ACC. The units acquired or built during an assessment year will be added on a prorated basis based on the sum of the

number of days available of each individual unit added to the ACC. The date to be used for determining days available is the date of "End of Initial Operating Period" (EIOP) for the corresponding project. *COMMENT:* One comment stated that the formula used for the calculation of the actual vacancy rate is inconsistent with that used for the completion of PHA financial information and creates the potential for errors when preparing both the PHMAP certification and the annual budget documents. The actual vacancy rate should be consistent throughout all HUD requirements (i.e., form HUD–51234 and budget forms).

Response: The Department agrees that the definitions and methodologies for both PFS and PHMAP should be the same as long as feasible, and the language of the new rule reflects that.

Comment: One comment recommended adding to the list of definitions the terms "move-out date," which is when the PHA regains possession of the unit by the legal expiration of the lease; and "effective lease date," which is the date from which rent is due and payable and all other provisions of the lease are enforceable.

Response: The Department partially agrees with the comment and the new rule includes the definitions. The "effective lease date" is the date when the executed lease contract becomes effective and rent is due and payable and all other provisions of the lease are enforceable. On the other hand, the "move-out date" is the actual date when the resident vacates the unit, which may or may not coincide with the legal expiration of the lease agreement.

Component #2, Unit Turnaround

Comment: Two comments stated that if the turnaround calculation is retained, it should be kept as a separate indicator. Two comments suggested the elimination of this component, because unit turnaround measures efficiency of scheduling maintenance activities, which should be covered by indicators #4 and #5.

Response: The Department disagrees with both of these suggestions. The requirement to measure a PHA's ability to turn around its vacant units is statutory, whether the statutory requirement is carried out by establishing a separate indicator for unit turnaround or by including unit turnaround as a component of a different indicator. The Department agrees with the assumption that if vacancies are at a grade C or above, a PHA does not have a problem with turning around vacant units. The Department also disagrees that unit turnaround solely measures a PHA's efficiency of scheduling maintenance activities. The calculation of unit turnaround also includes down time, which is the time between when the unit is vacated and a work order is issued for the repair of the unit; and lease-up time, which is the time from when maintenance completes the repair of the unit and a new lease takes effect.

Comment: Three comments stated that this component does not accurately measure a PHA's performance in maintaining and leasing their units because nothing in the component shows how many units the PHA had to turn around during the year. These commenters believed the percentage of units that are turned around during the year should be included in the formula. For example, if a PHA has a turnaround time of 20 days, and turned over 45% of their units, and you multiply the turnaround time (20 days) times the percentage of turnover (45%), it equals 20 times 45%, or nine days. You then subtract nine days from the 20 days to equal a turnaround of 11 days. The commenters felt that this is a more accurate measure of a PHA's ability to manage and turnaround per unit. A PHA with a high yearly turnaround is unduly taxed under the current formula.

Response: The Department disagrees with this suggestion because this component is measuring the annual average of time it takes a PHA to turn around its vacant units, rather than measuring the turnover rate, which takes into account how many units the PHA had to turn around during the year.

Comment: Three comments stated that the calculation of unit turnaround includes vacancy days from prior fiscal years, offering little incentive (scoring) under the proposed rule for re-occupying older units. It is recommended that unit turnaround time be capped at one year or 360 days.

Response: The Department disagrees because to do so would result in an inaccurate assessment of a PHA's ability to turnaround all vacant units and would provide no incentive for PHAs to ensure that long-tern vacant units are turned around and reoccupied. In addition, if these units are not included in the calculation of this component, it would result in a skewed perception of a PHA's ability to manage its total maintenance/re-leasing activities. Furthermore, "turnaround time" is a term of art and means all the days that elapse between one tenancy and the next. In the event that unusual or special circumstances exists, a PHA may request a modification to the calculation of this component.

Comment: Two comments feel that this component should be given the same exemptions as in component #1.

Response: The Department agrees and stated so in both the preamble and the regulation of the proposed rule, as well as in the new rule.

Comment: Two comments stated that unit turnaround time should exempt seven days for each PHA-required transfer because one resident has two units tied-up for a week and sometimes longer.

Response: The Department disagrees with this suggestion. Although the total time it took the two units mentioned in the comment to be turned around may have been a week or longer, each unit was turned around on different days, with different individual total turnaround time. The intent of this component is to measure the annual average number of days it takes a PHA to turn around its vacant units, which includes for each vacant unit a total of down time, make ready time, and lease up time.

Comment: Two Comments questioned the definition which states that units are exempted from the vacancy calculation if special conditions exist that are beyond control of the PHA. They inquired whether this definition includes units delayed for reoccupancy as a result of heavy vandalism. They contend that it should because such vandalism is often beyond the PHA's control.

Response: The Department has determined not to specifically include heavy vandalism as part of conditions beyond a PHA's control in this definition since circumstances for individual PHAs will differ. In such a case, a PHA may submit a modification request to exclude such units in the calculation of this component, accompanied by justifying documentation.

Comment: One Comment stated that unit turnaround is assessed based on calendar days rather than working days (25% of the time in 20 calendar days is non-working time). The Commenter contended that it should be based on regular working days since most PHAs cannot afford to pay overtime salary rates.

Response: The Department disagrees and will continue to use calendar days as the standard for all of the PHMAP indicators. Vacancies, rent collection, etc., are not based on working days, and it would be unrealistic to do so. In addition, it is easier to calculate calendar days, especially when using an automated system, due to the necessity of factoring in holidays and weekends when using working days.

Comment: One Comment stated that unit turnaround operates against thorough tenant screening and compliance with city code requirements and, therefore, against the reputation of public housing. These other factors that affect unit turnaround should be considered, including strict lease compliance, terminating residencies or relocating over or underhoused families. The Commenter said that conscientious implementation of HUD policy can create large turnovers, stress maintenance resources and result in poor ratings, while a PHA with no turnovers or even lack of attention to over and under-housing can maintain an excellent rating.

Response: The Department disagrees with this statement because the enforcement of and/or compliance with these factors is part of the ongoing management responsibility of all PHAs. Using good management practices, a PHA should not have a higher turnaround time due to enforcement and/or compliance with the other factors mentioned in the Comment. For example, a PHA that strictly enforces rent collection procedures will typically have fewer evictions since more residents will pay rent in a timely manner. This normally will eliminate the need for evictions or situations where huge balances are built up and the resident vacates as a result of not being able to pay off the indebtedness once court action is taken. If a PHA enforces the lease clauses regarding the upkeep of the unit by occupants through informing the resident of the family's responsibility, providing instruction as necessary, and through inspections, repair, and properly instituted resident charges, units will tend to be in better condition when vacated, thereby reducing needed repairs and subsequently reducing vacant unit turnaround time. Additionally, a lack of attention to over and underhoused residents will affect a PHA's turnover rate, rather than its turnaround time.

Comment: One Comment requested that the Department consider the implementation of an exception to the component whereby, if all but one unit turns over in a timely manner, a PHA can request an exception for a circumstance that was beyond its control. Even one exception can have a big impact in a small PHA.

Response: The Department agrees, and in the event a truly unusual or special circumstance exists, a PHA may submit a modification request that addresses the circumstance(s) beyond its control.

Comment: One Comment stated that assessing this component based on how the PHA fared in the first component is appropriate and the grading is equitable.

Response: The Department agrees, and will continue to examine unit turnaround as the second component under this indicator.

Comment: One Comment stated that if the current turnaround method stays, it should be a measure of when the unit is ready physically for rental and the new tenant has committed to the unit, not necessarily when physical occupancy occurs.

Response: The Department disagrees with the Comment for several reasons. First, there is no guarantee that maintenance staff will start renovations as soon as possible after the unit is vacated. Secondly, there is no guarantee that the first applicant that is offered the unit will accept, thereby leaving the unit vacant for a longer period of time. Thirdly, the Department believes that the definition of turnaround time takes into account the concerns expressed in the Department's first two reasons for disagreeing. A well managed PHA coordinates maintenance and resident selection activities to ensure that as many units as possible are available for occupancy as soon as possible by planning move-ins in advance and notifying applicants as soon as possible. Since the PHMAP assesses management performance, it is appropriate to include the management of the total maintenance/re-leasing activities in this component.

Comment: One Comment (1) disagrees that unit turnaround is an unnecessary component for high performers; (2) feels that this component should be weighted as proposed; (3) believes that an adjusted turnaround time exceeding 30 days is unacceptable performance for any management agency regardless of the vacancy rate; and (4) believes that the need for a turnaround time of 50 days or less to score on this component is a poor standard and would not show the results of what may be clear and significant performance improvements.

Response: The Department disagrees with the first statement because normally, a PHA (whether a standard or high performer) that achieves at least a grade of C for component #1 does not have a problem with turning around vacant units, i.e., unit turnaround is not a factor in a high vacancy rate. The Department agrees with the second statement because the vacancy rate is a clear manifestation of management effort and embodies the essence of a PHA's mission; therefore, it is weighted more heavily than the process-oriented unit turnaround component. It is not clear what the Comment meant in the third statement by "adjusted turnaround time." This term was not referred to in the proposed rule, was not included as a definition, nor was it used in the text of the component. The Department also disagrees with the fourth statement and believes that the range between the grades in this component is equitable for the new rule.

Comment: One Comment stated that the proposed rule provides that the calculation of turnaround time for newly modernized units starts when the unit is turned over to the PHA from the contractor and ends when the lease is effective for the new or returning resident. This provision eliminates a level playing field for measuring the normal turnaround time required by a PHA to restore vacant units to occupancy. The Commenter alleges that this gives unfair advantage to PHAs that did not need to vacate units for modernization and it doubly penalizes PHAs that modernize units for completing modernization on large numbers of units concurrently. The Commenter felt that this component should measure the time it takes PHAs to restore units to occupancy when they vacate for normal move-out reasons.

Response: The Department disagrees with this Comment and believes that this method of calculating unit turnaround does provides a level playing field for PHAs because it provides a standard method that will be used by all PHAs. The Department does not believe that this method of calculating unit turnaround gives an unfair advantage to any PHA, regardless of the scope or type of modernization. A unit that is modernized with the resident in place is not included in the calculation of this indicator because it has not been vacated and subsequently turned around; therefore, there is no advantage to be considered. If a PHA vacates a unit to modernize, the time it took to modernize the unit is not included in unit turnaround time regardless of the number of units completing modernization concurrently. A PHA should be able to plan for move-ins in advance and notify applicants in sufficient time to coincide with the availability of units. This component will continue to measure unit turnaround for whatever reason the unit is vacated and turned around.

Comment: One Comment recommended that average turnaround time be defined as, "the annual average of the total number of turnaround days between the legal expiration date of the immediate past lease (whenever that occurred, including in some previous fiscal year) and the date a new lease takes effect, that being the date from which rent is due and payable and all

other provisions of the lease are enforceable." This allows PHAs to take into consideration the wide variety of local ordinances and State statues that effect the termination of a lease and date the PHA thereby regains possession of the unit.

Response: The Department agrees, in part, with this recommendation, and will change the definition of average turnaround time to read, "...the annual average of the total number of turnaround days between the latter of the legal expiration date of the immediate past lease or the actual move-out date of the former tenant (whenever that occurred, including in some previous fiscal year) and the date a new lease takes effect." This change will take into consideration the wide variety of State and local laws that effect the termination of a lease. By retaining the actual move-out date of the former tenant in the definition, a PHA is not penalized for doing evictions, since in such cases, the resident usually vacates after the legal expiration date of the lease. It should be noted that in the rare case where an applicant executes a lease and moves into the unit prior to the completion of minor repairs, the calculation of turnaround time continues until the repairs to the unit have been completed by the PHA.

Indicator #2, Modernization—§ 901.15

The weight for this indicator has been increased to x1.5 in the new rule to reflect the importance of planning for and allocating scarce modernization funding.

Comment: Ten Comments supported the greater emphasis being given to obligation of funds in relation to expenditure of funds for components #1 and #2.

Response: The Department concurs that by assigning more weight to fund obligation, and less to fund expenditure, the rule largely removes the disincentive for PHAs to accept inferior work products from contractors.

Comment: Two comments recommended that there should be intermediate grades for components #1 and #2 that allow for varying times beyond the required deadlines (e.g., within one year after deadline = C, two years = D, etc.). Interim grades should be adopted to recognize that capacities vary between PHAs and the size of their modernization programs. One method would be: A for 100%, B for 90–99.9%, C for 80–89.9%, D for 70–79.9%, and F for below 70%. If the Department remains adamant that these are too many grades, then at least a grade of C should be available for > 80% but < 100%. Another comment suggested that components #1 and #2 should have more grades (A–F) to allow small amounts of funds to be expended/obligated without scoring an F. For example, 99% of funds obligated/expended would receive a score of B, and 95% of funds obligated/expended would receive a score of C. Another comment recommended that all components should have grades A–F; larger PHAs may have multiple modernization projects being run simultaneously. A problem with just one such project should not be the cause of a failing grade. In addition, another comment recommended that an intermediate grade of C should be created for components #1 and #2 for PHAs that, for example, are one year behind the expenditure or obligation time. Some PHAs may need to accumulate funds over several years in order to fully carry out their strategic plans. Another comment recommended that large PHAs that administer complex, multi-year programs that exceed $100 million in a single year, be given more flexible standards than are proposed for components #1 and #2. The proposed rule refers to the HUD-approved original implementation schedule, and the previous interim rule refers to the HUD-approved revised schedule. HUD should allow a grade of A for these two components where the HUD-approved original or revised implementation schedule allows longer than three years to expend all funds, and the PHA is either in compliance with that schedule or has timely self-executed an extension of the HUD-approved deadline for valid reasons beyond its control.

Response: The Department does not agree with these comments since components #1 and #2 adequately take into account situations where longer times are appropriate in the original implementation schedule or are necessary in the revised implementation schedule due to reasons outside of the PHA's control. The Department believes that it is appropriate to distinguish between time extensions due to reasons outside of the PHA's control (which have no adverse impact on the PHA's score on components #1 and #2) and time extensions due to reasons within the PHA's control (which avoid fund recapture, but have an adverse impact on the PHA's score on components #1 and #2). The Department notes that the need to use leftover funds is a reason for a time extension outside of the PHA's control. In addition, the Department notes that while larger PHAs have more funds to obligate and expend, such PHAs also have greater resources and capacity to implement their programs; therefore, size of program is not appropriate in measuring fund obligation and expenditure performance.

Comment: Six comments expressed concern about how HUD will define "significant findings" for components #3 and #4 in the new rule. This is a very critical issue since HUD staff judgments vary widely from city to city. Significant findings should be really significant. PHAs should have the opportunity to see and comment on the definition.

Response: The Department has revised components #3 and #4 to include a definition of "findings." The Department has eliminated the term "significant" since, by definition, all findings made in connection with HUD monitoring or an audit are significant. Items that are not significant are considered to be observations and are not designated as findings.

Comment: Two comments disagreed that obligation of funds should be weighted higher than expenditure of funds. Often it is easier to enter into a contract than it is to complete one. Emphasis should be on a PHA's planning efforts and its record of delivering promised work.

Response: The Department does not agree with this comment. The Department believes that the more time-consuming part of implementation involves the design work, the bid process, and the award of contract. In the overwhelming majority of cases, fund expenditure occurs routinely after fund obligation, in accordance with the schedule for periodic payments.

Comment: Two comments were unclear about the reporting requirements for a self-executed time extension for obligation of funds and suggested that the Department provide a short list of examples of the types of circumstances "out of the control of the PHA" which would warrant a self-executing extension.

Response: The Department has revised components #1 and #2 to provide additional examples which are: unforeseen delays in contracting or contract administration; and need to use left-over funds from a completed modernization program for additional work. Additional examples will be provided in the revised PHMAP Handbook 7460.5.

Comment: One comment stated that it was not clear what data were being used to score components #1, #2 and #5, and suggested that HUD needs to develop a procedure reflecting PHA performance in the same fiscal year as other PHMAP grades.

Response: The Department scores components #1 and #2 on the basis of Federal Fiscal Year (FFY), not PHA fiscal year, in order to provide a uniform measurement for all PHAs, without regard to the relationship between the construction season and PHA fiscal year. The Department scores components #3, #4, and #5 based on the status of the PHA's modernization program(s) as of the PHA's fiscal year end. The Department intends to continue these bases for scoring.

Comment: One comment noted that the components are well described and the grading is equitable.

Response: The comment is noted by the Department.

Comment: One comment recommended that only fund obligation should be measured since in fact this is the only activity really under a PHA's control, with expenditures affected by contractor progress, litigation, and other outside factors.

Response: Fund expenditure is a performance measure mandated by the 1992 Appropriations Act and, therefore, must be included.

Comment: One comment recommended that the modernization indicator be changed for the assessment of the CGP. Requirements for measurements should be in large percentages rather than items of work (i.e., 33% of all funds three years old or less should be obligated). Further detail should not be required. HUD should model these reporting requirements on those of the CDBG program. There should be flexibility for expenditure rate requirements based on circumstances beyond PHA control, such as contractor default, the discovery of hidden conditions, etc.

Response: The Department believes that the component on fund obligation appropriately assesses performance under the CGP. The CGP provides annual formula funding for modernization. Accordingly, such stable and predictable funding should enable CGP PHAs to plan and implement their modernization programs in an expeditious manner. The Department strongly believes that two years is adequate time for most PHAs to obligate all funds, but provides for a longer time period where appropriate.

Comment: One comment recommended that fund obligation be extended to three years rather than the two proposed.

Response: The Department believes that two years is a more appropriate measure of performance. However, the Department notes that the PHA may propose, and HUD may approve, implementation schedules with fund obligation deadlines of longer than two years due to local differences in work scope and complexity, construction seasons, material or equipment supply, or State/local contracting requirements.

Comment: One comment questioned how HUD will know whether the PHA extended the target date within 30 calendar days after the deadline and whether such extensions were for reasons outside of the PHA's control. These components are not certified by the PHA, but are graded by HUD based on HUD in-house information. HUD will only know what it can gather from LOCCS and from on-site reviews. Assessments will be very inconsistent and of questionable accuracy.

Response: A PHA is currently required to inform HUD if it has extended the target date for fund obligation so that HUD may enter the revised date into the Line of Credit Control System (LOCCS). A PHA also is currently required to report on all time extensions that it issued and the reasons for those extensions in its annual CGP performance and evaluation report for the program year ending June 30. If a PHA issues a time extension between June 30 and September 30, it will be required to inform HUD so that components #1 and #2 may be scored correctly. If the State/Area Office fails to take into account a time extension made by the PHA, the PHA may appeal its score to the State/Area Office so that the corrected information may be used in rescoring.

Comment: One comment stated that component #1 is an example of excessive flexibility, in that a PHA can miss the performance target but still receive a grade A by executing a self-imposed time extension within 30 calendar days after the expenditure deadline so long as the extension is for conditions which the PHA determines is beyond its control. A PHA also can manage this requirement by simply including in its original implementation schedule, a time period longer than three years to expend its modernization funds. The same options are available in connection with component #2.

Response: The Department believes that PHA flexibility to issue time extensions for reasons outside of the PHA's control is critical to streamlining program requirements and is an important tool in expediting program implementation. HUD still approves the original implementation schedule and may require a shorter time period if a PHA proposes a time period that is too long. Also, HUD reviews the basis on which the PHA issues a time extension and, if inappropriate, may withdraw the PHA's authority to do so, thereby requiring that all future time extensions be submitted for prior HUD approval.

Comment: One comment questioned the term "modernization" as used in components #1 and #2. Does it mean CIAP/CGP only, or the larger definition of "modernization" found in the term "approved funded, on-schedule annual modernization program?" The comment contended that the rule uses two different definitions of the term "modernization": one that is CIAP/CGP only; and one that includes more than just CIAP/CGP.

Response: All components apply to both the CGP, the CIAP and lead based paint risk assessment (1992–1995). Only components #3, #4 and #5 apply to funding under the HOPE VI Program and the Vacancy Reduction Program for the assessment of this indicator. The new rule has been revised to include this language.

Comment: One comment recommended that HUD decouple the fund obligation deadline from specific modernization projects. This is in keeping with HUD's approach in the community development program arena where HUD tracks a specified amount of funds obligated each year regardless of the year in which HUD allocated the funds to a locality.

Response: The Department does not agree with this comment since each annual grant must be individually tracked and closed out.

Comment: One comment stated that components #1 and #2 do not measure the adequacy of modernization efforts or address the adequacy of the overall maintenance program of the PHA.

Response: The Department points out that both components are mandated by statute. The Department believes that component #2, fund obligation, is a critical indicator of modernization performance. Neither component is intended to address the adequacy of the PHA's overall maintenance program.

Comment: One comment stated that a PHA's potential score for components #3 and #4 seems to be subject to the timing of a HUD monitoring visit. A PHA should not be graded on these components unless at least three months have elapsed between the date of HUD's monitoring report to the PHA and the end of the PHA's fiscal year; also, the time frame for HUD reviews should be clarified.

Response: The Department agrees that a minimum time should be specified between the date of HUD's monitoring report or audit is provided to the PHA and the end of the PHA's fiscal year in order to give the PHA sufficient time to correct all findings. Accordingly, the Department has revised components #3

and #4 to reflect a minimum time of 75 calendar days.

Comment: One comment stated that a clearer distinction should be established between an "A" and a "C" grade for components #3 and #4; i.e., that a PHA must "have corrected" all findings versus "be in the process of correcting" all findings.

Response: The phrase the "PHA has corrected" all findings means that HUD concurs in the PHA's determination that the violation no longer exists and that HUD is ready to close the finding or has already closed it. The phrase the "PHA is in the process of correcting" all findings means that the violation still exists and the finding is not yet ready to be closed.

Comment: One comment supports an appeal process in the event a PHA and HUD differ on what constitutes "significant findings."

Response: As stated, above, this language has been changed and the term "significant" has been eliminated. In addition, the PHMAP rule at § 901.125 sets forth the PHA's right of appeal.

Comment: One comment recommended that HUD use qualified building inspection firms or inspectors, in combination with qualified HUD engineers as they are available to inspect the physical work that is completed rather than the Corps of Engineers.

Response: The Department intends to use all resources available to it, including the U.S. Army Corps of Engineers, for inspection of approved modernization programs.

Comment: One comment recommended that component #5 be covered under indicator #6, financial management, since financial management of the modernization program is part of the overall financial management of the PHA's programs.

Response: The Department rejects this comment since the modernization budget controls are so integral to implementation performance by a PHA.

Comment: One comment supported the change to component #5 that reflects the flexibility recently provided to CGP PHAs to move work items between approved annual statements and the five-year action plan and to address emergency items not reflected in either document. Another comment noted that emergency CGP work does not require prior HUD approval.

Response: The Department agrees that emergency CGP work does not require prior HUD approval and has revised component #5 to specifically exclude emergency work.

Comment: One comment proposed a new component related to the incorporation of work orders, which are identified by yearly inspections of systems and units and deferred for modernization, in the modernization plan.

Response: The Department does not agree with this comment because all work orders are tracked under indicator #4 in the new rule. A work order deferred for modernization is any work order that is combined with similar work items as defined in § 901.5.

Indicator #3 Rents Uncollected—§ 901.20

Comment: Ten comments supported the simplification of the indicator and the grading method, without further comment.

Response: The comments are noted by the Department.

Comment: Ten comments sought a variety of additional exclusions from "dwelling rent" such as charges for amounts that cannot be collected by the PHA without stopping the eviction process, amounts owed by tenants no longer in possession, disputed amounts, amounts written off, or amounts abated. One PHA thought that the indicator was inconsistent with the one strike policy in indicator #8 because a resident evicted for selling drugs would be charged dwelling rent that could not be collected during the eviction process.

Response: The Department does not agree. The reasons for nonpayment of rent are varied and the specific conditions mentioned are not unique. The purpose of the indicator is to assess a PHA's ability to deal with conditions for nonpayment effectively to collect the rent due; excluding the charges related to all possible reasons for noncollection would defeat the purpose of the indicator. A PHA may request a modification or exclusion to this indicator due to highly unusual or unique circumstances.

Comment: Five comments pointed out inconsistencies in terminology in the indicator that they believed made the indicator unclear. One comment stated that the terminology in § 901.20 doesn't have the same specificity as the summary. The language in § 901.20 needs to be revised to conform with the summary and the definitions. There were four comments regarding the definition of the terms "current dwelling rent billed," "current dwelling rent uncollected," "percent of current dwelling rent," and "rents uncollected."

Response: The terminology referred to in the comments has been changed in the new rule to be consistent.

Comment: Four comments stated that uncollected rent of 2% or less for a grade of A was unduly restrictive and not in line with the private market standard. The comments requested that the 2% be changed to 5% to conform to industry standards.

Response: The Department believes that the percentage for grade A is fair since this grade represents the truly outstanding PHA, rather than the industry standard. The industry standard of 5% is reflected in grade C of this indicator, and denotes standard performance.

Comment: Two comments noted that the indicator is not as simple as it seems since data required by the indicator is not readily available in the accounting system. One comment stated that the method should not be changed from the interim method.

Response: The Department recognizes that accounting systems do not usually collect or compile the specific tenant accounts receivable information required for indicator #3 as proposed; therefore, the proposed indicator has been changed to incorporate information that is collected by PHAs to compile other tenant accounts receivable and financial reports. The major change between the new indicator and the current method is that the new indicator includes only information for tenants in residence during the assessed fiscal year.

Comment: One PHA commented that rent collections are so important that the indicator should have a weight of x3.

Response: The Department agrees that rent collections are important to the financial health of the PHA, and it has the second highest weight of all the indicators. The weighting has been simplified to a ten point scale, with only indicator #1, vacancy rate and unit turnaround, having a weight of x2.

Indicator #4, Work Orders § 901.25

General Comments

Comment: Many comments received were generally supportive of the revised requirements of this indicator. Most indicated that the changes made to this indicator will create a management tool that is more equitable and provide a more accurate measurement of work order completion.

Response: The comments are noted by the Department.

Comment: Four comments stated that recording the time for completing emergency and non-emergency work orders is unnecessary and unproductive. The extra administrative expense to record the time of processing work orders is not justified. One comment stated that this change will put an excessive burden on small PHAs in tracking the time involved on routine

VOL 61 ISS 251 DE 30 1996 UMI

(non-emergency) work orders due to the many factors which can effect how long it takes to do a work order.

Response: The Department does not agree with this statement. This indicator is a statutory requirement under the PHMAP. The preamble to the PHMAP rule and the new rule state that "implicit in this indicator is the adequacy of the PHA's work order system in terms of how a PHA accounts for and controls its work orders, and its timeliness in preparing/issuing work orders." Therefore, there should not be substantial additional administrative expense since an adequate work order system must be able to track and control work orders from the dates/times of when the work orders were initiated to the dates/times when they were completed.

Comment: Two comments stated that emergency work orders should be at least equal in weight to non-emergency work orders.

Response: The Department believes that since emergency conditions must be abated immediately or no longer than 24 hours from when first reported, the tracking and controlling of non-emergency work orders would provide more accurate information of PHA work order performance. Hence, more weight is given to the PHAs' non-emergency work order activities. However, the weight of the total indicator in the new rule is x1.

Comment: Two comments stated that the definitions for cyclical work orders and preventive maintenance are very similar, which is especially distressing because the proposed rule is very clear in its requirement that the two not be confused.

Response: The Department agrees that there are many instances in which PHAs might not use the work order process to do general cleaning activities, pick up trash or change light bulbs. When they do, these work orders are classified as cyclical work orders and are excluded from component #2, non-emergency work order, calculation. Other examples of cyclical work orders might be work orders that are routinely written each year to replace furnace filters, clean out site and roof storm drains or raking leaves in the fall. Preventive maintenance work orders are usually generated from preventive maintenance inspections. They are primarily related to the modification or repair of physical systems of units, buildings and grounds. The Department will include examples of cyclical and preventive work orders in the revision of the PHMAP Handbook 7460.5.

Comment: Two comments stated that for work orders done by outside contractors, which may take longer to complete or that require special parts, if a vendor has difficulty in securing a part, the PHA would be penalized even though the living conditions in the unit aren't compromised.

Response: The Department does not agree with this comment. The Department has provided up to 25 days for the average time to complete non-emergency work orders in order for a PHA to achieve a grade A for this component. This is quite liberal as compared to the private sector. The few cases that might exceed the 25 day period, due to a wait on a special part, should not significantly impact a final PHMAP score. In regards to emergency work orders, if the emergency condition in a particular unit cannot be corrected or abated within the 24 hour time frame, the resident(s) could be moved out of the unit, which would abate the emergency situation.

Comment: Two comments wants to know if the reduction of days needed to complete work orders affect grades A and B, or is it only taken into consideration when the grade is C or less. Under what conditions may a PHA make such an election? To this, the rule appears to be silent.

Response: The reduction of days needed to complete non-emergency work orders is only taken into consideration when the grade is C or less. The Department has revised the reduction of days needed to complete non-emergency work orders during the preceding three years to conform with other changes in the new rule.

Comment: One comment stated that this indicator is poorly written and needs additional clarification.

Response: The comment is not specific as to where the clarifications are needed. The Department wants a new PHMAP rule that is clear, concise and easy to understand, and welcomes any and all suggestions on how it can achieve that goal. If some areas of the rule are unclear to a reader, or needs further interpretation, he/she can contact the local State/Area Office for assistance.

Comment: One comment stated that PHAs may need technical assistance to construct an effective tracking system without spending scarce funds on additional software or special tracking systems.

Response: The Department agrees with this comment and maintains that PHAs must have in place an adequate work order system that tracks and controls work orders from the dates that they were initially entered into the system to the dates when they were completed. The necessary information to grade emergency and non-emergency work orders should be readily accessible from the data in the PHA's work order system. However, if the PHA's existing system cannot perform the necessary tracking function, it should be a priority of the PHA to up-date the existing system or replace it with one that can. To that end, HUD is always available to provide appropriate technical assistance.

Comment: One comment stated that there should be a one year delay in implementation.

Response: The Department has determined that the revisions in the new PHMAP rule will apply to PHAs with fiscal years ending the quarter after the new PHMAP rule is published in the **Federal Register**.

Comment: One comment stated that this indicator does not provide any means for measuring the effectiveness of a PHA's response to deficiencies identified in inspections.

Response: The Department agrees. Measuring the effectiveness of PHA response to deficiencies is too subjective and would not necessarily be the same from PHA to PHA; PHMAP measures performance.

Comment: One comment stated that a confirmatory review should be required each year by qualified HUD staff or building inspection firms.

Response: The Department disagrees due to the lack of resources. Risk management is used to determine where confirmatory reviews are most needed.

Component #1, Emergency Work Orders

Comment: One comment stated that the evaluation for grading emergency work orders under component #1, is too tight, i.e., 99% of the emergency work orders completed or abated within 24 hours for a grade A and down to 95% completed or abated for a grade F.

Response: The Department does not agree. The Department defines emergency as physical work items that pose an immediate threat to the life, health and safety of residents or that are related to fire safety. If emergency work items cannot be completed or abated within 24 hours, the PHA could move the resident out of the unit until the emergency work is completed or abated. The removal of the resident(s) from the emergency condition is considered abatement. Therefore, correcting or abating an emergency situation should never exceed 24 hours.

Comment: One comment stated that a more specific definition of emergency work orders should be given, possibly including examples.

Response: Emergency means physical work items that pose an IMMEDIATE

threat to life, health, safety, or property, or that are related to fire safety. Some of the more easily definable emergency situations would be: (1) an unhealthy or undrinkable water supply; (2) a gas leak; (3) a broken sanitary sewer line where sewage is ponding on the surface of the ground; (4) failed heating systems in colder winter climates; (5) hazardous electrical systems; non-working smoke detector or fire alarm system; and (7) toxic material situations such as exposure to asbestos or defective lead-based paint. Situations such as leaky roofs, broken windows or stairways might be classified as an emergency depending on specific circumstances and the degree to which the situation is an immediate threat to tenant health, safety or to property. Temporarily covering a hole in the roof or broken window, or closing off a stairwell until the condition can be corrected would be considered emergency abatement and would change these types of work orders from emergency to regular (non-emergency) work orders. The Department will include examples of emergency and non-emergency work orders in the revision of the PHMAP Handbook 7460.5.

Component #2, Non-Emergency Work Orders

Comment: Two comments stated that excluding cyclical work orders from the calculation of this indicator serves to create what must be an unintentional disincentive to devote staff resource time to routine daily maintenance work. The PHA that devotes all of its maintenance resources to competing PHMAP measured work orders while ignoring trash on the grounds and in the hallways will score higher than a PHA that devotes its resources to daily maintenance as well as inspection and resident initiated work orders. Unless the PHMAP rule intends to cause PHAs to place a very low priority on the completion of daily maintenance work orders, work orders generated to accomplish this work should not be excluded from the calculation of this indicator.

Response: The Department disagrees with this suggestion since this component was designed to only measure PHA performance in completing work orders and was never intended to place daily maintenance work at a low priority or ignore trash on the grounds and in the hallways. Normally, tasks such as picking up trash, etc., are performed by laborers and would not be covered by a work order. Work orders exempted for modernization, issued to prepare a vacant unit for re-rental, or issued for the performance of cyclical maintenance are not necessarily the same from PHA to PHA and consequently, would tend to skew the performance grade results from PHA to PHA if they were not exempted.

Comment: One comment stated that preventive maintenance work orders are not exempted from the calculation of this component and should be. This PHA issues over 3,000 work orders for preventive maintenance to be performed on the heating systems over the period of the three to four month non-heating season. If these are included in the count, there is no possible way for this PHA to obtain a high score for this component since the work could never be completed in 25 days or less.

Response: It appears that the work orders described above should be classified as cyclical work orders, which are excluded from the non-emergency calculation. If this is not the case, the PHA does have the option to request HUD's approval of either a modification or exclusion of this indicator.

Comment: One comment stated that to divide work orders among routine and emergency, then determine average number of days it took to complete them assumes that only closed work orders will be counted under this indicator, and any work order that is not closed will be counted against the following fiscal year as we currently do with vacant units. Please clarify.

Response: The calculation of this indicator includes: the number of days in the assessed fiscal year it takes to close active non-emergency work orders carried over from the previous fiscal year; the number of days it takes to complete non-emergency work orders issued and closed during the assessed fiscal year; and the number of days all active non-emergency work orders are open in the assessed fiscal year, but not completed. The new rule includes a definition of the average number of days for non-emergency work orders to be completed.

Comment: One comment stated that this indicator should specifically state that HUD wants all preventive maintenance work orders tracked rather than focusing on exclusions and thus, place proper emphasis on preventive maintenance.

Response: The Department agrees and has added specific language to the new rule stating that all preventive maintenance work orders are to be tracked, as well as which type of work orders are exempted from the calculation of this indicator.

Section 901.30 Indicator #5, Annual Inspection of Units and Systems

General Comments

Comment: Three comments support the improvements in this indicator, particularly reducing the components from four to two and eliminating redundancies.

Response: HUD agrees that it is more appropriate to track all work orders, including inspection generated work orders, under indicator #4. Indicator #5 now focuses more on a PHA's ability to determine short-term maintenance needs and long-term modernization needs.

Comment: Three comments expressed concern about the possible subjective interpretation of the adequacy of a PHA's inspection system by HUD field staff. A clear and reasonable description of an adequate inspection system should be included in the rule.

Response: The preamble to the proposed rule stated that the adequacy of a PHA's inspection program will be part of the confirmatory review in terms of the quality of a PHA's inspections, and how a PHA tracks both inspections and needed repair, and the adequacy of a PHA's inspection system is also included in the new rule. The Department recognizes that what is adequate for one PHA may not be adequate for another PHA, thereby making this term general in concept. Examples of inspection systems will be included in a guidebook on the conduct of confirmatory reviews and in the revised PHMAP Handbook 7560.5.

Comment: Two comments stated that the two components are well described and are graded equitably. However, it should be clarified if damages caused by residents that are not reported to maintenance for prompt repair could be exempted and considered as repairs for code compliance.

Response: If a unique or unusual circumstance were to occur, a PHA could request a modification to this indicator to avoid being penalized for circumstances beyond its control. However, one of the purposes of an annual unit inspection is for a PHA to be able to identify, at least annually, the condition of its housing stock. Since this indicator no longer measures the amount of time it takes to correct unit/system deficiencies, the annual inspection would simply initiate corrective action.

Comment: One comment stated that this indicator is poorly written and needs additional clarification.

Response: The comment is not specific as to where the clarifications are needed. The Department wants a

VOL 61 ISS 251 DE 30 1996 UMI

new PHMAP rule that is clear, concise and easy to understand, and welcomes any and all suggestions on how it can achieve that goal. If some areas of the rule are unclear to a reader, or needs further interpretation, he/she may contact the local State/Area Office for assistance.

Comment: One comment stated that PHAs must have adequate time to change the manner in which they track annual inspections and needed repairs.

Response: The Department agrees, and the new rule will apply to PHAs whose fiscal year ends the quarter after the publication of this rule in the **Federal Register**.

Comment: One comment recommended that a confirmatory review of this indicator be required each year by HUD or qualified building inspection firms that would track whether each item was completed or whether it was referred to a work order and when the work order was completed.

Response: The Department disagrees because these issues are more properly examined under indicator #4, work orders. Also, due to the lack of resources, risk management is used to determine where confirmatory reviews are most needed. However, when HUD conducts a confirmatory review of indicator #4, the items mentioned in the comment are verified and confirmed.

Comment: One comment stated that component #2 should have a higher weight. The commenter suggested that there should be a new component that requires a monthly walk through of the common areas, with the results of these inspection being available for HUD monitoring.

Response: The Department disagrees with both parts of the comment. HUD believes that the inspection of units and the inspection of systems are equally important to the quality of a PHA's housing stock and, therefore, each component is weighted equally. The Department believes that adding a new component that requires a monthly walk through of the common areas would result in the micromanagement of PHAs.

Comment: One comment asked why the proposed certification form asks the question, "Percent of units meeting HQS."

Response: This question has always been on the certification form. The Department requests this information for trending and statistical purposes.

Comment: One comment felt that this indicator has been severely weakened. Poor property management may be rewarded simply because inspections have been conducted. The necessary follow-up to correct identified deficiencies is not addressed in the proposed rule.

Response: The Department disagrees with this comment because inspection generated repair items are tracked under indicator #4, work orders.

Comment: One comment suggested that units under proposed demolition and disposition applications that are vacant should be excluded from this indicator.

Response: The Department does not agree with this comment. There have been and will continue to be significant differences between initiating the application process and receiving approval to dispose or demolish.

Comment: One comment does not agree with the exemption of occupied units that the PHA has made two documented attempts to inspect because this could become an excuse for PHAs with poor inspection programs.

Response: The Department disagrees that such a situation is likely to happen because the language of the exemption goes on to state that PHAs may claim this exemption only if it can document that appropriate legal action (up to and including eviction of the legal or illegal occupant(s)), has been taken under the provisions of the lease to ensure that the unit can be subsequently inspected.

Comment: One comment observed that the expanded definition of what units are excluded from the calculations are an improvement. It seems logical to exclude units in the same category as in the vacancy indicator. However, there is concern about the exclusion of "units vacant for circumstances and actions beyond the PHA's control." The concept is too vague. There will be situations cited that may arguably be within an agency's control. HUD should, minimally, identify a short list of examples as a guide to PHAs and HUD State/Area Offices.

Response: The Department agrees and this rule has been revised to specifically state the allowable exemptions for indicator #5.

Comment: One comment agrees with excluding units documented as uninhabitable, but feels the term should be defined (e.g., condemned by local health department). In addition, PHAs with uninhabitable units should indicate what plans they have to demolish and dispose of such units.

Response: The language for this indicator already states that units that are documented to be uninhabitable by order of the local health department may be exempted. To further enumerate all of the possible Federal, State or local agencies that could be involved in such a process is unnecessary since situations differ from PHA to PHA. However, if units have been determined to be in such a state as to be designated uninhabitable, HUD strongly recommends that PHAs at least inspect these units annually to verify the structural integrity of the building. This is particularly important for scattered site units and long-term vacant buildings. In addition, a CGP PHA has to address the physical needs of all of its developments in its Comprehensive Plan.

Component #1, Annual Inspection of Units

Comment: Three comments stated that HQS should remain as the standard, with the PHA expanding on the HQS requirements to include local code items. Otherwise, HUD would need knowledge of many different local codes to properly assess PHA actions. The commenters added that it would be necessary to adapt HQS at the highest local standard or a PHA would have to modify inspection standards based on where the unit was located.

Response: The Department requires that HQS be used as the inspection criteria for PHAs *only* if there are no local occupancy and/or housing codes that cover a PHA's jurisdiction. The PHMAP Handbook 7460.5 requires that a PHA comply with local occupancy and/or housing codes. Rather than expand on the HQS requirements to include local code items, a PHA should expand upon local code requirements to include omitted HQS items. If a PHA is dealing with more than one local occupancy/housing code within its jurisdiction, the PHA should incorporate HQS items into the local occupancy/housing inspection forms for each locality.

Comment: Two comments stated that incorporating maintenance long-term planning into annual inspections would greatly compromise the ability of a PHA to abate common problems. In addition, it is difficult to determine if completion of long-term preventive maintenance functions (exterior painting, etc.) would be included.

Response: The Department disagrees with this comment and believes that just the opposite is likely to occur. A PHA's ability to abate common problems should be greater when a PHA is able to plan for short-term maintenance needs and long-term modernization needs. Such planning will allow a PHA to budget appropriate expenditures from its operating budget and modernization program, thereby avoiding possible budget short falls. With such planning done on an on-going basis, a PHA can focus more resources on day-to-day operations and the abatement of

common problems. In addition, the completion of long-term preventive maintenance items are included at the discretion of each PHA. A PHA may decide to fund all exterior painting out of its operating budget, painting "X" amount of units/buildings each year on a rotating basis. Or, a PHA may decide to include 50% of its exterior painting under its modernization program, and fund the exterior painting of the remaining units out of its operating budget.

Comment: One comment felt that the proposed indicator does not exempt occupied units scheduled for modernization this year or the next. Inspection of occupied units scheduled for imminent modernization should be limited to an inspection of emergency conditions only. It seems wasteful to take the time to write up deficiencies on a unit when specifications have been developed and possibly even bid for the modernization of the unit. One comment stated that the term "referred the deficiency to the current year's or next year's modernization program" is an incredible loophole simply permitting the existence of non-compliant conditions.

Response: This indicator does exempt a vacant unit undergoing modernization as stated in the preamble language and the proposed rule. The Department has added new language to the new rule in order to clarify the circumstances under which work orders can be deferred to modernization. As stated in the definition for this term, only similar items can be deferred by a PHA to be completed in the current year's modernization program, or to be completed in next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the work order was generated.

However, before an item is deferred to modernization, it should be (1) similar to a work item that is in the current year's modernization program, (2) similar to a work item that is in next year's modernization program, or (3) similar to deficiencies noted in other units/buildings and the correction of such deficiencies has not been included in the current or next year's modernization program, but the current or next year's Annual Statement is revised to include the new work item. If the similar deficiency that was deferred for modernization is not corrected in the current or next year's modernization program, the work item may no longer be exempted from the calculation of this indicator and the deficiency reverts back to being tracked through the work order system.

Occupied units shall be inspected, particularly for detection and repair of emergency conditions, as long as they remain occupied. Non-emergency work orders generated during inspection of occupied units scheduled for imminent modernization (this year or the next) should be classified as deferred for modernization and not included in the computation of this indicator as long as the identified deficiencies are part of the work items included in the modernization project.

Comment: One comment stated that it is not clear whether preventive maintenance items, such as repairs to stoves and plumbing, etc., would be recorded or tracked. How are they recorded if completed during the inspection?

Response: All preventive maintenance items should be recorded and tracked through the work order tracking system. This information will enable a PHA to plan for short- and long-term maintenance needs. If a minor deficiency is corrected during an inspection, the PHA should not retroactively issue a work order for that work item. A minor deficiency that is corrected during the inspection is no longer a deficiency, and there is no need to issue a work order. However, any parts used to complete minor repairs made during the course of an annual inspection should be tracked through inventory control.

Comment: One comment was concerned that many PHAs may misinterpret the indicator as suggesting that a PHA must use only local housing/occupancy code or HQS, and nothing else.

Response: A PHA should use local housing and/or occupancy codes, and should expand upon local code requirements to include omitted HQS items, when applicable. In cases where there is no local occupancy and/or housing code or the local code is less stringent than HQS, the PHA should use HQS.

Component #2, Annual Inspection of Systems

Comment: One comment stated that there is no definition provided for the term "maintenance plan" and yet it is used as a factor of measure for indicator #5, component #2. The use of this term appears to be with an appropriate intent to allow for the fact that a major system that has been inspected and documented to be in good repair does not require another inspection in the following year. An effective PHA systems maintenance plan could appropriately reschedule the system for inspection three years later. If the system is new, after the first year of operation, testing it might not need to be rescheduled until five years later. A maintenance plan would document the performance of appropriately scheduled preventive maintenance on systems. Only safety systems and those required to be inspected and certified annually by State law for safety reasons should require annual inspection. If the intent of this provision is the use of the term "maintenance plan" is to allow for this fact, it should be clearly stated as such. Otherwise, different Field Offices will be left to subjectively interpret the meaning of this term and its applicability in the determination of PHA performance under indicator #5.

Response: The Department agrees that the term "maintenance plan" should be defined. It is defined in the rule as a comprehensive annual plan of a PHA's maintenance operation by providing the total year's estimated work schedule supported by a staffing plan, contract schedule, materials and procurement plan, training, and approved budget. The plan should establish a strategy for meeting the goals and time frames of the facilities management planning and execution, capital improvements, utilities, and energy conservation activities. The Department disagrees with the rest of the comment because this component examines whether a PHA inspects all of its systems *at least annually* to ensure the viability of the units/buildings and the provision of safe, sanitary and decent housing.

Section 901.35 Indicator #6, Financial Management

Component #1, Cash Available

Comment: Eight comments specifically approved of combining the cash and energy/utility consumption components; three more comments specifically approved of the cash available component.

Response: The comments are noted by the Department.

Comment: Three comments objected to the combination of cash available with energy/utility consumption and/or to the use of one or the other as a measure of financial management. Commenters stated that energy is not a measure of financial management and that available cash is not a measure of energy management.

Response: The Department disagrees. Although the amount of cash on hand is not by itself a measure of energy management, efficiencies in operation and in energy/utility consumption will reduce expenditures and thereby affect cash available.

VOL 61 ISS 251 DEC 30 1996 UMI

Comment: Nine comments stated that the indicator should include other factors such as ratio of reserves to expenses over a period of time, an assessment of audit findings, average monthly cash reserves instead of a "snapshot" of cash available at fiscal year end, ability to maintain expenses within budget, ability to maintain an adequate reserve level for contingencies, or that the existing interim indicators should be retained.

Response: The Department does not disagree that there are a number of additional factors that could be measured as an indication of good financial management. However, the review of existing PHMAP procedures was done with the intent of streamlining and of limiting the number and content of the indicators to the basic information that could be used for performance measurement. This review process intentionally resulted in fewer, not more, indicator measurements. Maintaining a minimum level of liquidity was determined to be a basic requirement for financial management that should be an essential part of performance measurement.

Comment: Nine comments expressed concern that the terms "cash available," "cash reserves," and "routine operating expenses" were not adequately defined and would lead to inconsistent reporting on the part of PHAs. One comment stated that the sample worksheet should be revised to be computer friendly. One comment stated that the "Analysis of General Fund Cash Balance" should be used in lieu of the sample worksheet. One comment stated that the sample worksheet should match the information on form HUD–52595, Balance Sheet, because it would be difficult for small PHAs to identify accounts receivable/payable that would be active within 30 days.

Response: The Department notes that the sample worksheet is intended as guidance to the PHA in determining the cash available to meet routine operating expenditures, but its use is optional. "Routine operating expenses" are identified on the worksheet as being those reported on form HUD–52599, Statement of Operating Receipts and Expenditures, Line 520, Total Routine Expense. If a PHA experiences one-time expenditures in a given year that would distort the use of Line 520 information for the indicator, the PHA may request a modification. If PHAs follow the practice of aging their accounts receivable/payable, determining those that would be active within 30 days should not be a problem, and if the accrual information is immaterial to the computation, it need not be included. The use of information directly from form HUD–52595, Balance Sheet, would be possible only in the case of a PHA with no programs other than the management of PHA-owned rental. For the same reason, the Department does not think that the "Analysis of General Fund Cash Balance," which is based on form HUD–52595, is a substitution for the sample worksheet since the Analysis does not, without further calculation, provide the user with the amount of cash specifically available for PHA-owned rental operations. In any case, the sample worksheet is optional and a PHA may choose to develop its own format and procedures, as long as its results are the same as would be derived by utilizing the optional worksheet.

Comment: Five comments stated that the indicator penalizes PHAs for using reserve dollars to operate, and two comments expressed concern that small PHAs will never be able to accumulate sufficient cash to score well on the indicator.

Response: The Department recognizes that PHAs must make choices in the use of funds and that there are circumstances that may make it difficult to achieve or to sustain a given level of cash, or that may reduce available cash on a short term basis. However, HUD also recognizes that in order to function in a financially responsible manner a PHA must have a minimum amount of cash on hand to cover day-to-day routine expenditures. Available cash to cover one month's routine expenditures would be 8.33% of total routine expenditures; a PHA does not fail this indicator unless the percentage is less than 5%. In order to meet its monitoring responsibilities, it is important that the Department take note of such PHAs and of the circumstances that are affecting their cash flow situation.

Comment: Three comments asked if the cash available calculation was to be adjusted for subsidy proration or year end adjustments for subsidy.

Response: The sample worksheet for indicator #6 has provision for including year end adjustments for subsidy in determining cash availability. The difference between subsidy eligibility and the prorated subsidy amount is not included because the amount of the difference will not be realized in cash payments.

Comment: One comment stated that percentages should be applied to PHAs of all sizes since $3 million in cash for a large PHA might not be enough to cover unexpected financial difficulties. One comment stated that dollars, not percentages, should be applied to all PHAs.

Response: The indicator measures cash available to cover routine expenditures, not unexpected cash needs for emergencies. The new indicator is measured in percentages because a percent gives a more flexible basis for evaluation than a flat dollar amount.

Comment: One comment expressed concern that the indicator would encourage PHAs to exercise poor financial judgment by deferring needed maintenance expenditures in order to maintain a large cash balance and score well on indicator #6.

Response: The Department disagrees. Indicator #6 is but one indicator in a group of indicators intended to measure PHA performance; two other indicators (#4 and #5) measure the PHA's performance in the area of maintenance.

Comment: One comment stated that the available cash should take into consideration funds that might be available from local government to help the PHA.

Response: The Department disagrees that the PHA potential to tap the local government for funds should be automatically included in determining the amount of cash available. Unless the local government is legally required to subsidize the operation of the PHA, there is no assurance that the local government's willingness or ability to provide funds to the PHA will continue in the future.

Component #2, Energy Consumption

In the proposed rule, the Department indicated particular interest in receiving comments from PHAs as to whether they preferred Option A, Option B or the choice of being able to use either option for their PHMAP certification and assessment. Option A compares energy/utility consumption expenses to the average of those computed on a three year rolling base and Option B measures whether or not a PHA has conducted an energy audit and implemented the improvements recommended as a result of the energy audit.

Comment: Nine comments preferred a choice of either Option A or Option B. Four comments stated a preference for Option B.

Response: The Department adopts the preferred approach of the majority of comments, which offers PHAs required to be assessed on this component a choice of either Option A or Option B.

Comment: Five comments stated that the energy/utilities component, Option A, should be based on consumption instead of dollars expended since PHAs don't have any control over the utility rate charged by local utility companies.

Response: The Department agrees and the proposed PHMAP energy/utilities component, Option A, does measure energy/utilities consumption rather than dollars. The sample worksheet for computing Option A compares a PHA's current consumption to its rolling base period consumption. In comparing Line 17 to Line 13 of form HUD–52722B, Adjustment for Utilities Consumption and Rates, the rolling base period consumption is adjusted prior to the comparison with the current year to reflect the current year's rates. Since the same rates are used, the only difference in the amounts compared is due to consumption. The wording of the proposed rule regarding Option A in the preamble may have been confusing in this regard and this option has been revised to refer to energy/utility consumption expenses.

Comment: Three comments stated that the upgrading of equipment, e.g., the addition of security lighting, affects consumption and that PHAs should not be penalized. One comment stated that PHAs should not be penalized for positive initiatives, such as increased utilization by resident initiatives and family self-sufficiency participants, that result in increased consumption for office buildings.

Response: The Department agrees that a PHA should not be penalized for increased energy/utility consumption due to upgrades of equipment such as adding security lighting for safety, etc., and resident initiatives programs. Therefore, with sufficient supporting documentation, a PHA may request a modification to exempt the excess energy/utility consumption from the calculation of the energy/utility component, Option A. The Department anticipates the issuance of a revised PHMAP Handbook 7460.5 subsequent to the effective date of the new rule. Examples of eligible modification requests and required supporting documentation will be included in the Handbook.

Comment: One comment stated that the component should be named "utility consumption" rather than "energy consumption" since water and sewer charges are a utility expense for PHAs, not an energy source.

Response: The name of the component was, in fact, changed from "energy" to "energy/utility" in the proposed rule to reflect the fact that water and sewer charges, which are now included in the consumption measurement, are, as the comment states, a utility expense for PHAs, not an energy source. This component is referred to as "energy consumption" in the new rule, with Option A referred to as "energy/utility consumption expenses."

Comment: One comment stated that the cost of utilities, in comparison with other operating expenses, is not sufficient to justify a PHMAP indicator when other expenses are not measured at all under the PHMAP.

Response: The Department disagrees. Currently, PHA utility expenses exceed $1 billion annually and represent over one-quarter of PHA operating expenses. It is clear that the cost of utilities is a major operating expense that must be addressed on an on-going basis by management. Congress recognized the importance of this issue by including it in the statute as one of the mandatory indicators. Therefore, the cost of utilities must be included in the PHMAP assessment.

Comment: One Comment supported the elimination of measuring energy/utility consumption for those PHAs scoring C or higher for component #1, but stated that the energy audit rule at § 905.302 should be revised to require an audit every five years only for PHAs that score lower than C. Otherwise, the Comment states, comparing energy and utility cost to the average of a three year rolling base should be eliminated as unnecessary.

Response: The Department disagrees. The Department addressed this concern regarding audits for standard and high performers at the time it issued the final rule at 24 CFR part 965 earlier this year. At that time, it was noted that PHA utility expenses exceed $1 billion annually, and the appropriation for operating subsidy for fiscal years 1994 and 1995 was sufficient to fund PHAs at 95% and 96%, respectively. In fiscal year 1996, the appropriation for operating subsidy was only sufficient to fund PHAs at 89%. It is not guaranteed that future appropriations will result in a higher percentage of funding. Hence, the Department must ensure that PHAs conduct audits as one means of holding down operating costs, including the cost of utilities, and ensuring that the limited funds available for operations are used as efficiently as possible.

HUD's Office of Inspector General (OIG) recently completed an Audit Report entitled "Review of Opportunities to Reduce Utility Costs At Public Housing Authorities." The OIG report was based on visits to approximately 63 PHAs that manage 41% of the 1.3 million public housing units nationally. The OIG indicated that, despite past efforts, opportunities for reducing utility costs continue to exist and are cost effective in many instances due to ongoing improvements in technology. PHA managers need to be aware of, evaluate, and give maximum consideration to these ongoing and new opportunities when managing their utility costs. The OIG further states, that, because of improvements in technology, managing utilities is a continuous process that requires an ongoing energy management program.

Comment: One Comment stated that the rule needs a definition of "energy audit" and "cost effective" so that PHAs know how to determine what is "cost effective" and what is not. In addition, the Comment stated that the rule should also cross-reference the location of any applicable HUD guidance on the matter.

Response: The terms referenced by the Commenter have previously been defined at 24 CFR 965.303, PHA-Owned or Leased Projects-Maintenance and Operation. However, as a result of President Clinton's regulatory reinvention efforts and Executive Order 12866, Regulatory Planning and Review, issued by President Clinton on September 30, 1993, HUD commenced a comprehensive review of all of its regulations to determine which regulations could be eliminated and streamlined. One such review was with respect to 24 CFR part 965. The Department favored providing PHAs with more flexibility to meet local custom and eliminated those definitions. The Department still believes that those definitions still represent a reasonable description for those terms and may be used by PHAs. The revised PHMAP Handbook 7460.5 will include cross-references to applicable HUD issuances as appropriate.

Comment: One Comment stated that the energy/utility component could be greatly improved by lowering the standards and recommended adopting a standard of a 10% increase for a grade C level performance and a 4%-5% increase for a grade A.

Response: The Department believes that the current percentage ranges are equitable and that a choice of using Option A or Option B, which the Department has decided to adopt, offers PHAs much greater latitude with regard to the energy/utilities component.

Comment: One Comment stated a preference to let Option A stand as a separate indicator as it does now since Option B (energy audits) is not funded by the Department.

Response: The Department disagrees with this rationale on the basis of its belief that a sound energy management program is fundamental to good property management and that energy audits are a cost of doing business that should be included as a part of an agency's budget.

VOL 61 ISS 251 DE 30 1996 UMI

Comment: One Comment stated that, for purposes of PHMAP, Option A should be modified to reinstate the HDD factor. One Comment stated that if HDDs are not considered for PHMAP, the rolling base period should be extended so as not to distort energy expenditure trend data due to abnormal weather. One Comment stated that the elimination of the HDD factor no longer offers adjustments for unusually harsh winters.

Response: The Department agrees that HDDs should be considered for purposes of PHMAP if an HDD adjustment would significantly affect a PHA's assessment. For purposes of PHMAP, therefore, a PHA may request a modification to adjust consumption using an HDD adjustment for space heating utilities provided that the same data source is used for the current year as well as the three year rolling base period. The HDD factors used by a PHA are subject to HUD State/Area Office approval.

Comment: One Comment recommended the elimination of Option A due to conditions beyond the control of the PHA (e.g., rate increases) or positive initiatives (e.g., increased resident programs that have resulted in increased consumption to provide facilities for these activities).

Response: As previously discussed, Option A measures only consumption, not rate, increases and increased consumption due to special circumstances, e.g., resident initiatives programs, will be addressed in a revised PHMAP Handbook 7460.5.

Comment: One Comment proposed that Option B be modified to permit a passing grade for PHAs that have conducted an energy audit and have an implementation plan for all items in the audit in that it may not be feasible to implement all recommendations given insufficient funding and other priorities relating to health and safety.

Response: The Department agrees. A PHA may achieve a grade C under Option B if it has completed the energy audit, developed an implementation plan and is on schedule with its implementation schedule, based on available funds. The implementation plan should identify at least the items from the audit, the estimated cost, the planned funding source (e.g., funds from 1998 operating budget, 1998 CGP, etc.) and the anticipated date of completion for each item. The Department has changed the language in the new rule to reflect this comment.

Comment: One Comment expresses concern that at the time of a PHMAP self-certification, an audit report may have just been issued or may be five years old. The Comment states that this would give some PHAs an advantage and force others into an F grade. The Comment also questions whether a PHA should implement all cost effective recommendations, e.g., it may be cost-effective to use gas appliances rather than electric, but could create a carbon monoxide danger in units of a certain design. Other recommendations may be cost-effective over a very long payback period but there may be higher priority needs. The Comment recommends that Option B refer to an energy audit completed at least two years earlier and implementation of all recommendations with a payback period of five years or less unless the PHA has established good cause for not implementing them.

Response: The Comment lacks specificity as to exactly how the Commenter believes that the existence of an audit just issued or which may be five years old will give any PHA an advantage. Not all PHAs are going to do audits at the same time, nor would the Department expect them to. As such, some PHAs will be completing work from a previous audit while other PHAs are planning new work from a recently completed audit. The Department does not have a problem with this sequence as it expects energy management to be a constant, ongoing and evolutionary process. Therefore, HUD has determined not to revise Option B to refer to an energy audit completed at least two years earlier, and not to adopt the suggestion that PHAs implement all recommendations with a payback period of five years or less unless the PHA has established good cause for not implementing them.

The Department has no problem with eliminating an otherwise cost effective energy conservation measure (ECM) if the existing design would render the measure hazardous. Issues such as this should be a consideration during the development of the audit itself. At that point, consideration would have to be given to the cost of work necessary to make the ECM safe. If all costs are considered, including the additional hazard, the ECM would likely not be cost effective.

The Department believes that a two year audit period is excessively short and unnecessarily burdensome on PHAs, and has included in this component the existing five year frequency contained in 24 CFR part 965. As noted above, during HUD's streamlining process of 24 CFR part 965, the definition of cost effective (a pay back period of 15 years or less) was eliminated. HUD favors giving PHAs the flexibility to determine what is cost effective. Therefore, HUD will not adopt the recommendation of requiring incorporation of EMCs with a five year payback. The revised PHMAP Handbook 7460.5 will include cross-references to applicable HUD issuances, as appropriate.

Indicator #7, Resident Services and Community Building—Section 901.40

General Comments

Comment: One comment stated that this indicator combines several distinct elements with the grading system, requiring a PHA to score an A on each element in order to score an A on the indicator. The comment added that these elements should be reorganized as separate components within the indicator and the indicator grade should be a composite of the component scores, as is the pattern in the other PHMAP indicators.

Response: The Department agrees with the comment and the new rule reflects the changes. The new resident services and community building indicator is now subdivided into four equally weighted components, and the indicator or the individual components are subject to exclusion based on the particular circumstances of each PHA. The name of this indicator has been renamed "Resident Services and Community Building" to place a more accurate emphasis upon the specific role of PHAs for these functions.

Comment: One comment suggested that the criteria for this indicator should recognize innovations in program design or implementation beyond the traditional grant programs that often require considerable effort and resourcefulness.

Response: The Department agrees that PHAs should promote innovation in the implementation of resident programs, especially if this results in linkages to additional resources and measurable results. The subdivision of the indicator into four components will provide more flexibility to recognize this type of innovation when assessing the indicator. The Department will provide further guidance, in the form of examples of activities that PHAs could get credit under each one of the components, in the revision of the PHMAP Handbook 7460.5.

Comment: One comment indicated agreement with the reduction of weight factor from triple weight but suggested that a reduction to a weight of x1.5 would be more appropriate.

Response: The Department disagrees with the comment. A weight of x1 in the new 100 point system represents 10% of the score. A weight of x3 in the current 220 point system represents 13.6% of

the score. It should also be considered that some elements of the current resident initiatives indicator are now covered in the new security indicator. The Department feels that the weight assigned to the new resident services and community building indicator is adequate.

Comment: One comment stated support for a PHMAP indicator measuring resident involvement, but expressed disappointment with the language of the proposed rule and indicated that the current rule gives more flexibility and offers a broader base for resident participation. Another comment stated that the proposed scoring aspects of the indicator appear unrealistic. Both comments suggested HUD retain the current indicator.

Response: The Department disagrees that the current resident initiatives indicator should be retained, without changes, in the new rule. The Department agrees that the indicator required some clarification in order to make it easier to assess and score and the new rule reflects those changes.

Comment: Two comments requested that the term "on-going management issues" be defined. The comments argued that this is a very bread term and could create problems if PHAs are required to pass all on-going management issues by the residents because business delays would be very costly. The comments stated that this is not a practical requirement and that the term "ample opportunity" is too vague. Another comment requested that the terms: "Section 3 program," "monitors progress," "issues reports," "encouraged the formation of a resident council," "mechanisms to ensure residents have ample opportunity for input," and "percent of goals met under implementation plan" be defined in the rule.

Response: Many of these terms have either been revised, or the term is defined elsewhere in the Code of Federal Regulations. The Department will add any applicable guidance regarding such terms in the revised PHMAP Handbook 7460.5.

Comment: The Department received several comments regarding applicability of this indicator to small PHAs. One comment stated that it is impossible for small PHAs to organize a workable resident initiatives program with part-time staff and that the indicator imposes too much extra work and is an administrative burden for small PHAs. Another comment indicated that small PHAs don't have the resources to handle this workload and residents don't have the interest. Five comments proposed that PHAs with 100 units or less be exempted from this indicator and that only large PHAs be assessed under it.

Three comments suggested that the indicator be removed for all housing authorities, or revised to consider only PHAs of 250 or more units. The comments proposed that as a minimum, PHAs with 249 or less units should be exempted. The comments argued that HUD has used 249 or less units as criterion for "small housing authorities" for nearly all aspects of funding such as CIAP vs. CGP, Youth Build Grants, Vacancy Reduction Grants, or Tenant Opportunity Program grants. Another comment indicated that maybe this indicator exclusion should be for all PHAs with less than 500 units.

One comment stated that small PHAs should be assessed under the indicator because residents of these PHAs also have a right to involvement in PHA management. One comment indicated that under the proposed changes, HUD has the appearance that it no longer cares what these smaller PHAs are doing. Another comment added that all PHAs should be assessed under the indicator in order to ensure that they are informed of the programs available and are conforming, to the best of their ability, to the Section 3 program. One other comment stated that since many PHAs over the past three years have gotten extensively involved in aspects of resident initiatives, it seems unfair to automatically exclude the efforts of those who have performed and earned merit. Another comment suggested that PHAs with 100% elderly units be excluded from this indicator.

Response: The Department agrees that since it has used fewer than 250 units as a threshold for "small housing authorities" for nearly all aspects of funding, the same criterion should and is being used for applicability of this indicator. This policy is consistent with the Tenant Participation and Tenant Opportunities regulation (24 CFR part 964) which has a participating threshold of 250 units, and it is also utilized in the CGP. In addition, PHA's with 100% elderly developments will not be assessed under this indicator. To avoid penalizing small PHAs with active programs, PHAs with fewer than 250 units or with 100% elderly developments may request to be assessed under the indicator at the time of PHMAP certification submission.

Comment: Two comments indicated that what this indicator measures is not a property management issue, but a social issue related to PHAs. The provision of social service support is not a function of PHA management any more than it is a function of privately owned or Section 8 residential property management.

Response: The Department understands that active resident participation and involvement have a direct affect on property management and are a key element to a successful, well managed public housing community. The Department provided a separate resident initiatives indicator and component on resident involvement in PHMAP because there is considerable evidence that resident services programs can help to promote and sustain housing authority management successes. Various tenant participation initiatives (patrols, neighborhood clean-ups, etc.) can reduce vandalism and project maintenance. Resident employment initiatives get residents involved in positive pursuits and employed residents can act as role models for others. Overall, involving residents in the various facets of property management—as trainees in a landscaping project or as participants in screening prospective residents—can showcase self-improvement and individual responsibility and contribute substantially to building positive and strong public housing communities.

Comment: Two comments requested HUD to clarify if the indicator intends to "examine efforts" or to "require efforts" and argued that it seems that it has been prescribed to require PHAs to develop and administer programs that at times are not funded by HUD, are not long-term commitments by HUD, and in most cases, the results of performance are predicated on the residents' willingness to participate. It is not equitable to score a PHA on items that are beyond the PHA's control. It is equitable to request PHAs to adopt resolutions encouraging participation. Another comment indicated that this is an unfunded mandate.

One comment stated that the performance message has now been confused with compliance items. Another comment indicated that PHMAP is intended to be a performance-based assessment system in which indicators must be written so that standards and criteria are clear, measurable, and capable of being duplicated from one PHA to another. The comment added that too much of this indicator is process-oriented, not performance-based and that adopting programs and "mechanisms" is administrative process and offers no guarantee or measure of results. One other comment stated that the indicator, as currently structured, will be very difficult to grade and will produce very inconsistent results. Three comments recommended that this indicator be

VOL 61 ISS 251 DE 30 1996 UMI

deleted entirely because it measures process and not outcomes.

Response: This indicator has been revised to hold PHAs accountable only for the functions they perform in operating resident services programs. The indicator has been subdivided into four separate components to make it easier to assess and grade: economic uplift and self-improvement; resident organization, resident involvement; and resident programs management. Each has been reshaped to address the public comments, especially to focus solely on the PHA's responsibilities for resident services. The indicator has been renamed "Resident Services and Community Building" to place a more accurate emphasis upon the specific roles of PHAs for these functions.

In response to concerns about short-term resident initiatives funding, it should be emphasized that PHAs would only be assessed for programs for which it has been funded. PHAs could also get credit for programs implemented through a partnership, for which the funding was made available through another of the partners.

Component #1, Economic Uplift and Self-Improvement

Comment: One comment stated that under the proposed changes, HUD adds a Section 3 requirement that has mixed adherence throughout the country. Another comment indicated that in small communities there are very few Section 3 programs and if there is one and the contractor's contract calls for them to hire Section 3 people, all a PHA can do is inform the residents that they may apply. One other comment argued that the implementation of Section 3 programs and the number of residents hired by the PHA is not a measure of its management. The comment concluded that resident self-sufficiency and related programs don't have any place in a management assessment program.

One comment indicated that to implement Section 3 training, you must have residents willing to participate. It stated that most of their residents are elderly, handicapped or have very small children and many are not able to work. Another comment stated that the Section 3 program may be disadvantageous to large municipalities facing a hiring freeze. Another comment stated that Section 3 is a mandate for any department using federal funds, and should not be a centralized program, as indicator #7 seems to require. It added that there seems to be no final rule for Section 3 in Public Housing (24 CFR part 135) and its status seems in doubt.

One comment mentioned that it does not have a concern with the Section 3 program emphasis because it has a great program now, but it is concerned with future funding and the impact if no new funding is available to continue the program. One comment agreed with the Department's efforts to emphasize the Section 3 program and another comment recommended that PHAs be required to show results in employment efforts in subsequent years to add to the results oriented focus. One other comment stated that it is difficult to be consistently abreast of a PHA performance under Section 3 and resident employment and suggested that it must be a PHA requirement to report resident employment to the HUD office in order to assess this criteria. Another comment stated that Section 3 is already a requirement and argued that PHAs should not get credit for something they are already required to implement. It further suggested that credit be given only for those things that PHAs do that are over and above HUD requirements such as internship programs or on the job training plans and also for using CGP funds to assist resident groups and develop security measures.

Response: The inclusion of an employment-related subcomponent in the resident initiatives indicator reflects the Department's emphasis on economic uplift as a proactive means to reducing dependency, and as mandated by the recent welfare reform legislation. The Department understands that there is considerable evidence that the increase in working families is very beneficial to property management. Because of the importance of this area, the Department wishes to give PHAs credit for the leadership role they can perform in employment-related initiatives. The Department has expanded the definition to include all employment-related initiatives, not just Section 3 or those in the public sector. Section 3 is effective as an interim rule and should be viewed as one tool in employment related initiatives.

In response to comments that the indicator be strengthened, language has been added to the indicator to require the PHA to provide evidence that they have one or more economic uplift and self-improvement programs and partnerships for economic uplift, including but not limited to, Section 3 initiatives. Such opportunities can be provided either directly or through non-PHA partners. The Department believes it is important for PHAs to get credit for their initiatives in promoting employment opportunities for residents. It is expected that PHAs will provide data on the number of residents by development in employment-related programs as well as evidence of the number of residents obtaining employment. PHAs can use Multifamily Tenant Characteristics System information to measure employment.

While the Department is supportive of PHAs efforts to measure employment, the indicator only requires that PHAs implement programs (HUD funded or non-HUD funded through partnerships) in its family occupied developments and set up and implement a system for measuring progress. The Department is not trying to dictate specific numeric employment goals but rather emphasizing activities that help measure PHA effort in implementing these programs.

Component #2, Resident Organization

Comment: One comment stated that HUD's encouragement of a resident council at each family development site assumes that resident councils are an absolute for every family development, regardless of the size of the development. Resident councils for some small developments are not only not necessary, but impractical. Another comment indicated that family developments are often built on scattered sites throughout a wide geographical area. The comment added that it is next to impossible to establish a resident council under these conditions and that this goal should be voluntary in these situations.

Response: Current HUD requirements give PHAs and resident communities the flexibility to determine how resident councils are organized. There is no specific requirement for a resident council at each development. The local public housing community should determine what kind of representation system suits its needs and makes the most sense. In larger developments, a separate resident council is merited. In smaller PHAs, a city-wide council may be more appropriate.

Comment: One comment stated that the current rule is supportive of resident councils and other resident groups while the proposed rule is too restrictive because it only makes reference to resident councils. The comment added that, while highly desirable, it is not always possible to organize and conduct development-wide elections and it urged the Department to reinstate the "or other resident groups" language of the current rule. Three comments suggested that the indicator reference to resident councils at each PHA family development should be changed to specify "HUD recognized resident councils."

Response: HUD is supportive of all resident organizations that work to benefit the residents, but the indicator

does not pretend to cover all possible forms of resident organization. The Department considers that resident councils, as official vehicles of resident representation, should be encouraged and the indicator measures PHA efforts to promote this goal. In regards to the issue of "HUD-recognized resident councils," the Department understand that it is not HUD's role to certify resident councils and that it is the PHA's responsibility to certify if such organizations have been formed in compliance with approved regulations, policies and procedures.

Component #3, Resident Involvement

Comment: Four comments stated that PHAs should not be penalized for lack of participation by the residents provided the PHA promotes self-sufficiency programs and community involvement. The comments indicated that PHAs may offer a variety of programs and training for residents, but they cannot make residents attend and participate. Another two comments recommended that an exclusion of the indicator be permitted in such cases where a PHA can show that the residents are not interested in forming a resident council and do not want to be involved in any of the programs covered by this indicator. One other comment also recommended to make each component potentially able to be excluded, based upon PHA's situation. Two comments stated that this indicator cannot accurately establish levels of participation, interest, etc., of the residents, it only measures the level of opportunities the PHA makes available to its residents. Therefore, it cannot measure performance.

Response: The Department agrees that PHAs cannot be made responsible for lack of interest by residents in organizing resident councils, but PHAs can be assessed on their efforts to promote and facilitate the organization of resident councils by activities such as: facilitating space for meetings, providing training, access to bulletin boards, helping to schedule and promote meetings, approving Board policies and developing PHA procedures for certifying resident councils.

In response to some of the concerns expressed in the comments, the Department changed the indicator to subdivide it into four components. This component measures PHA efforts regarding resident councils, and PHA collaboration and support to existing resident councils or to those that are in the process of being organized. A PHA is not responsible for the formation or continuation of resident councils as these functions are the responsibility of the resident councils. The Department is making the indicator and each of its components subject to exclusion. This would certainly apply to cases where the PHA can show evidence that it has predominately scattered site units and that residents are not interested in these programs. The Department will provide additional guidance to PHAs on this issue in the revision of the PHMAP Handbook 7460.5.

Comment: Three comments indicated that resident involvement is simply not an appropriate measure of a PHA's management capability.

Response: The Department disagrees and as mentioned earlier, believes that active resident participation and involvement have a direct affect on property management and are key elements to a successful, well managed PHA. In addition, there is considerable evidence that resident involvement and resident services programs can help to promote and sustain housing authority management successes.

Resident Surveys

Comment: One comment stated that resident surveys would be time consuming, but may be helpful. Another comment suggested that PHAs should be required to complete a resident survey on the fear of crime and the measure of disorder in each community once a year.

Two comments stated that resident surveys are most important in order to establish programs in which the residents are interested and suggested that PHAs be required to report on whether they conduct resident surveys for modernization or whether the PHA attempts to conduct resident surveys or communicates with newsletters. Five other comments expressed support for resident surveys, with one proposing an annual standardized survey used as a learning tool by PHAs and another three arguing that standardized surveys should only be used as models for PHAs to develop locally oriented surveys.

One comment suggested that resident surveys be optional for well managed PHAs and required under the MOA for troubled PHAs. Another comment stated that conducting resident surveys is a good idea, but HUD should allow PHAs to complete regular surveys in lieu of HUD's mandated ideas of what resident involvement means.

Two comments indicated that PHAs should be encouraged, but not required, to conduct such surveys, with HUD assisting in the development of survey formats and data analysis models that PHAs may use for this purpose. The comments argued that if HUD wishes to use customer satisfaction as the basis for the PHMAP score, then HUD should conduct the survey itself using some type of sampling technique that employs consistent and statistically reliable methods. Another comment expressed concern with the feasibility of implementing this measure in small PHAs with a majority of elderly and residents with disabilities.

Another comment stated that consumer satisfaction is critical in public housing and a survey of residents may be a way to gauge satisfaction. Surveys should not be conducted by PHAs; that would add too much paperwork and residents would feel inhibited to express their true feelings. Surveys should be conducted by private contractors, using a standardized form on a statistically significant sample of residents (using MTCS data to assure a diverse and representative group) from each PHA. The results would be shared with HUD and the PHA.

Ten comments stated that resident surveys as suggested would only amount to more paperwork with few, if any, tangible results. A survey completed by the resident council or advisory board would be more accurate and more useful. Another three comments stated that the present contact with residents is sufficient to adequately assess their level of satisfaction. One comment indicated that no new unfunded tasks should be imposed on PHAs through PHMAP.

Four comments indicated that surveys, by their nature, are subjective in orientation and often reflect the goals of the entity doing the survey. There are too many variables which would affect the responses. To direct PHAs to design and implement their own surveys would be a self-serving exercise of little real value. For HUD to develop a standard survey to be used by every PHA, each with its own set of problems and capabilities, would result in a document devoid of any real meaning. Another two comments stated that surveys are complex to develop and can be resented or distrusted by residents. Four comments expressed concern with the cost to PHAs of implementing resident surveys and indicated that a national format is not a good idea because of the special local conditions. Another comment stated that PHAs shouldn't be penalized for lack of resident response to these surveys.

Two other comments argued that total consumer satisfaction is impossible to achieve and even more difficult to measure. Requiring PHAs to conduct periodic surveys for this purpose is an undue burden, especially on large PHAs

VOL 61 ISS 251 DEC 30 1996 UMI

where housing projects are distant from one another and from the PHA.

One comment recommended that this be a voluntary activity and that it not be included in performance measurements. Another comment requested HUD to provide technical assistance in the area of assessing consumer satisfaction, but discouraged the creation of a new reporting requirement. HUD could distribute information to PHAs on how to design, develop and implement resident satisfaction surveys. It is unrealistic to expect that a single resident survey instrument will necessarily be meaningful to every PHA and every resident population. In times of diminishing operating subsidies, HUD should not force PHAs to conduct such surveys only for the sake of PHMAP.

Response: In response to the comments, the Department decided not to require the implementation of resident surveys as part of the PHMAP process. Although it is not required, PHAs may consider the voluntary use of this optional tool to obtain resident input and to measure resident involvement and satisfaction.

The Tenant Participation and Tenant Opportunities regulation (24 CFR § 964) stipulates that PHAs shall encourage full resident participation and partnership with the PHA. The Department does not want to provide overly specific instructions to PHAs, but instead wants to offer options for alternative approaches for promoting constructive resident participation and customer satisfaction. Therefore, the component on resident participation has been changed to require a PHA to provide evidence that the PHA is providing meaningful ways to communicate and partner with residents concerning the quality of life and housing management services (such as screening, relocation, capital improvements), but is not prescribing the specific method(s).

Possible methods used by PHAs would include, but not be limited to: resident membership on the PHA Board of Commissioners or on specific policy committees that contribute substantially in planning and implementing PHA programs; regular resident consultation through ongoing, scheduled meetings with the PHA-certified duly-elected resident councils; regular communication mechanisms with residents, such as a newsletter, as well as other means such as customer surveys and focus groups.

Component #4, Resident Programs Management

Comment: Several comments stated that PHA performance should not be assessed based on grants and activities that are not under the control of the PHA. Sixteen comments indicated that TOP and TAG are controlled by the resident organization and not by the PHAs and that it would be unfair of HUD to hold PHAs accountable for tenant organization grants that are not under the PHA's control. One of the comments suggested that HUD eliminate this component. Another comment asked if a PHA would get credit if its resident organization implements a TOP grant training.

Response: The Department agrees that PHAs should not be held responsible for resident activities or grants that are not under their control and the new rule reflects these changes. The indicator has been revised in order to assess PHAs for the functions they perform in operating resident services programs and for resident management or TOP performance only when the PHA is the contract administrator for the program.

Comment: One comment stated that in order to meet 90% of the goals as defined in the grants, a PHA would need to adjust those goals under various circumstances, i.e., numbers versus percentages; either the grant plan should allow for a percentage versus an exact number to be included, or the goal must be flexible enough to change when circumstances dictate.

Another two comments indicated that this indicator requires the documentation of achievement of a certain percentage of goals under resident initiative programs, but goals tend to be few and somewhat unquantifiable; such program goals should not be measured by PHMAP unless the goals had been articulated with the understanding that they were to be quantifiable and achievable within the grant term; progress is often in the hands of the tenants and tenant leaders.

Two comments stated that there is general concern that measuring performance in meeting grant goals may be difficult to evaluate and may not be representative of performance. There is a clear incentive for PHAs to establish easily attainable goals to protect a good PHMAP score. We believe the goals for such programs should be set as high as possible and used as targets for achievement. Some other system of measurement should be found. This should be measured in the criteria used to determine management capability in the competition to receive grants.

One comment argued that HUD shouldn't ask PHAs to document goals met under resident initiatives programs. Those programs already have exhaustive reporting requirements.

One comment stated that the standard defined as 90% and 60% of goal attainment under the implementation plan for any and all of the grant programs are too stringent and perhaps inappropriate to the goals being measured. The measure of goal attainment based on implementation strategies is at best subjective and at times affected by conditions beyond the control of the PHA.

One comment indicated concern with the indicator measuring resident involvement via any resident related grants received by the agency. The comment argued that HUD would do better to leave grant measurements with the specific grant processes and perhaps rate PHAs on whether they have a system to become informed about resident related grant opportunities or if they have applied, assuming they have resources to do so.

Another comment indicated that § 901.40(a)(4) attempts to measure compliance in many categorical funding programs in which PHAs are voluntary participants and that have their own contractual requirements and enforcement mechanisms. If HUD were to grade compliance with these contracts under PHMAP, HUD would be unilaterally imposing new contractual provisions that substantially alter the consequences of performance or non-performance. Provisions of this nature should not take effect unless and until they are subject to negotiation between the contracting parties.

One comment stated that applying for social service grants is a PHA option, not a requirement. PHAs that do not elect to apply are appropriately not penalized. How can evaluation of a PHA's performance of optional activities be used as a basis to rate the PHA's management performance?

Response: The Department included resident grant progress as a component of the resident initiatives indicator because it is critical that any available categorical grant funding be utilized effectively to meet the defined work plan objectives of the specific programs. This component would only apply if the PHA has responsibility for administering one or more grant programs.

By applying to these programs, a participating PHA accepts implementation requirements attached to them. Goals for these programs are developed by the PHA and should reflect realistic expectations of what the

PHA proposes to accomplish. The rule reflects some margin of flexibility in grading the percentage of goals achieved. Assessing PHAs on performance in managing grant programs is not new to PHMAP. PHAs are assessed under other areas of their management, including performance in managing grant programs (competitive or formula) such as modernization. In addition, the Department has revised the regulation to eliminate assessment of the resident management or TOP unless the PHA acts as the contract administrator for the resident grantee.

Section 901.45 Indicator #8, Security

General Comments

Comment: There were fifteen comments recommending that indicator #8 not apply to smaller PHAs, described variously as those PHAs with fewer than 500 units, fewer than 250 units, and fewer than 100 units. One comment felt that all PHAs, regardless of size, should be assessed under this indicator because crime and drugs exists everywhere.

Response: In response to the comments received, the Department has determined that indicator #8 will apply to PHAs with 250 or more units under management. To avoid penalizing small PHAs with active programs, PHAs with fewer than 250 units can request to be assessed under the indicator at the time of the PHMAP certification submission. However, PHAs with fewer than 250 units should be keeping records of crime, reporting it to local law enforcement, administering rigorous screening criteria, evicting residents who engage in criminal activity, and meeting the goals specified by categorical grants as good management practices, even though they are not required to be measured on this activity.

Comment: There were two comments specifically supporting "One Strike and You're Out" and screening and eviction policies through indicator #8. Two commenters mentioned that constraints in existing State law or the local court system have made it difficult to comply with the intent of the one strike policy. Two other commenters indicated that PHAs should be required to submit evidence that they have implemented eviction policies that could be monitored through tracking systems.

Response: The Department is pleased that there is a positive response to its one strike policies which are established pursuant to the "Housing Opportunity Program Extension Act of 1996" and PIH implementing guidance (Notice PIH 96–27), which provided additional guidance to PHAs in the areas of screening, lease enforcement and eviction in order to help PHAs fight crime. The one strike policy must be implemented within the context of the applicable State laws and court systems. PHAs will not be required to submit documentation at the time of certification; rather, PHAs are required to maintain supporting documentation for all of the indicators it certifies to for HUD post review. To assist PHAs in setting up and operating successful programs, the Department will provide examples of best practices in the forthcoming revised PHMAP Handbook 7460.5.

Comment: There were four comments that felt that this indicator would place unnecessary administrative burdens on a small PHA that does not have a crime problem and is already cooperating with the local police department. In addition, small PHAs do not have the resources (funds and personnel) to perform the security measures required by this indicator.

Response: Current practices by PHAs show that the cooperation of PHAs and local law enforcement for the collection and reporting of PHA crime information is not always a cost issue. Please note that the Extension Act permits PHAs to request criminal conviction records of adult applicants from the National Crime Information Center (NCIC), police departments and other law enforcement agencies. The Public Housing Drug Elimination Technical Assistance Program can be used to assist PHAs in developing appropriate collection systems and data bases. The Department anticipates that the use of NCIC and other data sources in addition to the technical assistance from HUD will enable PHAs to obtain necessary information in a timely manner.

Comment: Three comments felt that there should be a policy designed for small PHAs and one for large PHAs. It will be very difficult for a small PHA with no security problem and no resident involvement to make a passing grade in this indicator.

Response: Rather than have a separate security indicator for small and large PHAs, the Department has determined that PHAs with fewer than 250 units shall be exempted from this indicator unless the PHA requests to be assessed under the indicator at the time of the PHMAP certification submission.

Comment: Three comments stated that the criteria listed for this indicator are measures of process and not necessarily results. A more appropriate measure would include actual crime data. Also, indicators of vacancy percentage and financial management are directly related to the degree of security in the developments.

Response: This indicator has been revised to reflect the comments received and its components now more accurately measure results. The Department agrees that vacancies and financial management are directly related to security in the developments, but performance in these areas are measured under indicators #1 and #6.

Comment: One comment suggested that this indicator shouldn't apply until adequate time is provided for PHAs to establish the proper documentation, reporting, and tracking criteria to successfully score in this indicator. Another comment strongly requested that HUD require data be provided beginning with the next fiscal year after the effective date of the provisions of this indicator because it would be very difficult to secure data from January 1, 1996, to the present.

Response: The Department has determined that the new rule will apply to PHAs with fiscal years ending the quarter after the new rule is published in the **Federal Register**.

Comment: One comment stated that this indicator combines several distinct elements with the grading system, requiring a PHA to score an A on each element to score an A on the indicator. These elements should be reorganized as separate components within the indicator and the indicator grade should be a composite of the component scores, as is the pattern in the other PHMAP indicators.

Response: The Department will grade this indicator as a composite of the sub-component scores, as is the pattern in other PHMAP indicators.

Comment: One comment felt that security is not a property management issue, but a social issue related to PHAs, and was outside of the PHA's control. Another comment stated that reducing crime and drugs was an appropriate property management issue.

Response: In both public and private property management, crime and drug problems have a direct affect on property management. Because of this, the Department has determined it is critical that this indicator apply to all PHAs with 250 units or more under management.

Comment: One comment stated that this indicator will be very difficult to grade objectively and consistently. The terms "mechanism to track crime-related problems" and "system for taking action" are vague and undefined and need clarification. Two comments questioned the meaning of "document results in screening out" various applicants. One comment felt the proposed measure of PHA actions to appropriately screen out applicants and

evict residents who engage in criminal activity is the only appropriate measure of PHA management performance under this indicator.

Response: The Department has rephrased this component and the first two phrases mentioned are no longer included in the new rule. The third phrase commented on has been revised to say, "can document that it successfully screens out and denies admission to a public housing applicant who * * *" and "can document that it successfully evicts a public housing resident who * * *" This new language more clearly embodies the intent of the one strike policy. The Department agrees with the last comment.

Comment: One comment felt that the term "crime" should be defined to avoid wasting time on crimes that do not affect the safety/security of residents.

Response: The Department has not established one uniform national definition of crime, since different types of crime represent different threats, and vary among communities. HUD believes each PHA should decide what constitutes criminal violations that are unacceptable to the local community. In general, the crimes against which PHAs should screen applicants are those that would pose a threat to the health or safety of other residents or PHA staff, or a financial risk to the PHA. These crimes would be lease violations. These are the crimes against which applicants should be screened and for which violators be evicted.

Comment: One comment stated that § 901.110(e) should state that indicator #8 should be excluded automatically for PHAs with 100 or fewer units.

Response: The Department agrees with this comment and the rule has been changed to state that this indicator does not apply to PHAs with fewer than 250 units under management unless the PHA requests to be assessed under the indicator at the time of the PHMAP certification submission.

Comment: One comment reflected that criteria #2 and #3 deal with screening and evictions. If HUD is to allow a PHA to self-certify on this indicator, the PHA should be required to submit evidence of policies and leases to support the certification.

Response: The Department disagrees and is requiring that a PHA maintain supporting documentation for all of the indicators it certifies to for post review by HUD or the independent auditor rather than submit additional documentation at the time of certification.

Comment: One comment felt that too many communities already have police departments that avoid their responsibilities in public housing "projects" for reasons that include the perception that public housing is a Federal rather than local responsibility. This indicator plays into that mind set, and therefore, hurts the crime fighting goals PHAs and HUD share.

Response: The Department believes that the establishment of one strike leasing, eviction and related processes have already proven to be effective in crime/drug reduction. This indicator has been designed to measure the inplementation of mechanisms that many PHAs have already used successfully in developing safe and secure environments for public housing residents.

Comment: One comment believes that this is the most important indicator for large PHAs where crime is a critical problem, and should have a greater weight than x1.

Response: The Department agrees that this is a very important indictor. This indicator and indicator #7, resident involvement, have a combined total of 20 points in a 100 point scale. The Department feels that this is an equitable distribution when the importance of all of the indicators are considered as a whole.

Comment: One comment thought that PHAs should request help from the HUD State Coordinator in getting assistance from law enforcement agencies.

Response: The Department recommends that a PHA first contact its State/Area Office for technical assistance in obtaining assistance from law enforcement agencies, and to explore alternative solutions. HUD agrees that the State Coordinator and the Area Representative should be advised of unresolved difficulties in implementing the one strike policy. The Department will provide assistance, as appropriate, to further the implementation of the one strike policy.

Comment: One comment suggested that additional criteria should be considered that would give recognition to PHAs that have made tremendous progress in arresting crime and/or have established resident patrols to assist in crime reduction.

Response: The Department appreciates the suggestion, but feels that the appropriate vehicle for such recognition is its Performance Awards Ceremony.

Comment: One comment suggested there be a criterion that measures a PHA's efforts to get resident involvement in citizen patrols.

Response: The Department agrees that citizen patrols are very effective in helping to reduce incidence of crime in a community, and this criterion is indirectly measured under components #1 and/or #4 of this indicator.

Component #1, Tracking and Reporting Crime Related Problems

Comment: Thirty comments felt that PHAs should not be held accountable under indicator #8 for cooperation with local police departments and other community agencies, as this partnership was beyond their control. At least one commenter expressed concern about being able to access criminal data. Another commenter indicated that PHAs do not have the authority to address crime problems.

Response: As a result of these concerns, the Department has determined that PHAs will not be assessed for partnerships with the local police departments and other local agencies, with the exception of grade A. Grade A of this component has been revised to assess a PHA's cooperative system for tracking and reporting incidents of crime to local police authorities. Grades below an A assess only the reporting of incidents of crime to local police authorities. Although PHAs will not be measured under this criterion for grades below an A, it is essential for PHAs to work closely with local and State agencies in order to operate effective crime and drug prevention programs. Also, while PHAs do not specifically have the authority for arrests, they can utilize one strike to deny admission or evict known criminal violators.

Comment: Five comments thought that documentation from local law enforcement agencies might be a method of reporting crime in small housing authorities.

Response: The Department couldn't agree more. All PHAs are encouraged to develop partnership relationships with local law enforcement entities, and all PHAs should be keeping records of crime, reporting it to local law enforcement, administering rigorous screening criteria, and evicting residents who engage in criminal activity.

Comment: One comment stated that HUD shouldn't ask PHAs to try to require their municipal police departments to act beyond the scope of the Cooperation Agreement.

Response: It is not intended that tracking and reporting crime-related problems would in any way mandate PHAs to require their municipal police departments to act beyond the scope of the Cooperation Agreement. A PHA should always act within the scope of the Cooperation Agreement and should never require another agency to act beyond the scope of the Agreement.

Comment: One comment stated that PHAs that complain that they cannot negotiate obtaining monthly calls for service confirm that they have poor relations with their local police departments.

Response: Although this may be true, it is not necessarily through lack of trying. A PHA should continue to negotiate working relationships with local law enforcement entities.

Component #4, Grant Program Goals

Comment: Five comments reflected that this indicator requires the documentation of achievement of a certain percentage of goals under resident initiative programs, but goals tend to be few and somewhat unquantifiable. Such program goals should not be measured by PHMAP unless the goals had been articulated with the understanding that they were to be quantifiable and achievable within the grant term. There is general concern that measuring performance in meeting grant goals may be difficult to evaluate and may not be representative of performance. There is a clear incentive for PHAs to establish easily attainable goals to protect a good PHMAP score. Four of these commenters felt that some other system of measurement should be found, or the indicator eliminated. One commenter proposed that the goals be set as high as possible and used as a target for achievement. Seven commenters indicated that PHAs should not be rated on this indicator unless there was specific funding for all PHAs, and therefore, this program area was an unfunded mandate. One commenter stated that PHAs should only be rated on resident initiatives, not security. One commenter questioned why the goal did not track progress in goal achievement under the Drug Elimination program.

Response: The Department believes that the establishment of one strike leasing, eviction and related processes have already proven to be effective in crime/drug reduction. This indicator has been designed to measure the implementation of mechanisms that many PHAs have already used successfully in developing safe and secure environments for public housing residents. Grant goals are part of the overall evaluation of an application for funding. If a PHA has unrealistic goals, they are either renegotiated, or the PHA does not receive funding.

The Department has determined that security will continue to be a separate indicator because it is integral to good management and can be accomplished without additional funding, or with operating subsidy and comprehensive grant funds. PHAs should make use of these or other allowable funding sources to address crime and security problems. The Department cannot restrict factors to those in the Drug Elimination Program since crime problems affect all PHAs, not only those that have successfully competed for drug elimination grants.

Comment: One comment stated that goal achievement should be measured in terms of program implementation (which it is within the power of the PHA), not impact on crime (which is beyond the control of the PHA). A range from 85% to 100% should be establish for achieving an A grade.

Response: The Department has determined that a PHA will achieve a grade A for this indicator if it is meeting at least 90% of its goals under the implementation plan for any and all of these programs.

Data Collection—§ 901.100

Comment: Thirty comments stated that 45 days to submit the certification is a concern because PHAs are busy completing their year end work. It would cause a problem for small PHAs that have limited human resources to complete all other fiscal year end reports required. The time to submit should remain 90 days. Two comments stated that 45 days to submit its certification would be sufficient time as long as there was a quorum for the Board meeting, and as long as the process works smoothly. Seven comments recommended that certifications should be submitted 60 days following the end of a PHA's fiscal year.

Response: HUD is attempting to balance the need to make the PHMAP scoring as quick and timely as possible, so that it more accurately reflects a PHA's current status, with the additional year end burden it represents to both PHAs and HUD itself. In light of the above comments, the Department has determined that a better balance is achieved with a 60, rather than 45, day submission period, and the rule is amended accordingly.

Comment: Two comments pointed out that PHAs that request and receive an extension to submit their fiscal year end financial reports should also be granted an extension to file their PHMAP certification. Large PHA's must routinely ask for extensions to submit their year end financial statements.

Response: The Department agrees with the comment. To satisfy administrative requirements, PHAs must submit extension requests or waiver requests for both their fiscal year end financial reports and their PHMAP certification. However, a State/Area Office may grant an extension for the submission of year end financial statements for a period of no more than 90 calendar days. Requests for extensions for more than 90 calendar days, or requests for extensions in addition to the initial 90 calendar days, shall be approved by the Assistant Secretary, as well as waivers for the submission of a PHA's PHMAP certification.

Comment: Two comments felt that PHMAP should be more flexible so as not to discourage otherwise outstanding performance due to late submission of required reports or a PHA's inability to review and approve submissions more quickly. Lateness should not have the effect of decimating the performance ratings in all areas rated by PHMAP.

Response: The Department disagrees with this comment, and will retain the option which permits State/Area Offices to award a presumptive rating of failure in all of the PHMAP indicators if required reports have not been submitted to HUD in a timely manner. HUD believes that outstanding performance includes a PHA's ability to submit in a timely manner required reports that are used to calculate the PHA's PHMAP score.

Comment: Two comments felt that the revisions to the rule may require major changes in the systems used to maintain records related to PHMAP. Changes in a PHA's information systems will be both costly and burdensome. It will require PHAs to focus important resources on administrative areas that will not improve the manner in which quality housing is provided to low-income families.

Response: HUD recognizes that, at least initially, the changes made by this rule to improve PHMAP will impose a burden on PHAs who will have to make necessary adjustments in their information systems. As was the case for the previous rule, it is expected that as the collection and organization of the data will become more routine following the first submission, the associated burden will also decrease.

Comment: One comment felt that the time frame for submission should relate to the size of the PHA.

Response: HUD disagrees with this comment. The Department has received comments from small PHAs citing small staffs and from large PHAs citing large administrative burdens to justify changes in the time frame for submission. The Department has concluded that, until experience demonstrates otherwise, the same time frame for submissions should apply to all PHAs.

Comment: One comment felt that the certification form is cumbersome and includes requests for information currently available to HUD, specifically financial data required to be provided to HUD by all PHAs, or more information than currently required. It appears to require inclusion of data necessary for HUD to perform or confirm the calculations made by the PHA, and this is repetitive since PHA audits ensure accuracy in reporting. This is contrary to HUD's intent to require PHAs to certify to information otherwise not available.

Response: The worksheet and certification form have been redesigned to make them more user friendly, as applicable. HUD welcomes additional, specific recommendations to improve these documents further. The Department disagrees that the certification form requests information currently available to HUD. For example, the new certification form financial management question for indicator #6 requests the dollar amount of a PHA's cash reserve available for operations. The requested financial information is not reported on any other required reporting submission. The Department cannot rely totally on audit report confirmation because audit reports are not normally available until after the PHMAP process has been completed for the assessed fiscal year. The certification form requires a PHA to state the raw data that are used to calculate the score of specific indicators to ensure accurate calculation.

Comment: One comment stated that if the purpose is to shorten the time it takes for a PHA to learn its status/score, it may be more appropriate to reduce the amount of time that HUD has to respond. It should not take any more than two weeks to review the PHA submission (one page) and to perform any analysis or calculations for indicators that HUD scores.

Response: HUD is attempting to balance the need to make the PHMAP scoring as quick and timely as possible, so that it more accurately reflects a PHA's current status, with the additional year end burden it represents to both PHAs and HUD itself. In light of the above comments, the Department has determined that a better balance is achieved with a 60, rather than 45, day submission period. State/Area Offices monitor other program areas in addition to the PHMAP, which is just one facet of the Department's overall affordable rental housing efforts. In addition to the section 8 program, State/Area Offices must administer such efforts as modernization programs, resident initiative programs, and drug elimination programs. The Department feels that 60 days for State/Area Offices to complete a PHMAP assessment is equitable in view of other workload requirements.

Comment: One comment reflected that in the preamble to the proposed rule, HUD states that it will require State/Area Offices to give PHAs their PHMAP scores within 45 days from certification, but the proposed rule's text does not contain that requirement. The commenter suggests that HUD include that requirement in the text.

Response: State/Area Offices will be required to meet the 60 day notification period by an internal directive that will be as binding upon them as a regulatory requirement.

Comment: One comment observed that § 901.100(b)(5) stipulates that a PHA's certification will be post-reviewed by HUD during the next on-site review, but is subject to verification at any time. What does this mean? It suggests that verification could be accomplished by some means other than on-site review. It is critical to clearly stipulate in the rule a standard and consistent approach that must be followed by all HUD State/Area Offices in order to validate, document and justify a conclusion that a PHMAP score certified by a PHA should be changed.

Response: On-site reviews are usually conducted pursuant to risk management, and § 901.100(b)(9) simply provides that certification verification can take place at any time notwithstanding the regularly scheduled on-site reviews. In addition, the rule does clearly stipulate a standard and consistent approach to validate, document and justify a conclusion that a PHMAP score certified by a PHA should be changed. The verification language in § 901.100(b)(9) is related to the provision at § 901.115(k), that permits, in exceptional circumstances that constitute a standard and consistent approach, a State/Area Office to reinstate any review as necessary to address particular deficiencies, or deny or rescind incentives or high performer status, even though a PHA has satisfied all of the indicators for high or standard performer designation.

Comment: One comment asked exactly what information does HUD expect to derive from "existing reporting and data forms?" As written, only indicator #2 can be scored by HUD without complete and total reliance on PHA self-certified data. This is an enormous flaw in any allegedly objective assessment process, including PHMAP.

Response: The assessment process is the result of balancing the two objectives of maximizing reliability and minimizing the administrative burden. The Department realizes that the extensive demands upon both its own and PHAs' resources limit what may be appropriately imposed upon PHAs and adequately monitored by the Department. HUD's reliance upon PHA-certified data is backed up by the admittedly small number of on-site reviews HUD is able to conduct, but these reviews do indicate substantial, good faith compliance. HUD attempts to target its monitoring resources as efficiently as possible by focusing on troubled or near troubled PHAs or PHAs in which the factors identified in § 901.115(k) of the rule are present. The required supplement to the independent audit requires a PHA's independent audit to ascertain whether the PHA maintains the data necessary to support its PHMAP certification and whether the PHMAP data are consistent with the PHA's other records. HUD will continue to consider ways in which the reliability of PHMAP may be improved. In addition, the new rule has been revised to state that a PHA may not appeal its PHMAP score to the State/Area Office if the reason the PHA received a failing in any indicator or component was due to the fact that the PHA did not provide justifying documentation to the independent auditor for the indicator(s) the PHA certified to.

Comment: One comment stated that the clause that allows PHAs to include in their PHMAP certifications "any information bearing on the accuracy or completeness of the data being used by HUD in grading an indicator" is confusing. A PHA should certify to the correct data in exactly the manner prescribed by the PHMAP process. If a PHA believes that the data does not fairly represent its performance, it should submit a "modification" request, but the data in the certification shouldn't be changed.

Response: The rule, at § 901.100(b)(3), provides that a PHA may include such information in its certification, rather than through an exclusion or modification request, and that HUD will consider the information in grading the affected indicator. The intent is not to encourage a result that the certified information would be changed, but to encourage a PHA to submit corrected data, late reports, or previously omitted required data at the time it submits its PHMAP certification. This provision allows more flexibility in the PHMAP process, and helps ensure that the most recent data is available to use in completing the PHMAP assessment.

Comment: One comment felt that the provision that suggests a PHA could get

a presumptive F in all PHMAP indicators if the certification is not submitted on time should be clarified. Does this mean all indicators or only those which rely on the certification?

Response: The language states all indicators. This provision at § 901.100 (b)(4) gives HUD a direct and timely way of enforcing the certification requirement. Although compliance with PHMAP is the norm among PHAs, if failure to provide the certification would only result in failing grades for the indicators subject to certification, a PHA may decide to forgo submitting the certification when a passing grade could be achieved without it. This would defeat the purpose of PHMAP to assess the performance of a PHA on all of the indicators.

Computing Assessment Score—§ 901.105

Comment: Two comments agree that the establishment of clear-cut adjustment guidelines is a good addition to PHMAP.

Response: The comment is noted by the Department.

Comment: One comment stated that the physical condition of a project reflects not only the care and maintenance provided by the PHA, it also reflects the attitudes and behavior of residents in some communities. Those cases where the physical condition of the project does not improve regardless of a PHA's efforts to improve and maintain the project in safe and sanitary condition should be considered as a condition beyond the PHA's control, and a modification or exclusion should be allowed for this reason.

Response: The Department disagrees with this comment. If a resident's attitudes and behavior cause maintenance or other physical problems, it then becomes a lease enforcement issue rather than automatic grounds for a modification or exclusion request due to conditions beyond a PHA's control. However, HUD considers modification and exclusion requests individually, and on a case by case basis, and grants or denies them as appropriate.

Comment: One comment stated that the definition of neighborhood is based on census tract and proposed that HUD permits also the option of census block groups. Census blocks allows for more specific definition of demographic characteristics.

Response: The Department agrees that PHAs may use census blocks as well as census track data, as appropriate.

Comment: One comment stated that the proposed rule excludes developments that received comprehensive modernization within the past ten years from receiving additional weight for the physical condition factor. Some PHAs receive comprehensive modernization for a portion of a larger community. When that happens, some proportional additional weight should be allowed for the physical condition factor.

Response: The Department has determined that if only certain units or developments received substantial rehabilitation, the additional weight would be prorated to exclude the units or developments with substantial rehabilitation. The revision to the PHMAP Handbook 7460.5 will include examples of proration.

Comment: One comment suggested that an alternative for weighting could be to provide extra credit for PHAs that, because of aggressive efforts to develop joint programs, are able to mitigate the adverse conditions in the general vicinity of the developments as well as within them.

Response: The Department may not provide an alternative to the physical condition and neighborhood environment factors because they are statutory. A PHA's efforts to mitigate the adverse conditions in the general vicinity of the developments will be recognized by the resident involvement indicator to the extent the PHA involves residents in such efforts. In general, it is expected that a well-managed PHA would have a positive influence on the adverse conditions in its general vicinity, but the PHA's primary responsibility is to conditions within its developments, and this remains the focus of PHMAP.

Comment: One comment felt that adjustments for physical condition and neighborhood environment are too liberal and can result in artificially inflated scores.

Response: The Department disagrees with this comment, since the adjustments for physical condition and/or their neighborhood environment apply to the following three indicators only: indicator #1, vacancy percentage and unit turnaround; indicator #4, work orders; and indicator #5, annual inspection and condition of units and systems.

Comment: One comment reflected that § 901.105(d)(3)(ii) states that developments that have received comprehensive modernization within the past ten years are not eligible for a weighted score for the physical condition factor. Are these developments eligible for the neighborhood factor?

Response: Yes, these developments are eligible for the neighborhood environment factor.

Comment: One comment reflected that § 901.105(d)(3)(iii) states that a PHA that receives a grade of A under indicators #4 and #5 may not claim the additional weight for indicator #1 since the physical condition of its developments is not applicable. Is a PHA eligible for the additional weight for indicator #1 using the neighborhood environment factor?

Response: Yes, such a PHA is eligible for the neighborhood environment factor.

Comment: One comment disagreed that a PHA that receives a grade of A under indicators #4 and #5 may not claim the additional weight for indicator #1 since the physical condition of its developments is not applicable. The ability of management to lease a vacant unit bears a direct relationship to its age and neighborhood environment. A PHA's ability to market a unit and a housing applicant's decision to rent a unit is influenced by the neighborhood conditions and environment in which the development is located. Accordingly, the additional weight for indicator #1 should be permitted. Another comment stated that a PHA could be doing a good job of inspecting units and responding to work orders and still have a high vacancy rate at one or more of its developments due to neighborhood environment (if not also physical condition). A PHA has the right to qualify under either one or both.

Response: The Department disagrees with this comment, and maintains that if a unit is in good physical condition, the age of the unit has little bearing on the ability to rent the unit. HUD believes that well maintained units, as evidenced by an outstanding rating in the areas of work orders and the condition of units and systems, are not eligible for the additional weight for physical condition, since indicators #4 and #5 account for the physical condition of a PHA's units. The additional weight based upon neighborhood environment for indicator #1 is permitted in such a case.

Comment: One comment stated that since PHAs already have the right to seek modifications or exclusions, rewarding PHAs with bonus points seems ludicrous.

Response: The additional weight given the factors of physical condition and neighborhood environment represents the Department's implementation of the statutory mandate to have the weights assigned to various indicators reflect these factors. The use of exclusion and modification

VOL 61 ISS 251 DE 30 1996 UMI

requests implements the statutory mandate that PHAs not be penalized as a result of circumstances beyond their control.

Comment: One comment stated that the additional points made available to PHAs that demonstrate a significant number of units subject to adverse physical conditions or neighborhood environment, seem significant. If over 50% of a PHA's units are subject to such conditions, a PHA may get no more than one additional point for each of the three indicators that can be adjusted under the rule.

Response: This comment is correct, and the Department believes that this represents a fair and equitable adjustment for the physical condition and neighborhood environment of a PHA's developments.

Comment: One comment stated that the proposed rule also excludes "developments that have received comprehensive modernization funds within the past ten year" from eligibility for the adjustment based on physical condition. This should be revised to make it clear that "comprehensive modernization" does not simply mean the use of any CGP money, but contemplates, for example, "significant capital investments that addresses more than 80% of a development's assessed capital need."

Response: The Department has defined modernization to include not only the CIAP and CGP, but also the Vacancy Reduction Program, Hope VI Program, and any successor program(s) to the CGP or the CIAP. For indicator #2, modernization, all components apply to both the CGP and the CIAP. Only components #3, #4 and #5 apply to funding under the Hope VI Program and the Vacancy Reduction Program for the assessment of indicator #2.

Comment: One comment thought this section should be more explicit in order to allow anyone to actually compute a PHA's score following the instructions, and examples should be provided.

Response: The Department agrees, and examples of how to compute a PHA's score will be included in the revision to the PHMAP Handbook 7460.5.

Comment: One comment stated that the provision for "adjustment for physical condition and neighborhood environment" makes reference to units located in developments over 10 years old that require major capital investment. HUD needs to clarify how that applies to scattered-site projects where the age of the units and buildings will vary greatly.

Response: For scattered site projects, where the age of the units and buildings vary, the Date of Full Availability (DOFA) should be applied. Normally, when a PHA purchases scattered site units, they are rehabilitated prior to occupancy. DOFA also applies in cases where scattered site units are built under new construction.

Comment: One comment pointed out that HUD needs to define how to compute the 5% (of the units) to which the limiting conditions apply for the "adjustment for physical condition and neighborhood environment." Is it individually computed or cumulative (i.e., 5% of physical condition vs. 3% of physical condition plus 2% of neighborhood environment condition).

Response: The percent of units to which the limiting conditions apply is computed as the total number for physical condition (PC) and neighborhood environment (NE) with each unit counted only once if both apply to it (so that a PHA with 10 units both PC and NE + 5 units PC only + 5 units NE only would have 20 eligible units that would be used for purposes of computing the percent applicable to indicators #1, #4 and #5; unless the PHA received a grade of A in indicators #4 and #5, then indicators #4 and #5 would have zero eligible units, and indicator # 1 would have 15 eligible units for purposes of computing the percent). This procedure of adding the number of units to which both conditions apply to the number of units to which only one condition applies is followed because the rule reads, "Any PHA with 5% or more of its units *subject to either or both of the above conditions* shall, if they so choose, be issued a weighted PHMAP score in addition to the regular score based solely upon the certification of the PHA."

Comment: One comment stated that the provision for "adjustment for physical condition and neighborhood environment" states that PHAs will certify to "which of the indicators the extra scoring will be added." How is the PHA to make this determination? What would preclude the PHA to add the points to all three indicators? The sample certification form offers no clarification of this issue, nor does the rule. The PHA should be required to certify the data used to claim the "adjustment."

Response: A PHA does certify to the adjustment for physical condition (PC) and neighborhood environment (NE). It could and should add the points to each of the three indicators to which the weights apply. Example: a 100 unit (scattered site) PHA has 10 units both PC and NE + 10 units PC only + 10 units NE only. In this case .8 is added to indicators #1, #4 and #5 (because both or either conditions apply to at least 30% but less than 40% of the units, and .8 is the weight added for this percentage range), except if indicators #4 and #5 get grades of A, zero is added to indicators #4 and #5, and .7 is added to indicator #1 (because PC does not apply for purposes of indicator #1 when indicators #4 and #5 get grades of A, and so the 10 units would not be counted for indicator #1, leaving 20 eligible units, 20% of the total, for which .7 is the added weight).

Comment: One comment suggested that § 901.105(d)(3)(ii) should read: Units in developments that have received comprehensive modernization within the past ten years are not eligible to be included in the calculation of total PHA units subject to "management difficulties" due to physical condition only.

Response: The Department agrees and has rephrased that section to read: Units in developments that have received substantial rehabilitation within the past ten years are not eligible to be included in the calculation of total PHA units due to physical condition only.

Comment: One comment felt that § 901.105(d)(3)(iv) should be clarified since it is confusing.

Response: The Department agrees, and this has been clarified in the new rule to state that a PHA's score for indicators #1, #4 and/or #5, after any adjustment(s) for physical condition and/or neighborhood environment, may not exceed the maximum potential weighted points assigned to the respective indicator(s).

PHA Request for Exclusion or Modification—§ 901.110

Comment: Two comments stated that the previous interim rule permits a PHA to submit a request if the PHA were to discover and demonstrate "highly unusual circumstances." The commenters urge HUD to retain this mechanism to permit consideration of first-time exclusion/modification requests at the appellate level. It is recognized and expected that HUD would subject such requests to strict scrutiny, but there is no reason why such matters cannot be solved by State/Area Office Directors of Public Housing as part of the appellate process rather than at the Assistant Secretary level.

Response: This stipulation was eliminated because it restricted the grounds for appeal.

Comment: One comment reflected that this section requires that a request for an exclusion or modification be submitted at the time of certification. There has been no understanding from HUD on how it grades certain items or

what time periods are considered for the indicators that HUD grades. PHAs should have the right to request an exclusion or modification on the HUD-graded indicators after HUD has announced the preliminary grades on them.

Response: The indicators scored by HUD are based on information that a PHA submits to HUD on other reports. Therefore, a PHA should know what its HUD graded scores are based on. The interim and proposed rules clearly state "annual" and "immediate past fiscal year," except for components #2–1 and #2–2, where they clearly state Federal fiscal year.

PHA Score and Status—§ 901.115

Comment: Seventeen comments felt that denying high performer status to a PHA if it scores below a C on any indicator is not a good change. It does not make sense to punish a PHA for only one low score; the total numerical rating should be the only determination in high/standard/troubled performer. The commenters noted that under the proposed rule, PHAs with the same overall score could receive different ratings; this does not seem equitable. The overall performance of the PHA operation is being graded, not an indicator. Denying high performer status to a PHA that gets less than a C in any indicator should be dropped from the rule. Two other comments felt that a system that really identifies and rewards outstanding performance is much more desirable.

Response: The Department believes that high performer designation should identify outstanding management performance, and thus stipulates that a PHA shall not be designated as a high performer if it receives less than a C for any indicator. The intent in not to punish a PHA, but rather to recognize PHAs for outstanding management performance. It has always been possible for PHAs to have the same score, but a different designation, when high performer designation was awarded or when troubled designation was withheld.

Comment: One comment notes that § 901.115(g)(1) stipulates that PHMAP incentives or high performer status could be rescinded in the case of a PHA that is operating under a special agreement with HUD. The commenter asks what a special agreement is and how does it bear on a PHA's actual performance rating under PHMAP? Three additional comments strongly opposes sections 901.115(g)(2) and (3), which would allow the State/Area HUD Office to deny or rescind incentives or high performer status for PHAs either involved in litigation that bears directly upon the management of PHAs or are operating under a court order. HUD should require that the "specific explanation" referred to in § 901.115(g) include, at least, a summary of proven fraud, misconduct, or substantial noncompliance. PHAs that can achieve high performer status while operating under these conditions should not be penalized by HUD for continuing to manage operations efficiently and demonstrate positive effort to eliminate obstacles while improving housing conditions for families.

Response: Section 901.115(k) only delineates the exceptional circumstances under which State/Area Offices may deny or rescind initiatives or high performer status. Such actions are not automatic when these exceptional circumstances are present, but are determined on a case by case basis with consideration of the specific circumstances involved. In addition, these determinations may be appealed to the Assistant Secretary, providing an additional safeguard that they will not be made without due deliberation.

Comment: One comment suggested that HUD should submit a written explanation of any PHMAP score of C or below on any indicator not directly certified by the PHA because PHAs are required to submit an Improvement Plan for indicators with grades under C.

Response: The indicators scored by HUD are based on information that a PHA submits to HUD on other reports. Therefore, a PHA should know on what its HUD graded scores are based. Improvement plans are only required for a grade of F and a State/Area Office may require it for every indicator with a grade of D or E.

Comment: One comment observed that in the preamble to the previous interim rule, HUD stated that it would address how the State/Area Offices will determine at which PHAs it would conduct confirmatory reviews in handbook guidance. HUD should at least provide handbook guidance on the factors that the State/Area Office will consider to select a PHA for a confirmatory review.

Response: The Department has provided such guidance in the Field Office Monitoring of Public Housing Agencies (PHAs) Handbook 7460.7 REV–2.

Comment: One comment stated that § 901.115(e) suggests that a "small" PHA (100 units or less) will not be designated as mod-troubled, no matter how bad their program is. This is not reasonable.

Response: Section 901.115(e) of the proposed rule reads, "PHAs with more than 100 units that achieve a total weighted score of less than 60% on indicator (2), modernization, shall be designated as mod-troubled." The Department agrees that these "small" PHAs should also be assessed on their modernization program, and will amend this section accordingly.

Comment: One comment stated that in § 901.115(h), the reference to "paragraph (e)" should be a reference to "paragraph (g)."

Response: HUD agrees and has amended § 901.115(l) to reference § 901.115(k).

Posting of PHA PHMAP Scores

Comment: Four comments felt that the posting of PHA PHMAP scores should be required at all offices, rather than in all developments, since many developments are too small to have an office or any other building where such notice could be posted, and it is virtually impossible to do with scattered site projects. Notice can be mailed to residents where it is impractical or inappropriate to post the notice.

Response: The Department agrees and has amended this section accordingly.

Comment: Three comments felt that it was not clear why the posting of PHMAP scores is necessary, or why are PHAs being singled out when reviews of other public entities are not held up for public scrutiny. To post a score with no explanation is silly and there would be no way to post an explanation. By the same token, to publish in the **Federal Register** is not really fair without offering a PHA an opportunity to explain why they may have scored poorly in a particular area.

Response: This provision was recommended by the Office of Management and Budget in the course of its review of the proposed rule in accordance with Executive Order 12866. These requirements are intended to make the community, and tenants in particular, aware of their PHA's management score and to encourage dialogue among the PHA, residents and the community.

Comment: One comment felt that the rule should make clear that PHAs are only required to post and report out final PHMAP scores and do not have to post and report any score that is appealed in a timely basis and is under consideration by HUD.

Response: The Department agrees and has amended this section accordingly.

Comment: One comment observed that § 901.120(b) references a "handicapped" score. This term is not used elsewhere in the rule. It should be changed to "adjustment for physical

VOL 61 ISS 251 DE 30 1996 UMI

condition and neighborhood environment".

Response: The Department agrees and will amend this section accordingly.

Comment: One comment stated that § 901.120(c) should explicitly state that a normal "confirmatory review" is to be conducted prior to the issuance of the initial notification letter. This way, the statement in paragraph (c)(1) about "exceptional circumstance" will make sense.

Response: The Department agrees and has added appropriate language to the rule.

Comment: One comment reflects that § 901.120(c)(1) states that the results of a confirmatory review should be explained in writing if the review is conducted after the issuance of the initial notification letter. The results of confirmatory reviews should always be explained in writing to the PHA, regardless of when conducted.

Response: The Department agrees and has added appropriate language to the rule.

Making the Right Decision

The Department specifically expressed its interest in receiving comments concerning ways in which PHAs can receive positive recognition within the context of this regulation for making the right decision.

Comment: One comment stated that it is unreasonable to put forth an assessment system which rewards highly graded performance and not expect actions to be guided by that system.

Response: The Department recognizes that PHMAP scores should not be interpreted as the sole determinant of a PHA's performance, nor should actions be solely guided by the PHMAP. Good management recognizes and balances all variables in the day-to-day operations of a PHA.

Comment: One comment agrees with a PHA doing the right thing. If doing the right thing is important for the PHA, then HUD should also do the right thing. HUD should ensure that PHMAP scores can be adjusted appropriately for any situation that results in lower grading of any indicator that occurs while doing the right thing. Recognition is nice, but PHMAP should be designed in such a way as to actually reward PHAs for right decisions, not simply recognize them outside the program structure.

Response: The Department believes that the ability to request a modification or exclusion of any indicator will usually result in the appropriate adjustments for making the right decision. The Department will continue to explore ways to provide incentives to PHAs for making the right decisions that result in the long-term improvement of overall PHA operations and of a PHA's housing stock. In addition, the Department will recognize such PHAs at the Performance Awards Ceremony.

State/Area Office Functions—§ 901.120

Comment: One comment reflected that § 901.120(2)(c) states the purpose of on-site confirmatory reviews but does not provide a standard applied circumstance under which or manner in which they will be carried out. The new rule should stipulate that an on-site confirmatory review is required before a State/Area Office can decide to change the PHMAP score certified by a PHA, and should include specifically what documentation State/Area Offices must review as a basis for determining the validity of PHA performance certifications. The confirmatory review documentation requirements should be adequate to meet HUD's verification needs while at the same time comply with the Paperwork Reduction Act.

Response: State/Area Offices conduct confirmatory reviews on a risk management basis, as discussed in the Field Office Monitoring of Public Housing Agencies (PHAs) Handbook 7460.7 REV–2. The confirmatory review guidebook and the revised PHMAP Handbook, which will be issued subsequent to the publication of the new rule, will include appropriate guidance regarding the conduct of confirmatory reviews. The rule requires confirmatory reviews of PHAs with 100 or more units before removing a designation of troubled or mod-troubled. In addition, the rule requires a confirmatory review of any PHA that scores less than 60% for its total weighted score, or less than 60% on indicator #2, modernization, before the designation of a PHA as troubled or mod-troubled. Although troubled or mod-troubled pre-designation confirmatory reviews were not previously mandatory, the Department has determined that such reviews can be significant elements of its risk management approach to PHMAP and can maximize the efficient use of its limited resources.

Appeals—§ 901.125

Comment: One comment urged HUD to extend the deadline for appeals to the State/Area to the 30th calendar day after the PHMAP initial notification letter is received. The deadline in the proposed rule of 15 days after mailing is not sufficient time to file a carefully crafted appeal, nor should the time to appeal be measured from the date of mailing. The losing party in a Federal lawsuit has 30 days to appeal. HUD should provide no less time to a PHA that contends it has not been fairly or accurately assessed.

Response: The Department has determined not to change the time frame for a PHA to submit an appeal. The experience of HUD has been that appeals received in Headquarters are well thought out and presented. A PHA that submits an appeal should not have to go through a lengthy process in order to appeal; the documentation and information should be readily available since the PHA would have researched the information in order to submit its certification.

Comment: One comment stated that the proposed rule does not specifically permit an appeal from a State/Area Office rejection of a claim for additional scoring adjustment that is based on the physical condition or neighborhood environment of housing developments. Although the proposed rule appears to cover disputes over the analysis or accuracy of data submitted in support of the claim, it would not cover disputes over whether a PHA maintained adequate documentation to support its claim. The proposed rule covers this type of dispute as it relates to denials of exclusion or modification requests but does not extend to a dispute over weighted scoring. This appears to be an unintended oversight and should be corrected.

Response: HUD agrees and has amended this section accordingly.

Comment: One comment urges HUD to reconsider the amorphous term "data errors" that the proposed rule would carry over from the previous interim rule or in the PHMAP Handbook 7460.5. HUD's failure to explain the meaning of this term could result in ad hoc, overly narrow interpretations by State/Area Offices in individual ratings. HUD should revise this ground for appeal to encompass any dispute over the accuracy, calculation, or interpretation of data employed in the grading process that, if resolved in the PHA's favor, would affect its regular or weighted score.

Response: The Department has changed the language to read, "any dispute over the accuracy, calculation, or interpretation of data employed in the grading process that would affect a PHA's PHMAP score."

Comment: One comment stated that according to § 901.125(a), a PHA could appeal the denial of an exclusion/modification request if that denial has any effect on their total score. This is different from the 5% threshold in the current rule. If this is the intent, it should be explicitly stated.

Response: The Department believes that it is stated explicitly: "A PHA may appeal...the denial of exclusion or modification requests when their denial affects a PHA's total weighted score, * * *" As stated previously, a PHA should have the right to appeal its PHMAP score with as few restrictions as possible.

Comment: One comment thought § 901.125(a)(3) should specify how long the State/Field Offices have to rule on an appeal.

Response: State/Area Offices will be required to meet the 30 day period for responding to appeals by an internal directive that will be as binding upon them as a regulatory requirement.

Comment: One comment stated that § 901.125(a)(5) is duplicative of paragraph (a)(1)(ii).

Response: The Department agrees and has deleted § 901.125(a)(5) from the new rule.

Incentives—§ 901.130

Comment: Five comments stated that HUD should specify the actual HUD requirements that it intends to waive for high and standard performers and supports the extension of any such incentives to standard performers, as the proposed rule accomplishes. The proposed rule falls short of offering any true incentives that would encourage more PHAs to improve their performance. Besides a certificate, the only other incentives mentioned are being relieved from unspecified procedural requirements. But the rule also states that the State/Area Office has the discretion to continue to hold PHAs accountable for those same requirements. HUD must grant additional flexibility, on the record, to standard and high performing agencies. In the past, there seems to have been recognition, but little or no actual relief from administrative burdens.

Response: The Department will cite specific incentives for high and standard performers in the revision of the PHMAP Handbook 7460.5. Incentives are presented in the handbook rather than the regulation to enable the Department to revise the incentives more quickly as conditions and circumstances warrant.

Comment: One comment felt that the administrative burden on PHAs is growing and requested HUD to consider measurable relief such as the elimination of Davis-Bacon or project-based accounting for well-managed PHAs.

Response: The Department cannot eliminate administrative burdens that are separate statutory requirements, such as Davis-Bacon and project-based accounting (applicable to PHAs with 500 or more units). However, the Department's Labor Relations Office is intending to implement a provision that will allow PHAs to obtain only one HUD-determined wage rate determination for a PHA's entire fiscal year.

Comment: One comment suggested that HUD exempt PHAs with three consecutive years of standard or high performing determinations from having to calculate and certify their PHMAP indicators. Rather, the indicators could be subject to the independent public audit (IPA). If, and when, the IPA indicates that a PHA is experiencing significant management problems, it could again be subject to yearly certifications.

Response: The Department disagrees with this suggestion because the independent audit only checks the existence and consistency of a PHA's PHMAP documentation; it does not award a score. In addition, a well managed PHA should have little or no troubled certifying on an annual basis.

Comment: One comment proposes that PHAs designated as high performers for a minimum of three consecutive years be required to certify to PHMAP only every other year unless and until they are designated as something less than high performers. In the event that their PHMAP score slips to standard performer or below, PHAs would revert to annual certifications until they, once again, have established themselves as high performers for three consecutive years. This would not only be a good incentive for PHAs, but also would reduce workload of the HUD offices.

Response: As stated, above, a well managed PHA should have little or no troubled certifying on an annual basis.

Comment: One comment feels that HUD's proposal that representatives of high-performing PHAs may be requested to serve on a Departmental group working with troubled PHAs is not of sufficient benefit to most PHAs. HUD must be willing to provide real cash incentive to the PHAs that perform well, not just pat them on the back. For instance, if high-performing PHAs are able to enter into ventures that provide monies in excess of 100% PFS subsidy, they should be able to keep most, if not all, of it. The ability of high-performing PHAs to generate revenue should not be used to reward low-performing PHAs.

Response: The Department already permits the retention of "other income," as stipulated in Notice PIH 96–24, Performance Funding System Policy Revision to Encourage Public and Indian Housing Authorities to Facilitate Resident Employment and Undertake Entrepreneurial Initiatives, issued April 3, 1996.

Comment: One comment stated that the proposed rule limits incentives to mod high performers that are also overall high performers. This appears to be a change from the previous interim rule, and is unfair. Mod high performers that are overall standard performers should be able to benefit from mod incentives.

Response: The Department disagrees with this comment and believes that only outstanding performance overall and in modernization warrants the high performer designation.

Comment: One comment encourages HUD to permit the State/Area Offices to add incentives to the extent practical and as deemed appropriate.

Response: The Department agrees and has amended the new rule to permit State/Area Offices to add incentives to the extent practical and as deemed appropriate, with prior concurrence of such action by the Assistant Secretary.

Comment: One comment stated that § 901.130(g) of the proposed rule states that the State/Area Office will have discretion to subject a PHA to any requirement that would otherwise be omitted under the specified relief in accordance with § 901.115. What does this mean? It reads like an attempt to catch anything that the rule makers forgot without specifying what. Anything significant that might be recognized at some later date as omitted should be addressed as an amendment to the rule for consistent application nationwide.

Response: This section refers to cases where the specified unusual circumstances listed in § 901.115 exist at a PHA and the State/Area Office determines the necessity of reinstating any review or requirement.

Comment: One comment stated that according to § 901.130(a), both high performers and standard performers will receive incentives. If so, will these incentives be different for each group? If not, what is the advantage of achieving high performer status?

Response: The Department agrees, and will provide separate incentives for both standard and high performers.

Memorandum of Agreement—§ 901.135

Comment: One comment stated that an independent assessment team is not discussed or defined anywhere else in the rule. What is it? What are its functions? How is it assembled? The requirement for an "independent assessment" prior to "troubled" designation should be thoroughly discussed somewhere in the rule.

Response: The Department went through the procurement process to contract with the two consultants that conduct the independent assessments. The function of the two consultants is to conduct an assessment of problem areas independent of HUD, issue a report of findings, and perhaps participate in MOA negotiations. Since the independent assessment is separate from the PHMAP scoring process, the independent assessment is addressed only in § 901.135, Memorandum of Agreement, in the new rule.

Improvement Plan—§ 901.145

Comment: One comment stated that the phrase, "* * * as well as other performance and/or compliance deficiencies as may be identified as a result of an on-site review of the PHA's operations * * *, is too broad and loose. The Improvement Plan shouldn't try to cover everything; this muddies the Improvement Plan and the PHMAP process. This section should specify that additional issues may be added to the Improvement Plan only if HUD and the PHA agree that they are directly related to PHA non-performance in the PHMAP deficiencies.

Response: The Department disagrees with this suggestion and believes that the rule should provide the flexibility to permit identified deficiencies to be addressed as soon as possible, whether they are related to PHMAP or not. This provision allows all identified deficiencies to be addressed in one document.

PHMAP Public Record—§ 901.155

Comment: One comment raised several questions, such as: how do FOIA requirements apply to PHMAP records, if at all; how do these requirements complement each other; are all internal HUD records on the PHMAP assessment included in the "open public record," including those that would be excluded from the normal FOIA request? This should be clarified.

Response: The FOIA does apply to PHMAP. The items listed in § 901.155 ("certifications, the records of exclusion and modification requests, appeals, and designations of status based on physical condition and neighborhood environment") are all public records, and do not make an exclusive or exhaustive list. Also included would be such items as the notification to the PHA, and the State/Area Office scoring sheet. Exemptions authorized under FOIA by 5 U.S.C. 552(b) would still apply. This section is clarified to read, "...as open records, available for public inspection for three years consistent with the Freedom of Information Act (5 U.S.C. 552) and in accordance with any procedures established by the State/Area Office to minimize disruption of normal office operations."

Substantial Default—§ 901.200

Comment: One comment observed that § 901.200 requires HUD to determine a PHA in "substantial default" if that PHA has been designated as troubled and does not show significant improvement (i.e., 10 point increase) in its PHMAP score within one year. The preamble notes that the rationale for this is that "troubled PHAs have already had more than adequate time to implement corrective action, or will have at least one year from the time of its initial troubled designation." This is not correct. Because of the PHMAP score notification process, a PHA would have less than a year to correct deficiencies once it is notified and before the next assessment. The time frame established for improvement is arbitrary and too short for real improvement to take place. It may be reasonable for some PHAs but not for others. Improvement in performance is the function of many factors. This time frame should be changed.

Response: The rule is modified to stipulate one year after final notification.

Notice and Response—§ 901.205

Comment: One comment stated that section (a) stipulates that if information from any other credible source indicates that there may exist events or conditions constituting a substantial breach or default, HUD shall advise a PHA of such information. Before taking further action, except in cases of apparent fraud or criminality, and/or if emergency conditions exist posing an imminent threat to the life, health or safety of residents, HUD shall afford the PHA a timely opportunity to initiate corrective action. This provision lends itself to unintentional abuse. The use of unidentified credible sources as the basis for action on unverified conditions could leave PHAs vulnerable to becoming the victims of political witch hunts. Even emergency conditions allow 24 hours for corrective action. At minimum, a PHA should be afforded 24 hours for emergencies and longer as appropriate for non-emergency conditions to respond with verification that the condition does or does not exist. This provision should be modified accordingly.

Response: "Timely opportunity" varies due to possible individual situations and the Department will provide for a reasonable amount of time for a PHA to initiate corrective action. The Department will consider each situation individually, and on a case by case basis, as appropriate.

Resident Participation in Competitive Proposals—§ 901.220 and Resident Petitions for Remedial Action—§ 901.225

Comment: One comment stated that § 901.220(b) and § 901.225 require at least 5% of the residents at a PHA in substantial default to indicate to HUD their interest in participating in the competitive proposal process. This percentage is unreasonably low. There isn't a PHA in the country that doesn't have at least five people out of 100 eager to get rid of the current PHA management. This doesn't necessarily mean that they know what they are talking about or are right. The Department needs to seriously consider a threshold of interest that is high enough to ensure true interest by the resident population, not just a handful of disgruntled residents.

Response: The Department agrees, and has changed the percentage in the new rule to require that 20% of the residents at a PHA in substantial default indicate to HUD their interest in participating in the competitive proposal process.

Technical Assistance—§ 901.235

Comment: One comment felt that this section is confusing and gives the impression that it is designed to limit HUD's ability to offer technical assistance and should be clarified.

Response: The Department disagrees and thinks this section very specifically states and authorizes under what circumstances HUD may provide technical assistance to troubled or near troubled PHAs.

III. Findings and Certifications

Justification for Interim Rulemaking

Although this rule could have been published as a final rule because it was first published as a proposed rule for prior notice and comment on May 6, 1996 (61 FR 20358), it is being published as an interim rule to communicate HUD's intention to continue to revise and improve the rule. Following a period of implementation and experience with this rule, HUD will again solicit public comment to further refine the PHMAP process.

Paperwork Reduction Act

The information collection requirements for the Public Housing Management Assessment Program have been approved by the Office of Management and Budget in accordance

with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), and assigned OMB control number 2577–0156. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection displays a valid control number.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, local and tribal governments and the private sector. This rule does not impose any Federal mandates on any State, local or tribal governments or the private sector within the meaning of the Unfunded Mandates Reform Act of 1995.

Environmental Review

A Finding of No Significant Impact with respect to the environment, in accordance with HUD regulations at 24 CFR part 50, which implements § 102(2)(C) of the National Environmental Policy Act of 1969, was prepared for the proposed rule and remains applicable. The Finding of No Significant Impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays in the Office of the Rules Docket Clerk.

Impact on Small Entities

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)) has reviewed and approved this rule, and in so doing certifies that this rule will not have a significant economic impact on a substantial number of small entities, since the rule only establishes management assessment criteria which will be utilized by State/Area Offices for monitoring purposes and the provision of technical assistance to PHAs.

Federalism

The General Counsel, as the Designated Official under Executive Order 12612, Federalism, has determined that the policies contained in this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. The rule is intended to promote good management practices by including, in HUD's relationship with PHAs, continuing review of PHAs' compliance with already existing requirements. In addition, the rule carries out, as unobtrusively as possible, a Federal statutory mandate. The rule does not create any new significant requirements of its own. As a result, the rule is not subject to review under the Order.

Family Impact. The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The rule involves requirements for management assessment of PHAs. Any effect on the family would be indirect. To the extent families in public housing will be affected, the impact of the rule's requirements is expected to be a positive one.

List of Subjects in 24 CFR Part 901

Public housing, reporting and recordkeeping requirements.

Accordingly, part 901 of title 24 of the Code of Federal Regulations is revised to read as follows:

PART 901—PUBLIC HOUSING MANAGEMENT ASSESSMENT PROGRAM

Sec.

901.1 Purpose, program scope and applicability.
901.5 Definitions.
901.10 Indicator #1, vacancy rate and unit turnaround time.
901.15 Indicator #2, modernization.
901.20 Indicator #3, rents uncollected.
901.25 Indicator #4, work orders.
901.30 Indicator #5, annual inspection of units and systems.
901.35 Indicator #6, financial management.
901.40 Indicator #7, resident services and community building.
901.45 Indicator #8, security.
901.100 Data collection.
901.105 Computing assessment score.
901.110 PHA request for exclusion or modification of an indicator or component.
901.115 PHA score and status.
901.120 State/Area Office functions.
901.125 PHA right of appeal.
901.130 Incentives.
901.135 Memorandum of Agreement.
901.140 Removal from troubled status and mod-troubled status.
901.145 Improvement Plan.
901.150 PHAs troubled with respect to the program under section 14 (mod-troubled PHAs).
901.155 PHMAP public record.
901.200 Events or conditions that constitute substantial default.
901.205 Notice and response.
901.210 Interventions.
901.215 Contracting and funding.
901.220 Resident participation in competitive proposals to manage the housing of a PHA.
901.225 Resident petitions for remedial action.
901.230 Receivership.
901.235 Technical assistance.

Authority: 42 U.S.C. 1437d(j); 42 U.S.C. 3535(d).

§ 901.1 Purpose, program scope and applicability.

(a) *Purpose.* This part establishes the Public Housing Management Assessment Program (PHMAP) to implement and augment section 6(j) of the 1937 Act. PHMAP provides policies and procedures to identify public housing agency (PHA), resident management corporation (RMC), and alternative management entity (AME) management capabilities and deficiencies, recognize high-performing PHAs, designate criteria for defining troubled PHAs and PHAs that are troubled with respect to the program under section 14 (Public Housing Modernization Program), and improve the management practices of troubled PHAs and mod-troubled PHAs.

(b) *Program scope.* The PHMAP reflects only one aspect of PHA operations, i.e., the results of its management performance in specific program areas. The PHMAP should not be viewed by PHAs, the Department or other interested parties as an all-inclusive and encompassing view of overall PHA operations. When viewing overall PHA operations, other criteria, including but not limited to, the quality of a PHA's housing stock, compliance issues, Fair Housing and Equal Opportunity issues, Board knowledge and oversight of PHA operation, etc., even though not covered under the PHMAP, are necessary in order to determine the adequacy of overall PHA operations. The PHMAP can never be designed to be the sole method of viewing a PHA's overall operations. A PHA should not manipulate the PHMAP system in the short-term in order to achieve a higher PHMAP score, thereby delaying or negating long-term improvement. Making a correct and viable long-term decision (doing the right thing) may hurt a PHA in the short-term (i.e., lower PHMAP score), but will result in improved housing stock and better overall management of a PHA over the long-term and a higher sustainable PHMAP score.

(c) *Applicability.* (1) The provisions of this part apply to PHAs and RMC/AMEs as noted in the sections of this part. The management assessment of an RMC/AME differs from that of a PHA. Because an RMC/AME enters into a contract with a PHA to perform specific management functions on a development-by-development or program basis, and because the scope of the management that is undertaken

varies, not every indicator that applies to a PHA would be applicable to each RMC/AME.

(2) Due to the fact that the PHA and not the RMC/AME is ultimately responsible to the Department under the ACC, a PHA's score will be based on all of the developments covered by the ACC, including those with management functions assumed by an RMC or AME (pursuant to a court ordered receivership agreement, if applicable). This is necessary because of the limited nature of an RMC/AME's management functions and the regulatory and contractual relationships among the Department, PHAs and RMC/AMEs.

(3) A significant feature of RMC management is that 24 CFR §§ 964.225 (d) and (h) provide that a PHA may enter into a management contract with an RMC, but a PHA may not contract for assumption by the RMC of the PHA's underlying responsibilities to the Department under the Annual Contributions Contract (ACC).

(4) When a PHA's management functions have been assumed by an AME:

(i) If the AME assumes only a portion of the PHA's management functions, the provisions of this part that apply to RMCs apply to the AME (pursuant to a court ordered receivership agreement, if applicable); or

(ii) If the AME assumes all, or substantially all, of the PHA's management functions, the provisions of this part that apply to PHAs apply to the AME (pursuant to a court ordered receivership agreement, if applicable).

(5) To ensure quality management results from a contract between an AME and a PHA, or between an AME and HUD, minimum performance criteria that relate to the PHMAP indicators, as applicable, should be included in such contract. Failure to meet the performance criteria would be a basis for termination of the contract. However, even in the absence of explicit contractual provisions, this part applies to AMEs in accordance with paragraph (b)(4) of this section, above.

§ 901.5 Definitions.

Actual vacancy rate is the vacancy rate calculated by dividing the total number of vacancy days in the fiscal year by the total number of unit days available in the fiscal year.

Adjusted vacancy rate is the vacancy rate calculated after excluding the vacancy days that are exempted for any of the eligible reasons. It is calculated by dividing the total number of adjusted vacancy days in the fiscal year by the total number of unit days available in the fiscal year.

Alternative management entity (AME) is a receiver, private contractor, private manager, or any other entity that is under contract with a PHA, or that is otherwise duly appointed or contracted (for example, by court order, pursuant to a court ordered receivership agreement, if applicable, or agency action), to manage all or part of a PHA's operations. Depending upon the scope of PHA management functions assumed by the AME, in accordance with § 901.1(b)(2), the AME is treated as a PHA or an RMC for purposes of this part and, as appropriate, the terms PHA and RMC include AME.

Assessed fiscal year is the PHA fiscal year that has been reviewed for management performance using the PHMAP indicators. Unless otherwise indicated, the assessed fiscal year is the immediate past fiscal year of a PHA.

Assistant Secretary means the Assistant Secretary for Public and Indian Housing of the Department.

Available units are dwelling units, (occupied or vacant) under a PHA's Annual Contributions Contract, that are available for occupancy, after excluding or adjusting for units approved for non-dwelling use, employee-occupied units, and vacant units approved for deprogramming (units approved for demolition, disposition or units that have been combined).

Average number of days for non-emergency work orders to be completed is calculated by dividing the total of the:

(1) Number of days in the assessed fiscal year it takes to close active non-emergency work orders carried over from the previous fiscal year;

(2) The number of days it takes to complete non-emergency work orders issued and closed during the assessed fiscal year; and

(3) The number of days all active non-emergency work orders are open in the assessed fiscal year, but not completed, by the total number of non-emergency work orders used in the calculation of paragraphs (1), (2) and (3), of this definition.

Average turnaround time is the annual average of the total number of turnaround days between the latter of the legal expiration date of the immediate past lease or the actual move-out date of the former tenant (whenever that occurred, including in some previous fiscal year) and the date a new lease takes effect. Each time an individual unit is re-occupied (turned around) during the fiscal year, the turnaround days for that unit shall be counted in the turnaround time. Average turnaround time is calculated by dividing the total turnaround days for all units re-occupied during the assessed fiscal year by the total number of units re-occupied during the assessed fiscal year.

Cash reserve is the amount of cash available for operations at the end of an annual reporting period after all necessary expenses of a PHA or development have been paid or funds have been set-aside for such payment. The cash reserve computation takes into consideration both short-term accounts receivable and accounts payable.

Confirmatory review is an on-site review for the purposes of State/Area Office verification of the performance level of a PHA, the accuracy of the data certified to by a PHA, and the accuracy of the data derived from State/Area Office files.

Correct means to improve performance in an indicator to a level of grade C or better.

Cyclical work orders are work orders issued for the performance of routine maintenance work that is done in the same way at regular intervals. Examples of cyclical work include, but are not limited to, mopping hallways; picking up litter; cleaning a trash compactor; changing light bulbs in an entryway; etc. (Cyclical work orders should not be confused with preventive maintenance work orders.)

Deficiency means any grade below C in an indicator or component.

Down time is the number of calendar days a unit is vacant between the later of the legal expiration date of the immediate past lease or the actual move-out date of the former resident, and the date the work order is issued to maintenance.

Dwelling rent refers to the resident dwelling rent charges reflected in the monthly rent roll(s) and excludes utility reimbursements, retroactive rent charges, and any other charges not specifically identified as dwelling rent, such as maintenance charges, excess utility charges and late charges.

Dwelling rent to be collected means dwelling rent owed by residents in possession at the beginning of the assessed fiscal year, plus dwelling rent charged to residents during the assessed fiscal year.

Dwelling rent uncollected means unpaid resident dwelling rent owed by any resident in possession during the assessed fiscal year, but not collected by the last day of the assessed fiscal year.

Dwelling unit is a unit that is either leased or available for lease to eligible low-income residents.

Effective lease date is the date when the executed lease contract becomes effective and rent is due and payable and all other provisions of the lease are enforceable.

Emergency means physical work items that pose an immediate threat to life, health, safety, or property, or that are related to fire safety.

Emergency status abated means that an emergency work order is either fully completed, or the emergency condition is temporarily eliminated and no longer poses an immediate threat. If the work cannot be completed, emergency status can be abated by transferring the resident away from the emergency situation.

Emergency work order is a work order, from any source, that involves a circumstance that poses an immediate threat to life, health, safety or property, or that is related to fire safety.

Employee occupied units refers to units that are occupied by employees who are required to live in public housing as a condition of their job, rather than the occupancy being subject to the normal resident selection process.

HQS means Housing Quality Standards as set forth at 24 CFR § 882.109 and amended by the Lead-Based Paint regulation at 24 CFR § 35.

Improvement Plan is a document developed by a PHA, specifying the actions to be taken, including timetables, that may be required to correct deficiencies where the grade for an indicator is a grade D or E, and shall be required to correct deficiencies of failed indicators, identified as a result of the PHMAP assessment when an MOA is not required.

Indicators means the major categories of PHA management functions that are examined under this program for assessment purposes. The list of individual indicators and the way they are graded is provided in § 901.10 through § 901.45.

Lease up time is the number of calendar days between the time the repair of a unit is completed and a new lease takes effect.

Local occupancy/housing codes are the minimum standards for human occupancy, if any, as defined by the local ordinance(s) of the jurisdiction in which the housing is located.

Maintenance plan is a comprehensive annual plan of a PHA's maintenance operation that contains the fiscal year's estimated work schedule and which is supported by a staffing plan, contract schedule, materials and procurement plan, training, and approved budget. The plan should establish a strategy for meeting the goals and time frames of the facilities management planning and execution, capital improvements, utilities, and energy conservation activities.

Major systems include, but are not limited to, structural/building envelopes which include roofing, walls, windows, hardware, flashing and caulking; mechanical systems which include heating, ventilation, air conditioning, plumbing, drainage, underground utilities (gas, electrical and water), and fuel storage tanks; electrical systems which include underground systems, above ground systems, elevators, emergency generators, door bells, electronic security devices, fire alarms, smoke alarms, outdoor lighting, and indoor lighting (halls, stairwells, public areas and exit signs); and transformers.

Make ready time is the number of calendar days between the date the unit is referred to maintenance for repair by a work order and occupancy is notified that the unit is ready for re-occupancy.

Memorandum of Agreement (MOA) is a binding contractual agreement between a PHA and HUD that is required for each PHA designated as troubled and/or mod-troubled. The MOA sets forth target dates, strategies and incentives for improving management performance; and provides sanctions if performance does not result.

Move-out date is the actual date when the resident vacates the unit, which may or may not coincide with the legal expiration of the lease agreement.

Non-emergency work order is any work order that covers a situation that is not an immediate threat to life, health, safety, or property, or that is unrelated to fire safety.

Percent of dwelling rent uncollected is calculated by dividing the amount of dwelling rent uncollected by the total dwelling rent to be collected.

PHA means a public housing agency. As appropriate in accordance with § 901.1(b)(2), PHA also includes AME.

Percentage of emergency work orders completed within 24 hours is the ratio of emergency work orders completed in 24 hours to the total number of emergency work orders. The formula for calculating this ratio is: total emergency work orders completed (or emergency status abated) in 24 hours or less, divided by the total number of emergency work orders.

PHA-generated work order is any work order that is issued in response to a request from within the PHA administration.

Preventive maintenance program is a program under which certain maintenance procedures are systematically performed at regular intervals to prevent premature deterioration of buildings and systems. The program is developed and regularly updated by the PHA, and fully documents what work is to be performed and at what intervals. The program includes a system for tracking the performance of preventive maintenance work.

Preventive maintenance work order is any work done on a regularly scheduled basis in order to prevent deterioration or breakdowns in individual units or major systems.

Reduced actual vacancy rate within the previous three years is a comparison of the vacancy rate in the PHMAP assessment year (the immediate past fiscal year) with the vacancy rate of that fiscal year which is two years previous to the assessment year. It is calculated by subtracting the vacancy rate in the assessment year from the vacancy rate in the earlier year. If a PHA elects to certify to the reduction of the vacancy rate within the previous three years, the PHA shall retain justifying documentation to support its certification for HUD post review.

Reduced the average time it took to complete non-emergency work orders during the previous three years is a comparison of the average time it took to complete non-emergency work orders in the PHMAP assessment year (the immediate past fiscal year) with the average time it took to complete non-emergency work orders of that fiscal year which is two years previous to the assessment year. It is calculated by subtracting the average time it took to complete non-emergency work orders in the PHMAP assessment year from the average time it took to complete non-emergency work orders in the earlier year. If a PHA elects to certify to the reduction of the average time it took to complete non-emergency work orders during the previous three years, the PHA shall retain justifying documentation to support its certification for HUD post review.

Resident-generated work order is a work order issued by a PHA in response to a request from a lease holder or family member of a lease holder.

Resident management corporation (RMC) means the entity that proposes to enter into, or that enters into, a management contract with a PHA in accordance with 24 CFR 964.120. As appropriate in accordance with § 901.1(b)(2), RMC also includes AME.

Routine operating expenses are all expenses which are normal, recurring fiscal year expenditures. Routine expenses exclude those expenditures that are not normal fiscal year expenditures and those that clearly represent work of such a substantial nature that the expense is clearly not a routine occurrence.

Standards equivalent to HQS are housing/occupancy inspection standards that are equal to HUD's Section 8 HQS.

Substantial default means a PHA is determined by the Department to be in violation of statutory, regulatory or contractual provisions or requirements, whether or not these violations would constitute a substantial default or a substantial breach under explicit provisions of the relevant Annual Contributions Contract (ACC) or a Memorandum of Agreement.

Unit days available are the number of days that the available units were available for occupancy in a PHA fiscal year. Unit days available are calculated by adding the number of days that each unit was available for occupancy in the year.

Units approved for non-dwelling use refers to units approved for non-dwelling status for use in the provision of social services, charitable purposes, public safety activities and resident services, or used in the support of economic self-sufficiency and anti-drug activities.

Units vacant due to circumstances and actions beyond the PHA's control are dwelling units that are vacant due to circumstances and actions that prohibit the PHA from occupying, selling, demolishing, rehabilitating, reconstructing, consolidating or modernizing the units. For purposes of this definition, circumstances and actions beyond the PHA's control are limited to:

(1) *Litigation.* The effect of court litigation such as a court order or settlement agreement that is legally enforceable. An example would be units that are required to remain vacant because of fire/police investigations, coroner's seal, or as part of a court-ordered or HUD-approved desegregation effort.

(2) *Laws.* Federal or State laws of general applicability, or their implementing regulations. This category does not include units vacant only because they do not meet minimum housing and building code standards pertaining to construction or habitability under Federal, State, or local laws or regulations, except when these code violations are caused for reasons beyond the control of the PHA, rather than as a result of management and/or maintenance failures by the PHA. Examples of exempted units under this category are: vacant units that are documented to be uninhabitable for reasons beyond the PHA's control due to high/unsafe levels of hazardous/toxic materials (e.g., lead-based paint or asbestos), by order of the local health department or directive of the Environmental Protection Agency, where the conditions causing the order are beyond the control of the PHA, and units kept vacant because they became structurally unsound (e.g., buildings damaged by shrinking/swelling subsoil or similar situations). Other examples are vacant units in which resident property has been abandoned, but only if State law requires the property to be left in the unit for some period of time, and only for the period stated in the law and vacant units required to remain vacant because of fire/police investigations, coroner's seal, or court order.

(3) *Changing market conditions.* Example of units in this category are small PHAs that are located in areas experiencing population loss or economic dislocations that face a lack of demand in the foreseeable future, even after the PHA has taken aggressive marketing and outreach measures. Where a PHA claims extraordinary market conditions, the PHA will be expected to document the market conditions to which it refers (the examples of changing population base and competing projects are the simplest), the explicit efforts that the PHA has made to address those conditions, the likelihood that those conditions will be mitigated or eliminated in the near term, and why the market conditions are such that the PHA is prevented from occupying, selling, demolishing, rehabilitating, reconstructing, consolidating or modernizing the vacant units. In order to justify the adjustment, the PHA will need to document the specific market conditions that exist and document marketing and outreach efforts. The PHA will need to describe when the downturn in market conditions occurred, the location(s) of the unit(s) effected, the likelihood that these circumstances will be mitigated or eliminated in the near term and why the market conditions are such that they are preventing the PHA from occupying, selling, demolishing, rehabilitating, reconstructing, consolidating, or modernizing the vacant units.

(4) *Natural disasters.* These are vacant units that are documented to be uninhabitable because of damaged suffered as a result of natural disasters such as floods, earthquakes, hurricanes, tornadoes, etc. In the case of a "natural disaster" claim, the PHA would be expected to point to a proclamation by the President or the Governor that the county or other local area in question has, in fact, been declared a disaster area.

(5) *Insufficient funding.* Lack of funding for otherwise approvable applications made for Comprehensive Improvement Assistance Program (CIAP) funds (only PHAs with less than 250 units are eligible to apply and compete for CIAP funds). This definition will cease to be used if CIAP is replaced by a formula grant.

(6) *Casualty Losses.* Vacant units that have sustained casualty damage and are pending resolution of insurance claims or settlements, but only until the insurance claim is adjusted, i.e., funds to repair the unit are received. The vacancy days exempted are those included in the period of time between the casualty loss and the receipt of funds from the insurer to cover the loss in whole or in part.

Vacancy day is a day when an available unit is not under lease by an eligible low-income resident. The maximum number of vacancy days for any unit is the number of days in the year, regardless of the total amount of time the unit has been vacant. Vacancy days are calculated by adding the total number of days vacant from all available units that were vacant for any reason during the PHA's fiscal year.

Vacant unit is an available unit that is not under lease to an eligible low-income family.

Vacant unit turnaround work order is a work order issued that directs a vacant unit to be made ready to lease to a new resident and reflects all work items to prepare the unit for occupancy.

Vacant unit undergoing modernization as defined in 24 CFR § 990.102. In addition, the following apply when computing time periods for a vacant unit undergoing modernization:

(1) If a unit is vacant prior to being included in a HUD-approved modernization budget, those vacancy days that had accumulated prior to the unit being included in the modernization budget must be included as non-exempted vacancy days in the calculation.

(2) The calculation of turnaround time for newly modernized units starts when the unit in turned over to the PHA from the contractor and ends when the lease is effective for the new or returning resident. Thus, the total turnaround time would be the sum of the pre-modernization vacancy time, and the post-modernization vacancy time.

(3) Unit-by-unit documentation, showing when a vacant unit was included in a HUD-approved modernization budget, when it was released to the PHA by the contractor, and when a new lease is effective for the new or returning resident, must be maintained by the PHA.

(4) Units remaining vacant more than two FFYs after the FFY in which the modernization funds are approved, may no longer be exempted from the

calculation of the adjusted vacancy rate if the construction contract has not been let. These units may be exempted again, but only after a contract is let.

Vacant units approved for deprogramming exist when a PHA's application for the demolition and/or disposition of public housing units has received written approval from HUD; or when a PHA's application to combine/convert has received written approval from HUD.

Work order is a directive, containing one or more tasks issued to a PHA employee or contractor to perform one or more tasks on PHA property. This directive describes the location and the type of work to be performed; the date and time of receipt; date and time issued to the person or entity performing the work; the date and time the work is satisfactorily completed; the parts used to complete the repairs and the cost of the parts; whether the damage was caused by the resident; and the charges to the resident for resident-caused damage. The work order is entered into a log which indicates at all times the status of all work orders as to type (emergency, non-emergency), when issued, and when completed.

Work order completed during the immediate past fiscal year is any work order that is completed during the PHA's fiscal year regardless of when it may have been received.

Work order deferred for modernization is any work order that is combined with similar work items and completed within the current PHMAP assessment year, or will be completed in the following year if there are less than three months remaining before the end of the PHA fiscal year when the work order was generated, under the PHA's modernization program or other PHA capital improvements program.

§ 901.10 Indicator #1, vacancy rate and unit turnaround time.

This indicator examines the vacancy rate, a PHA's progress in reducing vacancies, and unit turnaround time. Implicit in this indicator is the adequacy of the PHA's system to track the duration of vacancies and unit turnaround, including down time, make ready time, and lease up time. This indicator has a weight of x2.

(a) For the calculation of the actual and adjusted vacancy rate (and, if applicable, unit turnaround time), the following three categories of units (as defined in the rule at § 901.5), that are not considered available for occupancy, will be completely excluded from the computation:

(1) Units approved for non-dwelling use.

(2) Employee occupied units.

(3) Vacant units approved for deprogramming (i.e., demolition, disposition or units that have been combined).

(b) For the calculation of the adjusted vacancy rate and turnaround time, the vacancy days for units in the following categories (fully defined in the rule at § 901.5) shall be exempted:

(1) Vacant units undergoing modernization as defined in § 901.5.

(i) Only vacancy days associated with a vacant unit that meets the conditions of being a unit undergoing modernization will be exempted when calculating the adjusted vacancy rate or, if necessary, the unit turnaround time. Neither vacancy days associated with a vacant unit prior to that unit meeting the conditions of being a unit undergoing modernization nor vacancy days associated with a vacant unit after construction work has been completed or after the time period for placing the vacant unit under construction has expired shall be exempted.

(ii) A PHA must maintain the following documentation to support its determination of vacancy days associated with a vacant unit that meets the conditions of being a unit undergoing modernization:

(A) The date on which the unit met the conditions of being a vacant unit undergoing modernization: and

(B) The date on which construction work was completed or the time period for placing the vacant unit under construction expired.

(2) Units vacant due to circumstances and actions beyond the PHA's control as defined in § 901.5. Such circumstances and actions may include:

(i) Litigation, such as a court order or settlement agreement that is legally enforceable.

(ii) Federal or, when not preempted by Federal requirements, State law of general applicability or their implementing regulations.

(iii) Changing market conditions.

(iv) Natural disasters.

(v) Insufficient funding for otherwise approvable applications made for CIAP funds. This definition will cease to be used if CIAP is replaced by a formula grant.

(vi) Vacant units that have sustained casualty damage and are pending resolution of insurance claims or settlements, but only until the insurance claim is adjusted. A PHA must maintain at least the following documentation to support its determination of vacancy days associated with units vacant due to circumstances and actions beyond the PHA's control:

(A) The date on which the unit met the conditions of being a unit vacant due to circumstances and actions beyond the PHA's control;

(B) Documentation identifying the specific conditions that distinguish the unit as a unit vacant due to circumstances and actions beyond the PHA's control as defined in § 901.5;

(C) The actions taken by the PHA to eliminate or mitigate these conditions; and

(D) The date on which the unit ceased to meet such conditions and became an available unit.

(E) This supporting documentation is subject to review and may be requested for verification purposes at any time by HUD.

(c) *Component #1, vacancy percentage and progress in reducing vacancies.* A PHA may choose whether to use the actual vacancy rate, the adjusted vacancy rate or a reduction in the actual vacancy rate within the past three years. This component has a weight of x2.

(1) *Grade A:* The PHA is in one of the following categories:

(i) An actual vacancy rate of 3% or less; or

(ii) An adjusted vacancy rate of 2% or less.

(2) *Grade B:* The PHA is in one of the following categories:

(i) An actual vacancy rate of greater than 3% and less than or equal to 5%; or

(ii) An adjusted vacancy rate of greater than 2% and less than or equal to 3%.

(3) *Grade C:* The PHA is in one of the following categories:

(i) An actual vacancy rate of greater than 5% and less than or equal to 7%; or

(ii) An adjusted vacancy rate of greater than 3% and less than or equal to 4%; or

(iii) The PHA has reduced its actual vacancy rate by at least 15 percentage points within the past three years and has an adjusted vacancy rate of greater than 4% and less than or equal to 5%.

(4) *Grade D:* The PHA is in one of the following categories:

(i) An actual vacancy rate of greater than 7% and less than or equal to 9%; or

(ii) An adjusted vacancy rate of greater than 4% and less than or equal to 5%; or

(iii) The PHA has reduced its actual vacancy rate by at least 10 percentage points within the past three years and has an adjusted vacancy rate of greater than 5% and less than or equal to 6%.

(5) *Grade E:* The PHA is in one of the following categories:

(i) An actual vacancy rate of greater than 9% and less than or equal to 10%; or

(ii) An adjusted vacancy rate of greater than 5% and less than or equal to 6%; or

(iii) The PHA has reduced its actual vacancy rate by at least five percentage points within the past three years and has an adjusted vacancy rate of greater than 6% and less than or equal to 7%.

(6) *Grade F:* The PHA is in one of the following categories:

(i) An actual vacancy rate greater than 10%; or

(ii) An adjusted vacancy rate greater than 7%; or

(iii) An adjusted vacancy rate of greater than 6% and less than or equal to 7% and the PHA has not reduced its actual vacancy rate by at least five percentage points within the past three years.

(d) *Component #2, unit turnaround time.* This component is to be completed only by PHAs scoring below a grade C on component #1. This component has a weight of x1.

(1) *Grade A:* The average number of calendar days between the time when a unit is vacated and a new lease takes effect for units re-occupied during the PHA's assessed fiscal year, is less than or equal to 20 calendar days.

(2) *Grade B:* The average number of calendar days between the time when a unit is vacated and a new lease takes effect for units re-occupied during the PHA's assessed fiscal year, is greater than 20 calendar days and less than or equal to 25 calendar days.

(3) *Grade C:* The average number of calendar days between the time when a unit is vacated and a new lease takes effect for units re-occupied during the PHA's assessed fiscal year, is greater than 25 calendar days and less than or equal to 30 calendar days.

(4) *Grade D:* The average number of calendar days between the time when a unit is vacated and a new lease takes effect for units re-occupied during the PHA's assessed fiscal year, is greater than 30 calendar days and less than or equal to 40 calendar days.

(5) *Grade E:* The average number of calendar days between the time when a unit is vacated and a new lease takes effect for units re-occupied during the PHA's assessed fiscal year, is greater than 40 calendar days and less than or equal to 50 calendar days.

(6) *Grade F:* The average number of calendar days between the time when a unit is vacated and a new lease takes effect for units re-occupied during the PHA's assessed fiscal year, is greater than 50 calendar days.

§ 901.15 Indicator #2, modernization.

This indicator is automatically excluded if a PHA does not have a modernization program. This indicator examines the amount of unexpended funds over three Federal fiscal years (FFY) old, the timeliness of fund obligation, the adequacy of contract administration, the quality of the physical work, and the adequacy of budget controls. All components apply to both the Comprehensive Grant Program (CGP), the Comprehensive Improvement Assistance Program (CIAP) and lead based paint risk assessment funding (1992–1995), and any successor program(s) to the CGP or the CIAP. Only components #3, #4 and #5 apply to funding under the Hope VI Program and the Vacancy Reduction Program for the assessment of this indicator. This indicator has a weight of x1.5.

(a) *Component #1, unexpended funds over three Federal fiscal years (FFYs) old.* This component has a weight of x1.

(1) *Grade A:* The PHA has no unexpended funds over three FFYs old or is able to demonstrate one of the following:

(i) The unexpended funds are leftover funds and will be recaptured after audit;

(ii) There are no unexpended funds past the original HUD-approved implementation schedule deadline that allowed longer than three FFYs; or

(iii) The PHA has extended the time within 30 calendar days after the expenditure deadline and the time extension is based on reasons outside of the PHA's control, such as need to use leftover funds, unforeseen delays in contracting or contract administration, litigation, material shortages, or other non-PHA institutional delay.

(2) *Grade F:* The PHA has unexpended funds over three FFYs old and is unable to demonstrate any of the above conditions; or the PHA requests HUD approval of a time extension based on reasons within the PHA's control.

(b) *Component #2, timeliness of fund obligation.* This component has a weight of x2.

(1) *Grade A:* The PHA has no unobligated funds over two FFYs old or is able to demonstrate one of the following:

(i) There are no unobligated funds past the original HUD-approved implementation schedule deadline that allowed longer than two FFYs; or

(ii) The PHA has extended the time within 30 calendar days after the obligation deadline and the time extension is based on reasons outside of the PHA's control, such as need to use leftover funds, unforeseen delays in contracting or contract administration, litigation, material shortages, or other non-PHA institutional delay.

(2) *Grade F:* The PHA has unobligated funds over two FFYs old and is unable to demonstrate any of the above two conditions; or the PHA requests HUD approval of a time extension based on reasons within the PHA's control.

(c) *Component #3, adequacy of contract administration.* For the purposes of this component, the term "findings" means a violation of a statute, regulation, Annual Contributions Contract or other HUD requirement in the area of contract administration. This component has a weight of x1.5.

(1) *Grade A:* Based on HUD's latest on-site inspection and/or audit, where a written report was provided to the PHA at least 75 calendar days before the end of the PHA's fiscal year, there were no findings related to contract administration or the PHA has corrected all such findings.

(2) *Grade C:* Based on HUD's latest on-site inspection and/or audit, where a written report was provided to the PHA at least 75 calendar days before the end of the PHA's fiscal year, there were findings related to contract administration and the PHA is in the process of correcting all such findings.

(3) Grade F: Based on HUD's latest on-site inspection and/or audit, where a written report was provided to the PHA at least 75 calendar days before the end of the PHA's fiscal year, there were findings related to contract administration and the PHA has failed to initiate corrective actions for all such findings or those actions which have been initiated have not resulted in progress toward remedying all of the findings.

(d) *Component #4, quality of the physical work.* For the purposes of this component, the term "findings" means a violation of a statute, regulation, Annual Contributions Contract or other HUD requirement in the area of physical work quality. This component has a weight of x3.

(1) *Grade A:* Based on HUD's latest on-site inspection, where a written report was provided to the PHA at least 75 calendar days before the end of the PHA's fiscal year, there were no findings related to the quality of the physical work or the PHA has corrected all such findings.

(2) *Grade C:* Based on HUD's latest on-site inspection, where a written report was provided to the PHA at least 75 calendar days before the end of the PHA's fiscal year, there were findings related to the quality of the physical

work and the PHA is in the process of correcting all such findings.

(3) *Grade F:* Based on HUD's latest on-site inspection, where a written report was provided to the PHA at least 75 calendar days before the end of the PHA's fiscal year, there were findings related to the quality of the physical work and the PHA has failed to initiate corrective actions for all such findings or those actions which have been initiated have not resulted in progress toward remedying all of the findings.

(e) *Component #5, adequacy of budget controls.* This component has a weight of x1.

(1) *Grade A:* The CGP PHA has expended modernization funds only on work in HUD-approved CGP Annual Statements, CGP Five-Year Action Plan, excluding emergencies, or CIAP Budgets, or has obtained prior HUD approval for required budget revisions. The CIAP PHA has expended modernization funds only on work in HUD-approved CIAP Budgets or related to originally approved work or has obtained prior HUD approval for required budget revisions.

(2) *Grade F:* The *CGP PHA* has expended modernization funds on work that was not in HUD-approved CGP Annual Statements, CGP Five-Year Action Plan, excluding emergencies, or CIAP Budgets, and did not obtain prior HUD approval for required budget revisions. The *CIAP PHA* has expended modernization funds on work that was not in HUD-approved CIAP Budgets or was unrelated to originally approved work and did not obtain prior HUD approval for required budget revisions.

§ 901.20 Indicator #3, rents uncollected.

This indicator examines the PHA's ability to collect dwelling rent owed by residents in possession during the immediate past fiscal year by measuring the balance of dwelling rents uncollected as a percentage of total dwelling rents to be collected. This indicator has a weight of x1.5.

(a) *Grade A:* The percent of dwelling rent uncollected in the immediate past fiscal year is less than or equal to 2% of total dwelling rent to be collected.

(b) *Grade B:* The percent of dwelling rent uncollected in the immediate past fiscal year is greater than 2% and less than or equal to 4% of total dwelling rent to be collected.

(c) *Grade C:* The percent of dwelling rent uncollected in the immediate past fiscal year is greater than 4% and less than or equal to 6% of total dwelling rent to be collected.

(d) *Grade D:* The percent of dwelling rent uncollected in the immediate past fiscal year is greater than 6% and less than or equal to 8% of total dwelling rent to be collected.

(e) *Grade E:* The percent of dwelling rent uncollected in the immediate past fiscal year is greater than 8% and less than or equal to 10% of total dwelling rent to be collected.

(f) *Grade F:* The percent of dwelling rent uncollected in the immediate past fiscal year is greater than 10% of total dwelling rent to be collected.

§ 901.25 Indicator #4, work orders.

This indicator examines the average number of days it takes for a work order to be completed, and any progress a PHA has made during the preceding three years to reduce the period of time required to complete maintenance work orders. Implicit in this indicator is the adequacy of the PHA's work order system in terms of how a PHA accounts for and controls its work orders, and its timeliness in preparing/issuing work orders. This indicator has a weight of x1.

(a) *Component #1, emergency work orders completed within 24 hours or less.* All emergency work orders should be tracked. This component has a weight of x1.

(1) *Grade A:* At least 99% of emergency work orders were completed or the emergency was abated within 24 hours or less during the PHA's immediate past fiscal year.

(2) *Grade B:* At least 98% of emergency work orders were completed or the emergency was abated within 24 hours or less during the PHA's immediate past fiscal year.

(3) *Grade C:* At least 97% of emergency work orders were completed or the emergency was abated within 24 hours or less during the PHA's immediate past fiscal year.

(4) *Grade D:* At least 96% of emergency work orders were completed or the emergency was abated within 24 hours or less during the PHA's immediate past fiscal year.

(5) *Grade E:* At least 95% of emergency work orders were completed or the emergency was abated within 24 hours or less during the PHA's immediate past fiscal year.

(6) *Grade F:* Less than 95% of emergency work orders were completed or the emergency was abated within 24 hours or less during the PHA's immediate past fiscal year.

(b) *Component #2, average number of days for non-emergency work orders to be completed.* All non-emergency work orders that were active during the assessed fiscal year should be tracked (including preventive maintenance work orders), except non-emergency work orders from the date they are deferred for modernization, issued to prepare a vacant unit for re-rental, or issued for the performance of cyclical maintenance. This component has a weight of x2.

(1) *Grade A:* All non-emergency work orders are completed within an average of 25 calendar days.

(2) *Grade B:* All non-emergency work orders are completed within an average of greater than 25 calendar days and less than or equal to 30 calendar days.

(3) *Grade C:* The PHA is in one of the following categories:

(i) All non-emergency work orders are completed within an average of greater than 30 calendar days and less than or equal to 40 calendar days; or

(ii) The PHA has reduced the average time it takes to complete non-emergency work orders by at least 15 days during the past three years.

(4) *Grade D:* The PHA is in one of the following categories:

(i) All non-emergency work orders are completed within an average of greater than 40 calendar days and less than or equal to 50 calendar days; or

(ii) The PHA has reduced the average time it takes to complete non emergency work orders by at least 10 days during the past three years.

(5) *Grade E:* The PHA is in one of the following categories:

(i) All non-emergency work orders are completed within an average of greater than 50 calendar days and less than or equal to 60 calendar days; or

(ii) The PHA has reduced the average time it takes to complete non-emergency work orders by at least 5 days during the past three years.

(6) *Grade F:* The PHA is in one of the following categories:

(i) All non-emergency work orders are completed within an average of greater than 60 calendar days; or

(ii) The PHA has not reduced the average time it takes to complete non-emergency work orders by at least 5 days during the past three years.

§ 901.30 Indicator #5, annual inspection of units and systems.

This indicator examines the percentage of units that a PHA inspects on an annual basis in order to determine short-term maintenance needs and long-term modernization needs. Implicit in this indicator is the adequacy of the PHA's inspection program in terms of the quality of a PHA's inspections, and how a PHA tracks both inspections and needed repairs. All occupied units are required to be inspected. This indicator has a weight of x1.

(a) Units in the following categories are exempted and not included in the calculation of the total number of units,

and the number and percentage of units inspected. Systems that are a part of individual dwelling units that are exempted, or a part of a building where all of the dwelling units in the building are exempted, are also exempted from the calculation of this indicator:

(1) Occupied units where the PHA has made two documented attempts to inspect, but only if the PHA can document that appropriate legal action (up to and including eviction of the legal or illegal occupant(s)), has been taken under provisions of the lease to ensure that the unit can be subsequently inspected.

(2) Units vacant for the full immediate past fiscal year for the following reasons, as defined at § 901.5:

(i) Vacant units undergoing modernization; and

(ii) Vacant units that are documented to be uninhabitable for reasons beyond a PHA's control due to:

(A) High/unsafe levels of hazardous/toxic materials;

(B) By order of the local health department or a directive of the Environmental Protection Agency;

(C) Natural disasters; and

(D) Units kept vacant because they became structurally unsound.

(b) *Component #1, annual inspection of units.* This component refers to an inspection using either the local housing and/or occupancy code, or HUD HQS if there is no local code or the local code is less stringent that HQS. This component has a weight of x1.

(1) *Grade A:* The PHA inspected 100% of its units and, if repairs were necessary for local code or HQS compliance, either completed the repairs during the inspection; issued work orders for the repairs; or referred similar work items to the current year's modernization program, or to next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was completed.

(2) *Grade B:* The PHA inspected less than 100% but at least 97% of its units and, if repairs were necessary for local code or HQS compliance, either completed the repairs during the inspection; issued work orders for the repairs; or referred similar work items to the current year's modernization program, or to next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was completed.

(3) *Grade C:* The PHA inspected less than 97% but at least 95% of its units and, if repairs were necessary for local code or HQS compliance, either completed the repairs during the inspection; issued work orders for the repairs; or referred similar work items to the current year's modernization program, or to next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was completed.

(4) *Grade D:* The PHA inspected less than 95% but at least 93% of its units and, if repairs were necessary for local code or HQS compliance, either completed the repairs during the inspection; issued work orders for the repairs; or referred similar work items to the current year's modernization program, or to next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was completed.

(5) *Grade E:* The PHA inspected less than 93% but at least 90% of its units and, if repairs were necessary for local code or HQS compliance, either completed the repairs during the inspection; issued work orders for the repairs; or referred similar work items to the current year's modernization program, or to next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was completed.

(6) *Grade F:* The PHA has failed to inspect at least 90% of its units; or failed to correct deficiencies during the inspection or issue work orders for the repairs; or failed to refer similar work items to the current year's modernization program, or to next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was completed.

(c) *Component #2, annual inspection of systems.* This component examines the inspection of buildings and sites according to the PHA's maintenance plan, including performing the required maintenance on structures and systems in accordance with manufacturer's specifications and established local/PHA standards, or issuing work orders for maintenance/repairs, or including identified deficiencies in this year's modernization program, or in next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was performed. This component has a weight of x1.

(1) *Grade A:* The PHA inspected all major systems at 100% of its buildings and sites, according to its maintenance plan. The inspection included performing the required maintenance on structures and systems in accordance with manufacturer's specifications and established local/PHA standards, or issuing work orders for maintenance/repairs, or including identified deficiencies in the current year's modernization program, or in next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was performed.

(2) *Grade B:* The PHA inspected all major systems of at least a minimum of 90% but less than 100% of its buildings and sites, according to its maintenance plan. The inspection included performing the required maintenance on structures and systems in accordance with manufacturer's specifications and established local/PHA standards, or issuing work orders for maintenance/repairs, or including identified deficiencies in the current year's modernization program, or in next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was performed.

(3) *Grade C:* The PHA inspected all major systems of at least a minimum of 80% but less than 90% of its buildings and sites, according to its maintenance plan. The inspection included performing the required maintenance on structures and systems in accordance with manufacturer's specifications and established local/PHA standards, or issuing work orders for maintenance/repairs, or including identified deficiencies in the current year's modernization program, or in next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was performed.

(4) *Grade D:* The PHA inspected all major systems of at least a minimum of 70% but less than 80% of its buildings and sites, according to its maintenance plan. The inspection included performing the required maintenance on structures and systems in accordance with manufacturer's specifications and established local/PHA standards, or issuing work orders for maintenance/repairs, or including identified deficiencies in the current year's modernization program, or in next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was performed.

(5) *Grade E:* The PHA inspected all major systems of at least a minimum of 60% but less than 70% of its buildings and sites, according to its maintenance plan. The inspection included performing the required maintenance on structures and systems in accordance with manufacturer's specifications and established local/PHA standards, or

issuing work orders for maintenance/repairs, or including identified deficiencies in the current year's modernization program, or in next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was performed.

(6) *Grade F:* The PHA failed to inspect all major systems of at least 60% of its buildings and sites and perform the required maintenance on these systems in accordance with manufacturers specifications and established local/PHA standards, or did not issue work orders for maintenance/repairs, or did not include identified deficiencies in the current year's modernization program, or in next year's modernization program if there are less than three months remaining before the end of the PHA fiscal year when the inspection was performed.

§ 901.35 Indicator #6, financial management.

This indicator examines the amount of cash reserves available for operations and, for PHAs scoring below a grade C on cash reserves, energy/ utility consumption expenses. This indicator has a weight of x1.

(a) *Component #1, cash reserves.* This component has a weight of x2.

(a) *Grade A:* Cash reserves available for operations are greater than or equal to 15% of total actual routine expenditures, or the PHA has cash reserves of $3 million or more.

(2) *Grade B:* Cash reserves available for operations are greater than or equal to 12.5%, but less than 15% of total actual routine expenditures.

(3) *Grade C:* Cash reserves available for operations are greater than or equal to 10%, but less than 12.5% of total actual routine expenditures.

(4) *Grade D:* Cash reserves available for operations are greater than or equal to 7.5%, but less than 10% of total actual routine expenditures.

(5) *Grade E:* Cash reserves are greater than or equal to 5%, but less than 7.5% of total actual routine expenditures.

(6) *Grade F:* Cash reserves available for operations are less than 5% of total actual routine expenditures.

(b) *Component #2, energy consumption.* Either option A or option B of this component is to be completed only by PHAs that score below a grade C on component #1. Regardless of a PHA's score on component #1, it will not be scored on component #2 if all its units have tenant paid utilities. Annual energy/utility consumption expenses includes water and sewage usage. This component has a weight of x1.

(1) *Option A, annual energy/utility consumption expenses.*

(i) *Grade A:* Annual energy/utility consumption expenses, as compared to the average of the three years' rolling base consumption expenses, have not increased.

(ii) *Grade B:* Annual energy/utility consumption expenses, as compared to the average of the three years' rolling base consumption expenses, have not increased by more than 3%.

(iii) *Grade C:* Annual energy/utility consumption expenses, as compared to the average of the three years' rolling base consumption expenses, have increased by more than 3% and less than or equal to 5%.

(iv) *Grade D:* Annual energy/utility consumption expenses, as compared to the average of the three years' rolling base consumption expenses, have increased by more than 5% and less than or equal to 7%.

(v) *Grade E:* Annual energy/utility consumption expenses, as compared to the average of the three years' rolling base consumption expenses, have increased by more than 7% and less than or equal to 9%.

(vi) *Grade F:* Annual energy/utility consumption expenses, as compared to the average of the three years' rolling base consumption expenses, have increased by more than 9%.

(2) *Option B, energy audit.*

(i) *Grade A:* The PHA has completed or updated its energy audit within the past five years and has implemented all of the recommendations that were cost effective.

(ii) *Grade C:* The PHA has completed or updated its energy audit within the past five years, has developed an implementation plan and is on schedule with the implementation plan, based on available funds. The implementation plan identifies at a minimum, the items from the audit, the estimated cost, the planned funding source, and the anticipated date of completion for each item.

(iii) *Grade F:* The PHA has not completed or updated its energy audit within the past five years, or has not developed an implementation plan or is not on schedule with its implementation plan, or has not implemented all of the recommendations that were cost effective, based on available funds.

§ 901.40 Indicator #7, Resident Services and Community Building.

This indicator examines the PHA's efforts to deliver quality customer services and to encourage partnerships with residents, resident organizations, and the local community, including non-PHA service providers, that help improve management operations at the PHA; and to encourage programs that promote individual responsibility, self improvement and community involvement among residents and assist them to achieve economic uplift and develop self-sufficiency. Also, if applicable, this indicator examines PHA performance under any special HUD grant(s) administered by the PHA. PHAs can get credit for performance under non-HUD funded programs if they choose to be assessed for these programs. PHAs with fewer than 250 units or with 100% elderly developments will not be assessed under this indicator unless they request to be assessed at the time of PHMAP certification submission. This indicator has a weight of x1.

(a) *Component #1, economic uplift and self-improvement.* PHAs will be assessed for all the programs that the PHA has HUD funding to implement. Also, PHAs can get credit for implementation of programs through partnerships with non-PHA providers, even if the programs are not funded by HUD or the PHA, if they choose to be assessed for them. PHAs must select either to be assessed for all or none of the non-HUD funded programs. This component has a weight of x1.

(1) *Grade A:* The PHA Board of Commissioners, by resolution, has adopted one or more economic uplift and self-improvement programs, examples include but are not limited to, the Section 3 program, homeownership, PHA support for resident education, training, child-care, job-placement programs, Head Start, etc., and the PHA can document that it has implemented these programs in developments covering at least 90% of its family occupied units, either directly or through partnerships with non-PHA providers, and the PHA monitors performance under the programs and issues reports concerning progress, including residents receiving services and residents employed, under these programs.

(2) *Grade C:* The PHA Board of Commissioners, by resolution, has adopted one or more economic uplift and self-improvement programs, including but not limited to, the programs described in grade A, above, and the PHA can document that it has implemented these programs in developments covering at least 60% of its family occupied units, either directly or through partnerships with non-PHA providers, and the PHA staff monitors performance under the programs and issues reports to the Board concerning progress, including residents receiving

services and residents employed, under these programs.

(3) Grade F: The PHA Board of Commissioners, by resolution, has not adopted one or more economic uplift and self-improvement programs, including but not limited to, the programs described in grade A, above, or the PHA has not implemented these programs in developments covering at least 60% of its family occupied units, either directly or through partnerships with non-PHA providers.

(b) *Component* #2, resident organization. This component has a weight of x1.

(1) *Grade A:* The PHA can document formal recognition of, a system of communication and collaboration with, and support for resident councils where these exist, and where no resident council exists, the PHA can document its encouragement for the formation of such councils.

(2) *Grade F:* The PHA cannot document formal recognition of, or a system of communication and collaboration with, or document its support for resident councils where these exist, or where no resident council exists, the PHA cannot document its encouragement for the formation of such councils.

(c) *Component* #3, resident involvement. Implicit in this component is the need to ensure a PHA's delivery of quality customer services to residents. This component has a weight of x1.

(1) *Grade A:* The PHA Board of Commissioners, by resolution, provides for resident representation on the Board and committees, and the PHA has implemented measures that ensure the opportunity for regular resident input into plans and the evaluation for ongoing quality of life and housing management conditions, including but not limited to, modernization and development programs, screening and other occupancy matters, relocation, the operating budget, resident programs, security and maintenance programs.

(2) *Grade C:* The PHA Board of Commissioners, by resolution, provides for resident representation on the Board and committees, and the PHA has implemented measures that ensure the opportunity for regular resident input into plans and the evaluation for ongoing quality of life and housing management conditions in the modernization and development programs and at least three of the remaining six areas described in grade A, above.

(3) *Grade F:* The PHA Board of Commissioners, by resolution, did not provide for resident representation on the Board and committees, or the PHA has not implemented measures that ensure the opportunity for regular resident input into plans and the evaluation for ongoing quality of life and housing management conditions in the modernization and development programs and at least three of the remaining six areas described in grade A, above.

(d) *Component* #4, *resident programs management.* This component examines a PHA's management of HUD funded resident programs. However, PHAs can also get credit for performance under non-HUD funded programs if they choose to be assessed for them. PHAs must select either to be assessed for all or none of the non-HUD funded programs. This component has a weight of x1.

(1) *Grade A:* If the PHA has any HUD funded special programs that benefit the residents, including but not limited to, the Family Investment Center (FIC), Youth Sports (YS), Food Banks, Health Clinics, Youth Apprenticeship Program (YAP), Family Self-Sufficiency (FSS), or a Resident Management (RM) or Tenant Opportunity Programs (TOP) where the PHA is the contract administrator, the PHA can document that it is meeting at least 90% of its goals under the implementation plan for any and all of these programs.

(2) *Grade C:* If the PHA has any HUD-funded special programs that benefit the residents, including but not limited to, the programs described in grade A, above, the PHA can document that it is meeting at least 60% of its goals under the implementation plan for any and all of these programs.

(3) *Grade F:* If the PHA has any HUD-funded special programs that benefit the residents, including but not limited to, the programs described in grade A, above, the PHA cannot document that it is meeting at least 60% of its goals under the implementation plan for all of these programs.

§ 901.45 Indicator #8, security.

This indicator evaluates the PHAs performance in tracking crime related problems in their developments, reporting incidence of crime to local law enforcement agencies, the adoption and implementation of tough applicant screening and resident eviction policies and procedures, and, as applicable, PHA performance under any HUD drug prevention or crime reduction grant(s). PHAs can get credit for performance under non-HUD funded programs if they choose to be assessed for these programs. PHAs with fewer than 250 units will not be assessed under this indicator unless they request to be assessed at the time of PHMAP certification submission. This indicator has a weight of x1.

(a) Component #1, Tracking and Reporting Crime Related Problems. This component has a weight of x1.

(1) *Grade A:* The PHA Board, by resolution, has adopted policies and the PHA has implemented procedures and can document that it (1) tracks crime and crime-related problems in at least 90% of its developments, and (2) has a cooperative system for tracking and reporting incidents of crime to local police authorities to improve law enforcement and crime prevention.

(2) *Grade C:* The PHA Board, by resolution, has adopted policies and the PHA has implemented procedures and can document that it (1) tracks crime and crime-related problems in at least 60% of its developments, and (2) reports incidents of crime to local police authorities to improve law enforcement and crime prevention.

(3) *Grade F:* The PHA Board, by resolution, has not adopted policies and the PHA has not implemented procedures or cannot document that it (1) tracks crime and crime-related problems in at least 60% of its developments, or (2) reports incidents of crime to local police authorities to improve law enforcement and crime prevention.

(b) *Component* #2, *Screening of Applicants.* This component has a weight of x1.

(1) *Grade A:* The PHA Board, by resolution, has adopted policies and the PHA has implemented procedures and can document that it successfully screens out and denies admission to a public housing applicant who:

(i) Has a recent history of criminal activity involving crimes to persons or property and/or other criminal acts that would adversely affect the health, safety or welfare of other residents or PHA personnel;

(ii) Was evicted, because of drug-related criminal activity, from housing assisted under the U.S. Housing Act of 1937, for a minimum of a three year period beginning on the date of such eviction, unless the applicant has successfully completed, since the eviction, a rehabilitation program approved by the public housing agency;

(iii) The PHA has reasonable cause to believe is illegally using a controlled substance; or

(iv) The PHA has reasonable cause to believe abuses alcohol in a way that causes behavior that may interfere with the health, safety, or right to peaceful enjoyment of the premises by other residents or PHA personnel.

VOL 61 ISS 251 DE 30 1996 UMI

(2) *Grade C:* The PHA Board, by resolution, has adopted policies and the PHA has implemented procedures, but cannot document results in successfully screening out and denying admission to a public housing applicant who meets the criteria as described in grade A, above.

(3) *Grade F:* The PHA has not adopted policies or has not implemented procedures that result in screening out and denying admission to a public housing applicant who meets the criteria as described in grade A, above, or the screening procedures do not result in the denial of admission to a public housing applicant who meets the criteria as described in grade A, above.

(c) *Component #3, Lease Enforcement.* This component has a weight of x1.

(1) *Grade A:* The PHA Board, by resolution, has adopted policies and the PHA has implemented procedures and can document that it appropriately evicts any public housing resident who:

(i) The PHA has reasonable cause to believe engages in any criminal activity that threatens the health, safety, or right to peaceful enjoyment of the premises by other residents or PHA personnel;

(ii) The PHA has reasonable cause to believe engages in any drug-related criminal activity (as defined at section 6(l) of the 1937 Act (42 U.S.C. 1437d(l)) on or off the PHA's property; or

(iii) The PHA has reasonable cause to believe abuses alcohol in such a way that causes behavior that may interfere with the health, safety, or right to peaceful enjoyment of the premises by other residents or PHA personnel.

(2) *Grade C:* The PHA Board, by resolution, has adopted policies and the PHA has implemented procedures, but cannot document results in appropriately evicting any public housing resident who meets the criteria as described in grade A, above.

(3) *Grade F:* The PHA has not adopted policies or has not implemented procedures that document results in the eviction of any public housing resident who meets the criteria as described in grade A, above, or the eviction procedures do not result in the eviction of public housing residents who meet the criteria as described in grade A, above.

(d) *Component #4, Grant Program Goals.* This component examines a PHA's management of HUD-funded drug prevention or crime reduction programs. However, PHAs can also get credit for performance under non-HUD funded programs if they choose to be assessed for them. PHAs must select either to be assessed for all or none of the non-HUD funded programs. This component has a weight of x1.

(1) *Grade A:* If the PHA has any special drug prevention program or crime reduction program funded by any HUD funds, the PHA can document that the goals are related to drug and crime rates, and it is meeting at least 90% of its goals under the implementation plan for any and all of these programs.

(2) *Grade C:* If the PHA has any special drug prevention program or crime reduction program funded by any HUD funds, the PHA can document that the goals are related to drug and crime rates, and it is meeting at least 60% of its goals under the implementation plan for any and all of these programs.

(3) *Grade F:* If the PHA has any special drug prevention program or crime reduction program funded by any HUD funds, the PHA does not have a system for documenting or cannot document that the goals are related to drug and crime rates, or cannot document that it is meeting 60% or more of its goals under the implementation plan for any and all of these programs.

§ 901.100 Data collection.

(a) Information on some of the indicators will be derived by the State/Area Office from existing reporting and data forms.

(b) A PHA shall provide certification as to data on indicators not collected according to paragraph (a) of this section, by submitting a certified questionnaire within 60 calendar days after the end of the fiscal year covered by the certification:

(1) The certification shall be approved by PHA Board resolution, and signed and attested to by the Executive Director.

(2) PHAs shall maintain documentation for three years verifying all certified indicators for HUD on-site review.

(3) A PHA may include along with its certification submission, rather than through an exclusion or modification request, any information bearing on the accuracy or completeness of the data used by HUD (corrected data, late reports, previously omitted required reports, etc.) in grading an indicator. HUD will consider this assertion in grading the affected indicator.

(4) If a PHA does not submit its certification, or submits its certification late, appropriate sanctions may be imposed, including a presumptive rating of failure in all of the PHMAP indicators, which may result in troubled and mod-troubled designations.

(5) A PHA that cannot provide justifying documentation to HUD during the conduct of a confirmatory review, or other verification review(s), for any indicator(s) or component(s) certified to, shall receive a failing grade in that indicator(s) or component(s), and its overall PHMAP score shall be lowered.

(6) If the data for any indicator(s) or component(s) that a PHA certified to cannot be verified by HUD during the conduct of a confirmatory review, or any other verification review(s), the State/Area Office shall change a PHA's grade for any indicator(s) or component(s), and its overall PHMAP score, as appropriate, to reflect the verified data obtained during the conduct of such review.

(7) A PHA that cannot provide justifying documentation to the independent auditor for the indicator(s) or component(s) that the PHA certified to, as reflected in the audit report, shall receive a grade of F for that indicator(s) or component(s), and its overall PHMAP score shall be lowered.

(8) A PHA's PHMAP score for individual indicators or components, or its overall PHMAP score, may be changed by the State/Area Office pursuant to the data included in the independent audit report, as applicable.

(9) A PHA's certification and supporting documentation will be post-reviewed by HUD during the next on-site review as determined by risk management, but is subject to verification at any time. Appropriate sanctions for intentional false certification will be imposed, including suspension or debarment of the signatories, the loss of high performer designation, a lower grade for individual indicators and a lower PHMAP total weighted score.

(c) For those developments of a PHA where management functions have been assumed by an RMC, the PHA's certification shall identify the development and the management functions assumed by the RMC. The PHA shall obtain a certified questionnaire from the RMC as to the management functions undertaken by the RMC. The PHA shall submit the RMC's certified questionnaire along with its own. The RMC's certification shall be approved by its Executive Director or Chief Executive Officer of whatever title.

§ 901.105 Computing assessment score.

(a) Grades within indicators and components have the following point values:

(1) Grade A = 10.0 points;
(2) Grade B = 8.5 points;
(3) Grade C = 7.0 points;
(4) Grade D = 5.0 points;
(5) Grade E = 3.0 point; and
(6) Grade F = 0.0 points.

(b) If indicators or components are designated as having additional weight

VOL 61 ISS 251 DE 30 1996 UMI

(e.g., x1.5 or x2), the points in each grade will be multiplied times the additional weight.

(c) Indicators will be graded individually. Components within an indicator will be graded individually, and then will be used to determine a single grade for the indicator, by dividing the total number of component points by the total number of component weights and rounding off to two decimal places. The total number of component weights for this purpose includes a one for components that are unweighted (i.e., they are weighted x1, rather than x1.5 or x2).

(d) *Adjustment for physical condition and neighborhood environment.* The overall PHMAP score will be adjusted by adding additional points that reflect the adjustment to be given to the differences in the difficulty of managing developments that result from physical condition and neighborhood environment:

(1) Adjustments shall apply to the following three indicators only:

(i) Indicator #1, vacancy rate and unit turnaround;

(ii) Indicator #4, work orders; and

(iii) Indicator #5, annual inspection and condition of units and systems.

(2) Definitions of physical condition and neighborhood environment are:

(i) *Physical condition:* refers to units located in developments over ten years old that require major capital investment in order to meet local codes or minimum HQS standards, whichever is applicable. This excludes developments that have been comprehensively modernized.

(ii) *Neighborhood environment:* refers to units located within developments where the immediate surrounding neighborhood (that is a majority of the census tracts or census block groups on all sides of the development) has at least 51% of families with incomes below the poverty rate as documented by the latest census data.

(3) Any PHA with 5% or more of its units subject to either or both of the above conditions shall, if they so choose, be issued an adjusted PHMAP score in addition to the regular score based solely upon the certification of the PHA. The adjusted score shall be calculated as follows:

Percent of units subject to physical condition and/or neighborhood environment	Extra points
At least 5% but less than 10%	.5
At least 10% but less than 20%	.6
At least 20% but less than 30%	.7
At least 30% but less than 40%	.8
At least 40% but less than 50%	.9
At least 50%	1.0

(i) These extra points will be added to the score (grade) of the indicator(s) to which these conditions may apply. A PHA is required to certify on form HUD–50072, PHMAP Certification, the extent to which the conditions apply, and to which of the indicators the extra scoring points should be added.

(ii) Units in developments that have received substantial rehabilitation within the past ten years are not eligible to be included in the calculation of total PHA units due to physical condition only.

(iii) A PHA that receives a grade of A under indicators #4 and/or #5 may not claim the additional adjustment for indicator #1 based on physical condition of its developments, but may claim additional adjustment based on neighborhood environment.

(iv) A PHA that receives the maximum potential weighted points on indicators #1, #4 and/or #5 may not claim any additional adjustment for physical condition and/or neighborhood environment for the respective indicator(s).

(v) A PHA's score for indicators #1, #4 and/or #5, after any adjustment(s) for physical condition and/or neighborhood environment, may not exceed the maximum potential weighted points assigned to the respective indicator(s).

(4) If only certain units or developments received substantial rehabilitation, the additional adjustment shall be prorated to exclude the units or developments with substantial rehabilitation.

(5) The Date of Full Availability (DOFA) shall apply to scattered site units, where the age of units and buildings vary, to determine whether the units have received substantial rehabilitation within the past ten years and are eligible for a adjusted score for the physical condition factor.

(6) PHAs shall maintain supporting documentation to show how they arrived at the number and percentage of units out of their total inventory that are subject to adjustment.

(i) If the basis was neighborhood environment, the PHA shall have on file the appropriate maps showing the census tracts or census block groups surrounding the development(s) in question with supporting census data showing the level of poverty. Units that fall into this category but which have already been removed from consideration for other reasons (permitted exemptions and modifications and/or exclusions) shall not be counted in this calculation.

(ii) For the physical condition factor, a PHA would have to maintain documentation showing the age and condition of the units and the record of capital improvements, indicating that these particular units have not received modernization funds.

(iii) PHAs shall also document that in all cases, units that were exempted for other reasons were not included in the calculation.

§ 901.110 PHA request for exclusion or modification of an indicator or component.

(a) A PHA shall have the right to request the exclusion or modification of any indicator or component in its management assessment, thereby excluding or modifying the impact of those indicator's or component's grades in its PHMAP total weighted score.

(b) Exclusion and modification requests shall be submitted by a PHA at the time of its PHMAP certification submission to the State/Area Office along with supporting documentary justification, rather than during the appeal process.

(c) Requests for exclusions and modifications that do not include supporting documentary justification will not be considered.

(d) Indicator #2, modernization, shall be automatically excluded by the State/Area Office if a PHA does not have an open modernization program.

(e) Indicator #7, resident services and community building, shall be automatically excluded by the State/Area Office for PHAs with fewer than 250 units, or with 100% elderly developments, unless they request to be assessed at the time of the PHMAP certification submission.

(f) Indicator #8, security, shall be automatically excluded by the State/Area Office for PHAs with fewer than 250 units unless they request to be assessed at the time of the PHMAP certification submission.

§ 901.115 PHA score and status.

(a) PHAs that achieve a total weighted score of 90% or greater shall be designated high performers. A PHA shall not be designated as a high performer if it scores below a grade of C for any indicator. High performers will be afforded incentives that include relief from reporting and other requirements, as described in § 901.130.

(b) PHAs that achieve a total weighted score of 90% or greater on its overall PHMAP score and on indicator #2, modernization, shall be designated mod-high performers.

(c) PHAs that achieve a total weighted score of less than 90% but not less than 60% shall be designated standard. Standard performers will be afforded incentives that include relief from reporting and other requirements, as described in § 901.130.

(d) PHAs that achieve a total weighted score of less than 60% shall be designated as troubled.

(e) PHAs that achieve 60% of the maximum calculation for indicator #2, modernization, shall be designated as mod-troubled.

(f) Each PHA shall post a notice of its final PHMAP score and status in appropriate conspicuous and accessible locations in its offices within two weeks of receipt of its final score and status. In addition, HUD will publish every PHA's score and status in the **Federal Register**.

(g) A PHA that cannot provide justifying documentation to HUD during the conduct of a confirmatory review, or other verification review(s), for any indicator(s) or component(s) certified to, shall receive a failing grade in that indicator(s) or component(s), and its overall PHMAP score shall be lowered.

(h) If the data for any indicator(s) or component(s) that a PHA certified to cannot be verified by HUD during the conduct of a confirmatory review, or any other verification review(s), the State/Area Office shall change a PHA's grade for any indicator(s) or component(s), and its overall PHMAP score, as appropriate, to reflect the verified data obtained during the conduct of such review.

(i) A PHA that cannot provide justifying documentation to the independent auditor for the indicator(s) or component(s) that the PHA certified to, as reflected in the audit report, will receive a grade of F for that indicator(s), and its overall PHMAP score will be lowered.

(j) A PHA's PHMAP score for individual an indicator(s), component(s) or its overall PHMAP score may be changed by the State/Area Office pursuant to the data included in the independent audit report, as applicable.

(k) In *exceptional circumstances*, even though a PHA has satisfied all of the indicators for high or standard performer designation, the State/Area Office may conduct any review as necessary, including a confirmatory review, and deny or rescind incentives or high performer status, as described in paragraphs (a) and (b) of this section in the case of a PHA that:

(1) Is operating under a special agreement with HUD;

(2) Is involved in litigation that bears directly upon the management of a PHA;

(3) Is operating under a court order;

(4) Demonstrates substantial evidence of fraud or misconduct, including evidence that the PHA's certification of indicators is not supported by the facts, resulting from such sources as a confirmatory review, routine reports and reviews, an Office of Inspector General investigation/audit, an independent auditor's audit or an investigation by any appropriate legal authority; or

(5) Demonstrates substantial noncompliance in one or more areas (including areas not assessed by the PHMAP). Areas of substantial noncompliance include, but are not limited to, noncompliance with statutes (e.g., Fair Housing and Equal Opportunity statutes); regulations (e.g., 24 CFR § 85); or the Annual Contributions Contract (ACC) (e.g., the ACC, form HUD–53012A, Section 4, Mission of the PHA). Substantial noncompliance would cast doubt on the PHA's capacity to preserve and protect its public housing developments and operate them consistent with Federal law and regulations.

(l) When a State/Area Office Public Housing Director acts for any of the reasons stated in paragraph (k) of this section, the State/Area Office will send written notification to the PHA with a specific explanation of the reasons. An information copy will be forwarded to the Assistant Secretary for Public and Indian Housing.

(m) A PHA may appeal denial of high performer status in accordance with § 901.125.

§ 901.120 State/Area Office functions.

(a) The State/Area Office will assess each PHA within its jurisdiction on an annual basis:

(1) The State/Area Office will make determinations for high-performing, standard, troubled PHAs and mod-troubled PHAs in accordance with a PHA's PHMAP weighted score.

(2) The State/Area Office will also make determinations for exclusion and modification requests.

(b) Each State/Area Office will notify each PHA of the PHA's grade and the grade of the RMC (if any) assuming management functions at any of the PHA's developments, in each indicator; the PHA's management assessment total weighted score and status, and if applicable; its adjustment for physical condition and neighborhood environment; any determinations concerning exclusion and modification requests; and any deadline date by which appeals must be received. PHA notification should include offers of pertinent technical assistance in problem areas, suggestions for means of improving problem areas, and areas of relief and incentives as a result of high performer status. The PHA must notify the RMC (if any) in writing, immediately upon receipt of the State/Area Office notification, of the RMC's grades.

(c) An on-site confirmatory review may be conducted of a PHA by HUD. The purpose of the on-site confirmatory review is to verify those indicators for which a PHA provides certification, as well as the accuracy of the information received in the State/Area Office pertaining to the remaining indicators.

(1) Whenever practicable, a confirmatory review should be conducted by HUD prior to the issuance of a PHA's initial notification letter. The results of the confirmatory review shall be included in the PHA's initial notification letter.

(2) If, in an exceptional circumstance, a confirmatory review is conducted after the State/Area Office issues the initial notification letter, the State/Area Office shall explain the results of the confirmatory review in writing, correct the PHA's total weighted score, as appropriate, and reissue the initial notification letter to the PHA.

(3) The State/Area Office shall conduct a confirmatory review of a PHA with 100 or more units under management that scores less than 60% for its total weighted score, or less than 60% on indicator #2, modernization, before initially designating the PHA as troubled or mod-troubled. The results of the confirmatory review shall be included in the PHA's initial notification letter.

(4) The State/Area Office shall conduct a confirmatory review on a yearly basis of all troubled and mod-troubled PHAs.

(5) The State/Area Office shall conduct a confirmatory review of a PHA with 100 or more units under management prior to the removal of troubled or mod-troubled designation.

(6) Independent confirmatory reviews (team members from other State/ Area Offices) shall be conducted of troubled PHAs with 1250 or more units under management prior to the removal of troubled designation.

(d) A PHA that cannot provide justifying documentation to HUD during the conduct of a confirmatory review, or other verification review(s), for any indicator(s) or component(s) certified to, shall receive a failing grade in that indicator(s) or component(s), and its overall PHMAP score shall be lowered by the State/Area Office. The State/Area Office shall explain to the PHA the reason(s) for the change(s) in writing,

correct the PHA's grade for an individual component(s) and/or indicator(s) and total weighted score, as appropriate, and reissue the initial notification letter to the PHA.

(e) If the data for any indicator(s) or component(s) that a PHA certified to cannot be verified by HUD during the conduct of a confirmatory review, or any other verification review(s), the State/Area Office shall change a PHA's grade for any indicator(s) or component(s), and its overall PHMAP score, as appropriate, to reflect the verified data obtained during the conduct of such review. The State/Area Office shall explain to the PHA the reason(s) for the change(s) in writing, correct the PHA's grade for an individual component(s) and/or indicator(s) and total weighted score, as appropriate, and reissue the initial notification letter to the PHA.

(f) A PHA that cannot provide justifying documentation to the independent auditor for the indicator(s) or component(s) that the PHA certified to, as reflected in the audit report, will receive a grade of F for that indicator(s), and its overall PHMAP score will be lowered by the State/Area Office. The State/Area Office shall explain to the PHA the reason(s) for the change(s) in writing, correct the PHA's grade for an individual component(s) and/or indicator(s) and total weighted score, as appropriate, and reissue the initial notification letter to the PHA.

(g) A PHA's PHMAP score for an individual indicator(s), component(s) or its overall PHMAP score may be changed by the Area/State Office pursuant to the data included in the independent audit report, as applicable. The State/Area Office shall explain to the PHA the reason(s) for the change(s) in writing, correct the PHA's grade for an individual component(s) and/or indicator(s) and total weighted score, as appropriate, and reissue the initial notification letter to the PHA.

(h) Determinations on appeals and on petitions to remove troubled or mod-troubled status will be made by the State/Area Office.

(i) Determinations of intentional false certifications will be made by the State/Area Office. State/Area Offices shall consult with the local Office of Inspector General for guidance in cases of determinations of intentional false certification.

(j) In exceptional circumstances, the State/Area Office may deny or rescind a PHA's status as a standard or high performer, in accordance with § 901.115(i), so that it will not be entitled to any of the areas of relief and incentives.

(k) The State/Area Office will maintain PHMAP files for public inspection in accordance with § 901.155.

§ 901.125 PHA right of appeal.

(a) A PHA has the right to appeal its PHMAP score to the State/Area Office, including a troubled designation or a mod-troubled designation. A PHA may appeal its management assessment rating on the basis of data errors (any dispute over the accuracy, calculation, or interpretation of data employed in the grading process that would affect a PHA's PHMAP score), the denial of exclusion or modification requests when their denial affects a PHA's total weighted score, the denial of an adjustment based on the physical condition and neighborhood environment of a PHA's developments, or a determination of intentional false certification:

(1) A PHA may appeal its management assessment rating to the State/Area Office only for the reasons stated in paragraph (a) of this section:

(i) A PHA may not appeal its PHMAP score to the State/Area Office unless it has submitted its certification to the State/Area Office.

(ii) A PHA may not appeal its PHMAP score to the State/Area Office if the reason the PHA received a deficient grade in any indicator or component was due to the fact the PHA did not submit a required report in a timely manner or without an approved time extension.

(iii) A PHA may not appeal its PHMAP score to the State/Area Office if the reason the PHA received a failing grade in any indicator or component was due to the fact that the PHA did not provide justifying documentation to the independent auditor for any indicator(s) or component(s) the PHA certified to.

(2) The appeal shall be submitted to the State/Area Office and shall include supporting documentary justification of the reasons for the appeal.

(3) The State/Area Office will make determinations on initial appeals and will transmit the determination of the appeal to the PHA in a notification letter that will also include the date and place for submitting any further appeal.

(4) Appeals submitted to the State/Area Office without appropriate documentation will not be considered and will be returned to the PHA.

(b) Appeals of rescission of high performer designation shall be made directly to the Assistant Secretary for Public and Indian Housing.

(c) A PHA may appeal the denial of an initial appeal by the State/Area Office to the Assistant Secretary for Public and Indian Housing for the following reasons:

(1) Initial appeals denying high performer designation;

(2) Initial appeals denying the removal of troubled designation;

(3) Initial appeals denying the removal of mod-troubled designation;

(4) The denial of an appeal of a determination of intentional false certification;

(5) Data errors;

(6) The denial of exclusion or modification requests when their denial affects a PHA's total weighted score;

(7) The denial of an adjustment based on the physical condition and neighborhood environment of a PHA's developments;

(8) The refusal of a petition in accordance with § 901.140 to remove troubled or mod-troubled designations.

(d) A PHA may appeal its management assessment rating to the Assistant Secretary for Public and Indian Housing only for the reasons stated in paragraph (c) of this section.

(e) A PHA may not appeal its PHMAP score to the Assistant Secretary unless it has submitted its certification to the State/Area Office.

(f) Appeals submitted to the Assistant Secretary for Public and Indian Housing without appropriate documentation will not be considered and will be returned to the PHA.

(g) The date and place by which any appeal must be submitted will be specified in the letter from the State/Area Office notifying the PHA of any determination or action. For example, the State/Area Office initial notification letter or denial of initial appeal letter will specify the date and place by which appeals must be received. The date specified will be the 15th calendar day after the letter is mailed, not counting the day the letter is mailed. If the 15th day falls on a weekend or holiday, the date specified will be the next day that is not on a weekend or a holiday. Any appeal not received by the specified time and place will not be considered.

§ 901.130 Incentives.

(a) A PHA that is designated high performer or standard performer will be relieved of specific HUD requirements, effective upon notification of high or standard performer designation.

(b) A PHA shall not be designated a mod-high performer and be entitled to the applicable incentives unless it has been designated an overall high performer.

(c) High-performing PHAs, and RMCs that receive a grade of A on each of the indicators for which they are assessed, will receive a Certificate of

Commendation from the Department as well as special public recognition.

(d) Representatives of high-performing PHAs may be requested to serve on Departmental working groups that will advise the Department in such areas as troubled PHAs and performance standards for all PHAs.

(e) State/Area Offices may award incentives to PHAs on an individual basis for a specific reason(s), such as a PHA making the right decision that impacts long-term overall management or the quality of a PHA's housing stock, with prior concurrence from the Assistant Secretary.

(f) Relief from any standard procedural requirements does not mean that a PHA is relieved from compliance with the provisions of Federal law and regulations or other handbook requirements. For example, although a high or standard performer may be relieved of requirements for prior HUD approval for certain types of contracts for services, it must still comply with all other Federal and State requirements that remain in effect, such as those for competitive bidding or competitive negotiation (see 24 CFR 85.36):

(1) PHAs will still be subject to regular independent auditor (IA) audits.

(2) Office of Inspector General (OIG) audits or investigations will continue to be conducted as circumstances may warrant.

(g) In exceptional circumstances, the State/Area Office will have discretion to subject a PHA to any requirement that would otherwise be omitted under the specified relief, in accordance with § 901.115(i).

§ 901.135 Memorandum of Agreement.

(a) After consulting the independent assessment team and reviewing the report identified in section 6(j)(2)(b) of the 1937 Act, a Memorandum of Agreement (MOA), a binding contractual agreement between HUD and a PHA, shall be required for each PHA designated as troubled and/or mod-troubled. The scope of the MOA may vary depending upon the extent of the problems present in the PHA, but shall include:

(1) Baseline data, which should be raw data but may be the PHA's score in each of the indicators identified as a problem, or other relevant areas identified as problematic;

(2) Annual and quarterly performance targets, which may be the attainment of a higher grade within an indicator that is a problem, or the description of a goal to be achieved, for example, the reduction of rents uncollected to 6% or less by the end of the MOA annual period;

(3) Strategies to be used by the PHA in achieving the performance targets within the time period of the MOA;

(4) Technical assistance to the PHA provided or facilitated by the Department, for example, the training of PHA employees in specific management areas or assistance in the resolution of outstanding HUD monitoring findings;

(5) The PHA's commitment to take all actions within its control to achieve the targets;

(6) Incentives for meeting such targets, such as the removal of troubled or mod-troubled designation and Departmental recognition for the most improved PHAs;

(7) The consequences of failing to meet the targets, including such sanctions as the imposition of budgetary limitations, declaration of substantial default and subsequent actions, limited denial of participation, suspension, debarment, or the imposition of operating funding and modernization thresholds; and

(8) A description of the involvement of local public and private entities, including PHA resident leaders, in carrying out the agreement and rectifying the PHA's problems. A PHA shall have primary responsibility for obtaining active local public and private entity participation, including the involvement of public housing resident leaders, in assisting PHA improvement efforts. Local public and private entity participation should be premised upon the participant's knowledge of the PHA, ability to contribute technical expertise with regard to the PHA's specific problem areas and authority to make preliminary/tentative commitments of support, financial or otherwise.

(b) A MOA shall be executed by:

(1) The PHA Board Chairperson and accompanied by a Board resolution, or a receiver (pursuant to a court ordered receivership agreement, if applicable) or other AME acting in lieu of the PHA Board;

(2) The PHA Executive Director, or a designated receiver (pursuant to a court ordered receivership agreement, if applicable) or other AME-designated Chief Executive Officer;

(3) The Director, State/Area Office of Public Housing, except as stated in (d) of this section; and

(4) The appointing authorities of the Board of Commissioners, unless exempted by the State/Area Office.

(c) The Department encourages the inclusion of the resident leadership in MOA negotiations and the execution of the MOA.

(d) Upon designation of a large PHA (1250 or more units under management) as troubled, the State/Area Office shall make a referral to HUD Headquarters for appropriate recovery intervention and the execution of an MOA by the Assistant Secretary for Public and Indian Housing.

(e) A PHA will monitor MOA implementation to ensure that performance targets are met in terms of quantity, timeliness and quality.

§ 901.140 Removal from troubled status and mod-troubled status.

(a) A PHA has the right to petition the State/Area Office for the removal of a designation as troubled or mod-troubled.

(b) A PHA may appeal any refusal to remove troubled and mod-troubled designation to the Assistant Secretary for Public and Indian Housing in accordance with § 901.125.

(c) A PHA with fewer that 1250 units under management will be removed from troubled status by the State/Area Office upon a determination by the State/Area Office that the PHA's assessment reflects an improvement to a level sufficient to remove the PHA from troubled status, or mod-troubled, i.e., a total weighted management assessment score of 60% or more, and upon the conduct of a confirmatory review for PHAs with 100 or more units under management.

(d) A PHA with 1250 units or more under management will be removed from troubled status by the Assistant Secretary for Public and Indian Housing upon a recommendation by the State/Area Office when a PHA's assessment reflects an improvement to a level sufficient to remove the PHA from troubled or mod-troubled status, i.e., a total weighted management assessment score of 60% or more, and upon the conduct of an independent confirmatory review (team members from other State/Area Offices).

§ 901.145 Improvement Plan.

(a) After receipt of the State/Area Office notification letter in accordance with § 901.120(b) or receipt of a final resolution of an appeal in accordance with § 901.125 or, in the case of an RMC, notification of its indicator grades from a PHA, a PHA or RMC shall correct any deficiency indicated in its management assessment within 90 calendar days.

(b) A PHA shall notify the State/Area Office of its action to correct a deficiency. A PHA shall also forward to the State/Area Office an RMC's report of its action to correct a deficiency.

(c) If the State/Area Office determines that a PHA or RMC has not corrected a deficiency as required within 90 calendar days after receipt of its final

VOL 61 ISS 251 DE 30 1996 UMI

notification letter, the State/Area Office may require a PHA, or a RMC through the PHA, to prepare and submit to the State/Area Office an Improvement Plan within an additional 30 calendar days:

(1) The State/Area Office shall require a PHA or RMC to submit an Improvement Plan, which includes the information stated in (d) of this section, for each indicator that a PHA or RMC scored a grade of F.

(2) The State/Area Office may require, on a risk management basis, a PHA or RMC to submit an Improvement Plan, which includes the information stated in paragraph (d) of this section, for each indicator that a PHA scored a grade D or E, as well as other performance and/or compliance deficiencies as may be identified as a result of an on-site review of the PHA's operations.

(d) An Improvement Plan shall:

(1) Identify baseline data, which should be raw data but may be the PHA's score in each of the indicators identified as a problem in a PHA's or RMC's management assessment, or other relevant areas identified as problematic;

(2) Describe the procedures that will be followed to correct each deficiency; and

(3) Provide a timetable for the correction of each deficiency.

(e) The State/Area Office will approve or deny a PHA's or RMC's Improvement Plan, and notify the PHA of its decision. A PHA must notify the RMC in writing, immediately upon receipt of the State/Area Office notification, of the State/Area Office approval or denial of the RMC's Improvement Plan.

(f) An Improvement Plan that is not approved will be returned to the PHA with recommendations from the State/Area Office for revising the Improvement Plan to obtain approval. A revised Improvement Plan shall be resubmitted by the PHA or RMC within 30 calendar days of its receipt of the State/Area Office recommendations.

(g) If a PHA or RMC fails to submit an acceptable Improvement Plan, or to correct deficiencies within the time specified in an Improvement Plan or such extensions as may be granted by HUD, the State/Area Office will notify the PHA of its or the RMC's noncompliance. The PHA, or the RMC through the PHA, will provide HUD its reasons for lack of progress in submitting or carrying out the Improvement Plan within 30 calendar days of its receipt of the noncompliance notification. HUD will advise the PHA as to the acceptability of its reasons for lack of progress and, if unacceptable, will notify the PHA that it will be subject to sanctions provided for in the ACC and HUD regulations.

§ 901.150 PHAs troubled with respect to the program under section 14 (mod-troubled PHAs).

(a) PHAs that achieve a total weighted score of less than 60% on indicator #2, modernization, may be designated as mod-troubled.

(b) PHAs designated as mod-troubled may be subject, under the Comprehensive Grant Program, to a reduction of formula allocation or other sanctions (24 CFR § 968, Subpart C) or under the Comprehensive Improvement Assistance Program to disapproval of new funding or other sanctions (24 CFR § 968, Subpart B).

§ 901.155 PHMAP public record.

The State/Area Office will maintain PHMAP files, including certifications, the records of exclusion and modification requests, appeals, and designations of status based on physical condition and neighborhood environment, as open records, available for public inspection for three years consistent with the Freedom of Information Act (5 U.S.C. 552) and in accordance with any procedures established by the State/Area Office to minimize disruption of normal office operations.

§ 901.200 Events or conditions that constitute substantial default.

(a) The Department may determine that events have occurred or that conditions exist that constitute a substantial default if a PHA is determined to be in violation of Federal statutes, including but not limited to, the 1937 Act, or in violation of regulations implementing such statutory requirements, whether or not such violations would constitute a substantial breach or default under provisions of the relevant ACC.

(b) The Department may determine that a PHA's failure to satisfy the terms of a Memorandum of Agreement entered into in accordance with § 901.135 of this part, or to make reasonable progress to meet time frames included in a Memorandum of Agreement, are events or conditions that constitute a substantial default.

(c) The Department shall determine that a PHA that has been designated as troubled and does not show significant improvement (10 percentage point increase) in its PHMAP score within one year after final notification of its PHMAP score are events or conditions that constitute a substantial default:

(1) A PHA shall be notified of such a determination in accordance with § 901.205(c).

(2) A PHA may waive, in writing, receipt of explicit notice from the Department as to a finding of substantial default, and voluntarily consent to a determination of substantial default. The PHA must concur on the existence of substantial default conditions which can be remedied by technical assistance, and the PHA shall provide the Department with written assurances that all deficiencies will be addressed by the PHA. The Department will then immediately proceed with interventions as provided in § 901.210.

(d) The Department may declare a substantial breach or default under the ACC, in accordance with its terms and conditions.

(e) The Department may determine that the events or conditions constituting a substantial default are limited to a portion of a PHA's public housing operations, designated either by program, by operational area, or by development(s).

§ 901.205 Notice and response.

(a) If information from an annual assessment, as described in § 901.100, a management review or audit, or any other credible source indicates that there may exist events or conditions constituting a substantial breach or default, the Department shall advise a PHA of such information. The Department is authorized to protect the confidentiality of the source(s) of such information in appropriate cases. Before taking further action, except in cases of apparent fraud or criminality, and/or in cases where emergency conditions exist posing an imminent threat to the life, health, or safety of residents, the Department shall afford the PHA a timely opportunity to initiate corrective action, including the remedies and procedures available to PHAs designated as "troubled PHAs," or to demonstrate that the information is incorrect.

(b) In any situation determined to be an emergency, or in any case where the events or conditions precipitating the intervention are determined to be the result of criminal or fraudulent activity, the Assistant Secretary is authorized to intercede to protect the residents' and the Department's interests by causing the proposed interventions to be implemented without further appeals or delays.

(c) Upon a determination or finding that events have occurred or that conditions exist that constitute a substantial default, the Assistant Secretary shall provide written notification of such determination or finding to the affected PHA. Written notification shall be transmitted to the Executive Director, the Chairperson of the Board, and the appointing

authority(s) of the Board, and shall include, but need not necessarily be limited to:

(1) Identification of the specific covenants, conditions, and/or agreements under which the PHA is determined to be in noncompliance;

(2) Identification of the specific events, occurrences, or conditions that constitute the determined noncompliance;

(3) Citation of the communications and opportunities to effect remedies afforded pursuant to paragraph (a) of this section;

(4) Notification to the PHA of a specific time period, to be not less than 10 calendar days, except in cases of apparent fraud or other criminal behavior, and/or under emergency conditions as described in paragraph (a) of this section, nor more than 30 calendar days, during which the PHA shall be required to demonstrate that the determination or finding is not substantively accurate; and

(5) Notification to the PHA that, absent a satisfactory response in accordance with paragraph (d) of this section, the Department will take control of the PHA, using any or all of the interventions specified in § 901.210, and determined to be appropriate to remedy the noncompliance, citing § 901.210, and any additional authority for such action.

(d) Upon receipt of the notification described in paragraph (c) of this section, the PHA must demonstrate, within the time period permitted in the notification, factual error in the Department's description of events, occurrences, or conditions, or show that the events, occurrences, or conditions do not constitute noncompliance with the statute, regulation, or covenants or conditions to which the PHA is cited in the notification.

§ 901.210 Interventions.

(a) Interventions under this part (including an assumption of operating responsibilities) may be limited to one or more of a PHA's specific operational areas (e.g., maintenance, modernization, occupancy, or financial management) or to a single development or a group of developments. Under this limited intervention procedure, the Department could select, or participate in the selection of, an AME to assume management responsibility for a specific development, a group of developments in a geographical area, or a specific operational area, while permitting the PHA to retain responsibility for all programs, operational areas, and developments not so designated.

(b) Upon determining that a substantial default exists under this part, the Department may initiate any interventions deemed necessary to maintain decent, safe, and sanitary dwellings for residents. Such intervention may include:

(1) Providing technical assistance for existing PHA management staff;

(2) Selecting or participating in the selection of an AME to provide technical assistance or other services up to and including contract management of all or any part of the public housing developments administered by a PHA;

(3) Assuming possession and operational responsibility for all or any part of the public housing administered by a PHA; and

(4) The provision of intervention and assistance necessary to remedy emergency conditions.

(c) HUD may take the actions described in this part sequentially or simultaneously in any combination.

§ 901.215 Contracting and funding.

(a) Upon a declaration of substantial default or breach, and subsequent assumption of possession and operational responsibility, the Department may enter into agreements, arrangements, and/or contracts for or on behalf of a PHA, or to act as the PHA, and to expend or authorize expenditure of PHA funds, irrespective of the source of such funds, to remedy the events or conditions constituting the substantial default.

(b) In entering into contracts or other agreements for or on behalf of a PHA, the Department shall comply with requirements for competitive procurement consistent with 24 CFR 85.36, except that, upon determination of public exigency or emergency that will not permit a delay, the Department can enter into contracts or agreements on a noncompetitive basis, consistent with the standards of 24 CFR 85.36(d)(4).

§ 901.220 Resident participation in competitive proposals to manage the housing of a PHA.

(a) When a competitive proposal to manage the housing of a PHA in substantial default is solicited in a Request for Proposals (RFP) pursuant to section 6(j)(3)(A)(i) of the 37 Act, the RFP, in addition to publishing the selection criteria, will:

(1) Include a requirement for residents to notify the Department if they want to be involved in the selection process; and

(2) Include a requirement for the PHA that is the subject of the RFP to post a notice and a copy of the RFP in a prominent location on the premises of each housing development that would be subject to the management chosen under the RFP, for the purposes of notifying affected residents that:

(i) Invites residents to participate in the selection process; and

(ii) Provides information, to be specified in the RFP, on how to notify the Department of their interest.

(b) Residents must notify the Department by the RFP's application due date of their interest in participating in the selection process. In order to participate, the total number of residents that notify the Department must equal at least 20 percent of the residents, or the notification of interest must be from an organization or organizations of residents whose membership must equal at least 20 percent of the PHA's residents.

(c) If the required percentage of residents notify the Department, a minimum of one resident may be invited to serve as an advisory member on the evaluation panel that will review the applications in accordance with applicable procurement procedures. Resident advisory members are subject to all applicable confidentiality and disclosure restrictions.

§ 901.225 Resident petitions for remedial action.

The total number of residents that petition the Department to take remedial action pursuant to sections 6(j)(3)(A)(i) through (iv) of the 1937 Act must equal at least 20 percent of the residents, or the petition must be from an organization or organizations of residents whose membership must equal at least 20 percent of the PHA's residents.

§ 901.230 Receivership.

(a) Upon a determination that a substantial default has occurred and without regard to the availability of alternate remedies, the Department may petition the court for the appointment of a receiver to conduct the affairs of the PHA in a manner consistent with statutory, regulatory, and contractual obligations of the PHA and in accordance with such additional terms and conditions that the court may provide. The court shall have authority to grant appropriate temporary or preliminary relief pending final disposition of any petition by HUD.

(b) The appointment of a receiver pursuant to this section may be terminated upon the petition to the court by the PHA, the receiver, or the Department, and upon a finding by the court that the circumstances or conditions that constituted substantial

VOL

1996
UMI

default by the PHA no longer exist and that the operations of the PHA will be conducted in accordance with applicable statutes and regulations, and contractual covenants and conditions to which the PHA and its public housing programs are subject.

§ 901.235 Technical assistance.

(a) The Department may provide technical assistance to a PHA that is in substantial default.

(b) The Department may provide technical assistance to a troubled or non-troubled PHA if the assistance will enable the PHA to achieve satisfactory performance on any PHMAP indicator. The Department may provide such assistance if a PHA demonstrates a commitment to undertake improvements appropriate with the given circumstances, and executes an Improvement Plan in accordance with § 901.145.

(c) The Department may provide technical assistance to a PHA if without abatement of prevailing or chronic conditions, the PHA can be projected to be designated as troubled by its next PHMAP assessment.

(d) The Department may provide technical assistance to a PHA that is in substantial default of the ACC.

(e) The Department may provide technical assistance to a PHA whose troubled designation has been removed and where such assistance is necessary to prevent the PHA from being designated as troubled within the next two years.

Dated: December 10, 1996.

Kevin Emanuel Marchman,

Acting Assistant Secretary for Public and Indian Housing.

Prohibition of Oxygen Generators as Cargo in Passenger- Aircraft

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Final rule.

SUMMARY: RSPA is prohibiting the transportation of oxygen generators as cargo on board passenger-carrying aircraft. This rule applies to both foreign and domestic passenger-carrying aircraft entering, leaving or operating in the United States, and to any person offering an oxygen generator for transportation on any passenger-carrying aircraft.

EFFECTIVE DATE: This final rule is effective December 31, 1996.

FOR FURTHER INFORMATION CONTACT: William E. Vincent, Director, Office of Policy and Program Support, (202) 366–4831, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street SW., Washington DC 20590–0001.

SUPPLEMENTARY INFORMATION:

I. Background

On May 24, 1996, RSPA published in the **Federal Register** an interim final rule temporarily prohibiting, until January 1, 1997, the transportation of chemical oxygen generators as cargo on passenger-carrying aircraft. 61 FR 26418. This prohibition applies to domestic and foreign air carriers operating passenger-carrying aircraft entering, leaving or operating in the United States, and to any person offering a chemical oxygen generator for transportation as cargo on any of these aircraft.

This interim final rule was issued under the authority delegated to RSPA by the Secretary of Transportation, in 49 CFR 1.53(b), to issue regulations implementing the Federal hazardous material transportation law, 49 U.S.C. 5101–5127. Enforcement of the Federal hazardous material transportation law and the Hazardous Materials Regulations (HMR, 49 CFR Parts 171–180) issued under that law is shared by RSPA and four modal administrations within the Department of Transportation: Federal Aviation Administration (FAA), Federal Highway Administration, Federal Railroad Administration, and United States Coast Guard. FAA has primary enforcement authority concerning transportation of hazardous materials by air. 49 CFR 1.47(k).

RSPA does not regulate, and the HMR do not apply to, components of the aircraft itself. Accordingly, the May 24, 1996 interim final rule does not apply to chemical oxygen generators that are installed in the cabins of many aircraft to provide oxygen in emergencies to passengers and crew members. The prohibition in the May 24, 1996 interim final rule also does not apply to compressed oxygen in cylinders.

The May 24, 1996 interim final rule included the following definition of an oxygen generator to which the prohibition applies: "Oxygen generator (chemical) means a device containing chemicals that upon activation release oxygen as a product of chemical reaction." 49 CFR 171.8 (61 FR 26419). Exceptions to the prohibition are provided for a chemical oxygen generator that meets the specific safety requirements of 49 CFR 175.10(a)(7), for medical use of passengers in the passenger cabin, and for small oxygen generators for personal use that are transported as checked baggage in accordance with 49 CFR 175.10(a)(24). 49 CFR 173.21(k) (61 FR 26419). As discussed below, in a separate rulemaking proceeding in Docket No. HM–224A, RSPA is proposing elimination of the exception in 49 CFR 175.10(a)(24) for small personal oxygen generators.

II. NTSB Recommendations

The May 24, 1996 interim final rule responds in part to the following two recommendations of the National Transportation Safety Board (NTSB) that RSPA:

> In cooperation with the Federal Aviation Administration, permanently prohibit the transportation of chemical oxygen generators as cargo on board any passenger or cargo aircraft when the generators have passed expiration dates, and the chemical core has not been depleted. (A–96–29) (Class I, Urgent Action)
>
> In cooperation with the Federal Aviation Administration, prohibit the transportation of oxidizers and oxidizing materials (e.g., nitric acid) in cargo compartments that do not have fire or smoke detection systems. (A–96–30) (Class I, Urgent Action)

These recommendations were issued as part of NTSB's ongoing investigation of the May 11, 1996 accident involving the loss of ValuJet Airlines Flight 592. Preliminary evidence indicates that chemical oxygen generators were being carried in a cargo compartment on board Flight 592 and may have caused, or contributed to the severity of, the accident. NTSB and FAA are continuing to investigate this accident and issues concerning whether the chemical oxygen generators in the cargo compartment on board Flight 592 were offered for transportation, and were being transported, in accordance with the applicable requirements of the HMR. Nonetheless, RSPA issued the May 24, 1996 interim final rule to prevent any similar incidents involving chemical oxygen generators as cargo on passenger-carrying aircraft while RSPA could consider whether to make this prohibition permanent. In the separate rulemaking in Docket No. HM–224A, RSPA addresses the remaining parts of the NTSB recommendations by proposing to prohibit oxidizers from being transported aboard all passenger-carrying aircraft and in those inaccessible cargo compartments on cargo aircraft that lack fire or smoke detection and suppression systems (i.e., Class D compartments, *see* 14 CFR 25.857).

III. Comments and Other Matters Considered

RSPA received five comments on the interim final rule. As discussed below, RSPA is permanently prohibiting the transportation of oxygen generators (chemical) as cargo on passenger-carrying aircraft. This prohibition is consistent with the July 1996 amendment to the 1995–96 Edition of the International Civil Aviation Organization's Technical Instructions for the Safe Transport of Dangerous Goods by Air. (The HMR authorize the transportation of hazardous materials within the United States by aircraft in accordance with the ICAO Technical Instructions. 49 CFR 171.11.)

Two commenters recommended that the prohibition in the interim final rule be made permanent and extended to cargo aircraft. According to the Air Line Pilots Association (ALPA), similar crash scenarios "can produce the same amount of destruction" for both cargo and passenger-carrying aircraft. ALPA stated that oxygen generators pose a significant potential hazard to all aircraft and that the "line of demarcation" is not the number of persons on board an aircraft that might be lost, but whether the aircraft could withstand the potential hazard and be landed safety without loss of life or the aircraft.

A consultant who previously worked for FAA as a hazardous material inspector and coordinator expressed his concern that chemical oxygen generators should be forbidden for

transport by any type of aircraft. He stated that it is difficult, if not impossible, for an air carrier to insure that these items are in safe condition for transportation. He believes that airlines could normally transport replacement generators by ground and keep a supply at strategic locations, to avoid the need to carry them as cargo on their own airplanes, but he indicated that a limited exemption might be appropriate to allow replacements to be transported to overseas or remote areas. A private citizen also expressed her concern about hazardous materials contained in passengers' baggage. She recommended a prohibition against transportation of any material having the remotest possibility of endangering those on board an aircraft.

The Air Transport Association (ATA) supported the interim final rule but recommended that RSPA not rule out the possibility of reauthorizing the air transportation of chemical oxygen generators at a future date. ATA expressed its understanding that the oxygen generators carried aboard ValuJet Flight 592 "were unnecessarily and perhaps improperly offered for transportation by aircraft." It stated that, "since chemical oxygen generators were first installed in aircraft in lieu of oxygen bottles, tens of thousands have been safely transported by airlines in compliance with regulations" and also "as part of the aircraft's installation." ATA urged RSPA and FAA to address the "two possible failure modes" for these devices, inadequate safety devices and high ambient temperatures, through regulations that would require protective devices (such as a locking pin and a protective cap) and research into packaging methodologies that would provide thermal protection. ATA recommended that these issues receive further analysis "before RSPA totally forecloses the possibility of the resupply of chemical oxygen generators for installation in air carrier fleets via the combination air carriers' cargo system." ATA also indicated that air carriers had sought for many years, and would welcome, an increase in enforcement directed at offerors who fail to properly disclose shipments of hazardous materials.

A European supplier of aircraft oxygen equipment stated that it was necessary to allow chemical oxygen generators to be transported on passenger-carrying aircraft in order to repair planes on which the oxygen equipment had malfunctioned. This company indicated it is often requested to supply replacement equipment within four hours, because an aircraft is not permitted to take off before the defective equipment is replaced. This commenter stated that this happens "monthly several times all over the world," and asked if there was an exemption for an "aircraft on ground" situation. Otherwise, it stated, a forwarding agency would have to wait for a cargo-only aircraft, which operate less frequently.

RSPA recognizes that the oxygen generators involved in the ValuJet accident appear to have been shipped in violation of the HMR, and RSPA continues to believe that these generators may be safely transported in compliance with the HMR, including the conditions of the approvals under which the generators are offered for transportation by their original manufacturers. However, these devices appear to be unique in that, if handled improperly, they can both generate sufficient heat to set adjacent materials on fire and also provide oxygen to intensify a fire. The potential for loss of life and damage to property justify this prohibition and the consequence that any generators needed as replacement parts must be transported by ground or by cargo-only aircraft.

At the present time, RSPA is continuing this prohibition as limited to passenger-carrying aircraft. RSPA believes that any decision to prohibit chemical oxygen generators from cargo aircraft should only follow public notice and an opportunity for further comment. A prohibition against transporting any oxidizers in Class D compartments of cargo aircraft, as proposed under docket HM–224A, would apply to chemical oxygen generators. In that proceeding, among others, RSPA will continue to evaluate the hazards posed by chemical oxygen generators to determine what additional requirements, if any, are needed to insure their safe transportation.

ALPA also recommended removing the exceptions provided in 49 CFR 175.10(a) (7) and (24). The first subparagraph allows the transportation of an oxygen generator provided by the air carrier for medical use of a passenger in the passenger cabin. The exception solely applies to the transportation of those oxygen generators that are for use by on-board passengers and does not provide for the transportation of medical oxygen generators for the purposes of staging or positioning. ALPA believes that the availability of gaseous oxygen makes this part of the exception unnecessary. RSPA is not eliminating this part of subparagraph 175.10(a)(7) at this time because there is insufficient information on the potential effect on airline passengers with breathing difficulties, and the public interest would require public notice and comment before making this type of change to the HMR. RSPA may consider removing oxygen generators from subparagraph (a)(7) in a future rulemaking.

The exception in 49 CFR 175.10(a)(24) allows a small oxygen generator intended for personal use to be transported as a passenger's checked baggage under certain circumstances, including the approval of the air carrier. ALPA believes that passengers are unaware of this requirement, and therefore fail to notify the carrier, because of a lack of public awareness programs and procedures for informing passengers that they must contact the carrier before checking baggage containing an oxygen generator. ALPA also stated that there is no practical means of assuring that the person owning this type of oxygen generator has been educated in how to inspect and maintain the generator as specified in the HMR, and there is no way for the air carrier to examine the generator to verify compliance with the conditions in subsection 175.10(a)(24). ALPA pointed out that the United Kingdom's Civil Aviation Authority has prohibited the transportation of these personal oxygen generators on passenger-carrying aircraft.

ALPA's arguments in favor of eliminating the exception in subsection 175.10(a)(24) warrant further consideration. At the same time, RSPA believes that any such change should follow public notice and comment. Accordingly, RSPA is proposing to eliminate 49 CFR 175.10(a)(24) in the proposed rule in docket No. HM–224A. ALPA's recommendation and supporting comments will be considered in that proceeding.

IV. Effective Date

Because of the potential safety risk posed by continued transportation of oxygen generators as cargo in passenger-carrying aircraft, RSPA has determined that good cause exists for making this rule effective less than 30 days following its issuance.

V. Rulemaking Analyses and Notices

Executive Order 12866 and DOT Regulatory Policies and Procedures

This final rule is considered a significant regulatory action under section 3(f) of Executive Order 12866 and therefore is subject to review by the Office of Management and Budget. The rule is significant according to the Regulatory Policies and Procedures of the Department of Transportation (44 FR 11034).

The changes adopted in this rule should not result in any significant additional costs to persons subject to the HMR. About 150,000 of these oxygen generators are installed on about 1,000 U.S. passenger-carrying aircraft. Because of their typical effective life of about twelve years, it is not necessary to frequently transport these generators as uninstalled or not-in-use materials. In addition, alternative transportation is available for these generators because this rule does not prohibit or inhibit their transportation by highway, rail, water or cargo aircraft. Because of the minimal economic impact of this rule, a full regulatory evaluation is not warranted.

Executive Order 12612

This final rule has been analyzed in accordance with the principles and criteria in Executive Order 12612 ("Federalism") and does not have sufficient Federalism impacts to warrant the preparation of a federalism assessment.

Regulatory Flexibility Act

I certify that this final rule will not have a significant economic impact on a substantial number of small entities. There are limited adverse economic impacts on small businesses or other organizations because this rule imposes a limited prohibition on certain persons subject to the HMR.

Paperwork Reduction Act

There are no information collection requirements in this final rule.

Regulation Identifier Number

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

List of Subjects

49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Reporting and recordkeeping requirements.

49 CFR Part 173

Hazardous materials transportation, Packaging and containers, Radioactive materials, Reporting and recordkeeping requirements, Uranium.

In consideration of the foregoing, the interim rule amending 49 CFR parts 171 and 173 which was published at 61 FR 26418 on May 24, 1996, is adopted as a final rule with the following change:

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

1. The authority citation for Part 173 is revised to read as follows:

Authority: 49 U.S.C. 5101–5127, 44701; 49 CFR 1.45, 1.53.

2. In § 173.21, paragraph (k) is revised to read as follows:

§ 173.21 Forbidden materials and packages.

* * * * *

(k) Notwithstanding any other provision of this subchapter, including §§ 171.11 and 175.10(a)(2) of this subchapter, an oxygen generator (chemical) as cargo on a passenger-carrying aircraft. This prohibition does not apply to an oxygen generator for medical or personal use of a passenger that meets the requirements of § 175.10(a)(7) or § 175.10(a)(24) of this subchapter.

Issued in Washington, DC on December 23, 1996, under authority delegated in 49 CFR part 1.

Kelley S. Coyner,

Acting Administrator, Research and Special Programs Administration.

[FR Doc. 96–33036 Filed 12–27–96; 8:45 am]

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 171, 172, 173 and 175

[Docket No. HM–224A; Notice No. 96–26]

RIN 2137–AC92

Prohibition of Oxidizers Aboard Aircraft

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: RSPA proposes to amend the Hazardous Material Regulations to prohibit the carriage of oxidizers, including compressed oxygen, in passenger carrying aircraft and in Class D compartments on cargo aircraft. This proposal specifically analyzes the prohibition of oxidizers in Class D cargo compartments. RSPA plans to issue a supplemental notice of proposed rulemaking further analyzing the prohibition on the carriage of oxidizers aboard passenger carrying aircraft in Class B and C cargo compartments. RSPA is also proposing to add a shipping description to the Hazardous Materials Table for chemical oxygen generators and to require approval of a chemical oxygen generator that is transported with its means of initiation attached. These requirements would apply to foreign and domestic aircraft entering, leaving, or operating within the United States. The purpose of these proposals is to enhance air transportation safety.

DATES: Comments must be received by February 28, 1997.

ADDRESSES: Address comments to the Dockets Unit, Research and Special Programs Administration, U.S. Department of Transportation, room 8421, 400 Seventh Street, SW, Washington, DC 20590–0001. Comments should identify the docket number and be submitted in five copies. Persons wishing to receive confirmation of receipt of their comments should include a self-addressed, stamped postcard. The Dockets Unit is located in the Department of Transportation headquarters building (Nassif Building) at the above address on the eighth floor. Public dockets may be reviewed there between the hours of 8:30 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: John A. Gale, Office of Hazardous Materials Standards, (202) 366–8553, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street SW, Washington DC 20590–0001; or Gary Davis, Office of Flight Standards, (202) 267–8166, Federal Aviation Administration, U.S. Department of Transportation, 800 Independence Avenue, SW, Washington DC 20591.

SUPPLEMENTARY INFORMATION:

I. Background

The National Transportation Safety Board (NTSB) is investigating the May 11, 1996, crash of a passenger-carrying aircraft which resulted in 110 fatalities. Preliminary evidence indicates that chemical oxygen generators were carried as cargo on board the aircraft and may have caused or contributed to the severity of the accident. On May 24, 1996, RSPA published an interim final rule (IFR) in the **Federal Register** (61 FR 26418) under Docket HM–224 which temporarily prohibits the offering for transportation and transportation of chemical oxygen generators as cargo aboard in passenger carrying aircraft. The period for submitting comments on the interim final rule in Docket HM–224 closed July 23, 1996. After completing evaluation of the comments received, and the risks posed by oxygen generators, RSPA will issue a final rule under Docket HM–224 to make the prohibition permanent, terminate or modify the prohibition, or otherwise amend provisions of the Hazardous Materials Regulations (HMR; 49 CFR Parts 171 through 180) that apply to oxygen generators. The proposal in this NPRM for amendments to 49 CFR 171.11 and 172.101 are based on the existing (temporary) prohibition against transporting chemical oxygen generators as cargo aboard passenger carrying aircraft. These proposals may be modified in a final rule, as appropriate, to consider the further final rule to be issued under Docket HM–224.

On May 31, 1996, NTSB issued two recommendations to RSPA, as follows:

In cooperation with the Federal Aviation Administration, permanently prohibit the transportation of chemical oxygen generators as cargo on board any passenger or cargo aircraft when the generators have passed their expiration dates, and the chemical core has not been depleted. (Class I, Urgent Action) (A–96–29)

In cooperation with the Federal Aviation Administration, prohibit the transportation of oxidizers and oxidizing materials (e.g., nitric acid) in cargo compartments that do not have fire or smoke detection systems. (Class I, Urgent Action) (A–96–30)

The actions proposed in this notice are responsive, in part, to the NTSB recommendations and are based on RSPA's preliminary assessment of the hazards posed by oxidizers. In its recommendations to RSPA, the NTSB cited three previous incidents in which oxidizers caused fires aboard aircraft. In each of these incidents, there were apparent or known serious violations of the HMR. RSPA and FAA are not aware of any fire aboard an aircraft having been caused directly by transport of oxidizers in conformance with the HMR. However, RSPA and FAA agree with the NTSB that, in certain circumstances, oxidizers can contribute to the severity of a fire and may pose an unreasonable risk when transported in inaccessible cargo compartments which are not required to be equipped with fire or smoke detection systems or fire suppression (i.e., fire-extinguishing) systems.

II. Cargo Compartments Aboard Aircraft

Various design features incorporated into a cargo compartment's design are intended to control or extinguish any fire which might occur in that compartment. Under the Federal Aviation Regulations (FAR), cargo compartments are classified into five categories, Classes A, B, C, D, and E (see 14 CFR 25.857). In brief, a Class A compartment is one which is easily accessible in flight and in which the presence of a fire would be easily discovered by a crewmember. A Class B compartment is one in which any part of the compartment is accessible in flight to a crewmember with a hand held fire extinguisher and has an approved smoke detector or fire detector system. A Class C compartment is not accessible but has an approved smoke detector or fire detector system, an approved built-in fire-extinguishing system, means to control ventilation so that the extinguishing agent can control any fire that may start within the compartment, and means to exclude hazardous quantities of smoke, flames or extinguishing agent from any compartment occupied by crew or passengers.

A Class D compartment is not accessible but is one in which a fire occurring in it will be completely confined without endangering the safety of the airplane or the occupants, ventilation is controlled so that any fire likely to occur will not progress beyond safe limits, compartment volume does not exceed 1,000 cubic feet, and there are means to exclude hazardous quantities of smoke, flames or noxious gases from any compartment occupied

VOL 61 ISS 251 DE 30 1996 UMI

by crew or passengers. A Class D compartment is not required to have a fire or smoke detection system or a fire suppression system. Its design is intended to confine and control the severity of a fire. It generally is not sealed sufficiently to extinguish a fire, but is designed to limit air flow enough to prevent a significant fire. For a compartment of 500 cubic feet (cu. ft.) or less, an air flow of 1500 cu. ft. per hour (three air exchanges per hour) is acceptable.

A Class E compartment is one used on cargo-only aircraft which has an approved smoke or fire detection system, means to shut off the ventilating airflow and means to exclude hazardous quantities of smoke, flames or noxious gases from the flight crew compartment.

III. Oxidizers Under the HMR

Under the HMR, an oxidizer (Division 5.1) is a material that may, generally by yielding oxygen, cause or enhance the combustion of other materials (see 49 CFR 173.127). Materials in Division 5.1 are subdivided into Packing Groups I, II, or III, a relative ranking corresponding to high, moderate or low risks posed by the material. Packing groups are assigned to specifically named materials in the § 172.101 Hazardous Materials Table (Table). For generic entries, such as "Oxidizing solid, n.o.s." ("n.o.s." means "not otherwise specified"), packing groups are assigned by analogy with existing entries in the Table for liquids, and by test results for solids. Certain gases (Class 2), most notably oxygen, are also oxidizers under the HMR and, even though they are not classed as such, they are required to be identified with the OXIDIZER or OXYGEN label.

IV. Oxidizers Aboard Aircraft

Liquid oxidizers in Packing Group I are very reactive and have the ability to initiate and substantially intensify fires. These materials are forbidden for transportation by passenger-carrying aircraft and are permitted only in restricted quantities aboard cargo-only aircraft. Most oxidizers will not initiate fires when spilled or released, but will intensify fires from other sources. Many of these materials are permitted for transport aboard passenger-carrying and cargo-only aircraft. When transported by aircraft, these materials are subject to per package quantity limits specified in the Table, and to aircraft quantity limits specified in § 175.75.

Oxidizers currently authorized for transportation by aircraft in Class D cargo compartments generally will not initiate a fire. The potential hazard posed by them is that, if a fire were to occur elsewhere in the compartment, in the absence of a fire suppression system, the fire may burn long enough to involve the oxidizer. The oxidizer would then provide an oxygen-enriched environment which could intensify the fire and override the limited safety features of the compartment.

In the absence of a fire caused by another source, oxidizers currently authorized for air transportation and offered in conformance with the HMR present very little risk to aircraft, crew or passengers. The threat of a serious risk arises from the mixing of oxidizers with baggage and other cargo which are potential sources of fire. Over the past twenty years, virtually all fires aboard aircraft in passenger baggage or cargo involved forbidden materials or serious violations of the HMR.

V. Prohibition of Oxidizers Aboard Aircraft in Class D Cargo Compartments

Knowledge of the May 11, 1996, crash has increased awareness of the hazards posed by hazardous materials in transportation, and increased the vigilance on the part of the public, airlines, commercial shippers and the Federal Government. While this should result in fewer instances involving transportation of forbidden materials aboard aircraft, fires initiated by forbidden materials in passenger baggage and cargo likely will not be totally eliminated. Further, because Class D cargo compartments are not required to be equipped with smoke or fire detection systems or fire-extinguishing systems, oxidizers could become involved in and substantially intensify a cargo compartment fire thereby contributing to the severity of an incident and, possibly, the loss of life and property. For these reasons, RSPA and FAA agree with the NTSB recommendation to prohibit the transportation of oxidizers in cargo compartments that do not have fire or smoke detection systems. Therefore, RSPA proposes to amend § 175.85 to prohibit the loading or transportation in a Class D cargo compartment of a package for which an OXIDIZER or OXYGEN label (see §§ 172.426 and 172.405) is required under Subpart E of Part 172. These restrictions would apply to both foreign and domestic aircraft entering, leaving or operating in the United States.

The proposed prohibition against transportation of oxidizers as cargo in Class D compartments (and the possible expansion of this proposed prohibition to Class B and C compartments, as discussed in Part VI, below) would not affect the exception in 49 CFR 175.10(a)(7) for operator-supplied oxygen for a passenger's use during flight. However, in this NPRM, RSPA is proposing an editorial change to this section to clarify that this exception applies only to oxygen provided for use by an onboard passenger and does not allow the air carrier to transport medical oxygen devices as cargo in order to move them to the locations where they will be needed, at a later time, for use by passengers.

At the present time, a passenger's own medical oxygen cylinder may be transported as cargo on passenger-carrying aircraft in compliance with the HMR, but the passenger's own cylinder may not be transported in the passenger cabin. 49 CFR 175.85(a). If RSPA ultimately prohibits the carriage of all oxidizers, including gaseous oxygen, in Class B, C, and D compartments on passenger-carrying aircraft, a passenger would not be able to ship its own medical oxygen on the same airplane. The passenger would have to arrange for another supply of oxygen at destination, rather than using a cylinder that the passenger owns.

FAA supports a complete removal of oxidizers from passenger-carrying aircraft, as proposed, but also believes that, if it is necessary to allow a passenger to transport its own oxygen cylinder for use at destination, it is far safer to stow the cylinder in the passenger cabin, under the control of and accessible to the airline crew, than in an inaccessible cargo compartment. FAA does not believe that it is prudent to allow for the carriage of compressed oxygen in an inaccessible Class D compartment. It believes that, if an oxygen cylinder is involved in a fire, the release of oxygen will intensify the fire. Because the Class D cargo compartment does not contain detection or suppression devices and because it is inaccessible to crew, a fire that might otherwise be survivable has an increased risk of becoming fatal. Thus, FAA believes that it would be safer to carry personal medical oxygen cylinders in the cabin because the crew could quickly remove the cylinders from any fire area in the cabin. This is in contrast to the complete inability of the crew to remove compressed oxygen from an inaccessible Class D cargo compartment.

RSPA expressly invites comments on this and any other alternatives (to completely prohibiting passenger-owned oxygen cylinders) that would accommodate passengers with breathing difficulties that need their own supply of oxygen at destination. These comments should indicate whether, and how many, passengers actually ship their own medical oxygen cylinders on

the same airplane in order to have a supply of oxygen at their destination.

RSPA also invites air carriers to submit comments on the effect of the prohibition on current practices of using passenger-carrying aircraft to "stage" or position the oxygen cylinders that airlines provide to passengers with breathing difficulties for use during flight under 49 CFR 175.10(a)(7). The proposed prohibition would have the effect of requiring air carriers to ship their own cylinders by ground transportation or by cargo-only aircraft, rather than using their own passenger-carrying aircraft to move these devices to locations for passenger use.

FAA is working on a related action to require that Class D compartments be clearly marked so that cargo-handling personnel will be able to recognize them.

RSPA and FAA have tentatively determined that the costs of the requirements of this proposal would be $25 million over ten years ($17 million, present value). RSPA and FAA have also tentatively determined that the benefits of this proposal will outweigh the costs if it saves nine or more lives over the next ten years.

VI. Prohibition of Oxidizers As Cargo on All Passenger Carrying Aircraft

RSPA is proposing to extend the prohibition on oxidizers to Class B and C aircraft cargo compartments, effectively prohibiting the carriage of oxidizers on passenger carrying aircraft. RSPA plans on issuing an SNPRM further developing and analyzing this part of our proposed rule in the very near future. Although the proposal has not been fully developed, it is being proposed in this document for two reasons: (1) we would like to take advantage of the intervening time to seek public comment that can be used in development of the SNPRM; to the extent that commenters can very quickly provide us with their comments and supporting data, we will consider them in developing the SNPRM; and (2) we believe that, in preparing comments on the prohibition in "D" compartments, commenters should consider the possibility that any final rule could include a prohibition on all passenger carrying aircraft.

VII. Oxygen Generators: Shipping Description and Small Personal Oxygen Generators

A. Shipping Description

Currently, under the HMR, the most appropriate shipping description for an oxygen generator (chemical) containing sodium chlorate as the primary constituent is "Oxidizing solid, n.o.s., 5.1, UN1479, II." RSPA does not believe that this name adequately describes an oxygen generator. In particular, the name does not communicate to an air carrier the fact that the material is not authorized on passenger carrying aircraft. Therefore, consistent with changes recently adopted into the International Civil Aviation Organizations Technical Instructions for the Transport of Dangerous Goods By Air, RSPA proposes to add the following description to the Hazardous Materials Table (Table) "Oxygen generator, chemical, 5.1 UN3353, II." RSPA also is proposing to revise §§ 171.11, 171.12, and 171.12a to require the use of the new name in international transportation.

The second sentence of proposed § 171.11(d)(14) and the word "Forbidden" in Column 9A of the proposed Table entry for "Oxygen generator, chemical" are based on the existing (temporary) prohibition against transporting chemical oxygen generators aboard passenger-carrying aircraft. These proposals may be modified in a final rule, as appropriate, to consider the further final rule to be published under Docket HM–224. The UN identification number assigned to the proposed shipping name "Oxygen generator, chemical" in the Table may be revised if the UN Committee of Experts on the Transport Of Dangerous Goods adopts a different identification number in its Recommendations on the Transport of Dangerous Goods.

In addition, RSPA believes that the hazards posed by an oxygen generator, chemical that is shipped with its means of initiation attached require special approval. Therefore, consistent with the prohibitions and conditions specified in § 173.21, RSPA is proposing a separate requirement that oxygen generator, chemical that is shipped with its means of initiation attached must: (1) be classed and approved by the Associate Administrator for Hazardous Materials Safety; (2) incorporate at least two safety features that will prevent unintentional activation of the generator; and (3) when transported by air, be contained in a packaging prepared and originally offered for transportation by the approval holder. RSPA is also proposing to require that each shipper of an approved oxygen generator have a copy of the approval and that the approval number be marked on the outside of the package.

B. Small Personal Oxygen Genenerators

In the interim final rule RSPA published under Docket HM–224, RSPA prohibited the transportation of oxygen generators by passenger carrying aircraft. An exception was provided for personal oxygen generators that meet the conditions of § 175.10(a)(24). Section 175.10(a)(24) requires that the person carrying the oxygen generator receive the approval of the operator of the aircraft and that the personal oxygen generators conform to the following: (1) a six foot drop test without loss of contents or activation; (2) be equipped with at least two positive means of preventing unintentional activation; (3) be well insulated, and when actuated the temperature on any external surface does not exceed 212 degrees Fahrenheit; (4) be in the manufacturer's original packaging which must include a sealed outer wrapping or clear-evidence that the generator has not been tampered with; and (5) be marked to indicate conformance with § 175.10(a)(24).

In its comments to the interim final rule, the Air Line Pilots Association (ALPA) requested that the exception for small personal oxygen generators in § 175.10(a)(24) be removed. Though § 175.10(a)(24) requires passengers to notify operators when there are oxygen generators in their baggage, ALPA stated that an aircraft operator has no way of knowing that these small chemical oxygen generators are being carried in a passenger's checked baggage because there are no public awareness programs or procedures for notifying passengers that passengers are to contact operators before they offer bags containing generators as checked baggage. ALPA also stated that there is no realistic way to know when or that the person who purchased or who intends to carry oxygen generators has been educated in the proper way to inspect and maintain them as specified in the HMR. ALPA went on to say that there is no way for an operator to examine the units to verify that a passenger is in compliance with these requirements. ALPA also pointed out that the Civil Aviation Authority of the United Kingdom has banned personal oxygen generators on passenger-carrying aircraft.

RSPA believes that adequate public notice and comment should be provided before the exception in § 175.10(a)(24) is removed. Therefore, RSPA is proposing, in this NPRM, to remove the exception provided in § 175.10(a)(24) for small personal oxygen generators.

VIII. Request for Additional Comments

RSPA requests any available information concerning the costs and benefits of this proposed action. RSPA is requesting information concerning the hazards posed by oxidizers in aircraft cargo compartments that have fire detection or suppression systems. Please

VOL 61 ISS 251 DE 30 1996 UMI

provide detailed cost information to RSPA as to the manner by which you would incur costs as the result of the proposed ban of oxidizers including all germane monetary and qualitative cost information. RSPA also solicits comments from those foreign operators who would incur costs as the result of this proposal. Although our evaluation has not been able to determine any apparent cost impact on cargo aircraft carriers, RSPA recognizes there could, nonetheless, be a potential cost impact. As the result of this concern, RSPA solicits information from cargo aircraft operators who find they would incur costs from implementation of the proposed rule. Potentially impacted shippers are asked to provide detailed information on the manner by which they would incur costs.

There may also be adverse impacts on airlines if they routinely use passenger-carrying aircraft to transport, as cargo, oxygen cylinders which are normally installed on aircraft and must be periodically retested or refilled. RSPA has not assessed the costs associated with prohibiting the shipment of oxygen cylinders on passenger carrying aircraft. Therefore, RSPA requests any available information concerning the costs and benefits of banning oxygen cylinders, as cargo, aboard passenger carrying aircraft. Please provide detailed information as to the manner by which you would incur costs. In particular, RSPA is requesting information on the number of cylinders of oxygen which are transported each day on passenger carrying aircraft. What is the typical size of these containers? What other means of transportation are available? What are the cost differences to the airlines for using these other means of transportation?

By limiting the prohibition on oxidizers to packages required to be labeled OXIDIZER and OXYGEN, the prohibition would not apply to oxidizers classed as consumer commodities, ORM–D, under the provisions of § 173.152, or as consumer commodities, Class 9, as permitted under § 171.11. RSPA requests comments regarding whether it would be appropriate to extend this prohibition to consumer commodities which are oxidizers or whether quantity limits should be imposed on these materials in § 175.75.

IX. Future Rulemaking

RSPA, in coordination with FAA, has initiated a study to assess the risks associated with the transportation of hazardous materials in aircraft cargo compartments. As an initial step, RSPA held a meeting in Cambridge, Massachusetts on October 22, 1996, for purposes of identifying accident scenarios, probabilities of occurrence, and expected consequences. In attendance were representatives from the NTSB, FAA, Air Transport Association, Chemical Manufacturers Association, Air Line Pilots Association, International Air Line Passenger Association and several aircraft manufacturers. Based on the outcome of this study, RSPA may initiate a rulemaking to ban additional hazardous materials. RSPA requests comments regarding whether it would be appropriate to extend this prohibition to other materials which may pose hazards similar to oxidizers, such as organic peroxides. Comments are requested as to the costs and benefits of these possible actions.

X. Regulatory Analyses and Notices

Executive Order 12866 and DOT Regulatory Policies and Procedures

This proposed rule is considered a significant regulatory action under section 3(f) of Executive Order 12866 and was reviewed by the Office of Management and Budget. The rule is considered significant under the regulatory policies and procedures of the Department of Transportation (44 FR 11034). A preliminary regulatory evaluation is available for review in the public docket.

Executive Order 12612

This proposed rule has been analyzed in accordance with the principles and criteria contained in Executive Order 12612 ("Federalism"). The Federal hazardous materials transportation law (49 U.S.C. 5101–5127) contains an express preemption provision that preempts State, local, and Indian tribe requirements on certain covered subjects. Covered subjects are:

(i) the designation, description, and classification of hazardous material;

(ii) the packing, repacking, handling, labeling, marking, and placarding of hazardous material;

(iii) the preparation, execution, and use of shipping documents pertaining to hazardous material and requirements respecting the number, content, and placement of such documents;

(iv) the written notification, recording, and reporting of the unintentional release in transportation of hazardous material; or

(v) the design, manufacturing, fabrication, marking, maintenance, reconditioning, repairing, or testing of a package or container which is represented, marked, certified, or sold as qualified for use in the transportation of hazardous material.

Because RSPA lacks discretion in this area, preparation of a federalism assessment is not warranted. Title 49 U.S.C. 5125(b)(2) provides that DOT must determine and publish in the **Federal Register** the effective date of Federal preemption. That effective date may not be earlier than the 90th day following the date of issuance of the final rule and not later than two years after the date of issuance. This proposed rule would require oxidizers to be transported in certain types of cargo compartments aboard aircraft. RSPA solicits comments on whether the proposed rule would have any effect on State, local or Indian tribe requirements and, if so, the most appropriate effective date of Federal preemption.

Regulatory Flexibility Act

I certify that this proposed rule will not have a significant economic impact on a substantial number of small entities. This proposed rule applies to air carriers, most of whom are not small entities.

Paperwork Reduction Act

This proposed rule does not propose any new information collection requirements.

Regulation Identifier Number (RIN)

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN number contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

List of Subjects

49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Reporting and recordkeeping requirements.

49 CFR Part 172

Hazardous materials transportation, Hazardous waste, Labeling, Marking, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 173

Hazardous materials transportation, Packaging and containers, Radioactive materials, Reporting and recordkeeping requirements, Uranium.

49 CFR Part 175

Air carriers, Hazardous materials transportation, Radioactive materials, Reporting and recordkeeping requirements.

In consideration of the foregoing, 49 CFR Parts 171, 172, 173 and 175 would be amended as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

1. The authority citation for part 171 continues to read as follows:

Authority: 49 U.S.C. 5101–5127; 49 CFR 1.53.

2. In § 171.11, paragraph (d)(14) is added to read as follows:

§ 171.11 Use of ICAO Technical Instructions.

* * * * *

(d) * * *

(14) An oxygen generator (chemical) must be classed, approved, and described in accordance with the requirements of this subchapter. Except as provided in § 175.10(a)(7) of this subchapter, oxygen generators (chemical) may not be transported on passenger carrying aircraft (see § 173.21 of this subchapter).

3. In § 171.12, paragraph (b)(17) is added to read as follows:

§ 171.12 Import and export shipments.

* * * * *

(b) * * *

(17) An oxygen generator (chemical) must be classed, approved, and described in accordance with the requirements of this subchapter.

* * * * *

4. In § 171.12a, paragraph (b)(16) is added to read as follows:

§ 171.12a Canadian shipments and packagings.

* * * * *

(b) * * *

(16) An oxygen generator (chemical) must be classed, approved, and described in accordance with the requirements of this subchapter.

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, AND TRAINING REQUIREMENTS

5. The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5127; 49 CFR 1.53.

6. In the § 172.101 Hazardous Materials Table, the following entry is added in appropriate alphabetical order:

§ 172.101 Purpose and use of hazardous materials table.

* * * * *

SECTION 172.101.—HAZARDOUS MATERIALS TABLE

Symbols (1)	Hazardous materials descriptions and proper shipping names (2)	Hazard class or division (3)	Identification numbers (4)	PG (5)	Label Codes (6)	Special provisions (7)	(8) Packaging authorizations (§ 173.***) Exceptions (8A)	Nonbulk (8B)	Bulk (8C)	(9) Quantity limitations Passenger aircraft/ rail (9A)	Cargo aircraft only (9B)	(10) Vessel stowage requirements Location (10A)	(10A) Other (10B)
.	.	.	.	.	.	.	.	.	.	.	.	.	.

.	.	.	.	.	.	.	.	.	.	.	.	.	.

7. In 172.102, in paragraph (c)(1), Special Provision 57 is added to read as follows:

§ 172.102 Special provisions.

* * * * *

(c) * * *

(1) * * *

57 An oxygen generator, chemical that is shipped with its means of initiation attached must: (1) be classed and approved by the Associate Administrator for Hazardous Materials Safety; (2) incorporate at least two safety features that will prevent unintentional activation of the generator; and (3) when transported by cargo-only aircraft, be contained in a packaging prepared and originally offered for transportation by the approval holder. Each offerer of an approved oxygen generator must have a copy of the approval, and the approval number must be marked on the outside of the package.

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

8. The authority citation for Part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5127, 44701; 49 CFR 1.45, 1.53.

§ 173.21 [Amended]

9. In § 173.21, in paragraph (k), the words "or § 175.10(a)(24)" are removed.

PART 175—CARRIAGE BY AIRCRAFT

10. The authority citation for Part 175 continues to read as follows:

Authority: 49 U.S.C. 5101–5127; 49 CFR 1.53.

§ 175.10 [Amended]

11. In § 175.10, in paragraph (a)(7), the wording "a passenger" is revised to read "an onboard passenger" and paragraph (a)(24) is removed and reserved.

12. In § 175.85, paragraph (d) is added to read as follows:

§ 175.85 Cargo location.

* * * * *

(d) No person may load or transport in a Class D cargo compartment, as defined in 14 CFR 25.857(c), a package containing a hazardous material for which an OXIDIZER or OXYGEN label is required under Subpart E of Part 172 of this subchapter (see § 172.426 or § 172.405 of this subchapter, respectively).

* * * * *

Issued in Washington, DC on December 20, 1996, under the authority delegated in 49 CFR part 106.

Alan I. Roberts,

Associate Administrator for Hazardous Materials Safety.

Part V

Environmental Protection Agency

40 CFR Part 228
Ocean Dumping; Amendment of Site Designation; Final Rule

VOL 61 ISS 251 DE 30 1996 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 228

Ocean Dumping; Amendment of Site Designation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) amends the site designation for the San Francisco Deep Ocean Disposal Site (SF-DODS), an existing deep ocean dredged material disposal site located off San Francisco, California, by establishing a new temporary disposal volume limit of 4.8 million cubic yards per year, and by extending the time period during which the disposal site would be managed under the temporary disposal volume limit by two years (through December 31, 1998). This amendment is necessary in order to allow the SF-DODS to remain an option for disposal of dredged material from authorized projects, while documentation addressing comprehensive long term dredged material management for the region is being completed. The amendment is intended to provide the region with continued access to an environmentally appropriate dredged material disposal alternative. It is emphasized that this action does not constitute or imply EPA Region 9's or the Corps San Francisco District's approval of actual ocean disposal of dredged materials. Before a permit allowing such ocean disposal may be issued, alternatives to ocean disposal must be considered and a need for the disposal established under the Marine, Protection, Research, and Sanctuaries Act (MPRSA). EPA Region 9 or the Corps San Francisco District will deny permits when either agency determines that feasible environmentally preferable alternatives are available, including beneficial use.

Under today's final rule, the SF–DODS will remain designated as an available alternative for the disposal of suitable dredged material removed from the San Francisco Bay region and other nearby harbors or dredging sites for two years (through December 31, 1998). However, EPA is not setting a permanent annual disposal volume limit at this time, as originally envisioned in the August 11, 1994 site designation Final Rule. Instead, EPA is extending the existing interim management of the site at a new and reduced temporary disposal volume limit of 4.8 million cubic yards per year. A decision on a permanent disposal volume limit will be made by the end of this extension period, based on the comprehensive dredged material management planning process or based on a separate alternatives-based EPA evaluation of the need for ocean disposal. All other aspects of the August 11, 1994 SF-DODS designation Final Rule, including the provisions of the Site Management and Monitoring Plan (SMMP) will remain in full effect.

EFFECTIVE DATE: This final regulation becomes effective on December 30, 1996.

ADDRESSES: Send questions or comments to: Mr. Allan Ota, Ocean Disposal Coordinator, U.S. Environmental Protection Agency, (EPA) (WTR-2), 75 Hawthorne Street, San Francisco, California 94105, telephone (415) 744-1980.

FOR FURTHER INFORMATION CONTACT: Mr. Allan Ota, Ocean Disposal Coordinator, U.S. Environmental Protection Agency, Region 9 (WTR-2), 75 Hawthorne Street, San Francisco, California 94105, telephone (415) 744-1980.

SUPPLEMENTARY INFORMATION: In addition to the proposed rule (61 FR 54112), the primary supporting documents for this designation amendment are the *Final Environmental Impact Statement (EIS) for Designation of a Deep Water Ocean Dredged Material Disposal Site off San Francisco, California* (August 1993), the *Long-Term Management Strategy (LTMS) for the Placement of Dredged Material in the San Francisco Bay Region, Draft Policy Environmental Impact Statement/Programmatic Impact Report* (April, 1996), and the SF-DODS designation Final Rule [40 CFR 228.12(b)(70), 59 FR 41243 (August 11, 1994), subsequently republished as 40 CFR 228.15(l)(3), 59 FR 61128 (November 29, 1994), all of which are available for public inspection at the following locations:

1. EPA Region 9, Library, 75 Hawthorne Street, 13th Floor, San Francisco, California.
2. ABAG/MTC Library, 101 8th Street, Oakland, California.

A. Regulated Entities

Entities potentially regulated by this action are persons or entities seeking permits to dump material into ocean waters at the SF–DODS, under the Marine Protection, Research, and Sanctuaries Act, 33 U.S.C. 1401 et seq.. The rule would primarily be of relevance to parties in the San Francisco area seeking permits from the U.S. Army Corps of Engineers for the ocean dumping of dredged material at the SF–DODS as well as the U.S. Army Corps of Engineers itself. Potentially regulated categories and entities seeking to use the SF–DODS include:

Category	Examples of potentially regulated entities
Industry	Ports seeking dredged material ocean dumping permits for SF–DODS use.
	Marinas seeking dredged material ocean dumping permits for SF–DODS use.
	Shipyards seeking dredged material ocean dumping permits for SF–DODS use.
	Berth owners seeking dredged material ocean dumping permits for SF–DODS use.

Category	Examples of potentially regulated entities
State/local/ tribal governments.	Local governments owning ports or berths seeking dredged material ocean dumping permits for SF–DODS use.
Federal	US Army Corps of Engineers for its projects proposing to use the SF–DODS.
Government	Federal agencies seeking dredged material ocean dumping permits for SF–DODS use.

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by the action. This table lists types of entities that EPA is now aware could potentially be regulated by this action. Other types of entities not listed in this table could also be regulated. To determine whether your organization is potentially regulated by this action, you should carefully consider whether your organization is subject to the requirement to obtain an ocean dumping permit in accordance with the Purpose and Scope provisions of Section 220.1 of Title 40 of the Code of Federal Regulations, and you wish to use the SF–DODS. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the preceding **FOR FURTHER INFORMATION, CONTACT** section.

B. Background

Section 102(c) of the MPRSA of 1972, as amended, 33 U.S.C. Sections 1401 et seq., gives the Administrator of EPA authority to designate sites where ocean dumping may be permitted. By publication of a Final Rule in the **Federal Register** on August 11, 1994 (59 FR 41243), EPA Region 9 designated SF–DODS as an ocean dredged material disposal site under the MPRSA, and readers are referred to that rulemaking for further information on the site. In that Final Rule, EPA designated SF–DODS for continued use for a period of 50 years, with an interim capacity of six million cubic yards of dredged material per calendar year until December 31, 1996. It was assumed that by that date, a comprehensive evaluation of long term dredged material management needs for the overall San Francisco Bay region would have been conducted, which would have evaluated the potential for alternatives to ocean disposal, and which could therefore serve as a basis for establishing a permanent disposal volume limit for SF–DODS.

Since the August 11, 1994 site designation Final Rule, significant effort has in fact gone toward development of a comprehensive dredged material management approach for the region. In particular, the multi-agency draft Policy Environmental Impact Statement/ Programmatic Environmental Impact Report entitled *Long-Term Management Strategy (LTMS) for the Placement of Dredged Material in the San Francisco Bay Region* (LTMS draft EIS/R) was published on April 17, 1996. The LTMS draft EIS/R evaluates the overall dredged material management needs and disposal or reuse potential for the San Francisco Bay area over the next 50 years, including not only ocean disposal, but also in-Bay disposal (placement at designated sites within the San Francisco estuary that are managed under Section 404 of the Clean Water Act), and upland or wetland disposal or reuse. The policy alternatives evaluated in the LTMS draft EIS/R include varying levels of dredged material disposal or reuse in each of these three placement environments. The potential environmental and socioeconomic effects of each policy alternative are evaluated in the LTMS draft EIS/R. Selection of one of the alternative policy approaches set forth in the LTMS draft EIS/R could therefore serve as an appropriate basis for designating a permanent disposal volume limit for SF–DODS, as originally envisioned.

However, the LTMS Final EIS/R process is not yet complete. Public comments on the LTMS draft EIS/R were accepted through July 19, 1996, and over 60 substantive comment letters were received, many of which suggested that significant changes should be made before finalizing the EIS/R. Several comment letters expressed the view that the programmatic document was inadequate and that a revised draft EIS/R should be prepared. Other comment letters recommended that a detailed Management Plan, outlining the specific actions that state and federal agencies would take to implement any of the alternatives in the draft EIS/R, should be prepared prior to finalizing the programmatic EIS/R. It thus is apparent that an LTMS final EIS/R and Record of Decision will not be available in time to serve as the basis for establishing a permanent disposal volume limit for the SF–DODS before the December 31, 1996 expiration of the interim period specified in the August 11, 1994 site designation Final Rule.

Because of this situation, and in order to provide for a maximum of public comment opportunities about the overall policy approach that should be selected for long-term dredged material management(including the role of ocean disposal), EPA published a Proposed Rule (61 FR 54112) on October 17, 1996 to extend the period during which the SF–DODS would be managed under a temporary disposal volume limit. In that proposed rule, options were presented to solicit public comment both on the appropriate length for a new temporary extension, and for an appropriate temporary disposal volume limit.

A range of approaches to determining an appropriate temporary disposal volume limit for SF-DODS was presented by EPA in the proposed rule. These included: (1) Revising the disposal volume limit based on an updated estimate of overall dredging and potential ocean disposal needs for the San Francisco area; (2) revising the disposal volume limit based on one of the alternatives presented in the LTMS draft EIS/R; (3) revising the disposal volume limit to accommodate only those specific projects currently approved for ocean disposal (plus an additional volume to accommodate a limited number of new projects in the near term); and (4) leaving unchanged the existing disposal volume limit of six million cubic yards per year. As discussed in the preamble to the proposal, based on the site designation EIS, original August 1994 site designation rulemaking, and subsequent site monitoring results, no significant adverse environmental impacts are expected in association with the original interim disposal volume limit of six million cubic yards per year. All of the proposed rule's options for a continued temporary disposal volume limit reflected either a decrease, or no change, in potential disposal activity at the SF-DODS.

Five options also were presented in the proposed rule regarding extension of the date for management of the site under the temporary capacity limit. These options included extension periods of six months, one year, 18 months, two years, and an indefinite period tied to completion of the LTMS final EIS/R. EPA specifically solicited public comments on this range of options for an extended temporary site management period, as well as comments addressing other interim site management periods or alternatives that involve no extension at all.

C. Description of Final Rule

After considering the comments received on the proposed rule and the current status of the LTMS EIS/R, today's final rule reduces the temporary

VOL 61 ISS 251 DE 30 1996 UMI

volume capacity from 6 million cubic yards per year to 4.8 million cubic yards per year and extends site availability under that capacity for two years (through December 31, 1998). This is done in the final rule by amending 40 CFR 228.15(l)3) to reflect the new temporary volume limit and date.

Extending site use at this time under a temporary disposal volume limit will allow the LTMS EIS/R process to continue, without precluding final selection of any of the LTMS EIS/R's overall dredged material management alternatives. Other than establishing an interim disposal volume limit and setting a new timeframe for designating a permanent disposal volume limit, the provisions of the August 11, 1994 site designation Final Rule would be unchanged by today's amendments. Responses to the comments received on the proposal and its options are presented in Section D below.

D. Response to Comments on the Proposed Rule

A total of eleven letters and one telephone call commenting on the proposed rule were received. These included letters from two federal and two state agencies, two Bay area ports, one port association, two dredging/port industry associations, three environmental groups (signing one letter), and a natural resources law firm representing area fishermen's organizations. In addition, a "no comment" phone call was received from one federal agency. Finally, one letter incorporated by reference the commentor's earlier comments on the original (1994) site designation action, and on the LTMS draft Policy EIS/Programmatic EIR.

Citing information similar to that provided in the proposed rule, all nine of the agency, port, and industry comment letters supported Volume Option 4: Retain existing six million cubic yard per year interim disposal volume limit for the SF-DODS. All but one of these commenters also supported either Extension Option 1: Two-year extension to interim site management, or the potentially longer time period under Extension Option 5: Unspecified period of interim site management (one agency comment letter did not specify a preferred time-frame). In contrast, the other commenters supported substantially lower disposal volume limits (a variation of Volume Option 3: Interim disposal volume limit based on specific projects currently approved for ocean disposal, that would allow no more than four million cubic yards of disposal per year), and a shorter extension period (Extension Option 4: Six-month extension to interim site management). EPA's response to these comments is presented in the following paragraphs.

Establish a Permanent Annual Disposal Volume Limit Now

Three of the comment letters recommended that EPA issue a final (permanent) annual ocean disposal volume limit now, rather than extend interim site management any longer. These commenters noted their agreement with the statement in the proposed rule that sufficient information now exists for EPA to establish a permanent limitation, based on publication of the LTMS draft Policy EIS/Programmatic EIR, public comments received pursuant to that draft EIS/EIR, and site monitoring conducted to date. One commenter supported a permanent disposal volume limit of one- to two-million cubic yards per year based on the LTMS draft EIS/EIR alternatives; other commenters did not specify a preference for the size of a permanent disposal volume limit.

Response. EPA agrees that sufficient technical information exists on which to appropriately base a final (permanent) annual disposal volume limit for the SF-DODS. However, as discussed in the preamble to the proposed rule, EPA prefers to extend the existing, interim management of the disposal site while the consideration of permanent region-wide dredged material disposal alternatives continues via the LTMS process. It is unfortunate that the LTMS Policy EIS/Programmatic EIR was not finalized as originally envisioned before the end of the initial interim site management period. However, the purposes behind providing an interim site management period in the first place—i.e., to better consider long-term management options and to maximize public input opportunities—remain relevant today. In the event that the LTMS EIS/EIR process is still not completed by the end of the new extended interim site management period, EPA expects to resolve the issue of a final (permanent) disposal volume limit based on an independent evaluation of the information available at that time.

Interim Disposal Volume Limit of Six Million Cubic Yards Per Year is Excessive

Commenters criticized a disposal volume limit of six million cubic yards per year and argued that a maximum of four million cubic yards per year should be set. They raised several specific arguments, including: (1) The original designated volume limit of six million cubic yards per year was excessive and flawed; (2) the LTMS draft Policy EIS/Programmatic EIR uses a revised (lower) estimate of 4.8 million cubic yards of sediment per year that on average may be suitable for ocean disposal, but even this estimate was conservative; (3) EPA has provided no evidence that there is any need for ocean disposal in excess of four million cubic yards per year (there is no demonstrated need to provide allowance for projects in addition to those anticipated at this time; (4) it is inappropriate to define ocean disposal needs based on the lack of currently available alternatives; and (5) reducing the disposal limit at this time would not prejudice the ongoing LTMS process, whereas not reducing it in light of the LTMS's own new dredging estimates would prejudice the process. Each of these comments is addressed in the following paragraphs.

(1) The original (six million cubic yard per year) disposal limit was excessive and flawed at the time of the original site designation in 1994. In addition, the modeling at that time, which indicated that six million cubic yards per year could be disposed without adverse environmental impact, is irrelevant, since the legal standard requires EPA to minimize ocean disposal.

Response. EPA's original site designation EIS and rulemaking were based on the most up-to-date information that was appropriate to use at the time. The primary document supporting the original site designation for the SF-DODS was the Environmental Impact Statement (EIS) for Designation of a Deep Water Ocean Dredged Material Disposal Site off San Francisco, California. The draft EIS was published by EPA in December, 1992, and the final EIS was published in August, 1993. A proposed rule for site designation was subsequently published in the **Federal Register** on March 18, 1994, and the site designation final rule was published on August 11, 1994. The site designation became effective on September 12, 1994.

During the two years between publication of the draft EIS and the final designation of the ocean disposal site, new estimates of long-term dredging were being developed under the LTMS process. They were not, however, finalized for use in the final site desigation process. A series of base closure decisions during this general timeframe necessitated re-evaluation of long-term dredging needs. A final report was prepared, based on dredging project information as current as 1993, but was not published until 1995. This final report, Analysis of San Francisco Regional Dredging Quantity Estimate,

Dredging Project Profiles, and Placement Profiles, containing the new dredging estimates was published on September 28, 1995 (and incorporated as Appendix E in the LTMS draft Policy EIS/Programmatic EIR, dated April, 1996). Hence new, finalized estimates of long-term dredging needs were not completed, nor was there consensus on their use, at the time of the original site designation. EPA therefore evaluated (in part via computer modeling) the potential effects of six million cubic yards of disposal in one year as a reasonable worst-case scenario. Since this evaluation showed that significant adverse effects would not be expected at that level of disposal, lower disposal levels similarly would not be expected to cause significant effects. EPA believes that the modeling studies conducted for the original site designation therefore remain relevant to today's action to extend interim site use at 4.8 million cubic yards per year.

EPA has always recognized the need for caution in using any estimates of long-term, average dredging needs as the basis for site management decisions. Notwithstanding any overall disposal limit that may be set, project-by-project review must still occur and the need for ocean disposal must be determined in each case. EPA and the USACE will not approve any disposal that would be expected to cause significant adverse environmental effects individually or cumulatively. In this regard, too, the modeling studies showing that there should be no significant adverse environmental impacts from six million cubic yards per year of disposal at SF–DODS remain relevant. Today's new lower estimates could conceivably be superseded at some future date by higher estimates, if circumstances change substantially. If this were to occur, it would be appropriate to evaluate whether a higher level of ocean disposal could occur without causing significant adverse environmental effects. (The existing modeling results would not be adequate to establish whether disposal levels higher than six million cubic yards per year might be environmentally acceptable.) However, even if a higher disposal "need" were to exist in the future, higher levels of disposal would not be allowed if they would result in the Ocean Dumping Criteria being violated.

(2) The new long-term estimate of dredged material potentially suitable for ocean disposal which was used in the LTMS draft Policy EIS/Programatic EIR is 4.8 million cubic yards per year. Even that figure is conservative, because there is no evidence that more than four million cubic yards needs ocean disposal. Therefore an interim disposal limitation of no more than four million cubic yards per year should be established for the SF–DODS.

Response. EPA believes that the best and most appropriate current estimate of the long-term, average volume of dredged material that may be suitable for ocean disposal is 4.8 million cubic yards per year, as documented in the LTMS draft Policy EIS/Programmatic EIR. This volume represents a "high-end" estimate, taking into account projects and trends reasonably foreseeable at this time, and thus reflects a reasonable worst-case scenario. However, it is also an estimated average, and may not be sufficient in years of especially high dredging if alternative disposal sites are not available. For example, there are currently two large dredging projects authorized to use the SF–DODS and, if these are conducted simultaneously, four million cubic yards could in fact be disposed at the site in one year (1997). There is thus immediate "evidence" that at least four million cubic yards may occasionally need ocean disposal. However, a disposal limit set at four million cubic yards per year might not allow any other projects to use the SF–DODS in 1997, which could result in more disposal at existing sites within San Francisco Bay than would otherwise be necessary. In contrast, a disposal limit of 4.8 million cubic yards per year as represented by Volume Option 1 in the Proposed Rule (or the greater limits under Volume Options 3 and 4) would continue to allow consideration of ocean disposal as a potentially practicable alternative for new proposed projects.

(3) Four million cubic yards per year would allow currently authorized projects to proceed; there is no evidence of any need to provide for other than currently authorized projects at this time.

Response. As discussed in the response to the immediately preceding comment, a four million cubic yard per year disposal volume limit at the SF–DODS could in some circumstances (possibly as early as 1997) limit the range of practicable alternatives for new proposed projects. This in turn could result in more disposal at existing sites within San Francisco Bay than would otherwise be necessary. Of course, opportunities for beneficial reuse and upland disposal are also evaluated on a project-by-project basis. However, as documented in the LTMS draft Policy EIS/Programmatic EIR, beneficial reuse and upland disposal opportunities are generally very limited at the present time. The LTMS draft EIS/EIR therefore discussed the likelihood that the majority of dredged material generated in the near term would have to be managed at aquatic disposal sites (i.e., at the SF–DODS in combination with existing San Francisco Bay disposal sites), until additional beneficial reuse or upland disposal sites become available. It is EPA's determination that, in general and to the extent practicable, disposal of suitable dredged material at the SF–DODS is environmentally preferable to disposal at existing sites within San Francisco Bay. EPA therefore believes that restricting disposal at the SF–DODS to only currently approved projects during the extended interim use period may result in cumulative effects that could otherwise be avoided.

(4) It is inappropriate to define ocean disposal needs based on the lack of currently available alternatives.

Response. As discussed in the LTMS draft Policy EIS/Programmatic EIR, it is expected that in the near term management of dredged material from the San Francisco Bay area will require a greater emphasis on aquatic disposal sites than on beneficial reuse or upland disposal sites, due to lack of available opportunities for such reuse or upland diposal at this time. It is therefore appropriate to establish disposal volume limits that are sufficient to manage the reasonably foreseeable aquatic disposal needs, provided that no significant adverse environmental effects would occur at that level of disposal. (Modeling studies and subsequent site monitoring have in fact indicated that no significant adverse environmental effects are expected at the SF–DODS at disposal volumes even at the level of six million cubic yards per year.)

Over time, as the LTMS participants seek additional beneficial reuse or upland disposal sites, less overall reliance on aquatic disposal is anticipated. In the meantime, the primary alternative to ocean disposal is disposal at the existing designated sites within San Francisco Bay. As noted in the response to the immediately preceding comment, it is EPA's determination that, in general and to the extent practicable, disposal of suitable dredged material at the SF–DODS is environmentally preferable to disposal at existing sites within San Francisco Bay. Availability of in-Bay sites should therefore be limited to projects where a practicable alternatives analysis allows use of such sites. Thus, EPA's decision about a disposal volume limit for the SF–DODS is based not only on the current lack of beneficial reuse or upland disposal alternatives, but also in the current limited availability of

alternative aquatic disposal sites within San Francisco Bay, and the relative risks, impacts, and management opportunities afforded at those sites compared to the SF–DODS. In addition, project-by-project review must still occur and the need for ocean disposal must be determined in each case. Notwithstanding any overall disposal limit that may be set, EPA and the USACE will not approve any disposal at SF–DODS that would be expected to cause significant adverse environmental effects individually or cumulatively.

(5) Reducing the disposal limit at this time would not prejudice the ongoing LTMS process, whereas not reducing it in light of the LTMS's own new dredging estimates could be viewed as negative.

Response. EPA agrees that the revised LTMS estimate of long-term, average dredging quantities for the San Francisco Bay area reflects substantial new information that was not fully available at the time of the original SF–DODS designation. EPA has therefore applied this new information under the same approach that was used in the original designation action, and has determined that an annual disposal volume limit of 4.8 million cubic yards is appropriate. Use of this information, which was developed as part of the LTMS process, should not prejudice final decisions made as a result of the LTMS process. Final decisions will continue to be based on the most current information developed in that process. Prejudice is more likely to occur if EPA does not apply the most up-to-date information developed in that process.

Interim Site Management Period Should Not Exceed Six Months

Comments supporting the Proposed Rule's Extension Option 4: Six-month extension to interim site management, were based on two main considerations. First, that a six-month extension would allow for a total of over one year since the LTMS draft Policy EIS/Programmatic EIR was published (and approximately eight years since the LTMS process was initiated), which should be sufficient time to complete a final EIS/EIR. Second, that there is no need to tie the SF-DODS extension period decision to the timing of the Record of Decision following the LTMS final EIS/EIR. Each of these issues is addressed in the following responses.

(1) A six-month extension would allow for a total of over one year since the LTMS draft Policy EIS/Programmatic EIR was published (and approximately eight years since the LTMS process was initiated). This should be sufficient time to produce a final EIS/EIR.

Response. Over 60 letters, comprising over 1,000 individual comments, were received on the LTMS draft Policy EIS/Programmatic EIR. Many of these comments recommended that substantive revisions be made before the EIS/EIR is be finalized. In addition, unlike more typical "project" EIS/EIRs, responding to the comments received on the policy/program issues will require the collaboration and consensus of all the state and federal LTMS agencies. This process is more time-consuming than if the proposed action, and all the specific decisions needed to define and implement it, were to be within the authority of a single agency. Similarly, the experience of the LTMS agencies to date has been that evaluation of the policy/program issues in this process cannot be carried out through contractual support. Since this is a policy EIS/EIR, the majority of the analysis and written revisions must be done by agency staff. All available staff resources from each of the LTMS agencies are being assigned to finalizing the EIS/EIR (along with the related draft Management Plan). If the Policy EIS/Programmatic EIR is finalized earlier than expected, a permanent disposal volume limit for the SF-DODS can be established earlier than the end of the two-year extension period.

(2) There is no need to tie the SF-DODS extension period to the timing of the Record of Decision following the LTMS final EIS/EIR. Response. EPA agrees that the overall process could be accelerated, without significantly affecting public input, by publishing the proposed rule for a permanent disposal volume limit at the same time as the LTMS final EIS/EIR is published. The comment periods for the two actions could thus occur simultaneously, and the permanent disposal volume limit could become effective at the same time that the Record of Decision is signed by the federal agencies, rather than weeks to months later.

The LTMS Agencies Should Apply More Resources to Accelerate Finalizing the LTMS EIS/EIR

Some commenters recommended that the LTMS agencies accelerate the overall LTMS EIS/EIR schedule, thus allowing for a shorter interim management period for the SF–DODS, by applying additional staff and other resources to the EIS/EIR. In particular, they noted that the LTMS agencies have moved forward with implementation of a pilot joint-agency Dredged Material Management Office (DMMO) for permit application processing, before the EIS/EIR has been finalized and before other important documents (such as the Site Management and Monitoring Implementation Manual for the SF–DODS) have been prepared.

Response. With the exception of staff resources assigned to DMMO, all the available staff resources from each of the LTMS agencies are being assigned to finalizing the EIS/EIR (along with the related draft Management Plan). EPA recognizes that this leaves limited the resources available to produce other documents—such as the SMMP Implementation Manual—as quickly as would be desirable. Staff assigned to the DMMO are addressing current permit application information as it comes in. These applications and related reports would have to be evaluated by each of the member agencies, whether this is done individually or jointly under the auspices of the DMMO. The DMMO is expected to reduce the overall amount of time the agencies spend on directing and reviewing sediment evaluations for dredging projects, thus freeing resources that would otherwise not be available for the EIS/EIR effort. Thus, little or no benefit could be gained by delaying the establishment of the DMMO, or reducing staff allocated to it.

The LTMS Agencies Should Apply More Resources to Establishing Beneficial Reuse Alternatives

One commenter also recommended that the LTMS agencies apply more resources to identifying and implementing beneficial reuse or upland disposal alternatives. Such alternatives would presumably reduce the need for the two-year interim timeframe and/or the 4.8 million cubic yards per year interim disposal volume limit for the SF–DODS. In particular, the commenter noted that a new potential opportunity for large-scale reuse of dredged material in the Sacramento-San Joaquin River Delta has been suggested in another forum (the CalFed process), and that this new possibility should be pursued vigorously by the agencies.

Response. EPA agrees that a greater potential for beneficial reuse than projected by the LTMS draft EIS/EIR may exist, including the particular opportunity referred to by this commenter. Beneficial reuse has been identified as one of the issues that will be addressed for the final LTMS Policy EIS/Programmatic EIR. The LTMS agencies intend to explore ways to maximize the coordination among the programs that are looking into such opportunities, in order to maximize the beneficial reuse of Bay area dredged material to the extent practicable over time. Other beneficial reuse

opportunities may be identified during the interim management period for the SF–DODS, as well. To the extent that such opportunities become available, EPA and the USACE will require that they are evaluated in the practicable alternatives analysis for projects seeking aquatic disposal during the interim management period for the SF–DODS.

Other Comments Incorporated by Reference

One letter incorporated by reference the commentor's earlier letters about the original (1994) SF–DODS designation action, and about the LTMS draft Policy EIS/Programmatic EIR.

Response. EPA responded to the comments received regarding the original SF–DODS designation as a part of the Response to Comments section of that final rule, published in the **Federal Register** on August 11, 1994. EPA intends to respond fully to the commenter's letter about the LTMS draft Policy EIS/Programmatic EIR as a part of the overall response to comments on that document now being prepared by the LTMS agencies. Today's extension of the interim site management period for the SF–DODS is more limited in scope and purpose than the actions under consideration in the LTMS process. Moreover, the purpose of today's extension is to allow for the programmatic LTMS EIS/EIR process to be completed, including responding to comments received. Today's action in no way prejudices the ability to respond to the commenter's letter on the LTMS EIS/EIR, and in no way precludes the selection of any alternative evaluated in that document. Therefore, it is appropriate that the comments in the referenced letter are not addressed as part of today's action, to the extent that they coincide with the comments addressed herein.

E. Compliance With Other Laws and Executive Orders

Consistency With the Coastal Zone Management Act

EPA prepared a Coastal Consistency Determination (CCD) document based on the evaluations presented in the August, 1993 site designation EIS. The CCD evaluated whether the proposed action—designation of "Alternative Site 5" (now SF–DODS) as described in the site designation EIS as an ocean disposal site for up to 50 years, and with an annual capacity of six million cubic yards of dredged material meeting ocean disposal criteria—would be consistent with the provisions of the Coastal Zone Management Act. The CCD was formally presented to the California Coastal Commission (Commission) at their public hearing on April 12, 1994. The Commission staff report recommended that the Commission concur with EPA's CCD, and the Commission voted unanimously to concur on the CCD without revision.

Since the approved CCD was based on 50 years of site use at up to six million cubic yards of dredged material per year, and since these parameters are not exceeded by this action, this final rule extending interim disposal site management does not require additional Commission review.

Endangered Species Act Consultation

During the development of the August, 1993 site designation EIS, EPA consulted with the National Marine Fisheries Service (NMFS) and the U.S. Fish and Wildlife Service (FWS) pursuant to provisions of the Endangered Species Act, regarding the potential for designation and use of any of the alternative ocean disposal sites under study to jeopardize the continued existence of any federally listed threatened or endangered species. This consultation process is fully documented in the August, 1993 site designation EIS. NMFS and FWS concluded that none of the three alternative disposal sites, including Alternative Site 5, if designated and used for disposal of dredged material meeting ocean disposal criteria as described in the EIS, would jeopardize the continued existence of any federally listed threatened or endangered species.

This consultation was based on site use at up to six million cubic yards of dredged material per year, for 50 years. Since these parameters are not exceeded by this action, and since conditions have not changed for any of the listed or candidate threatened or endangered species potentially affected by disposal site use, this final rule extending interim disposal site management does not require additional Endangered Species Act consultation.

Executive Order 12866

Under Executive Order 12866 (58 FR 51735, October 4, 1993), the Agency must determine whether the regulatory action is "significant," and therefore subject to OMB review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to lead to a rule that may:

(1) Have an annual effect on the economy of $100 million or more, or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This final rulemaking should have minimal impact on permittees. The final rule merely extends the period of time during which the existing SF–DODS may be used under existing interim management provisions. It thus has been determined that this final rule is not a "significant regulatory action" under the terms of Executive Order 12866, and is therefore not subject to OMB review.

Regulatory Flexibility Act, as Amended by the Small Business Regulatory Enforcement Fairness Act of 1996

The Regulatory Flexibility Act (RFA) provides that, whenever an agency promulgates a final rule under 5 U.S.C. 553, an agency must prepare a regulatory flexibility analysis (RFA) unless the head of the agency certifies that the final rule will not have a significant economic impact on a substantial number of small entities (5 U.S.C. §§ 604 & 605). EPA has determined that this final rule will not have a significant economic impact on small entities since the amended site designation will only have the effect of providing a continuing disposal option for dredged material. The final rule merely extends the current period of interim management of the SF–DODS. Consequently, EPA's action will not impose any additional economic burden on small entities such as small private dredging operations that seek authorization for the dumping of dredged materials. For this reason, the Regional Administrator certifies, pursuant to section 605(b) of the Regulatory Flexibility Act, that the final rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The Paperwork Reduction Act, 44 U.S.C. 3501 et seq., is intended to minimize the reporting and record-keeping burden on the regulated community, as well as to minimize the cost of Federal information collection and dissemination. In general, the Act requires that information requests and record-keeping requirements affecting

VOL 61 ISS 251 DE 30 1996 UMI

ten or more non-Federal respondents be approved by the Office of Management and Budget. Since this final rule does not establish or modify any information or record-keeping requirements, it is not subject to the requirements of the Paperwork Reduction Act.

The Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year. Before promulgating an EPA rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

This final rule contains no Federal mandates (under the regulatory provisions of Title II of the UMRA) for State, local, or tribal governments or sections 202 and 205 of the UMRA. As is explained elsewhere in this preamble, the final rule merely extends the period of time during which the existing SF–DODS may be managed by the Federal government under existing interim provisions. Accordingly, it imposes no new enforceable duty on any State, local or tribal governments or the private sector. Even if this final rule did contain a Federal mandate, it would not result in annual expenditures of $100 million or more for State, local, and tribal governments in the aggregate, or the private sector. Thus this final rule is not subject to the requirements of sections 202 and 205 of the UMRA.

For the foregoing reasons, EPA also has determined that this rule contains no regulatory requirements that might significantly or uniquely affect small governments. Thus the requirements of Section 203 of UMRA do not apply to this rule.

Compliance With Administrative Procedure Act

The Administrative Procedure Act (APA), 5 U.S.C. 551 et seq., generally requires that substantive rules be published 30 days prior to their effective date except:

"(1) A substantive rule which grants or recognizes an exemption or relieves a restriction; * * * or (3) as otherwise provided by the agency for good cause found and published with the rule." 5 U.S.C. 553(d).

EPA is issuing today's final rule as effective December 30, 1996, under the provisions of 5 U.S.C. 553(d). As is explained elsewhere in this preamble, today's final rule is intended to assure that the SF–DODS remains available for use as a disposal alternative for suitable dredged material. In the absence of today's rule, after December 31, 1996, Federal projects and permit applicants that need to use the ocean disposal alternative (including the Port of Oakland project already using the site) would not be able to use the SF–DODS unless the additional step of site selection under MPRSA § 103 was undertaken by the USACE. By extending the current deadline, and avoiding this result, today's final rule has the effect of removing a restriction and thus meets the exception specified in 5 U.S.C. 553(d). In addition, the Agency believes today's rule meets the "good cause" exception of 5 U.S.C. 553(d)(3). As previously noted, failure to extend the current deadline before it expires could adversely affect the Port of Oakland Harbor project, which is currently authorized to dispose of project dredged material at the SF–DODS, and which received such authorization after environmental assessment, demonstration of a need for ocean disposal, and opportunity for public comment. Issuing today's final rule as immediately effective would avoid potential disruption of this ongoing and already authorized project. At the same time, issuance of the final rule as immediately effective would *not* result in additional use of the site by other potential dumpers. Because issuance of an immediately-effective rule is necessary to avoid disruption of an already approved, ongoing, and environmentally acceptable use of the SF–DODS on which the public has already had the opportunity to comment, and an immediate effective date does not result in usage by any other dumpers, the Agency has determined that there is good cause within the meaning of 5 U.S.C. 553(d)(3) to issue this rule as effective December 30, 1996.

List of Subjects in 40 CFR Part 228

Environmental Protection, Water Pollution Control.

Dated: December 20, 1996

Alexis Strauss,

Acting Regional Administrator, EPA Region 9.

In consideration of the foregoing, Subchapter H of Chapter I of Title 40 is amended as set forth below.

PART 228—[AMENDED]

1. The authority citation for part 228 continues to read as follows:

Authority: 33 U.S.C. 1412 and 1418.

§ 228.15 [Amended]

2. Section 228.15, paragraphs (l)(3)(vii) and (l)(3)(x) are amended by removing the words "December 31, 1996" each time they occur, and adding in their place, "December 31, 1998".

3. Section 228.15, paragraph (l)(3)(vii) is amended by removing the words "6 million cubic yards" and adding in their place, "4.8 million cubic yards".

Environmental Protection Agency

40 CFR Part 61

National Emissions Standards for Radionuclide Emissions From Facilities Licensed by the Nuclear Regulatory Commission and Federal Facilities not Covered by Subpart H; Final Rule

VOL 61 ISS 251 DE 30 1996 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[FRL-5670-5]

RIN 2060–AE 39

National Emissions Standards for Radionuclide Emissions From Facilities Licensed by the Nuclear Regulatory Commission and Federal Facilities not Covered by Subpart H

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final Rule.

SUMMARY: EPA is rescinding 40 CFR part 61, subpart I (subpart I) as it applies to Nuclear Regulatory Commission (NRC) or NRC Agreement State licensed facilities other than commercial nuclear power reactors. Subpart I is a National Emission Standard for Hazardous Air Pollutants (NESHAPs) which was published on December 15, 1989 and which limits radionuclide emissions to the ambient air from NRC-licensed facilities. As required by section 112(d)(9) of the Clean Air Act as amended in 1990, EPA has determined that the NRC regulatory program for licensed facilities other than commercial nuclear power reactors protects public health with an ample margin of safety, the same level of protection that would be afforded by continued implementation of subpart I.

DATES: This rule is effective December 30, 1996. Under section 307(b)(1) of the Clean Air Act, judicial review of this final action is available only by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit no later than February 28, 1997.

FOR FURTHER INFORMATION CONTACT: Gale Bonanno, Center for Federal Guidance and Air Standards and Communications, Radiation Protection Division, 6602J, Office of Radiation and Indoor Air, Environmental Protection Agency, Washington, DC 20460 (202) 233-9219, or Eleanor Thornton, at the same address (202) 233-9773.

SUPPLEMENTARY INFORMATION:

Regulated Entities

Entities affected by this action include facilities, other than commercial nuclear power generators, licensed by the Nuclear Regulatory Commission (NRC) or an NRC Agreement State. Subpart I continues to apply to federal facilities not owned or operated by the Department of Energy (DOE) ("non-DOE" federal facilities) and not licensed by the NRC. Facilities owned or operated by the Department of Energy are regulated under 40 CFR part 61 subpart H. The Agency notes that radionuclide NESHAPs subparts other than subpart I continue to apply as stated in each regulation to the owners and operators of uranium mill tailings piles, e.g., 40 CFR part 61 subpart W. This action does not affect regulation of radionuclides under statutes other than the CAA, e.g. Comprehensive Environmental Response, Compensation and Liability Act of 1980 (42 U.S.C. 9601).

Affected categories and entities include:

Category	Examples of facilities
NRC-Licensees	Uranium fuel cycle (those engaged in the conversion of uranium ore to produce electric power, e.g., uranium mills, fuel fabrication plants). Facilities licensed to use or possess nuclear materials such as hospitals, medical research facilities, radiopharmaceutical manufacturers, laboratories, etc.

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. This table lists the types of entities that EPA is now aware could potentially be affected by this action. Other types of facilities not listed in the table could also be regulated. To determine whether your facility is regulated by this action, you should carefully examine the applicability criteria in § 1.100 of today's rule which amends part 61 of Title 40 of the Code of Federal Regulations. If you have questions regarding the applicability of this action to a particular facility, consult the persons listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

Docket

Docket A-92-50 (cross-referenced with Dockets A-79-11 & A-92-31) contains the rulemaking record. The docket is available for public inspection between the hours of 8 A.M. and 5:30 P.M., Monday through Friday, in room M1500 of Waterside Mall, 401 M Street, SW, Washington, DC 20460. A reasonable fee may be charged for copying. The fax number is 202-260-4400.

I. Background

A. Regulatory History

On October 31, 1989, EPA promulgated National Emission Standards for Hazardous Air Pollutants (NESHAPs) under Section 112 of the Clean Air Act to control radionuclide emissions to the ambient air from a number of different source categories. 54 FR 51654 (December 15, 1989). Subpart I of 40 CFR part 61 covers two groups of facilities: (1) Facilities licensed and regulated by the Nuclear Regulatory Commission (NRC) and individual Agreement States ("NRC licensed facilities"), and (2) federal facilities which are not licensed by the NRC and are not owned or operated by the Department of Energy ("non-DOE federal facilities"). The first group is diverse, and includes facilities which have received a license to use or possess nuclear materials such as hospitals, medical research facilities, radiopharmaceutical manufacturers, laboratories and industrial facilities, as well as facilities involved in the uranium fuel cycle (the conversion of uranium ore to electric power) such as

uranium mills and fuel fabrication plants. EPA estimates there are approximately 22,000 such NRC and Agreement State licensed facilities in the United States (this figure includes those facilities using only sealed sources).

The present rulemaking concerns all NRC licensed facilities other than commercial nuclear power reactors, which are the subject of a separate rulemaking (60 FR 46206, Sept. 5, 1995). Non-DOE federal facilities not licensed by the NRC are not affected in any way by the present rulemaking. Subpart I limits radionuclide emissions from NRC licensed facilities to the ambient air to that amount which would cause any member of the public to receive in any year an effective dose equivalent (ede) no greater than 10 millirem (mrem), of which no more than 3 mrem ede may be from radioiodine. These limits were established pursuant to an EPA policy for section 112 pollutants first announced in the benzene NESHAP (54 FR 38044, September 14, 1989), utilizing the two-step process outlined in the vinyl chloride decision. *Natural Resources Defense Council* v. *EPA*, 824 F.2d 1146, (D.C. Cir. 1987)(*Vinyl Chloride*).

When subpart I was originally promulgated in December 1989, EPA simultaneously granted reconsideration of the subpart based on information received late in the rulemaking on the subject of duplicative regulation by NRC and EPA of NRC licensed facilities and on the potential negative effects of the standard on nuclear medicine. EPA established a comment period to receive further information on these subjects, and granted a 90-day stay of subpart I as permitted by Clean Air Act (CAA) section 307(d)(7)(B), 42 U.S.C. 7607 (d)(7)(B). That stay expired on March 15, 1990; and was subsequently extended on several occasions. (See 55 FR 10455, March 21, 1990; 55 FR 29205, July 18, 1990; and 55 FR 38057, September 17, 1990).

EPA later stayed subpart I for NRC and Agreement State licensees other than nuclear power reactors while EPA was collecting the additional information necessary to make a determination under section 112(d)(9) of the 1990 CAA Amendments. See 56 FR 18735 (April 24, 1991), and 40 CFR 61.109(a). However, on September 25, 1992, the U.S. Court of Appeals for the DC Circuit issued a decision that EPA had exceeded its authority by staying subpart I while the Agency was collecting information needed to make a determination under section 112(d)(9). *Natural Resources Defense Council* v. *Reilly*, 976 F.2d 36 (D.C. Cir. 1992)(*NRDC*). The stay for licensees other than nuclear power reactors expired before the NRDC decision could be implemented on November 15, 1992, and subpart I took effect for these licensees on November 16, 1992. EPA subsequently issued a notice confirming the effectiveness of subpart I for licensees other than nuclear power reactors. See 59 FR 4228 (January 28, 1994).

B. Clean Air Act Amendments of 1990

In 1990, Congress enacted legislation comprehensively amending the CAA, which included a section addressing the issue of regulatory duplication between EPA and NRC. CAA section 112(d)(9) provides that, "[N]o standard for radionuclide emissions from any category or subcategory of facilities licensed by the Nuclear Regulatory Commission (or an Agreement State) is required to be promulgated under [section 112] if the Administrator determines, by rule, and after consultation with the Nuclear Regulatory Commission, that the regulatory program established by the Nuclear Regulatory Commission pursuant to the Atomic Energy Act for such category or subcategory provides an ample margin of safety to protect the public health." This provision enables EPA to eliminate duplication of effort between EPA and NRC in instances where EPA can determine that the NRC program provides protection of public health equivalent to that required by the CAA.

C. Reconsideration of Subpart I

After the adoption of section 112(d)(9), EPA reviewed the information available to the Agency, including the information provided during the Agency's reconsideration of subpart I, to decide whether it could determine for particular categories of NRC licensees that the NRC regulatory program protects public health with an ample margin of safety. EPA's initial analysis focused on two general issues: (1) whether the NRC regulatory program in practice results in sufficiently low doses to protect the public health with an ample margin of safety; and (2) whether the NRC program is sufficiently comprehensive and thorough and administered in a manner which will continue to protect public health in the future.

After reviewing the available information for licensees other than nuclear power reactors, EPA concluded that it lacked sufficient information concerning actual air emissions from these facilities to make the substantive determination contemplated by section 112(d)(9). Accordingly, EPA undertook an extensive study in order to determine the doses resulting from radionuclide emissions at facilities other than nuclear power reactors. As discussed in detail in section II.A.1, EPA surveyed a randomly selected subset of all licensed facilities, as well as a group of "targeted" facilities chosen because of an expectation that they would have higher air emissions. See Draft Background Information Document, "NESHAPs Rulemaking on Nuclear Regulatory Commission and Agreement State Licensees Other Than Nuclear Power Reactors" EPA-430-R-92-011 (November 1992), Docket Entry A-92-50, II-B-1.

After evaluating the results of its study, reviewing the then current NRC regulatory program, and considering the likely effect of revisions of the NRC program which were pending at that time and of additional measures which NRC had agreed to adopt pursuant to a Memorandum of Understanding (MOU) with EPA (see section II.A.2), EPA proposed to rescind subpart I for NRC and Agreement State licensees other than nuclear power reactors on December 1, 1992. See 57 FR 56877 (December 1, 1992).

II. Rationale for Final Rule to Rescind 40 CFR Part 61, Subpart I for NRC and Agreement State Licensees

A. 1992 Proposal to Rescind Subpart I for Licensees Other Than Nuclear Power Reactors

The 1992 proposal to rescind subpart I for NRC licensees other than nuclear power reactors was based on EPA's extensive study of those licensees and on commitments made by NRC in an MOU with EPA. *See* 57 FR 56877 (December 1, 1992).

1. EPA Study of Air Emissions From NRC Licensed Facilities

In order to determine whether NRC licensees other than nuclear power reactors were in compliance with those emission limits deemed necessary by EPA to protect public health, EPA undertook a comprehensive study to determine the doses that resulted from emissions from these facilities. See Draft Background Information Document, "NESHAPs Rulemaking on Nuclear Regulatory Commission and Agreement State Licensees Other Than Nuclear Power Reactors" EPA-430-R-92-011 (November 1992), Docket Entry A-92-50, II-B-1. A major component of this study was a survey and analysis of a randomly selected subset of the approximately 6,000 NRC and Agreement State licensees using unsealed sources. These consist of hospitals, radiopharma-

VOL 61 ISS 251 DE 30 1996 UMI

manufacturers and distributors, and laboratories for which the doses and other emissions data were not well characterized. In order to gather the necessary information, EPA sent a letter under the authority of section 114 of the CAA to the selected facilities requiring them to submit specific information concerning their emissions and proximity to the exposed population. Doses were then determined by EPA using the COMPLY computer program which was specified in subpart I for determining compliance with the standard. EPA also investigated a group of "targeted" facilities selected for their potential to cause high doses.

EPA obtained Office of Management and Budget approval to send questionnaires to as many as 670 of the approximately 6,000 facilities, requesting release rates and the other necessary parameters. Since facilities handling only sealed sources do not present the potential for airborne emissions, they had been exempted from the NESHAP and were also excluded from analysis in the EPA study. Because EPA could not accurately determine in advance whether a given NRC or Agreement State licensee handled only sealed sources and would therefore be excluded from the analysis, the Agency over sampled in order to obtain the required number of responses.

A sample of at least 300 facilities was needed in order to be 95 percent confident that EPA could establish a dose level below which the doses caused by air emissions from 99 percent of the facilities lie. Over 600 letters were sent to a random subset of NRC or Agreement State licensees. Responses were submitted by all but three facilities and 367 of the responses were determined to be from facilities using unsealed sources.

The COMPLY computer program was used to estimate doses to the most exposed individuals located near the facilities. The National Oceanic and Atmospheric Administration's data base was used for meteorological data for the sites. Many facilities were contacted to obtain clarification or site-specific information. The dose to the nearest resident to each facility was calculated from the facility-specific information taken from the questionnaire and using meteorological data from the closest weather station.

A second component of the study was the targeted facilities, which fell into three sub-groups: (a) facilities determined to have potential for large emissions and which were not fully characterized in previous evaluations (examples included research reactors, rare earth producers, waste incinerators, low level waste facilities, and large university hospitals); (b) facilities with potential for large emissions which were more adequately characterized in previous assessments (these included fuel cycle facilities such as uranium mills, fuel fabrication plants, UF6 conversion plants); (c) atypical activities for which no formal evaluations had been made (these included activities such as depleted uranium weapons testing).

For facilities in sub-group (a), the data needed to characterize the emissions and doses were obtained from existing NRC docket information, supplemented as necessary with requests for missing data under authority of CAA section 114. The results of the previous assessments for facilities in sub-group (b) were summarized and updated to include more recent information. For the third sub-group, EPA reviewed the activity in question to ascertain the potential for significant airborne emissions, and evaluated the doses for these activities found to involve potentially significant emissions.

After evaluating both the randomly surveyed 367 facilities and the specifically targeted facilities using the COMPLY computer program, EPA determined that the highest estimated dose received by any member of the public from airborne emissions of radionuclides from any facility was 8.0 mrem/yr ede. Thus, none of the facilities evaluated appeared to cause a dose exceeding the levels established by the Administrator in the radionuclides NESHAPs. The median dose for the population is 0.00069 mrem/yr. *See* Draft Background Information Document, "NESHAPs Rulemaking on Nuclear Regulatory Licensees Other Than Nuclear Power Reactors" EPA 430–R–92–011 (November 1992), Docket Entry A–92–50, II–B–1 at 4–11. When the results of the survey were statistically extrapolated to the entire population of NRC or Agreement State licensees, EPA concluded that emissions from virtually all of the facilities were expected to be below the limits established by EPA. After evaluating the results of the study, EPA concluded that current emissions by NRC and Agreement State licensees other than nuclear power reactors result in doses less than the level found by EPA to provide an ample margin of safety to protect the public health.

2. Memorandum of Understanding (MOU) Between EPA and NRC

In an MOU executed on September 4, 1992, NRC committed to take several actions to implement "As Low As Reasonably Achievable" (ALARA) requirements for NRC licensees other than nuclear power reactors. This MOU was published on December 22, 1992, at 57 FR 60778.

Although the NRC regulatory program included mandatory dose limits that were higher than those established by subpart I, EPA's study demonstrated that the actual operation of the existing NRC program had resulted in lower doses to the public than those which would be allowed under subpart I. The steps established by the MOU reflected an expectation by EPA that new mandatory ALARA requirements would operate to constrain future increases in radionuclide emissions by NRC licensees which might otherwise be permissible under the NRC program.

Under the provisions of the MOU, NRC agreed to develop and issue a regulatory guide on the design and implementation of a radiation protection program to ensure that doses resulting from effluents from licensed facilities would remain ALARA. *See* section II.B.2 below. NRC agreed that the guide would describe the types of administrative programs and objectives which would be considered acceptable in satisfying the requirements of 10 CFR 20.1101(b), and establish a specific design goal of 10 mrem/yr ede to the maximally exposed individual for radionuclide air emissions from affected NRC and Agreement State licensees. *See* NRC Regulatory Guide 8.37, "ALARA Levels for Effluents from Materials Facilities," July 1993, Docket Entry A–92–50, II–F–4.

B. Events Subsequent to the 1992 Proposal

1. Changes to NRC Regulatory Program After the 1992 Proposal

After EPA published its 1992 proposal to rescind subpart I, major revisions to NRC's regulations at 10 CFR Part 20 became effective. NRC's revised rule (effective January 1994) implements 1987 Presidential guidance on occupational radiation protection and the recommendations of scientific organizations to establish risk-based limits and a system of dose limitation in accordance with the guidance published by the International Commission on Radiation Protection (ICRP). In adopting the risk-based methodology, the NRC reduced the allowable dose limit for members of the public from 500 mrem/yr ede to 100 mrem/yr ede from all pathways, which is then subject to further reduction under the ALARA provisions. Of the 100 mrem/yr ede, NRC allows only 50 mrem/yr ede by the air pathway, according to their Derived

Air Concentration tables, which is then subject to further reduction under the ALARA provisions.

Another significant revision of Part 20 codified the ALARA principle, which previously was only general guidance for NRC licensees other than nuclear power reactors. All licensees must now conduct operations in a manner that keeps doses to both workers and members of the public ALARA. This is defined to mean:

> making every reasonable effort to maintain exposures to radiation as far below the dose limits in this part as is practical consistent with the purpose for which the licensed activity is undertaken, taking into account the state of technology, the economics of improvements in relation to state of technology, the economics of improvements in relation to benefits to the public health and safety, and other societal and socioeconomic considerations, and in relation to utilization of nuclear energy and licensed materials in the public interest.

10 CFR 20.1003. 56 FR 23360, 23392 (May 21, 1991).

2. EPA Concerns Regarding Basis for Required Statutory Finding Under Section 112(d)(9)

Based on the record compiled as part of its proposal to rescind subpart I for NRC licensees other than nuclear power reactors, EPA was able to conclude that the vast majority of NRC and Agreement State licensees were in compliance with the 10 mrem/yr standard established by subpart I. However, after reviewing the language of the final Regulatory Guide issued by NRC pursuant to the September 4, 1992 MOU, EPA concluded that there was no element in the NRC regulatory program which expressly required or assured that licensees other than nuclear power reactors would maintain air emissions of radionuclides below EPA's 10 mrem/yr standard. See NRC Regulatory Guide 8.37, "ALARA Levels for Effluents from Materials Facilities," July 1993, Docket Entry A–92–50, II–F–4. Thus, it was not possible for the Agency to determine that radionuclide emissions to the ambient air would consistently and predictably remain below the EPA standard in the future if EPA were to proceed with rescission, or that NRC or the individual Agreement States would be in a position to require a particular licensee who did exceed 10 mrem/yr to reduce radionuclide emissions.

Another concern regarding the adequacy of the NRC program to support rescission of subpart I for licensees other than nuclear power reactors arose as part of an investigation by the General Accounting Office (GAO) of NRC's administration of its Agreement State program. Licenses for facilities other than nuclear power reactors are often administered by individual Agreement States rather than by NRC. In a report entitled "Nuclear Regulation: Better Criteria and Data Would Help Ensure Safety of Nuclear Materials," the GAO found that "NRC lacks criteria and data to evaluate the effectiveness of its two materials programs [agreement and non-agreement state]," and that "For agreement-state programs, NRC does not have specific criteria or procedures to determine when to suspend or revoke an inadequate or incompatible program." GAO/RCED–93–90 Nuclear Materials Regulation at 3 (April 1993). In subsequent Congressional testimony concerning the GAO findings, the NRC Commissioners acknowledged that NRC criteria and procedures should be improved, and stated that NRC was developing new criteria to assess the adequacy and compatibility of individual Agreement State programs, and new procedures which would govern suspension and termination of Agreement State programs.

As contemplated by CAA section 112(d)(9), EPA and NRC entered into consultations intended to resolve these concerns. The ALARA program, which requires NRC licensees to reduce emissions to the extent feasible below the mandatory ceiling in 10 CFR Part 20, was the principal focus of subsequent discussions between EPA and NRC. In these discussions, EPA and NRC discussed various NRC proposals for a rule which would "constrain" emissions from NRC licensees other than nuclear power reactors, either by establishing a rebuttable presumption that emissions causing a dose exceeding 10 mrem/yr are not ALARA, or by expressly finding that ALARA requires licensees to maintain emissions at or below the 10 mrem/yr level. During the course of these discussions, a new concern also emerged as to whether the NRC policies on Agreement States which were under development would enable NRC to require that a "constraint level" be a mandatory element of compatibility. See letter from Mary D. Nichols, EPA Assistant Administrator for Air and Radiation, to NRC Chairman Ivan Selin, July 6, 1994, Docket Entry A–92–50, IV–C–4.

On July 22, 1994, NRC proposed a "constraint level" rule which would have required each licensee to develop an ALARA program to maintain or achieve emissions resulting in a dose at or below 10 mrem/yr or, in the alternative, to "justify" a conclusion that emissions resulting in a dose exceeding 10 mrem/yr are ALARA. See letter from NRC Chairman Ivan Selin to EPA Administrator Carol M. Browner, July 22, 1994, Docket Entry A–92–50, IV–D–74. That correspondence also noted that new procedures to assure the adequacy and compatibility of Agreement States were under development, and indicated that NRC would also propose to require Agreement States to adopt the proposed "constraint level" rule as a matter of compatibility.

After reviewing the "constraint level" rule proposed by NRC on July 22, 1994, EPA concluded that the proposed provision permitting licensees to "justify" emissions in excess of 10 mrem/yr left uncertainty as to whether NRC or an individual Agreement State might accept or countenance as ALARA emissions resulting in a dose exceeding 10 mrem/year. As a consequence, EPA was concerned that it would still not be able to determine that future radionuclide emissions from affected licensees would be consistently and predictably at levels resulting in a dose below 10 mrem/yr, or that NRC or an individual Agreement State would be able to compel a licensee to reduce emissions if the 10 mrem/yr level were exceeded. EPA then advised NRC that EPA did not consider it prudent to proceed with rescission of subpart I for NRC licensees other than nuclear power reactors based on a record which might not adequately support the legal determination required by section 112(d)(9). Docket Entry A–92–50, IV–C–4.

3. NRC Actions Responsive to EPA Concerns

On December 21, 1994, after further considering the concerns expressed by EPA, NRC proposed to EPA a "constraint" rule construing ALARA as requiring each licensee to limit air emissions to a level resulting in a dose no greater than 10 mrem/yr. *See* letter from NRC Chairman Ivan Selin to EPA Administrator Carol M. Browner, December 21, 1994, Docket Entry A–92–50, IV–D–26. Under this proposal, exceeding the NRC constraint level would not itself be a violation, but any licensee exceeding the 10 mrem/yr constraint would be required to report the exceedance and to take corrective measures to prevent a recurrence. On March 14, 1995, NRC confirmed that it intended to make the proposed constraint rule a matter of Division Level 2 compatibility, which requires each Agreement State to incorporate in its program provisions at least as stringent as those established by the NRC rule. See letter from Robert M. Bernero, Director of the NRC Office Of

VOL 61 ISS 251 DE 30 1996 UMI

Nuclear Material Safety and Safeguards, to Mary D. Nichols, EPA Assistant Administrator for Air and Radiation, March 14, 1995, Docket Entry A–92–50, IV–D–27.

NRC has also taken steps which address concerns regarding the adequacy of criteria and procedures for the Agreement State program. NRC published a draft policy statement concerning adequacy and compatibility criteria, 59 FR 37269 (July 21, 1994), and a draft policy statement setting forth procedures which permit suspension or termination of individual Agreement State programs. 59 FR 40059 (August 5, 1994). In the March 14, 1995 letter, NRC assured EPA that the final policy statement on compatibility criteria would be consistent with the NRC proposal to make the NRC "constraint level" rule a matter of Division Level 2 compatibility.

After reviewing the proposed rule described in the December 21, 1994 letter and the additional assurances provided in the March 14, 1995 letter, EPA advised NRC that it had concluded that adoption by NRC of the proposals and policies set forth in these letters should be sufficient to resolve the Agency's stated concerns regarding its ability to make the finding required to support rescission under CAA Section 112(d)(9). See letter from EPA Administrator Carol M. Browner to NRC Chairman Ivan Selin, March 31, 1995, Docket Entry A–92–50, IV–C–5. In that correspondence, EPA also stated its intent to publish a notice requesting supplementary comment concerning the proposed rule to rescind subpart I for NRC licensees other than nuclear power reactors in conjunction with the publication by NRC of its proposed constraint rule.

4. EPA's Notice Reopening the Comment Period

EPA published a notice reopening the comment period for the rulemaking to rescind subpart I. 60 FR 50161, (September 28, 1995). The Notice reaffirmed EPA's proposal to rescind subpart I, described the expected proposed revisions to the NRC program which would support EPA's rescission, and invited additional comment on the sufficiency of the revisions to the NRC program to support the finding required by section 112(d)(9). The Agency extended the period for submitting comments in response to the Notice until February 22, 1996, to allow the public time to review NRC's proposed constraint rule prior to submitting comments to EPA. NRC published the proposed constraint rule on December 13, 1995. 60 FR 63984.

5. NRC Constraint Level for Air Emissions of Radionuclides and NRC Agreement State Policies and Procedures

On December 10, 1996, Commissioners adopted a final "constraint" rule modifying the NRC radiation protection program codified at 10 CFR part 20. 61 FR 65120. The final regulations adopted by NRC establish a constraint of 10 mrem/yr total effective dose equivalent (TEDE) [1] for dose to members of the public from air emissions of radionuclides from NRC licensed facilities other than commercial nuclear power reactors. 10 CFR section 20.1101(d). A dose constraint is defined as "a value above which specified licensee actions are required." 10 CFR section 20.1003, as amended. Thus, the final rule codifies a numerical value, 10 mrem/yr TEDE, for NRC's application of its ALARA principles contained in 10 CFR part 20 for radioactive air emissions from NRC licensees other than commercial nuclear power reactors. In the event that the 10 mrem/yr constraint is exceeded, the exceedance must be reported to NRC by the licensee within 30 days and the licensee must also provide a description of the circumstances of the exceedance and describe the corrective steps that have been or will be taken to ensure that the exceedance will not reoccur. 10 CFR section 20.2203(b)(l)(iv); 61 FR at 65121. NRC regulations provide for licensees to propose corrective steps and NRC will approve such actions (e.g., installation of filters, installation of a new pump, etc.) if appropriate to effectuate a decrease in dose. 10 CFR section 20.1101(d); 61 FR at 65123. *See also Memorandum* to Docket A–92–50 from Gale Bonanno, Workgroup Chair, December 16, 1996, Docket Entry A–92–50, IV–B–1 (analyzing final "constraint" rule).

The final constraint rule has been assigned a Division Level 2 compatibility. 61 FR at 65126. Thus, the Agreement States must address the constraint rule in their regulations, but they may adopt more restrictive requirements than the constraint rule. The Commission plans to revise and finalize draft NRC Regulatory Guide 8.37 as Regulatory Guide 4.20 at the time of implementation of their rule. This Regulatory Guide will outline methods for demonstrating compliance with the constraint level and the elements of the report required to be submitted in the event the constraint level is exceeded. This Guide will also express the Commission's belief that based on EPA's study and NRC's ongoing licensing and inspection program, the constraint level for doses to members of the public from air emissions of radionuclides as codified at section 20.1101(d) is easily achievable by all materials licensees.

In addition, the Commission recently approved, in principle, final policy statements entitled "Statement of Principles and Policy for the Agreement State Program" and "Policy Statement on Adequacy and Compatibility of Agreement State Programs". 60 FR 39463 (August 2, 1995). These documents describe the principles of the Agreement State program including the roles and responsibilities of NRC and the States in administering the program, and outline a general framework for determining which NRC program elements and requirements should be implemented by the Agreement States.

NRC provided additional information to EPA regarding the Commission's authority to suspend or terminate Agreement State programs. *See* letter from Martin Malsch, NRC Deputy General Counsel to Ramona Trovato, Director of EPA's Office of Radiation and Indoor Air, November 19, 1996, Docket Entry A–92–50, IV–G–8. As discussed above, the Commissioners approved the final "constraint" rule as a matter of Division 2 compatibility, meaning that Agreement States "will have to include an essentially identical or more restrictive legally binding generic requirement in their regulatory program." *Id.* The correspondence notes that in the event an Agreement State adopts a standard which is less stringent than the constraint rule, "NRC would be legally authorized to take a variety of actions with respect to the State program, including probation, suspension or termination of the program." *Id.*

Moreover, periodic reviews of the Agreement State programs are conducted by NRC to ensure that those programs are compatible with NRC's regulatory program and adequate to protect the public health. *Id.* The review process and criteria for such reviews are contained in NRC's Integrated Materials Performance Evaluation Program (IMPEP) issued on September 12, 1995, a copy of which is contained in the docket for this rulemaking. As noted in the correspondence, procedures were provided to the Commissioners on April 25, 1996, which will be applied by NRC if circumstances warrant the future suspension or termination of Agreement State programs. *Id.* The correspondence

[1] NRC expresses dose in total effective dose equivalent (TEDE), while subpart I expresses dose in effective dose equivalent (EDE). These two terms are equivalent.

thus concludes that "the IMPEP, together with designation of the constraint rule as category 2 for compatibility purposes, provide objective criteria to be used in assessing Agreement State regulation of air emissions and would provide a satisfactory legal basis for any NRC action required to address deficiencies in Agreement State programs including, if necessary, suspension or revocation of the Agreement State program." *Id. at 2*

III. Final Rule to Rescind 40 CFR Part 61, Subpart I for NRC and Agreement State Licensees

A. EPA Determination Under CAA Section 112(d)(9)

Section 112(d)(9) authorizes EPA to decline to regulate radionuclide emissions from NRC licensees under the CAA provided that EPA determines, by rule, and after consultation with NRC, that the regulatory scheme established by NRC protects the public health with an ample margin of safety. The legislative history of section 112(d)(9) provides clear guidance as to what is meant by "an ample margin of safety to protect the public health" and what process the Administrator should follow in making that determination in a rulemaking proceeding under section 112(d)(9). The Conference Report accompanying S.1630 points out that the "ample margin of safety" finding under section 112(d)(9) is the same "ample margin of safety" requirement that governed the development of standards promulgated under section 112 of the CAA prior to its amendment in 1990. The conferees also made clear that the process the Administrator is expected to follow in making any such determination under section 112(d)(9) is the process "required under the decision of the U.S. Court of Appeals in *NRDC* v. *EPA*, 824 F.2d 1146 (D.C. Cir. 1987) (*Vinyl Chloride*)." H. Rep. No. 101–952, 101st Cong., 2d Sess. 339 (1990), reprinted in 1 A Legislative History of the Clean Air Act Amendments of 1990, at 1789 (1993) (hereinafter "Legislative History CAAA90").

From the language of section 112(d)(9), it is apparent that where EPA has already specifically determined what level of emissions must be achieved to provide an "ample margin of safety," that level is the benchmark by which EPA must evaluate the adequacy of the NRC program. EPA specifically found when it promulgated 40 CFR part 61, subpart I, that 10 mrem/yr would provide the requisite "ample margin of safety." EPA conducted a two-step "ample margin of safety" analysis when it promulgated subpart I in 1989, and EPA hereby incorporates that analysis by reference as part of its present finding.

As EPA interprets section 112(d)(9), the Agency may rescind the subpart I NESHAP as it applies to NRC licensed facilities other than commercial nuclear power reactors if the Agency (1) consults with NRC, (2) engages in public notice and comment rulemaking, and (3) finds that the separate NRC regulatory program provides an equivalent level of public health protection (i.e., an ample margin of safety) as would be provided by implementation of subpart I. While a rulemaking to rescind a standard applicable to NRC licensees may commence prior to incorporation of all necessary elements in the NRC regulatory program, the elements of the NRC program must be deemed adequate by EPA to fully satisfy the statutory standard at the time EPA takes final action.

Section 112(d)(9) does not require exact equivalence between the EPA and NRC programs applicable to a particular category of licensees before EPA may decline to regulate radionuclide air emissions from that category. This construction of section 112(d)(9) was expressly affirmed by the Court of Appeals in its unpublished Memorandum opinion denying the petition for review of EPA's rescission of subpart I as applied to nuclear power reactors. Unpublished Opinion, *Sierra Club, et al.*, v. *Environmental Protection Agency*, No.95–1562 (D.C. Cir. October 22, 1996) at 4. Section 112(d)(9) requires that EPA conclude that implementation of the NRC program as a whole will achieve substantive protection of the public health equivalent to or better than that which would be achieved by enforcement of the EPA standard. Thus, if the NRC program as a whole will assure that air emissions from all affected licensees remain below the EPA standard, the NRC program may be deemed to provide an ample margin of safety, regardless of whether this results from enforcement by NRC of a single numerical standard.

Based on its study of NRC and Agreement State licensees, EPA has already determined that current air emissions from such licensees cause doses which are in compliance with the 10 mrem/yr standard in subpart I. However, as EPA construes section 112(d)(9), EPA must also evaluate the ability of the NRC and Agreement State program to assure that emissions remain below the level required to provide an "ample margin of safety." Thus, in deciding whether EPA may decline to regulate a particular category or subcategory of NRC or Agreement State licensees presently regulated under subpart I, EPA construes section 112(d)(9) as requiring that EPA determine: (1) that emissions from NRC licensees (or Agreement State licensees when authority to regulate the licensees has been assumed by the State) in that category or subcategory will be consistently and predictably at or below a level resulting in a dose of 10 mrem/yr, and (2) that NRC (or the Agreement States) can and will require any individual licensee in that category or subcategory with emissions that cause a dose exceeding 10 mrem/yr to reduce the emissions sufficiently that the dose will not exceed 10 mrem/yr.

EPA has previously concluded that radionuclide emissions to the ambient air from NRC and Agreement State licensees other than nuclear power reactors are generally well below the level that would result in a dose exceeding 10 mrem/yr. EPA experience in administration of subpart I since it became effective confirms this conclusion. Out of the thousands of licensees subject to the standard, only 16 facilities reported radionuclide air emissions exceeding the EPA standard for calendar year 1993 and only one facility reported emissions exceeding the EPA standard for calendar year 1994. No facilities reported exceeding the subpart I 10 mrem/yr standard for calendar year 1995. See Memorandum to Docket A–92–50 from Byron Bunger, December 18, 1996, Docket Entry A–92–50, IV–B–2 (Appendix to final rulemaking describing EPA's experience implementing Subpart I). Most of the reported exceedances were resolved through EPA approval of appropriate site-specific adjustments to the input parameters for COMPLY, the computer code used for calculating doses. The one exceedance not resolved through adjustments to the input parameters for COMPLY was satisfactorily resolved by the facility.

EPA concludes that the final adoption by NRC of the NRC constraint rule and the satisfactory resolution by NRC of prior deficiencies in NRC Agreement State policies and procedures resolve all remaining concerns regarding the adequacy of the NRC program to provide an "ample margin of safety" and support the requisite determination for rescission under CAA section 112(d)(9). Promulgation of the NRC constraint rule assures that radionuclide emissions by the affected licensees will be consistently and predictably below a level which would result in a dose exceeding 10 mrem/yr, and that NRC can require an individual licensee who exceeds the 10 mrem/yr level to take

corrective actions to reduce emissions. By making the NRC constraint rule a matter of Division Level 2 compatibility, NRC has assured EPA that those licensees regulated by individual Agreement States also will be subject to the 10 mrem/yr constraint level and will be required to report and correct any exceedances of that level. Finally, the adoption by NRC of policies establishing specific criteria for adequacy and compatibility, and procedures for suspension or termination of Agreement State programs resolves the Agency's concerns regarding the ability of NRC to act if it determines that an Agreement State program is inadequate or incompatible.

EPA is confident that NRC has the capability to enforce the provisions of the constraint rule through its inspection and enforcement programs. According to NRC, NRC's inspection program is based on conducting on-site inspections of each licensee's facility at frequencies determined partly by the size of the operation and the amount of radioactive materials the licensee is authorized to possess. Inspection frequencies appear to vary from a high of once per year for large licensees to once every five years for very small licensees. However, EPA understands that the majority of licensees authorized to possess any significant amounts of radioactive materials are inspected at frequencies ranging from one to three years. The Agency also notes that inspection frequencies may be adjusted by NRC as needed, and increased for licensees who have been subjected to certain NRC enforcement actions.

NRC's enforcement program is addressed in the NRC's Enforcement Policy, NUREG-1600, "General Statement of Policy and Procedure for NRC Enforcement Actions," (60 FR 34381, June 30, 1995). All violations identified through inspections and investigations are subject to civil enforcement action and may also be subject to criminal prosecution. After an apparent violation is identified, the severity is evaluated in order to determine the appropriate enforcement sanction. Severity levels range from Level I for the most significant violations, to Level IV for those of more than minor concern. Minor violations are not subject to formal enforcement action. The NRC uses three primary enforcement sanctions: Notices of Violation, civil penalties, and orders. A Notice of Violation (NOV) sets forth one or more violations of a legally binding requirement and normally requires a response from the licensee describing the reasons for the violation, the corrective steps taken or planned, and the date when actions will be complete. A civil penalty is a monetary fine considered for Severity Level III violations and are normally assessed for Severity Level I and II violations and knowing and conscious violations of the reporting requirements of Section 206 of the Energy Reorganization Act. In addition to NOVs and civil penalties, orders may be used to modify, suspend, or revoke licenses. Orders may require additional corrective actions, such as removing specified individuals from licensed activities or requiring additional controls or outside audits. Persons adversely affected by orders that modify, suspend, or revoke a license, or that take other action may request a hearing.

In addition to the inspection and enforcement programs, NRC conducts periodic reviews of the Agreement State radiation control programs. During those reviews, the NRC staff evaluates whether (1) the Agreement State has a compatible regulatory program, (2) the Agreement State is periodically conducting inspections of licensed activities involving agreement material to provide reasonable assurance of safe licensee operations and to determine compliance with its regulatory requirements, and (3) the Agreement State is taking timely enforcement action against licensees, when necessary, through legal sanctions authorized by state statutes and regulations.

Based on the above analysis, EPA is today determining that the NRC regulatory program for licensees other than commercial nuclear power reactors provides an ample margin of safety to protect the public health under CAA section 112(d)(9).

IV. Summary of Major Comments and Responses to Comments From 1992 NPRM and Notice Reopening Comment Period

This section briefly describes the major comments EPA received in response to the Agency's rulemaking to rescind subpart I for NRC and Agreement State licensed facilities other than commercial nuclear power reactors. EPA received numerous written comments in response to the December 1, 1992, proposal and the September 28, 1995, notice inviting additional comments. The Agency also received comments during public hearings conducted on January 14, 1993 and February 29, 1996. Additionally, the Agency received comments on the specific issue of whether to rescind subpart I for facilities other than commercial nuclear power reactors during the comment period for other rulemakings, e.g., the proposed stays discussed above. The Agency stated at the time of those rulemakings that such comments would be addressed in the context of this rulemaking on rescission. Comments received by the Agency during the pendency of this rulemaking, together with relevant comments received in other rulemakings, are addressed in the Response to Comments Document which has been placed in the docket for this rulemaking.

A major concern expressed by commenters relates to the lack of any provision in the Atomic Energy Act (AEA) equivalent to the broad authority to file citizen suits provided by Clean Air Act section 304. Commenters asserted that the absence of a citizen suit provision applicable to the NRC regulatory program would prevent a determination by EPA that the EPA and NRC regulatory programs are equally stringent. While EPA believes that this difference in the respective enabling statutes of the two agencies could be properly considered by EPA as one factor in deciding whether or not to exercise its discretion to rescind, EPA does not believe that this difference precludes the substantive finding required by section 112(d)(9). When Congress adopted section 112(d)(9), Congress was aware that the CAA includes citizen suit authority and that the AEA has no comparable provisions. Despite this difference, Congress clearly envisioned that circumstances might be such that EPA would make the finding required by section 112(d)(9) of the CAA. EPA notes that the same argument concerning the absence of citizen suit authority was recently rejected by the District of Columbia Court of Appeals in an unpublished opinion upholding the Agency's rescission of subpart I for nuclear power reactors. Unpublished Opinion, *Sierra Club, et al.*, v. *Environmental Protection Agency*, No.95-1562 (D.C. Cir. October 22, 1996).

In making today's ample margin of safety determination under section 112(d)(9), the Agency considered whether future emissions from licensees will be consistently and predictably at or below a level resulting in a dose of 10 mrem/yr and whether, in the event a licensee exceeds that level, NRC or an Agreement State can and will require the licensee to reduce emissions. In the event that the NRC regulatory program does not assure that licensee emissions result in doses at or below 10 mrem/year, any interested person may petition EPA to initiate a rulemaking to reinstate subpart I. Furthermore, EPA can act on its own initiative to reconsider the rescission if new information indicates

that the public health is not protected with an ample margin of safety.

Some commenters were also concerned about the regulatory authority of the states and how actions such as this rescission, taken pursuant to section 112(d)(9), might affect the states' authority under the CAA to establish radionuclide air emission standards. This issue was addressed in a July 2, 1993, letter from Robert M. Bernero, Director of the Office of Nuclear Material Safety and Safeguards to Margo Oge, Director of EPA's Office of Radiation and Indoor Air. Docket Entry A-92-50, IV-D-21. Mr. Bernero stated that the NRC Office of General Counsel has examined the CAA, and relevant portions of the legislative history, "and has concluded that the passage of the 1990 CAA amendments had no effect on the preexisting power of the States under section 116 [sic] to establish radionuclide air emission standards, regardless of any action EPA might take pursuant to section 112(d)(9)." EPA concurs with NRC's construction. NRC has also stated in the preamble to the final constraint rule that "[T]he Commission believes that [CAA section 112(d)(9] clarifies that EPA's determination regarding NRC and Agreement State licensees has no effect on the existing authority of States to impose air emission standards that are more stringent than those of EPA." Furthermore, as noted earlier, the Commission's designation of the constraint rule as a Division Level 2 matter of compatibility allows the Agreement States to set more stringent standards than the NRC constraint rule. 61 FR 65120, 65126 (December 10, 1996). In addition, this issue was extensively discussed by the Senate during floor debate for the 1990 CAA amendments. Passage of the "Simpson Amendment" (section 112(d)(9)) failed on the first vote due to concerns that the amendment somehow affected states' rights and the question of state authority had to be addressed before the amendment ultimately succeeded in passage. As explained by Senator Burdick, "Section 112(d)(9) provides for State authority for radionuclide emissions in the same manner and to the same extent as does existing section 116" of the CAA, which contains the provision that "nothing in this Act shall preclude or deny the right of any state or political subdivision thereof to adopt or enforce any standard or limitation respecting emissions of air pollutants ***" April 3, 1990 Congressional Record S3798.

Some commenters object to the EPA rescission based on the argument that the NRC constraint rule is not an enforceable standard. As discussed above, section 112(d)(9) does not require exact equivalence between the EPA and NRC regulatory programs before EPA may decline to regulate radionuclide emissions from a particular category or subcategory of NRC licensees. Rather, section 112(d)(9) requires EPA to determine that the NRC regulatory program as a whole will protect public health to the same or greater level as would implementation of subpart I. The study conducted by EPA as described above, the Agency's experience in implementing subpart I since it became effective in 1992, and NRC's recent adoption of the constraint rule and Agreement State policies provide ample basis for EPA to conclude that public health will be protected to the same level as would be achieved through continued implementation of subpart I. Although the NRC constraint level is not like the EPA standard in subpart I, in that exceeding the constraint is not itself an actionable violation, the constraint level is a value above which licensees must take actions to reduce emissions. Thus, EPA may conclude that future doses to members of the public caused by emissions of radionuclides from this category of facilities will be predictably and consistently at or below 10 mrem/yr and that NRC can and will take action in the event a facility exceeds the 10 mrem/yr level.

Commenters also expressed concern that the constraint rule does not limit doses from radioiodine to the 3 mrem/yr level of subpart I. Doses resulting from emissions of radioiodines were specifically considered as part of the EPA study described in detail above. The study demonstrated that no facility surveyed emitted a level of radioiodines causing a dose above 1 mrem/yr, and extrapolation of the survey data indicated that no licensed facility was expected to have emissions exceeding the EPA standard. Based on all of the information now available concerning the activities of NRC and Agreement State licensees, EPA believes that it is very unlikely that any licensee who is in compliance with the constraint level for all radionuclides of 10 mrem/yr will have radioiodine emissions exceeding the present EPA standard. Accordingly, EPA does not consider the absence of a separate limit for radioiodines in the NRC program to be a factor which will prevent the NRC program from providing an ample margin of safety.

Some commenters expressed an additional concern regarding the adequacy of the constraint rule based on the fact that Agreement States have three years in which to adopt the constraint rule after it has been finally adopted by NRC. The commenters are apparently concerned that there will be up to a three year gap in regulatory coverage in some individual Agreement States before a state version of the constraint rule can be adopted. EPA understands this hypothetical concern, but believes that it is misplaced for the following reason. The general ALARA requirement is already legally enforceable in every Agreement State. Whatever the opinion of any individual Agreement State in the past as to what ALARA requires an individual licensee to do, the constraint rule constitutes an authoritative conclusion by NRC that ALARA consistently requires that each licensee at least achieve emissions no greater than 10 mrem/yr. In light of the expert determination by NRC that licensees can readily achieve levels less than 10 mrem/yr, it would be difficult if not impossible for individual Agreement States to properly construe existing ALARA requirements less stringently. While EPA does not expect any individual Agreement State to accept emissions exceeding 10 mrem/year as ALARA, even before adoption of that State's own constraint level, were this to occur EPA would initiate consultations with NRC concerning the adequacy of that State's program and consider taking action to reimpose an EPA standard if the problem were not promptly corrected. EPA also notes that existing radionuclide standards adopted under State authority are not affected by today's rescission.

The Agency also received several comments on the differences in compliance calculation methodologies between NRC and EPA. The computer code used to calculate compliance with Subpart I, COMPLY, considers inhalation, immersion, ingestion, and exposure to contaminated ground. Commenters question how the NRC constraint level, which only considers inhalation and immersion, could provide an ample margin of safety to protect the public health. As explained above, EPA does not believe that section 112(d)(9) requires that every program element in the NRC program be exactly equivalent to the corresponding element in the EPA program. Such a construction would frustrate the evident Congressional intent to relieve licensees of duplicative regulation. Rather, section 112(d)(9) requires only that EPA conclude that the regulatory programs as a whole will provide the same level of protection of public health. While there are differences in the calculation methodologies used by EPA and NRC, EPA does not expect the differences in the manner in which doses are

VOL 61 ISS 251 DE 30 1996 UMI

calculated to lead to significant differences in the resultant level of protection of public health. While 16 facilities reported exceeding the subpart I standard for calendar year 1993, that number decreased significantly with no facilities reporting exceedances for calendar year 1995. See Memorandum to Docket A-92-50 from Byron Bunger, December 18, 1996, Docket Entry A-92-50, IV-B-2 (Appendix for final rulemaking describing EPA's experience implementing subpart I).

Another commenter was concerned that subpart I controls emissions of NARM [Naturally Occurring and Accelerator Produced Radioactive Materials] that are not subject to NRC licensing. EPA recognizes that emissions of NARM by NRC licensees are not formally subject to NRC licensure. However, although subpart I is nominally applicable to emissions of both licensed materials and NARM, EPA did not adopt subpart I in the first place based on any concern that emissions of unlicensed radionuclide materials by NRC licensees would present any hazard to public health. However, the definition of public dose in 10 CFR 20.1003 states: "Public dose means the dose received by a member of the public from exposure to radiation and/or radioactive material released by a licensee, or to any other source of radiation under the control of the licensee. Public dose does not include occupational dose or doses received from background radiation, from any medical administration the individual has received, or from voluntary participation in medical research programs." The section on "any other source of radiation under the control of the licensee" suggests that NRC licensees are required to protect the public from most NARM co-mingled with their licensed material, but not background radiation." Moreover, in a letter to EPA, NRC stated that such emissions already are controlled and will continue to be controlled to levels which protect the public with an ample margin of safety. See Docket Entry A-92-50, IV-D-21. NRC explained that "At NRC-licensed facilities, as a practical matter, licensees will control NARM emissions as if they were byproduct material emissions." Id. at p. 2.

V. Judicial Review

Any petition for judicial review of the final rule must be filed in the United States Court of Appeals for the District of Columbia on or before February 28, 1997. Only an objection to this rule which was raised with reasonable specificity during the period for public comment (including public hearings) may be raised as part of any petition for judicial review.

VI. Miscellaneous

A. Paperwork Reduction Act

There are no information collection requirements in this final rule.

B. Executive Order 12866

Under Executive Order 12866, (58 FR 57735, October 4, 1993) the Agency must determine whether this regulation, if promulgated, is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

This action is a significant regulatory action as that term is defined in Executive Order 12866, since it raises novel legal or policy issues. Thus, EPA has determined that rescinding subpart I as it applies to facilities licensed by the NRC or NRC Agreement States which are not engaged in the generation of commercial nuclear power is a "significant regulatory action" under the terms of Executive Order 12866 due to the presence of novel policy issues and is therefore subject to OMB review.

C. Submission to Congress and the General Accounting Office

Under 5 U.S.C. 801(a)(1)(A) as added by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), EPA submitted a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives and the Comptroller General of the General Accounting Office prior to publication of the rule in today's Federal Register. This rule is not "major" as defined by 5 U.S.C. 804(2) because it will not result in an annual effect on the economy of $100 million or more; there is no major increase in costs or prices to consumers, industries, governments or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation and United States firms" ability to compete with foreign counterparts.

D. Regulatory Flexibility Analysis

EPA has determined that it is not necessary to prepare a regulatory flexibility analysis in connection with this final rule. EPA has also determined that this rule will not have a significant impact on a substantial number of small entities. Today's final action is deregulatory; effectively reducing the regulatory burden on NRC licensees other than commercial nuclear power reactors by rescinding the applicable regulatory requirements.

E. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act") requires that the Agency prepare a budgetary impact statement before promulgating a rule that includes a Federal mandate that may result in expenditure by State, local, and tribal governments, in aggregate, or by the private sector, of $100 million or more in any one year. Section 203 requires the Agency to establish a plan for obtaining input from and informing, educating, and advising any small governments that may be significantly or uniquely affected by the rule.

Under section 205 of the Unfunded Mandates Act, the Agency must identify and consider a reasonable number of regulatory alternatives before promulgating a rule for which a budgetary impact statement must be prepared. The Agency must select from those alternatives the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule, unless the Agency explains why this alternative is not selected or the selection of this alternative is inconsistent with law.

The Agency has not prepared a budgetary impact statement or specifically addressed the selection of the least costly, most cost-effective, or least burdensome alternative because this final rule is estimated to result in expenditures by State, local, and tribal governments or the private sector of less than $100 million in any one year. Because small governments will not be significantly or uniquely affected by this rule, the Agency is not required to develop a plan with regard to small governments. As discussed in the preamble, the final rule has the effect of reducing overall regulatory burdens on

NRC licensed facilities other than commercial nuclear power reactors.

List of Subjects in 40 CFR Part 61

Environmental protection, Air pollution control, Benzene, Hazardous substances, Radionuclides, Radon, Vinyl Chloride.

Dated: December 20, 1996.

Carol M. Browner,

Administrator.

Part 61 of chapter I of title 40 of the Code of Federal Regulations is amended as follows:

PART 61—[AMENDED]

1. The authority citation for part 61 continues to read as follows:

Authority: 42 U.S.C. 7401, 7412, 7414, 7416, 7601.

2. Part 61 is amended by revising the heading for subpart I and by revising § 61.100 to read as follows:

Subpart I—National Emission Standards for Radionuclide Emissions From Federal Facilities Other Than Nuclear Regulatory Commission Licensees and Not Covered by Subpart H

§ 61.100 Applicability.

The provisions of this subpart apply to facilities owned or operated by any Federal agency other than the Department of Energy and not licensed by the Nuclear Regulatory Commission, except that this subpart does not apply to disposal at facilities regulated under 40 CFR part 191, subpart B, or to any uranium mill tailings pile after it has been disposed of under 40 CFR part 1E2, or to low energy accelerators.

§ 61.101 [Amended]

3. Section 61.101 is amended by removing paragraphs (a) and (e) and redesignating paragraphs (b), (c), (d) and (f) as (a), (b), (c), and (d) respectively.

§ 61.107 [Amended]

4. Section 61.107 is amended by removing and reserving paragraph (c)(1).

Executive Order 13032 of December 26, 1996

Further Amendment to Executive Order No. 12964

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the Federal Advisory Committee Act, as amended (5 U.S.C. App.), and to facilitate the work of the Commission on United States-Pacific Trade and Investment Policy, it is hereby ordered that Executive Order 12964 of June 21, 1995, as amended by Executive Order 12987 of January 31, 1996, is further amended in section 2 by deleting in the first sentence "December 31, 1996" and inserting "February 28, 1997" in lieu thereof.

William J. Clinton

THE WHITE HOUSE,
December 26, 1996.

ELECTRONIC BULLETIN BOARD

Free **Electronic Bulletin Board** service for Public Law numbers, Federal Register finding aids, and list of documents on public inspection. 202–275–0920

FAX-ON-DEMAND

You may access our Fax-On-Demand service. You only need a fax machine and there is no charge for the service except for long distance telephone charges the user may incur. The list of documents on public inspection and the daily Federal Register's table of contents are available using this service. The document numbers are 7050-Public Inspection list and 7051-Table of Contents list. The public inspection list will be updated immediately for documents filed on an emergency basis.

NOTE: YOU WILL ONLY GET A LISTING OF DOCUMENTS ON FILE AND NOT THE ACTUAL DOCUMENT. Documents on public inspection may be viewed and copied in our office located at 800 North Capitol Street, N.W., Suite 700. The Fax-On-Demand telephone number is: 301–713–6905

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A "●" precedes each entry that is now available on-line through the Government Printing Office's *GPO Access* service at http://www.access.gpo.gov/nara/cfr. For information about *GPO Access* call 1-888-293-6498 (toll free).

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $883.00 domestic, $220.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 512–1800** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2250**.

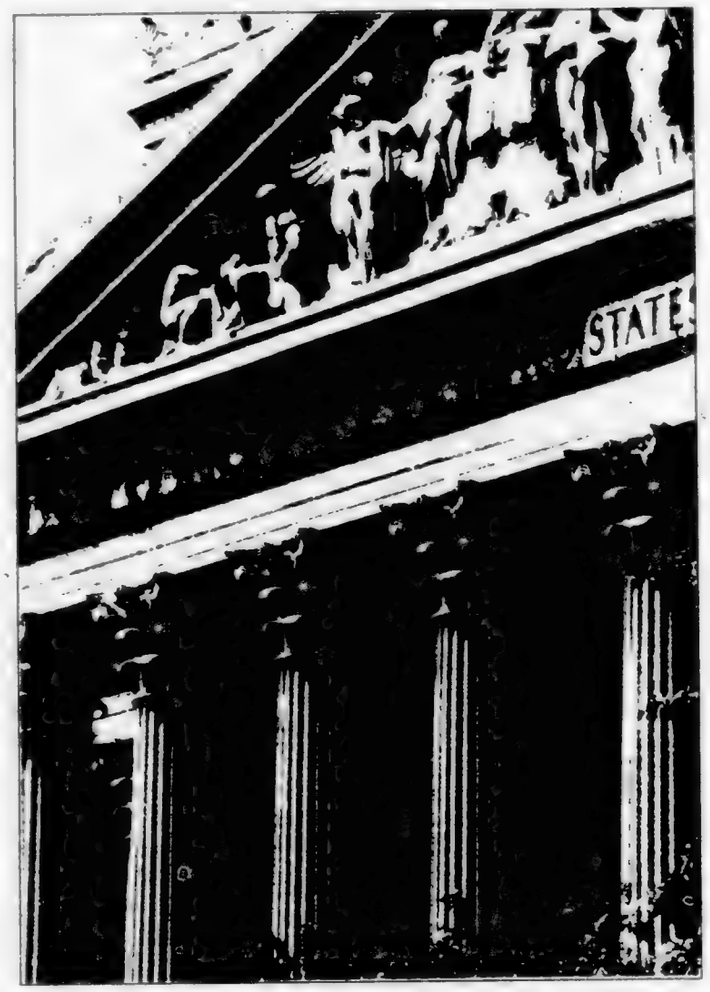
Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.



LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$26.00 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$24.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

For information on briefings in Washington, DC, see announcement on the inside cover of this issue

Now Available Online

Code of Federal Regulations

via

GPO Access

(Selected Volumes)

Free, easy, online access to selected *Code of Federal Regulations (CFR)* volumes is now available via *GPO Access*, a service of the United States Government Printing Office (GPO). *CFR* titles will be added to *GPO Access* incrementally throughout calendar years 1996 and 1997 until a complete set is available. GPO is taking steps so that the online and printed versions of the *CFR* will be released concurrently.

The *CFR* and *Federal Register* on *GPO Access*, are the official online editions authorized by the Administrative Committee of the Federal Register.

New titles and/or volumes will be added to this online service as they become available.

http://www.access.gpo.gov/nara/cfr

VOL 61 ISS 252 DEC 31 1996 UMI

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online edition of the **Federal Register** on *GPO Access* is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to gpoaccess@gpo.gov; by faxing to (202) 512–1262; or by calling toll free 1–888–293–6498 or (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Registers system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Cod of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessar4y to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Presidential Documents

Title 3—

The President

Executive Order 13033 of December 27, 1996

Adjustments of Certain Rates of Pay and Allowances

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the laws cited herein, it is hereby ordered as follows:

Section 1. *Statutory Pay Systems.* The rates of basic pay or salaries of the statutory pay systems (as defined in 5 U.S.C. 5302(1)), as adjusted under 5 U.S.C. 5303(a), are set forth on the schedules attached hereto and made a part hereof:

(a) The General Schedule (5 U.S.C. 5332(a)) at Schedule 1;

(b) The Foreign Service Schedule (22 U.S.C. 3963) at Schedule 2; and

(c) The schedules for the Veterans Health Administration of the Department of Veterans Affairs (38 U.S.C. 7306, 7404; section 301(a) of Public Law 102–40) at Schedule 3.

Sec. 2. *Senior Executive Service.* The rates of basic pay for senior executives in the Senior Executive Service, as adjusted under 5 U.S.C. 5382, are set forth on Schedule 4 attached hereto and made a part hereof.

Sec. 3. *Executive Salaries.* The rates of basic pay or salaries for the following offices and positions, which remain unchanged pursuant to section 637 of the Treasury, Postal Service, and General Government Appropriations Act, 1997, as incorporated in section 101(f) of Public Law 104–208, are set forth on the schedules attached hereto and made a part hereof:

(a) The Executive Schedule (5 U.S.C. 5312–5318) at Schedule 5;

(b) The Vice President (3 U.S.C. 104) and the Congress (2 U.S.C. 31) at Schedule 6; and

(c) Justices and judges (28 U.S.C. 5, 44(d), 135, 252, and 461(a)) at Schedule 7.

Sec. 4. *Uniformed Services.* Pursuant to section 601 of Public Law 104–201, the rates of monthly basic pay (37 U.S.C. 203(a)), the rates of basic allowances for subsistence (37 U.S.C. 402), and the rates of basic allowances for quarters (37 U.S.C. 403(a)) for members of the uniformed services and the rate of monthly cadet or midshipman pay (37 U.S.C. 203(c)) are set forth on Schedule 8 attached hereto and made a part hereof.

Sec. 5. *Locality-Based Comparability Payments.* (a) Pursuant to sections 5304 and 5304a of title 5, United States Code, locality-based comparability payments shall be paid in accordance with Schedule 9 attached hereto and made a part hereof.

(b) The Director of the Office of Personnel Management shall take such actions as may be necessary to implement these payments and to publish appropriate notice of such payments in the **Federal Register**.

Rules and Regulations

Federal Register
Vol. 61, No. 252
Tuesday, December 31, 1996

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Economic Analysis Staff

7 CFR Ch. XXXIX

Removal of CFR Chapter

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This final rule removes the regulations of the Economic Analysis Staff (EAS) relating to its organization and functions and availability of information to the public, to reflect an internal reorganization of the Department of Agriculture, which abolished EAS.

EFFECTIVE DATE: December 31, 1996.

FOR FURTHER INFORMATION CONTACT: Virginia Taylor, Office of the Chief Economist, United States Department of Agriculture, Room 227–E, Jamie L. Whitten Federal Building, Washington, D.C. 20250–3810, or call (202) 720–5955.

SUPPLEMENTARY INFORMATION: The Freedom of Information Act (FOIA) requires each Federal agency to publish in the **Federal Register** regulations regarding its organization and functions and the manner in which the public may obtain information from the agency. Part 3900 set out the organization and functions of EAS. Part 3901 set out the regulations of EAS for obtaining information under the Freedom of Information Act. Pursuant to a reorganization of the Department of Agriculture, EAS was integrated into the Office of the Chief Economist. This document removes Parts 3900 and 3901.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, notice of proposed rulemaking and opportunity for comment are not required. Further, since the rule relates to internal agency management it is exempt from the provisions of Executive Orders 12866 and 12988. In addition, this action is not a rule as defined by the Regulatory Flexibility Act, and thus is exempt from the provisions of that Act.

List of Subjects in 7 CFR Chapter XXXIX

Availability of information to the public; organizations and functions.

CHAPTER XXXIX [REMOVED]

Accordingly, under the authority of 5 U.S.C. 301 and 552, 7 CFR Chapter XXXIX is removed.

Done this 23rd of December, 1996, at Washington, D.C.

Keith Collins,

Chief Economist.

BILLING CODE 3410–01–M

Agricultural Marketing Service

7 CFR Part 58

[DA–96–10]

RIN 0581–AB43

Grading and Inspection, General Specifications for Approved Plants and Standards for Grades of Dairy Products: Revision of User Fees

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Agricultural Marketing Service is increasing the fees charged for services provided under the dairy inspection and grading program. This rule will yield an estimated $272,000 in fiscal year 1997. The program is a voluntary, user-fee program conducted under the authority of the Agricultural Marketing Act of 1946, as amended. This action increases the hourly rate to $47.00 per hour for continuous resident services and $52.00 per hour for nonresident services between the hours of 6:00 a.m. and 6:00 p.m. The fee for nonresident services between the hours of 6:00 p.m. and 6:00 a.m. would be $57.20 per hour. These fees represent an increase of four dollars per hour. The fees are being increased to cover the costs of recent salary increases and locality adjustments, the costs necessary to maintain adequate levels of service during changing production and purchasing patterns within the dairy industry, the continued full funding for standardization activities, and other operating costs.

EFFECTIVE DATE: January 5, 1997.

FOR FURTHER INFORMATION CONTACT: Lynn G. Boerger, USDA/AMS/Dairy Division, Dairy Grading Branch, Room 2750–South Building, P.O. Box 96456, Washington, D.C. 20090–6456, (202) 720–9381.

SUPPLEMENTARY INFORMATION: This rule has been determined to be not significant for purposes of Executive Order 12866 and has not been reviewed by the Office of Management and Budget.

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have preemptive effect with respect to any State or local laws, regulations or policies. This rule is not intended to have retroactive effect. There are no administrative procedures which must be exhausted prior to any judicial challenge to this rule or the application of its provisions.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA) 5 U.S.C. 601 *et seq.*, the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

There are more than 600 users of Dairy Grading Branch's inspection and grading services. Many of these users are small entities under the criteria established by the Small Business Administration (13 CFR 121.601). This rule will raise the fee charged to businesses for voluntary inspection services and grading services for dairy and related products. Even though the fee will be raised, the increase is approximately 8.6 percent and will not significantly affect these entities. These businesses are under no obligation to use these services, and any decision on their part to discontinue the use of the services would not prevent them from marketing their products. The Agricultural Marketing Service (AMS) estimates that overall this rule will yield an additional $272,000 during fiscal year 1997. The rule reflects certain fee increases needed to recover the cost of inspection and grading services rendered in accordance with the Agricultural Marketing Act (AMA) of 1946.

The Agricultural Marketing Service (AMS) has determined that this action will not have a significant impact on a

VOL 61 ISS 252 DEC 31 1996 UMI

substantial number of small entities, as defined in the Regulatory Flexibility Act (5 U.S.C. 601).

The Agricultural Marketing Act of 1946, as amended, authorizes the Secretary of Agriculture to provide Federal dairy grading and inspection services that facilitate marketing and help consumers obtain the quality of dairy products they desire. The Act provides that reasonable fees be collected from the users of the services to cover, as nearly as practicable, the cost of maintaining the program.

Since the costs of the grading program are covered entirely by user fees, it is essential that fees be increased when necessary to cover the cost of maintaining a financially self-supporting program. The last fee increase under this program became effective on October 1, 1995. Since that time, Congress increased the salaries of Federal employees by 2.9 percent as of January 7, 1996, which included locality pay. Also, there have been normal increases in other nonpay operating costs that include utilities, office space, and reimbursable travel. In addition, recent congressional action may result in additional salary increases of 3.0 percent in 1997. Although the program's operating reserves were adequate to cover the January 7, 1996, salary increase, this will not be the case for 1997 salary increases, and a fee increase is needed.

The grading program fees need to be increased to cover the costs associated with maintaining adequate levels of service during shifting production patterns within the dairy industry. The industry changes include plant consolidations, geographical shifts of dairy production areas, and changes in the types of dairy products being manufactured and offered for inspection and grading services. To minimize the necessary fee increase, the Department has initiated cost-reduction efforts which include the reduction of staff and program overhead.

On November 14, 1996, the Agricultural Marketing Service published in the **Federal Register** (61 FR 58345) for public comment a document proposing a $4.00 increase in the hourly fee for both resident and nonresident programs. No comments were received.

Pursuant to 5 U.S.C. 553, it is hereby found that good cause exists for not delaying the effective date of this action until 30 days after publication of this final rule in the **Federal Register**. A revenue shortfall warrants putting the higher rates into effect as quickly as possible. The increase in fees is essential for effective management and operation of the program and to satisfy the intent of the Agricultural Marketing Act of 1946. A proposed rule setting forth proposed fee increases was published in the **Federal Register** on November 14, 1996 (61 FR 58345). Therefore, the provisions of this final rule are known to interested parties.

Accordingly, the program fees are being increased as set forth below.

Program Changes Adopted in the Final Rule

This rule document makes the following changes in the regulations implementing the dairy inspection and grading program:

1. Increases the hourly fee for nonresident services from $48.00 to $52.00 for services performed between 6:00 a.m. and 6:00 p.m. The nonresident hourly rate is charged to users who request an inspector or grader for particular dates and amounts of time to perform specific grading and inspection activities. These users of nonresident services are charged for the amount of time required to perform the task and undertake related travel plus travel costs.

2. Increases the hourly fee for continuous resident services from $43.00 to $47.00. The resident hourly rate is charged to those who are using grading and inspection services performed by an inspector or grader assigned to a plant on a continuous, year-round resident basis.

List of Subjects in 7 CFR Part 58

Dairy products, Food grades and standards, Food labeling, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR Part 58 is amended as follows:

PART 58–GRADING AND INSPECTION, GENERAL SPECIFICATIONS FOR APPROVED PLANTS AND STANDARDS FOR GRADES OF DAIRY PRODUCTS

1. The authority citation for Part 58 continues to read as follows:

Authority: 7 U.S.C. 1621–1627.

2. Section 58.43 is revised to read as follows:

§ 58.43 Fees for inspection, grading, and sampling.

Except as otherwise provided in §§ 58.38 through 58.46, charges shall be made for inspection, grading, and sampling service at the hourly rate of $52.00 for service performed between 6:00 a.m. and 6:00 p.m. and $57.20 for service performed between 6:00 p.m. and 6:00 a.m., for the time required to perform the service calculated to the nearest 15-minute period, including the time required for preparation of certificates and reports and the travel time of the inspector or grader in connection with the performance of the service. A minimum charge of one-half hour shall be made for service pursuant to each request or certificate issued.

3. Section 58.45 is revised to read as follows:

§ 58.45 Fees for continuous resident services.

Irrespective of the fees and charges provided in §§ 58.39 and 58.43, charges for the inspector(s) and grader(s) assigned to a continuous resident program shall be made at the rate of $47.00 per hour for services performed during the assigned tour of duty. Charges for service performed in excess of the assigned tour of duty shall be made at a rate of 1½ times the rate stated in this section.

Dated: December 24, 1996.

Lon Hatamiya,

Administrator.

BILLING CODE 3410–02–P

Federal Crop Insurance Corporation

7 CFR Parts 401 and 457

RIN 0563–AB03

Common Crop Insurance Regulations; Florida Citrus Fruit Crop Insurance Provisions

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) finalizes specific crop provisions for the insurance of Florida citrus. The provisions will be used in conjunction with the Common Crop Insurance Policy Basic Provisions, which contain standard terms and conditions common to most crops. The intended effect of this action is to provide policy changes to better meet the needs of the insured, include the current Florida Citrus Endorsement with the Common Crop Insurance Policy for ease of use and consistency of terms, and to restrict the effect of the current Florida Citrus Endorsement to the 1997 and prior crop years.

EFFECTIVE DATE: January 30, 1997.

FOR FURTHER INFORMATION CONTACT: Bill Klein, Program Analyst, Research and Development Division, Product Development Branch, Federal Crop Insurance Corporation, United States

Department of Agriculture, 9435 Holmes Road, Kansas City, MO 64131, telephone (816) 926–7730.

SUPPLEMENTARY INFORMATION:

Executive Order No. 12866

The Office of Management Budget (OMB) has determined this rule to be exempt for the purposes of Executive Order No. 12866, and, therefore, this rule has not been reviewed by OMB.

Paperwork Reduction Act of 1995

The information collection requirements contained in these regulations were previously approved by OMB pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35) under OMB control number 0563–0003 at the proposed rule stage.

The amendments set forth in this final rule contains information collections that have been cleared by OMB under the provisions of 44 U.S.C. chapter 35.

No public comments were received.

Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on state, local, and tribal governments and the private sector.

This rule contains no Federal mandates (under the regulatory provisions of title II of the UMRA) of state, local, and tribal governments or the private sector. Thus, this rule is not subject to the requirements of sections 202 and 205 of the UMRA.

Executive Order No. 12612

It has been determined under section 6(a) of Executive Order No. 12612, Federalism, that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The provisions contained in this rule will not have a substantial direct effect on states or their political subdivisions, or on the distribution of power and responsibilities among the various levels of government.

Regulatory Flexibility Act

This regulation will not have a significant impact on a substantial number of small entities. New provisions included in this rule will not impact small entities to a greater extent than large entities. Under the current regulations, all producers are required to complete an application and acreage report. If the crop is damaged or destroyed, insureds are required to give notice of loss and provide the necessary information to complete a claim for indemnity. This regulation does not alter those requirements. The amount of work required of the insurance companies delivering and servicing these policies will not increase significantly from the amount of work currently required. This rule does not have any greater or lesser impact on the producer. Therefore, this action is determined to be exempt from the provisions of the Regulatory Flexibility Act (5 U.S.C. 605), and no Regulatory Flexibility Analysis was prepared.

Federal Assistance Program

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

Executive Order No. 12372

This program is not subject to the provisions of Executive Order No. 12372, which require intergovernmental consultation with state and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115, June 24, 1983.

Executive Order No. 12778

The Office of the General Counsel has determined that these regulations meet the applicable standards provided in sections 2(a) and 2(b)(2) of Executive Order No. 12778. The provisions of this rule will not have a retroactive effect prior to the effective date. The provisions of this rule will preempt state and local laws to the extent such state and local laws are inconsistent herewith. The administrative appeal provisions published at 7 CFR parts 11 and 780 must be exhausted before action for judicial review may be brought.

Environmental Evaluation

This action is not expected to have a significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

National Performance Review

This regulatory action is being taken as part of the National Performance Review Initiative to eliminate unnecessary or duplicative regulations and improve those that remain in force.

Background

On Friday, March 15, 1996, FCIC published a proposed rule in the **Federal Register** at 61 FR 10699–10703 to add to the Common Crop Insurance Regulations (7 CFR part 457), a new section, 7 CFR 457.107 (Florida Citrus Fruit Crop Insurance Provisions). The new provisions will replace and supersede the current provisions for insuring Florida citrus found at 7 CFR 401.143 and will be effective for the 1998 and succeeding crop years. Section 401.143 will also be amended to restrict its effect to the 1997 and prior crop years. By separate rule, § 401.143 will be removed and that section will be reserved.

Following publication of the proposed rule, the public was afforded 30 days to submit written comments, data, and opinions. A total of 32 comments were received from the crop insurance industry. The comments received and FCIC's response are as follows:

Comment: The crop insurance industry expressed concern that the proposed changes shown in the **Federal Register** were to be effective for the 1997 crop year.

Response: FCIC originally intended that the proposed rule be made final prior to the contract change date and in sufficient time to provide the industry and insureds time to be made aware of the changes and make adjustments as needed. When the proposed rule was not published until March 15, 1996, it was no longer possible to publish a final rule prior to the April 15, 1996, contract change date. The relevant sections have been amended to specify that the changes will not be implemented until the 1998 crop year.

Comment: One comment from the crop insurance industry questioned why optional units were allowed by both (or either) legal description and non-contiguous land for Florida citrus fruit, whereas in other citrus policies, optional units are offered by one or the other or by non-contiguous land only. They questioned whether regional differences are significant enough to preclude standardization.

Response: The unit structure in the proposed rule was intended to be the same as that contained in the current policy. The current policy allows optional units by legal description or by non-contiguous acreage. The provision has been amended to clarify the apparent ambiguity created in the proposed rule.

Comment: The crop insurance industry stated that the proposed varying levels of deductibles ranging from 25 percent to 50 percent of damage represents a substantial change from the current 10 percent of damage deductible and "will create an insurance product that is substantially deficient in providing desired protection for growers." They requested that the 10 percent deductible level be reinstated in the final rule.

Response: FCIC does not have the authority to offer a 10 percent

deductible for any crop. Section 508(b)(6) and 508(c)(6) of the Federal Crop Insurance Act, as amended, only allows coverage up to 85 percent of the individual yield, which requires more than 15 percent damage before an indemnity would be due. FCIC does not currently offer 85 percent coverage for any actual production history based policy. Implementation of an 85 percent coverage for Florida citrus fruit is being considered for the 1998 crop year. If approved, this coverage level will be shown on the County Actuarial Table. Therefore, no change has been made in the provisions.

Comment: The crop insurance industry expressed concern that the only justification for changing the 10 percent deductible was to make the provisions more compatible with the Common Crop Insurance Policy. The current program participation is high with the implementation of crop insurance reform and the loss ratio is low, in short the program works. It appears that change is only for change's sake.

Response: Although the timing of this change coincides with the Florida Citrus Fruit Crop Insurance Provisions being brought under the Common Crop Insurance Policy, the change is mandated by the above stated limitation contained in the Federal Crop Insurance Act, as amended.

Comment: The crop insurance industry expressed concern that the 10 percent deductible change would undermine their attempts to encourage "buy-up" sales. Producers buy CAT because they believe that the current program (limited and full coverage) is overpriced.

Response: FCIC has no choice but to increase the deductible to be in compliance with the Federal Crop Insurance Act, as amended. With the new coverage levels, "buy up" coverage should provide a level of coverage that will meet the insured's risk management needs.

Comment: One comment from the crop insurance industry criticized FCIC for not taking into account the needs of producers in making rules. While the proposed changes may favorably impact premium, the coverage will no longer be reasonable.

Response: FCIC met with producers and with the Florida Citrus Association, who both provided input and suggestions for the draft Florida Citrus Fruit Crop Provisions. Although FCIC is aware of the industry's opposition to replacing the 10 percent deductible with a proportional deductible, the Federal Crop Insurance Act, as amended, does not allow a 10 percent deductible.

Comment: One comment from the crop insurance industry suggested that a large majority of producers take CAT coverage because they feel the premium for limited and additional coverage is too high based on their assessment of the risk. The program is working with the current deductibles and does not need to be changed.

Response: FCIC has no choice but to change the current coverage levels. Under the new program, a series of different level deductibles will have separate rates and will allow producers to chose more appropriate levels of coverage, which should result in increased participation in limited and buy-up insurance.

Comment: One comment from the crop insurance industry was a request that the language in section 3(a), "You may select only one percent of the maximum dollar amount of insurance * * *", be clarified. They understand the language to mean that only one level of coverage may be selected for each type of citrus fruit insured.

Response: FCIC has added language to clarify the intent of section 3(a). If more than one kind of citrus fruit is included within a type and each citrus fruit has a different maximum amount of insurance, the insured must select the same coverage level for each kind of citrus fruit. For example, if an insured chooses the 75 percent coverage level for Naval Oranges, then the insured must also choose the 75 percent coverage level for Tangerines since both are included as Type IV citrus fruit.

Comment: One comment from the crop insurance industry suggests that neither ineligibility nor a reduction of benefits should be based on the age of the citrus tree. They contend that trees planted at a higher density can produce a marketable crop in as little as three years. They propose that eligibility be based on production of 100 boxes per acre on a unit basis.

Response: The proposed rule for Florida Citrus Fruit Crop Insurance Provisions authorized insuring trees that have not reached the fifth growing season after being set out either in the Special Provisions or by written agreement. Thus, if the 100 box requirement proves reasonable after review of the grove's production potential, coverage can be provided. Therefore, no change will be made in the provisions.

Comment: One comment from the crop insurance industry maintained that adding the proportional deductible to limited and additional insurance would serve to push producers to CAT.

Response: Currently more than 90 percent of the Florida citrus fruit producers have opted for CAT coverage, even with the availability of a 10 percent deductible. With a properly rated proportional deductible, insureds should find the limited and additional levels of insurance to be more affordable and a better risk management tool.

Comment: The crop insurance industry recommended establishing a contract change date earlier than March 15. Recommendations ranged from December 31 to February 28.

Response: FCIC would be willing to move the contract change date earlier if sufficient price and yield data were available to accurately estimate amounts of insurance. Currently, the data available is incomplete before February and the Actuarial Division believes that moving the date earlier than March 15 will not allow sufficient time to utilize the most recent information. For example, a major January freeze will have a significant effect on citrus fruit production and prices. Therefore, no change will be made to the provisions.

Comment: The crop insurance industry recommended that two amounts of insurance be offered. One amount would apply to trees 5 to 7 years and the other for trees more than 7 years. The five year limit could be waived if after inspection it was determined that the acreage could produce 100 boxes per acre.

Response: The current actuarial basis for insuring three age groups was based on National Agricultural Statistics Service (NASS) data and extensive research. If further study indicates that insuring based on two age groups would be more equitable, this change can be made in the actuarial table and need not be specified in the policy. Therefore, no change will be made to the provisions.

Comment: One comment from the crop insurance industry recommended that reclaimed land be made insurable. Insurability would be based on an inspection for both buy-up and CAT, with no written agreement required.

Response: There is reclaimed land that has been rated and, therefore, it is insurable. Other reclaimed land has not been rated and is not insurable except by written agreement. The insurability of reclaimed lands is provided in the Special Provisions. The rating of unrated reclaimed land is an underwriting issue which will be considered for possible future implementation.

Comment: The crop insurance industry recommended that Type II (Late Oranges) be covered as fresh fruit if records demonstrate the crop has been sold as fresh. Either designate Type II as

"fresh fruit" or add varieties to Type II such as 024 Late Orange Juice, and 025 Late Orange Fresh.

Response: FCIC agrees with the concept of insuring certain late oranges as fresh fruit. After studying the recommendation it was determined that these late oranges should be added to Type VII, as Late Oranges "Fresh".

Comment: The crop insurance industry recommended that insurance attach at fruit set so that there would be no gap in coverage.

Response: FCIC does not have sufficient underwriting information to change the date insurance attaches at this time. FCIC is currently researching other methods for insuring Florida citrus and one area of study is the date insurance should attach.

Comment: One comment from the crop insurance industry recommended that FCIC cover excessive rain and excessive wind damage that did not occur in conjunction with a hurricane or tornado. Fresh fruit blown from the tree and fresh fruit that is scarred or adulterated and cannot be marketed as fresh fruit due to excessive rain or wind would be adjusted on a fresh fruit basis.

Response: Insuring damage resulting from excess wind or rain not associated with a hurricane or tornado would greatly increase risk and the associated premium. This change could not be made without a notice and comment period. Therefore, no change will be made to the provisions.

Comment: One comment from the crop insurance industry stated that some flexibility may be needed for obtaining signatures and for mail time if a transfer takes place shortly before the acreage reporting date, but the transfer form does not reach the company office until after the acreage reporting date.

Response: If the transferor or the transferee signs the properly completed transfer form and gives the form to the crop insurance agent on or before the acreage reporting date, this requirement will be met. Therefore, no change will be made to the provisions.

Comment: One comment from the crop insurance industry recommended revising the language in section 10(b)(2)(ii), "Citrus fruit will be considered undamaged potential production if it is: (i) Or could be marketed as fresh fruit;" to "Citrus fruit will be considered undamaged potential production if it is: (i) Marketed or could be marketed as fresh fruit;".

Response: FCIC agrees and has revised the provision accordingly.

Comment: One comment from the crop insurance industry recommended that section 10(c)(2)(ii) be amended to delete pink and red grapefruit because proposed changes make it a "juice only" fruit.

Response: FCIC agrees with the comment and has deleted the words "pink and red grapefruit of Type III" from section 10(c)(2)(ii).

Comment: One comment from the crop insurance industry recommended that pink and red grapefruit of citrus Type III needs to be omitted from the fruit that are considered a total loss as a result of hail damage in section 10(h).

Response: FCIC agrees with the comment and has deleted the words "pink and red grapefruit of citrus Type III" from section 10(h).

Comment: One comment from the crop insurance industry recommended that the crop provisions be expanded to allow insureds to insure one crop of grapefruit as fresh fruit and a separate crop as juice.

Response: FCIC agrees to implement the recommendation and has removed the language in section 6 which required producers to insure all their grapefruit under a single type. Acreage of fresh and processing grapefruit will be identified separately on the acreage report.

Comment: The crop insurance industry recommended that the levels of juice content for types I, II, and III used to determine damage whenever a producer's records are deemed unacceptable be amended as follows:

Type I—52 pounds of juice per box
Type II—54 pounds of juice per box
Type III—45 pounds of juice per box

These recommendations are based on improvements in processing technologies and processing equipment implemented during the past few years and documented weighted averages for the last three seasons.

Response: FCIC agrees and has made the changes in section 10.

Comment: One comment from the crop insurance industry recommended that the written agreement language be more flexible and allow continuous coverage from year to year if no substantive changes occur.

Response: Written agreements are intended to provide a deviation from the terms of the policy or to extend coverage. If it is appropriate to continue the practice, the policy or Special Provisions should be amended to include the change or new coverage. Therefore, no change will be made to the provisions.

In addition to the changes described above, and minor reformatting and word changes for clarity, FCIC has made the following changes:

1. Section 1—Added the definition of "amount of insurance (acre)" "FSA" and changed the definition of "citrus fruit type" to add Late Oranges Fresh to Type VII, and changed the definition of "good farming practices," "non-contiguous," and "written agreement," for clarification.

2. Section 6—Removed language that provided that we could exclude from insurance, or limit the amount of insurance on, any acreage that was not insured the previous crop year. This language was not deemed to be necessary because because we currently inspect new acreage or acreage added to an existing unit.

3. Section 8(a)(1)—Clarified that if the application is submitted less than 10 days before the date insurance attaches, insurance will not attach until 10 days after receipt of the application. This provision is designed to prevent producers from applying for insurance only when they believe a loss is probable.

4. Section (8)(b)—Clarify that no premium will be due if the producer relinquishes an insurable interest in any insurable acreage of Florida citrus on or before the acreage reporting date of any crop year, unless a transfer of coverage and right to an indemnity is completed and the insurance provider is notified in writing on or before the acreage reporting date. The transferee must meet the eligibility requirements contained in this policy and the form must be subsequently approved by the insurance provider.

List of Subjects in 7 CFR Parts 401 and 457

Crop insurance, Florida citrus endorsement, Florida citrus fruit.

Final Rule

Accordingly, for the reasons set forth in the preamble, the Federal Crop Insurance Corporation hereby amends 7 CFR parts 401 and 457 as follows:

PART 401—GENERAL CROP INSURANCE REGULATIONS—REGULATIONS FOR THE 1988 AND SUBSEQUENT CONTRACT YEARS

1. The authority citation for 7 CFR part 401 continues to read as follows:

Authority: 7 U. S. C. 1506(l), 1506(p).

2. Section 401.143 introductory paragraph is revised to read as follows:

§ 401.143 Florida citrus endorsement.

The provisions of the Florida Citrus Endorsement, for the 1990 through 1997 crop years are as follows:

* * * * *

PART 457—COMMON CROP INSURANCE REGULATIONS; REGULATIONS FOR THE 1994 AND SUBSEQUENT CONTRACT YEARS

3. The authority citation for 7 CFR part 457 continues to read as follows:

Authority: 7 U.S.C. 1506(l), 1506(p).

4. 7 CFR part 457 is amended by adding a new § 457.107 to read as follows:

§ 457.107 Florida Citrus Fruit Crop Insurance Provisions.

The Florida Citrus Fruit Crop Insurance Provisions for the 1998 and succeeding crop years are as follows:

Department of Agriculture

Federal Crop Insurance Corporation

Florida Citrus Fruit Crop Provisions

If a conflict exists among the Basic Provisions (§ 457.8), these Crop Provisions, and the Special Provisions; the Special Provisions will control these Crop Provisions and the Basic Provisions; and these Crop Provisions will control the Basic Provisions.

1. Definitions

Amount of insurance (acre)—The dollar amount determined by multiplying the Reference Maximum Dollar Amount shown on the Actuarial Table for the citrus fruit times the coverage level you elect, times your share.

Box—A standard field box as prescribed in the State of Florida Citrus Fruit Laws.

Citrus fruit type—Any of the following:

(1) Type I—Early and mid-season oranges;

(2) Type II—Late oranges juice;

(3) Type III—Grapefruit for which freeze damage will be adjusted on a juice basis;

(4) Type IV—Navel Oranges, Tangelos and Tangerines;

(5) Type V—Murcott Honey Oranges (also known as Honey Tangerines) and Temple Oranges;

(6) Type VI—Lemons and Limes; and

(7) Type VII—Grapefruit for which freeze damage will be adjusted on a fresh fruit basis, and late oranges fresh.

Days—Calendar days.

FSA—Farm Service Agency, an agency of the United States Department of Agriculture or a successor agency.

Freeze—The formation of ice in the cells of the fruit caused by low air temperatures.

Good farming practices—The cultural practices generally in use in the county for the crop to make normal progress toward maturity and produce the expected yield for the type and age of citrus fruit, and are those recognized by the Cooperative State Research, Education, and Extension Service as compatible with agronomic and weather conditions in the county.

Harvest—The severance of mature citrus fruit from the tree by pulling, picking, or any other means, or collecting the marketable fruit from the ground.

Hurricane—A windstorm classified by the U.S. Weather Service as a hurricane.

Interplanted—Acreage on which two or more crops are planted in any form of alternating or mixed pattern.

Non-contiguous land—Any two or more tracts of land whose boundaries do not touch at any point, except that land separated only by a public or private right-of-way, waterway, or an irrigation canal, will be considered as contiguous.

Potential production—Citrus fruit that would have been produced had damage not occurred, including citrus fruit that:

(1) Was harvested before damage occurred;

(2) Remained on the tree after damage occurred; and

(3) Was lost from either an insured or uninsured cause;

But not including citrus fruit that:

(1) Was lost before insurance attached for any crop year;

(2) Was lost by normal dropping; or

(3) Any tangerines that normally would not meet the 210 pack size (2 and 4/16 inch minimum diameter) under United States Standards by the end of the insurance period for tangerines.

Written agreement—A written document that alters designated terms of this policy in accordance with section 11.

2. Unit Division

(a) A unit as defined in section 1 (Definitions) of the Basic Provisions (§ 457.8), (basic unit) will be divided into basic units by each citrus fruit type shown in section 1 of these crop provisions or designated in the Special Provisions.

(b) Unless limited by the Special Provisions, these basic units may be divided into optional units if, for each optional unit you meet all the conditions of this section or if a written agreement to such division exists.

(c) Basic units may not be divided into optional units on any basis other than as described in this section.

(d) If you do not comply fully with these provisions, we will combine all optional units that are not in compliance with these provisions into the basic unit from which they were formed. We will combine the optional units at any time we discover that you have failed to comply with these provisions. If failure to comply with these provisions is determined to be inadvertent, and the optional units are combined into a basic unit, that portion of the additional premium paid for the optional units that have been combined will be refunded to you for the units combined.

(e) All optional units you selected for the crop year must be identified on the acreage report for that crop year.

(f) Each optional unit must meet one of the following criteria, as applicable:

(1) *Optional Units by Section, Section Equivalent, or Farm Service Agency (FSA) Farm Serial Number:* Optional units may be established if each optional unit is located in a separate legally identified section. In the absence of sections, we may consider parcels of land legally identified by other methods of measure including, but not limited to Spanish grants, railroad surveys, leagues, labors, or Virginia Military Lands, as the equivalent of sections for unit purposes. In areas that have not been surveyed using the systems identified above, or another system approved by us, or in areas where such systems exist but boundaries are not readily discernable, each optional unit must be located in a separate farm identified by a single FSA Farm Serial Number; or

(2) *Optional Units on Acreage Located on Non-Contiguous Land:* Optional units may be established if each optional unit is located on non-contiguous land.

3. Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities

In addition to the requirements of section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8):

(a) You may select only one coverage level for each Florida citrus fruit type shown in section 1 of these crop provisions or designated in the Special Provisions, that you elect to insure. If different amounts of insurance are available for citrus fruit within a type, you must select the same coverage level for each citrus fruit. For example, if you choose the 75 percent coverage level for a specific citrus fruit within a type, you must also choose the 75 percent coverage level for all other citrus fruit within that type.

(b) In lieu of the production reporting date contained in section 3 (Insurance Guarantees, Coverage Levels, and Prices for Determining Indemnities) of the Basic Provisions (§ 457.8), potential production for each unit will be determined during loss adjustment.

(c) By the sales closing date contained in the Special Provisions, for the first year of insurance for acreage interplanted with another citrus fruit crop, and anytime the planting pattern of such acreage is changed, you must report the following:

(1) The age of the interplanted trees and type if applicable;

(2) The planting pattern; and

(3) Any other information we request in order to establish your amount of insurance.

(d) We will reduce acreage or the amount of insurance or both, as necessary, based on our estimate of the effect of the interplanted citrus fruit trees on the insured citrus fruit crop. If you fail to notify us of any circumstance that may reduce the acreage or amount of insurance, we will reduce the acreage or amount of insurance or both as necessary any time we become aware of the circumstance.

4. Contract Changes

In accordance with section 4 (Contract Changes) of the Basic Provisions (§ 457.8), the contract change date is March 15 preceding the cancellation date.

5. Cancellation and Termination Dates

In accordance with section 2 (Life of Policy, Cancellation, and Termination) of the Basic Provisions (§ 457.8), the cancellation date is April 30 preceding the crop year. The termination date is April 30 of the crop year.

6. Insured Crop

(a) In accordance with section 8 (Insured Crop) of the Basic Provisions (§ 457.8), the crop insured will be all acreage of each citrus fruit type that you elect to insure, in which you have a share, that is grown in the county shown on the application, and for which a premium rate is quoted in the actuarial table.

VOL 61 ISS 252 DEC 31 1996 UMI

(b) In addition to the citrus fruit not insurable in section 8 (Insured Crop) of the Basic Provisions (§ 457.8), we do not insure any citrus fruit:

(1) That cannot be expected to mature each crop year within the normal maturity period for the type;

(2) Produced by trees that have not reached the fifth growing season after being set out, unless otherwise provided in the Special Provisions or by a written agreement to insure such citrus fruit;

(3) Of "Meyer Lemons" and oranges commonly known as "Sour Oranges" or "Clementines"; or

(4) Of the Robinson tangerine variety, for any crop year in which you have elected to exclude such tangerines from insurance. (You must elect this exclusion prior to the crop year for which the exclusion is to be effective, except that for the first crop year you must elect this exclusion by the later of April 30 or the time you submit the application for insurance.)

(c) Upon our approval, prior to the date insurance attaches, you may elect to insure or exclude from insurance any insurable acreage that has a potential production of less than 100 boxes per acre. If you:

(1) Elect to insure such acreage, we will consider the potential production to be 100 boxes per acre when determining the amount of loss; or

(2) Elect to exclude such acreage, we will disregard the acreage for all purposes related to this contract.

(d) In addition to the provisions in Section 6(f) (Report of Acreage) of the Basic Provisions (§ 457.8), if you fail to notify us of your election to insure or exclude acreage, and the potential production from such acreage is 100 or more boxes per acre, we will determine the percent of damage on all of the insurable acreage for the unit, but will not allow the percent of damage for the unit to be increased by including such acreage.

7. Insurable Acreage

In lieu of the provisions in section 9 (Insurable Acreage) of the Basic Provisions (§ 457.8), that prohibit insurance attaching to a crop planted with another crop, citrus fruit interplanted with another citrus fruit crop is insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.

8. Insurance Period

(a) In accordance with the provisions of section 11 (Insurance Period) of the Basic Provisions (§ 457.8):

(1) Coverage begins on May 1 of each crop year, except that for the year of application if your application is received by us after April 21, but prior to May 1, insurance will attach on the 10th day after your properly completed application, acreage, and production reports are received in our local office, unless we inspect the acreage during the 10 day period and determine that it does not meet the requirements for insurability contained in your policy. You must provide any information that we require for the crop to determine the condition of the grove to be insured.

(2) The calendar date for the end of the insurance period for each crop year is:

(i) January 31 for tangerines and navel oranges;

(ii) April 30 for lemons, limes, tangelos, early and mid-season oranges; and

(iii) June 30 for late oranges, grapefruit, Temple, and Murcott Honey Oranges.

(b) In addition to the provisions of section 11 (Insurance Period) of the Basic Provisions (§ 457.8):

(1) If you acquire an insurable share in any insurable acreage after coverage begins, but on or before the acreage reporting date of any crop year, and if after inspection we consider the acreage acceptable, then insurance will be considered to have attached to such acreage on the calendar date for the beginning of the insurance period.

(2) If you relinquish your insurable share on any insurable acreage of citrus fruit on or before the acreage reporting date of any crop year, insurance will not be considered to have attached to, no premium will be due and no indemnity paid for, such acreage for that crop year unless:

(i) A transfer of coverage and right to an indemnity, or a similar form approved by us, is completed by all affected parties;

(ii) We are notified by you or the transferee in writing of such transfer on or before the acreage reporting date; and

(iii) The transferee is eligible for crop insurance.

9. Causes of Loss

(a) In accordance with the provisions of section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), insurance is provided only against the following causes of loss that occur within the insurance period:

(1) Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the grove;

(2) Freeze;

(3) Hail;

(4) Hurricane; or

(5) Tornado.

(b) In addition to the causes of loss excluded in section 12 (Causes of Loss) of the Basic Provisions (§ 457.8), we will not insure against damage or loss of production due to:

(1) Any damage to the blossoms or trees; or

(2) Inability to market the citrus fruit for any reason other than actual physical damage from an insurable cause specified in this section. For example, we will not pay you an indemnity if you are unable to market due to quarantine, boycott, or refusal of any person to accept production.

10. Settlement of Claim

(a) We will determine your loss on a unit basis. In the event you are unable to provide separate acceptable production records:

(1) For any optional units, we will combine all optional units for which such production records were not provided; or

(2) For any basic units, we will allocate any commingled production to such units in proportion to our liability on the harvested acreage for the units.

(b) In the event of loss or damage covered by this policy, we will settle your claim by:

(1) Calculating the amount of insurance for the unit by multiplying the number of acres by the respective dollar amount of insurance per acre for the citrus fruit and multiplying that result by your share;

(2) Calculating the average percent of damage to the respective citrus fruit, rounded to the nearest tenth of a percent (0.1%). The percent of damage will be the ratio of the number of boxes of citrus fruit considered damaged from an insured cause divided by the undamaged potential production. Citrus fruit will be considered undamaged potential production if it is:

(i) Marketed or could be marketed as fresh fruit;

(ii) Harvested prior to inspection by us; or

(iii) Harvested within 7 days after a freeze;

(3) Subtracting the coverage level percentage from 100 percent;

(i) Subtracting this result from the result of section (10)(b)(2); and

(ii) If the result section (10)(b)(3)(i) is positive, dividing this result by the coverage level percentage;

(4) Multiplying the result of section (10)(b)(3)(ii) by the amount of insurance for the unit for the respective citrus fruit.

(For example, if the average percent of damage is 70 percent and the coverage level is 75 percent (the deductible is 25 percent), the amount payable is 60 percent times the amount of insurance (70% damage - 25 % level deductible)=45% (45% ÷ 75%) 60% adjusted damage times the amount of insurance); and

(5) Totaling all such results of section (10)(b)(4) to determine the amount payable for the unit.

(c) Citrus fruit of Types IV, V, and VII that are seriously damaged by freeze, as determined by a fresh-fruit cut of a representative sample of fruit in the unit in accordance with the applicable provisions of the State of Florida Citrus Fruit laws, and that are not or could not be marketed as fresh fruit, will be considered damaged to the following extent:

(1) If less than 16 percent of the fruit in a sample shows serious freeze damage, the fruit will be considered undamaged; or

(2) If 16 percent or more of the fruit in a sample shows serious freeze damage, the fruit will be considered 50 percent damaged, except that:

(i) For tangerines of Type IV, damage in excess of 50 percent will be the actual percent of damaged fruit; and

(ii) Citrus of Types IV (except tangerines), V, and VII, if it is determined that the juice loss in the fruit exceeds 50 percent, such percent will be considered the percent of damage.

(d) Notwithstanding the provisions of section 10(c) of these crop provisions as to citrus fruit of Types IV, V, and VII, in any unit that is mechanically separated using the specific-gravity (floatation) method into undamaged and freeze-damaged fruit, the amount of damage will be the actual percent of freeze-damaged fruit not to exceed 50 percent and will not be affected by subsequent fresh-fruit marketing. However, the 50 percent limitation on mechanically-separated, freeze-damaged fruit will not apply to tangerines of citrus fruit Type IV.

(e) Any citrus fruit of Types I, II, III, and VI damaged by freeze, but that can be processed into products for human

VOL 61 ISS 252 DEC 31 1996 UMI

consumption, will be considered as marketable for juice. The percent of damage will be determined by relating the juice content of the damaged fruit to:

(1) The average juice content of the fruit produced on the unit for the three previous crop years based on your records, if they are acceptable to us; or

(2) The following juice content, if acceptable records are not furnished:

(i) Type I—52 pounds of juice per box
(ii) Type II—54 pounds of juice per box
(iii) Type III—45 pounds of juice per box
(iv) Type VI—43 pounds of juice per box

(f) Any citrus fruit on the ground that is not collected and marketed will be considered as 100 percent damaged if the damage was due to an insured cause.

(g) Any citrus fruit that is unmarketable either as fresh fruit or as juice because it is immature, unwholesome, decomposed, adulterated, or otherwise unfit for human consumption due to an insured cause will be considered as 100 percent damaged.

(h) Citrus fruit of Types IV, V, and VII that are unmarketable as fresh fruit due to serious damage from hail as defined in the applicable United States Standards for Grades of Florida fruit will be considered totally lost.

11. Written Agreements

Designated terms of this policy may be altered by written agreement in accordance with the following:

(a) You must apply to us in writing for each written agreement no later than the sales closing date, except as provided in section 11(e);

(b) The application for a written agreement must contain all variable terms of the contract between you and us that will be in effect if the written agreement is not approved;

(c) If approved by us, the written agreement will include all variable terms of the contract, including, but not limited to, crop type and variety, the guarantee, premium rate, and price election;

(d) Each written agreement will be valid for one year (if the written agreement is not specifically renewed the following year, insurance coverage for subsequent crop years will be in accordance with the printed policy); and

(e) An application for a written agreement submitted after the sales closing date may be approved if, after a physical inspection of the acreage, it is determined that no loss has occurred and the crop is insurable in accordance with the policy and written agreement provisions.

Signed in Washington, DC, on December 20, 1996.

Kenneth D. Ackerman,

Manager, Federal Crop Insurance Corporation.

[FR Doc. 96–33068 Filed 12–30–96; 8:45 am]

BILLING CODE 3410–FA–P

Federal Crop Insurance Corporation

7 CFR Part 404

Commodity Credit Corporation

7 CFR Part 1437

RIN 0560–AE85

Implementation of the Noninsured Crop Disaster Assistance Program Provisions of the Federal Agriculture Improvement and Reform Act of 1996

AGENCIES: Commodity Credit Corporation, Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: This final rule moves the noninsured crop disaster assistance program (NAP) provisions currently in 7 CFR part 404 to 7 CFR part 1437, and implements the amendments to NAP made in Title I of the Federal Agriculture Improvement and Reform Act of 1996 (the 1996 Act). The 1996 Act changes the administration of the program from the Federal Crop Insurance Corporation (FCIC) to the Secretary through the Commodity Credit Corporation. The NAP program will continue to be operated through the Farm Service Agency (FSA). Other amendments include the addition of seed crops and aquaculture (including ornamental fish) as crops eligible for benefits under this part, and relaxes the acreage and production reporting requirements.

EFFECTIVE DATE: December 31, 1996.

FOR FURTHER INFORMATION CONTACT: Leona Dittus, Director, Emergency and Noninsured Assistance Program Division, FSA, USDA, AG Box 0526, P. O. Box 2415, Washington, D.C. 20013–2415. Telephone (202) 720–3168.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This final rule is issued in conformance with Executive Order 12866 and has been determined to be significant and has been reviewed by the Office of Management and Budget.

Regulatory Flexibility Act

It has been determined that the Regulatory Flexibility Act is not applicable to this rule because neither FSA nor the CCC is required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

Environmental Evaluation

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is needed.

Executive Order 12778

The final rule has been reviewed in accordance with Executive Order 12778. The provisions of this final rule preempt State laws to the extent such laws are inconsistent with the provisions of this rule. The provisions of this rule are not retroactive. Before any judicial action may be brought concerning the provisions of this rule, the administrative remedies must be exhausted.

Executive Order 12372

This program is not subject to the provisions of Executive Order 12372, which require intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

Unfunded Mandates

The provisions of the Unfunded Mandates Reform Act of 1995 are not applicable to this rule because neither FSA nor CCC is required by 5 U.S.C. 553 or any other provision of the law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

Small Business Regulatory Enforcement Fairness Act of 1996

The Agency gave notice of the proposed rule and accepted comments from the public prior to the publication of the final rule. After the publication of the final rule, Congress passed both the 1996 Act and the Small Business Regulatory Enforcement Fairness Act of 1996. Due to fact that this rule makes slight changes to a rule that was already final when Congress passed these two Acts, it has been determined in accordance with section 808 of the Small Business Regulatory Enforcement Fairness Act of 1996, that it is impracticable, unnecessary and contrary to the public interest to require this rule to conform to the requirements of section 801 of that Act. Accordingly, this rule is effective upon publication in the **Federal Register**.

Paperwork Reduction Act

The amendments to 7 CFR 1437 set forth in this final rule involve a change in the existing information collection requirements. In accordance with the Paperwork Reduction Act of 1995, CCC received approval from OMB for the

collection of information in this rule that is not related to acreage reports. That collection was cleared as a revision to OMB docket number 0563–0016 at the time this rule was proposed. No comments were received regarding information collections contained in OMB docket 0563–0016.

Upon analysis of the current clearances of information collections associated with the Noninsured Crop Disaster Assistance Program (NAP), CCC found that information collection of acreage reports for this program are not currently approved by OMB. The agency has submitted an emergency information collection request (ICR) to OMB for the approval of these reports as necessary for the proper functioning of the program.

A copy of this emergency ICR, with applicable supporting documentation, may be obtained from Sean O'Neill, FSA, ENAPD, NAB, room 6701–S, STOP 0526, P.O. Box 2415, Washington, DC 20013–2415. Comments and questions about the ICR listed below should be directed to the Office of Information and Regulatory Affairs, Attn. OMB Desk Officer for Agriculture, Office of Management and Budget, Room 10202, Washington, DC 20503 ((202) 395–7340).

Title: Annual Certification Requirements, Assignment of Payments, and Power of Attorney (7 CFR Parts 12, 718, 1437, and 720).

OMB Control Number: 0560–0004.

Description: To be eligible for NAP benefits, producers must report all acreage in the county of the eligible crop (for each planting in the event of multiple planting) in which the producer has a share. Because NAP assistance is calculated on a unit basis, similar to catastrophic risk protection, it is necessary that producers report all acreage of the crop in which they have an interest in the county, not just the acreage which suffered a loss. The 1996 Act mandates the use of a producer's actual production history over a four to ten year period, necessitating precise records. The FSA–578 acreage report form is used under the NAP to collect data used to determine a producer's production of a crop and loss of production (on a yield basis) in the event a disaster occurs. The acreage report is also used in determining the estimated NAP area loss for a crop. If the annual planted acreage were not known the task of determining area, crop, crop production, and producer eligibility for the NAP could be difficult.

Executive Order 12612

It has been determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The provisions contained in this rule will not have a substantial direct effect on States or their political subdivisions, or on the distribution of power and responsibilities among the various levels of government.

Federal Assistance Programs

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

Background

Title I of the Federal Agriculture Improvement and Reform Act of 1996 (the 1996 Act) enacted on April 4, 1996, changes the administration of the noninsured crop disaster assistance program (NAP) from Federal Crop Insurance (FCIC) to the Secretary of Agriculture through the Commodity Credit Corporation. NAP will continue to be operated through the Farm Service Agency. Because the program will now be administered by the Commodity Credit Corporation (CCC), the NAP regulations will be moved from 7 CFR part 404 to 7 CFR part 1437. Upon publication of this rule, the current provision for NAP will be removed from part 404 and that part will be reserved.

The regulation reflects a change in references from FCIC and FCIC Manager to CCC and Executive Vice President, CCC, or a designee. Other major changes include:

(1) Section 1437.11 is amended to include seed crops and aquacultural species (including ornamental fish) as crops eligible for benefits under this part.

(2) Section 1437.17 is amended to provide that producers are required to report production for acreage previously reported to CCC as being planted by the immediately subsequent crop year acreage reporting date for the crop.

List of Subjects in 7 CFR Parts 404 and 1437

Agricultural commodities, Disaster assistance, reporting and recordkeeping requirements.

For reasons set out in the Preamble and under the authority of 5 U.S.C. 553, 7 CFR Chapters IV and XIV are amended as set forth below:

CHAPTER XIV—[AMENDED]

1. Chapter XIV is amended by adding part 1437 to read as follows:

Part 1437—NONINSURED CROP DISASTER ASSISTANCE PROGRAM REGULATIONS FOR THE 1996 AND SUCCEEDING CROP YEARS

Sec.

1437.1 Applicability.
1437.2 Administration.
1437.3 Definitions.
1437.4 Eligibility.
1437.5 Assistance
1437.6 Area.
1437.7 Yield Determinations.
1437.8 Acreage and Production Reports.
1437.9 Loss Requirements.
1437.10 Application for Payment and Notice of Loss.
1437.11 Payments for Reduced Yield and Prevented Planting.
1437.12 Multiple Benefits.
1437.13 Payment and income limitations.
1437.14 Violations of Highly Erodible Land and Wetland Conservation Provisions
1437.15 Violations Regarding Controlled Substances.
1437.16 Misrepresentation and scheme or device.
1437.17 Refunds to the Corporation.
1437.18 Offsets and assignments.
1437.19 Cumulative Liability.
1437.20 Appeals.
1437.21 Estates, trusts, and minors.
1437.22 Death, incompetence, or disappearance.
1437.23 OMB control numbers.

Authority: 15 U.S.C. 714b and 714c; and 7 U.S.C. 7333

§ 1437.1 Applicability.

For the 1996 and susbsequent crop years, NAP is intended to provide eligible producers of eligible crops with protection comparable to the catastrophic risk protection plan of crop insurance. NAP is also designed to help reduce production risks faced by producers of crops for which Federal crop insurance under the Federal Crop Insurance Act, as amended, is not available. NAP will reduce financial losses that occur when natural disasters cause a catastrophic loss of production or prevented planting of an eligible crop. Payment eligibility is based on an expected yield for the area and the producer's approved yield based on actual production history, or a transitional yield if sufficient production records are not available. Production for both the applicable area expected yield and the individual producer approved yield for the unit must fall below specified percentages in order to be eligible for payments under this part.

The provisions contained in this part are applicable to each eligible producer and each eligible crop for which catastrophic coverage is not otherwise available.

§ 1437.2 Administration.

(a) NAP is administered under the general supervision of the Executive Vice-President, CCC (Administrator, Farm Service Agency), and shall be carried out by State and county FSA committees (State and county committees).

(b) State and county committees, and representatives and their employees, do not have authority to modify or waive any of the provisions of the regulations of this part.

(c) The State committee shall take any action required by these regulations that the county committee has not taken. The State committee shall also:

(1) Correct, or require a county committee to correct any action taken by such county committee that is not in accordance with the regulations of this part; or

(2) Require a county committee to withhold taking any action that is not in accordance with this part.

(d) No provision or delegation to a State or county committee shall preclude the Executive Vice President, CCC, or a designee, from determining any question arising under the program or from reversing or modifying any determination made by a State or county committee.

(e) The Deputy Administrator may authorize State and county committees to waive or modify deadlines, except statutory deadlines, and other program requirements in cases where lateness or failure to meet such other requirements does not adversely affect operation of the program.

(f) The State committee will, in accordance with this part, recommend the geographical size and shape of the area where a natural disaster has occurred, and whether the area eligibility requirement has been satisfied. The recommendation of eligibility must be approved by the Executive Vice President, CCC, or a designee.

(g) The Executive Vice President, CCC, or a designee, will determine all yields and prices under this part.

§ 1437.3 Definitions.

The definitions set forth in this section shall be applicable for all purposes of administering the noninsured crop disaster assistance program. The terms defined in part 718 of this title and 1400 of this chapter shall also be applicable, except where those definitions conflict with the definitions set forth in this section.

Act means the Federal Agriculture Improvement and Reform Act of 1996, Public Law 104–127 (7 U.S.C. 7201 et seq).

Actual production history means the history determined in accordance with part 400, subpart G, of this title, except that when referring to NAP the terms of subpart G will mean as follows:

Insurance terms	NAP terms
Agent	Local office representative.
Claim	Application for payment.
Claim for indemnity	Application for payment.
Indemnity payment	NAP payment.
Insurable acreage	Eligible acreage.
Insurable cause	Natural disaster.
Insurable crop	Eligible crop.
Insurance company	Provider.
Insurance purposes	NAP purposes.
Insured	Eligible producer.
Insured producer	Eligible producer.
Uninsurable acreage	Ineligible acreage.
Uninsurable production.	Ineligible production.
Uninsured cause of loss.	Assigned production appraisal
Uninsured production	Ineligible production

Approved yield means an actual production history yield calculated and approved by CCC, used to determine any NAP payment in accordance with part 400, subpart G, of this title.

Aquacultural species means any species of aquatic organism grown as food for human consumption, or fish raised as feed for fish that are consumed by humans, or ornamental fish propagated and reared in an aquatic medium by a commercial operator on private property in water in a controlled environment.

Area means the geographic region recommended by the State FSA committee, and approved by CCC in accordance with § 1437.6, where a natural disaster has occurred which may qualify producers in the area for NAP payments.

Assigned yield means a yield assigned for a crop year in the base period, in accordance with part 400, subpart G, of this title, if the producer does not file an acceptable production report by the production reporting date.

Average market price means the price, or dollar equivalent on an appropriate basis; for example, pound, bushel, ton, for an eligible crop established by CCC for determining NAP payments. Such price will be on a harvested basis without the inclusion of transportation, storage, processing, packing, marketing or other post-harvest expenses and will be based, in part, on historical data.

Catastrophic coverage means a catastrophic risk protection plan of insurance offered by FCIC in accordance with part 402 of this title.

CCC means the Commodity Credit Corporation, a wholly owned Government corporation within the United States Department of Agriculture.

County expected yield means the eligible crop yield established by the State FSA committee and approved by CCC for the county. Such yield information may be obtained from National Agricultural Statistics Service, Cooperative States Research, Education, and Extension Service, credible nongovernmental studies, yields in similar areas, and similar reference material. For planted annual crops, such yield will be based on the acreage planted for harvest.

Crop year means the period of time within which the crop is normally grown and designated by the calendar year in which the crop is normally harvested in the area. For crops harvested over two calendar years, the crop year will be the calendar year in which the majority of the crop would have been harvested. For crops grown over more than two calendar years, each year in the growing period will be considered as a separate crop year designated by the calendar year in which the crop sustained a loss. For crops for which catastrophic coverage is available, the crop year will be as defined by such coverage.

Eligible crop means an agricultural commodity for which catastrophic coverage is not available and which is commercially produced for food or fiber as specified in this part. Eligible crop shall also include floricultural, ornamental nursery, and Christmas tree crops, turfgrass sod, seed crops, aquaculture (including ornamental fish), and industrial crops. In the case of a crop that historically has multiple plantings in the same crop year that are planted or are prevented from being planted, each planting may be considered a different crop for determining payments under this part. In the case of a crop that has different varieties or types, each variety or type may be considered a separate crop for determining payments under this part, if CCC determines there is a significant difference in price or yield between the varieties or types.

Expected area yield means the eligible crop yield established and approved by CCC for the geographic area.

Forage means land covered with grass or other vegetation, produced under such range management practices as are necessary to sustain sufficient quality and quantity of grass or vegetation each year to be suitable for grazing or mechanical harvest to feed livestock in a commercial operation. NAP benefits

for forage produced on any Federal or state owned lands are available only for seeded forage.

Good farming practices means the cultural practices generally used in the area for the crop to make normal progress toward maturity and produce at least the individual unit approved yield. The practices are normally those recognized by Cooperative State Research, Education, and Extension Service as compatible with agronomic and weather conditions in the area.

Harvested means a single harvest crop is considered harvested when the producer has, by hand or mechanically, removed the crop from the field. Crops with multiple harvests in one year or harvested over multiple years are considered harvested when the producer has, by hand or mechanically, removed at least one mature crop from the field. The crop is considered harvested once it is removed from the field and placed in a truck or other conveyance, except:

(1) Hay is considered harvested when in the bale, whether removed from the field or not; and

(2) Grazing is not considered harvesting for the purpose of determining a payment rate factor.

Livestock means any farm or other animal excluding aquacultural species and, including but not limited to domestic avian, ruminant, equine, and swine species grown or maintained for any purpose.

Local office means the FSA office or other USDA office designated by CCC.

Native forage means grass or other vegetation occurring naturally without seeding.

Natural disaster means damaging weather, including but not limited to drought, hail, excessive moisture, freeze, tornado, hurricane, excessive wind, or any combination thereof; or adverse natural occurrence such as earthquake, flood, or volcanic eruption; or related condition, including but not limited to heat, insect infestation, or disease, which occurs as a result of an adverse natural occurrence or damaging weather occurring prior to or during harvest that directly causes, accelerates, or exacerbates the destruction or deterioration of an eligible crop, as determined by the Secretary.

Ornamental fish means a decorative fish produced in a commercial fishery for sale.

Ornamental nursery crop means a decorative plant grown in a container or controlled environment for commercial sale.

Prevented planting means the inability to plant a crop with proper equipment during the planting period for the crop or commodity. A producer must prove that the producer intended to plant the eligible crop and that such crop could not be planted due to natural disaster reasonably related to the basis for the area designation under § 1437.6, as determined by the Executive Vice President. The natural disaster that caused the prevented planting must have occurred after the final planting date for the previous crop year and before the final planting date for the crop year in which a request for NAP payment was made. For crops with multiple plantings in a single crop year and one crop has been harvested, the natural disaster must occur, after the harvest of the harvested crop and before the end of the planting period for the next planting of the crop.

Production report means a written record showing the commodity's annual production and used to determine the producer's yield for NAP purposes. The report contains yield history by unit, if applicable, including planted acreage for annual crops, eligible acreage for perennial crops, and harvested and FCIC or CCC appraised production for the previous crop years. This report must be supported by verifiable written records, measurement of farm-stored production, or by other records of production approved by CCC. Information contained in an application for payment is considered a production report for the unit for the crop year for which the application was filed.

Qualifying gross revenues means:

(1) With respect to a person who receives more than 50 percent of such person's gross income from farming, ranching, and forestry operations, the annual gross income for the taxable year from such operations; and

(2) With respect to a person who receives 50 percent or less of such person's gross income from farming, ranching, and forestry operations, the person's total gross income for the taxable year from all sources.

Reseeded or replanted crop means the same crop planted on the same acreage after the first planting of the crop has failed.

Seed crop means a crop produced for the purpose of, or intended for use as, commercial propagation for sale.

Seeded forage means acreage which is mechanically seeded with grasses or other vegetation at regular intervals, at least every 7 years, in accordance with good farming practices.

Share means the producer's percentage of interest in the eligible crop as an owner, operator, or tenant. For the purpose of determining eligibility for payments under this part, the producer's share will not exceed the producer's share at the earlier of the time of loss or the beginning of harvest. Acreage or interest attributed to a spouse, child, or member of the same household may be considered part of the producer's share unless such individual is considered to be a separate person under part 1400 of this chapter.

Type or Variety means a scientifically recognized subspecies of a crop or commodity having a particular characteristic or set of characteristics.

Unit means, for NAP, all acreage of the eligible crop in the county for the crop year:

(1) In which the person has 100 percent crop share; or

(2) Which is owned by one person and operated by another person on a share basis.

Land rented for cash, a fixed commodity payment, or any consideration other than a share in the crop on such land will be considered as owned by the lessee. No unit other than that stated herein will be permitted.

§ 1437.4 Eligibility.

(a) Eligible crops are any commercial agricultural crop (excluding livestock and their by-products), commodity, or acreage of a commodity grown for food or fiber for which catastrophic coverage is not available under part 402 of this title. Different types or varieties of a crop or commodity may be treated as a separate eligible crop, if CCC determines there is a significant difference in price or yield.

(b) NAP payments will be made available for:

(1) Any commercial crop grown for food;

(2) Any commercial crop planted and grown for livestock consumption, including but not limited to grain and forage crops;

(3) Any commercial crop grown for fiber, excluding trees grown for wood, paper, or pulp products;

(4) Any commercially produced aquacultural species (including ornamental fish);

(5) Floriculture crops;

(6) Ornamental nursery crops;

(7) Christmas tree crops;

(8) Turfgrass sod;

(9) Industrial crops;

(10) Seed Crops; and

(11) Any crop, for which crop insurance under the Federal Crop Insurance Act is available in the county, that is affected by a natural disaster that is not named as an insurable peril under the producer's crop insurance policy.

(c) NAP payments will not be available for any acreage in any area for any crop for which catastrophic coverage is available, unless the loss

VOL 61 ISS 252 DEC 31 1996 UMI

was caused by a natural disaster that is not covered by catastrophic coverage and all other eligibility requirements under this part are satisfied.

§ 1437.5 Assistance.

(a) Producers who are eligible to receive NAP payments for crop years 1996 through 1998 will receive assistance against loss in yield greater than 50 percent of the producer's approved yield for the eligible crop payable at 60 percent of the established average market price for the crop.

(b) Producers who are eligible to receive NAP payments after crop year 1998 will receive assistance against loss in yield greater than 50 percent of the producer's approved yield for the eligible crop payable at 55 percent of the established average market price for the crop.

(c) CCC will adjust the NAP payment rate for crops that are produced with significant and variable expenses that are not incurred because the crop acreage was prevented from being planted or planted but not harvested.

(d) NAP payments will be determined by unit based on all the acreage and production of the crop and eligible prevented from being planted acreage of the crop.

(e) Each producer's NAP payment will be based on the producer's share of the eligible crop.

§ 1437.6 Area.

(a) For the purposes of this part, acreage affected by a natural disaster, or any adjustment thereto, will be included in the area recommended by the state FSA committee and submitted to CCC for approval, regardless of whether the commodity produced on the affected acreage suffered a loss.

(b) Except for eligible areas identified in paragraph (f) of this section, an approved area shall include at least five producers of crops on separate and distinct farms for which the area has been approved for NAP payments. Notwithstanding this provision, CCC may approve an area having fewer than five producers if the Executive Vice President, or a designee, determines that such area will suffer significant economic consequences as a result of the disaster.

(c) An area may be designated as follows:

(1) A county;

(2) Aggregated acreage that is at least 320,000 acres; or

(3) Aggregated acreage with not less than $80 million average value for all crops produced annually.

(d) If the aggregated acreage affected by the natural disaster does not meet the minimum requirement specified in paragraph (c) (2) or (3) of this section, the aggregated acreage will be expanded by adding acres from around the affected acreage, until the minimum requirement is met.

(e) The area may not be defined in any manner that intentionally includes or excludes producers or crops.

(f) Notwithstanding the provisions of paragraphs (a) and (c) of this section, for areas outside the 50 states of the United States, the area shall include 10 or more producers of the crop except CCC may approve an area outside the 50 United States having fewer than 10 producers of the crop for which the area is requested if the Executive Vice President determines that such area will suffer significant economic consequences as a result of the disaster.

§ 1437.7 Yield determinations.

(a) CCC will establish expected area yields for eligible crops for each county or area for which the NAP is available, using available information, which may include, but is not limited to, National Agricultural Statistics Service data, Cooperative State Research, Education, and Extension Service records, Federal Crop Insurance Corporation data, credible nongovernment studies, yields in similar areas, and reported approved yield data. For planted annual crops, such yields will be based on the acreage planted for harvest.

(b) CCC may make county yield adjustments taking into consideration different yield variations due to different farming practices in the county such as: irrigated, nonirrigated, organic, nonorganic, different types and varieties of a crop and intended use.

(c) In establishing expected area yields for eligible crops:

(1) If the approved area corresponds to a single county, the expected area yield will be the yield established by CCC for that county, including any adjustments permitted by this section;

(2) If the approved area encompasses portions of counties or more than one county, the expected area yield will be the weighted average of the yields established by CCC for those counties in the area, including any adjustments permitted by this section; and

(3) CCC may adjust expected area yields if:

(i) The cultural practices, including the age of the planting or plantings, are different from those used to establish the yield; or

(ii) The expected area yield established on a state or county level is determined to be incorrect for the area.

(d) CCC will establish approved yields for purposes of providing assistance under this part. Approved yields for the eligible crop will be based on the producer's actual production history in accordance with the provisions of part 400, subpart G, of this title.

(e) The approved yield established for the producer for the year in which the NAP payments are offered will be equal to the average of the consecutive crop year yields, as established by CCC, reported and certified by that producer for that eligible crop.

(f) If a producer receives an assigned yield for a year of natural disaster because production records were not submitted by the production reporting deadline, the producer will be ineligible to receive an assigned yield for the year of the next natural disaster unless adequate production records for the eligible crop from all the interim crop years are provided to the local office. The producer shall receive a zero yield for those years the producer is ineligible to receive an assigned yield.

(g) CCC will select certain producers on a random or targeted basis and require those selected to provide records acceptable to CCC to support the information provided. Producers may also be required to support the yield certification at the time of loss adjustment or on post-audit. Each certification must be supported by records acceptable to CCC. Failure to produce records acceptable to CCC will result in CCC establishing the yield in accordance with actual production history and may subject the producer to criminal and civil false claims actions under various Federal statutes as well as refund of any amount received. In addition, sanctions, as set out at § 1437.16, may be imposed for false certification.

(h) Records acceptable to CCC may include:

(1) commercial receipts, settlement sheets, warehouse ledger sheets, or load summaries if the eligible crop was sold or otherwise disposed of through commercial channels provided the records are reliable or verifiable; and

(2) Such documentary evidence as is necessary in order to verify the information provided by the producer if the eligible crop has been sold, fed to livestock, or otherwise disposed of other than through commercial channels such as contemporaneous measurements, truck scale tickets, and contemporaneous diaries, provided the records are reliable or verifiable.

(i) Any producer who has a contract to receive a guaranteed payment for production, as opposed to delivery, of an eligible crop will have the production adjusted upward by the amount of the production corresponding

to the amount of the contract payment received.

(j)(1) Producers will not be eligible to receive an assigned yield if the acreage of the crop in a county for the crop year has increased by more than 100 percent over any year in the preceding seven crop years, unless:

(i) The producer provides adequate records of production costs, acres planted, and yield for the crop year for which NAP payments are being sought; or

(ii) CCC determines that the records provided under this paragraph are inadequate. CCC may require proof that the eligible crop could have been marketed at a reasonable price had the crop been harvested.

(2) The provisions of this section will not apply if:

(i) The crop has been inspected prior to the occurrence of a loss by a third party acceptable to CCC; or

(ii) The FSA county executive director, with the concurrence of the FSA state director, makes a recommendation for an exemption from the requirements and such recommendation is approved by CCC.

§ 1437.8 Acreage and production reports.

(a) Producers must file one or more acreage reports at the local office no later than the date specified by CCC for each crop the producer wants to insure future eligibility for the NAP program. The acreage report may be filed by the farm operator. Any producer will be bound by the acreage report filed by the farm operator unless the producer files a separate acreage report prior to the acreage reporting date.

(b) Acreage reports required by paragraph (a) must include all of the following information:

(1) All acreage in the county of the eligible crop (for each planting in the event of multiple planting) in which the producer has a share;

(2) The producer's share at the time of planting or the beginning of the crop year;

(3) The FSA farm serial number;

(4) The crop, practice, and intended use;

(5) All persons sharing in the crop (including the identity of any person having an interest in the crop as producer) and the person's employer identification number or social security number, if the person wishes to receive any payment under the Act;

(6) The date the crop was planted; and

(7) Acreage prevented from being planted.

(c) For each crop for which an acreage report is filed in accordance with this section, the producer must report the production for that acreage by the immediately subsequent crop year acreage reporting date for the crop.

(d) A person's failure to submit the required information by the designated acreage reporting dates may result in the denial of payments under this part. If there is a change of ownership, operation, or share within the farming operation after the acreage reporting date, the local office must be notified not later than 30 calendar days after the change and proof of the change must be provided to maintain eligibility for payments under this part.

§ 1437.9 Loss requirements.

(a) To qualify for payment under this part, the loss or prevented planting of the eligible crop must be due to a natural disaster.

(b) Assistance under this part will not cover losses due to:

(1) The neglect or malfeasance of the producer;

(2) The failure of the producer to reseed or replant to the same crop in the county where it is customary to reseed or replant;

(3) The failure of the producer to follow good farming practices for the commodity and practice;

(4) Water contained or released by any governmental, public, or private dam or reservoir project, if an easement exists on the acreage affected for the containment or release of the water;

(5) Failure or breakdown of irrigation equipment or facilities; or

(6) Except for tree crops and perennials, inadequate irrigation resources at the beginning of the crop year.

(c) A producer of an eligible crop will not receive payments under this part unless the projected average or actual yield for the crop, or an equivalent measurement if yield information is not available, in the area falls below 65 percent of the expected area yield. Once this area, and all other, eligibility requirements have been satisfied:

(1) A reduced yield payment will be made to a producer if the total quantity of the eligible crop that the producer is able to harvest on the unit is less than 50 percent of the approved yield for the crop due to natural disaster reasonably related to the basis for the area designation under § 1437.6, factored for the share of the producer for the crop. Production from the entire unit will be used to determine whether the producer qualifies for a payment under this part. The quantity will not be reduced for any quality consideration unless a zero value is established; and

(2) A prevented planting payment under this part will be made if the producer is prevented from planting more than 35 percent of the total eligible acreage intended for planting to the eligible crop. Producers must have intended to plant the crop and prove that they were prevented from planting the crop due to natural disaster reasonably related to the basis for the area designation under § 1437.6, and the producer may be required to prove that such producer had the resources available to plant, grow, and harvest the crop, as applicable.

(d) NAP payments under this part for prevented planting will not be available for:

(1) Tree crops and other perennials, unless the producer can prove resources were available to plant, grow, and harvest the crop, as applicable;

(2) Land that planting history or conservation plans indicate would remain fallow for crop rotation purposes; or

(3) Land used for conservation purposes or intended to be or considered to have been left unplanted under any program administered by USDA, including the Conservation Reserve Program and Wetland Reserve Program.

§ 1437.10 Application for payment and notice of loss.

(a) Any person with a share in the eligible crop who would be entitled to a payment under this part must provide a notice of damage or loss within 15 calendar days after the occurrence of the prevented planting (the end of the planting period) or recognizable damage to the crop. The notice must be filed at the local office serving the area where the producer's unit is located. The farm operator may provide the notice for all producers with an interest in the crop. All producers on a farm will be bound by the operator's filing or failure to file the application for payment unless the individual producers elect to timely file their notice.

(b)(1) Applications for payments under this part must be filed, on Form FCI–74, by the applicant with the local office no later than the first acreage reporting date for the crop in the crop year immediately following the crop year in which the loss occurred.

(2) If the producer chooses not to harvest the crop, all eligible acres and crop units for which the producer intends to make an application for payment must be left intact until the units have been appraised or released by an FCIC or CCC approved loss adjuster.

(3) If the producer harvests the crop, the producer must provide such documentary evidence of crop production as CCC may require which

VOL 61 ISS 252 DE 31 1996 UMI

may include leaving representative samples of the crop for inspection.

(c) Failure to make timely application or to supply the required documentary evidence shall result in the denial of payments under this part.

§ 1437.11 Payments for reduced yields and prevented planting.

In the event that the area loss requirement has been satisfied for the crop and either:

(a) The producer has sustained a loss in yield in excess of 50 percent of the producer's approved yield established for the crop, the NAP low yield payment will be determined by:

(1) Multiplying the producer's approved yield by the total eligible acreage planted to the eligible crop;

(2) Multiplying the product of paragraph (a)(1) by 50 percent;

(3) Subtracting the total production from the total eligible acreage from the result in paragraph (a)(2);

(4) Multiplying the product of paragraph (a)(3) by the producer's share of the eligible crop;

(5) Multiplying the result of paragraph (a)(4) by the applicable payment factor in accordance with § 1437.5(c); and

(6) Multiplying the result in paragraph (a)(5) by:

(i) For the 1996 through 1998 crop years, 60 percent of the average market price, as determined by CCC, or any comparable coverage, as determined by CCC; or

(ii) For the 1999 and subsequent years, 55 percent of the average market price, as determined by CCC, or any comparable coverage, as determined by CCC; or

(b) The producer has been unable to plant at least 35 percent of the acreage intended for the eligible crop, the NAP payment will be determined by:

(1) Multiplying the producer's acreage intended to be planted to the eligible crop by 35 percent;

(2) Subtracting the result in (b)(1) from the number of eligible prevented planting acres as determined in § 1437.9(c)(2);

(3) Multiplying the result of (b)(2) by the producer's share of the eligible crop;

(4) Multiplying the producer's approved yield by the result of (b)(3);

(5) Multiplying the result of (b)(4) by the approved prevented planting payment factor in accordance with § 1437.5(c); and

(6) Multiplying the result of (b)(5) by:

(i) For the 1996 through 1998 crop years, 60 percent of the average market price, as determined by CCC, or any comparable coverage, as determined by CCC; or

(ii) For the 1999 and subsequent years, 55 percent of the average market price, as determined by CCC, or any comparable coverage, as determined by CCC.

§ 1437.12 Multiple benefits.

If a producer is eligible to receive payments under this part and benefits under any other program administered by the Secretary for the same crop loss, the producer must choose whether to receive the other program benefits or payments under this part. The producer is not eligible for both. Such election does not relieve the producer from the requirements of making a production and acreage report. However, if the other USDA program benefits are not available until after an application for benefits has been filed under this part, the producer may refund the total amount of the payment to the local office from which the payment was received.

§ 1437.13 Payment and income limitations.

(a) NAP payments shall not be made:

(1) In excess of $100,000 per person per crop year under this part, or

(2) To a person who has qualifying gross revenues in excess of $2 million for the most recent tax year preceding the year for which assistance is requested.

(b) Simple interest on payments to the producer which are delayed will be computed on the net payments ultimately found to be due, from and including the 31st day after the latter of the date the producer signs, dates, and submits a properly completed application for payment on the designated form, the date disputed applications are adjudicated, or the date the area and crop is approved for NAP payments. Interest will be paid unless the reason for failure to timely pay is due to the producer's failure to provide information or other material necessary for the computation or payment.

§ 1437.14 Violations of Highly Erodible Land and Wetland Conservation Provisions.

The provisions of part 12 of this title, apply to this part.

§ 1437.15 Violations Regarding Controlled Substances.

The provisions of § 718.11 of this title apply to this part.

§ 1437.16 Misrepresentation and scheme or device.

(a) If CCC determines that any producer has misrepresented any fact or has knowingly adopted, participated in; or benefitted from, any scheme or device that has the effect of defeating, or is designed to defeat the purpose of this part, such producer will not be eligible to receive any payments applicable to the crop year for which the scheme or device was adopted.

(b) If any misrepresentation, scheme or device, or practice has been employed for the purpose of causing CCC to make a payment which otherwise would not make under this part:

(1) CCC will withhold all or part of the payment that would otherwise be due.

(2) All amounts paid by CCC to any such producer, applicable to the crop year in which the offense occurred, must be refunded to CCC together with interest and other amounts as determined in accordance with this part.

(3) CCC may impose such other penalties or administrative sanctions as authorized by section § 1437.19.

(c) Scheme and device may include, but is not limited to:

(1) Concealing any information having a bearing on the application of the rules of this part;

(2) Submitting false information to the CCC or any county or state FSA committee; or

(3) Creating fictitious entities for the purpose of concealing the interest of a person in the farming operation.

§ 1437.17 Refunds to the CCC.

In the event that there is a failure to comply with any term, requirement, or condition for payment made in accordance with this part, or the payment was established as a result of erroneous information provided by any person, or was erroneously computed, all such payments or overpayments will be refunded to CCC on demand, plus interest determined in accordance with part 1403 of this chapter.

§ 1437.18 Offsets and assignments.

(a) Except as provided in paragraph (b), any payment or portion thereof to any person shall be made without regard to questions of title under State law and without regard to any claim or lien against the crop, or proceeds thereof, in favor of the owner or any other creditor except agencies of the U.S. Government. The regulations governing offsets and withholdings found at part 1403 of this chapter shall be applicable to payments under this part.

(b) Any producer entitled to any payment may assign any payments in accordance with regulations governing assignment of payment found at part 1404 of this chapter.

§ 1437.19 Cumulative liability.

(a) The liability of any producer for any payment or refunds, which is

determined in accordance with this part to be due to CCC will be in addition to any other liability of such producer under any civil or criminal fraud statute or any other statute or provision of law including, but not limited to, 15 U.S.C. 714; 18 U.S.C. 286, 287, 371, 641, 651, 1001, 1014; 15 U.S.C. 714m; and 31 U.S.C. 3729.

(b) All producers on the unit receiving payments under this part will be jointly and severally liable to repay any unearned payments under this part.

§ 1437.20 Appeals.

The appeal, reconsideration, or review of all determinations made under this part, except the eligibility provisions for crops, areas, or producers for which there are no appeal rights because they are determined rules of general applicability, must be in accordance with part 780 of this title.

§ 1437.21 Estates, trusts, and minors.

(a) Program documents executed by persons legally authorized to represent estates or trusts will be accepted only if such person furnishes evidence of the authority to execute such documents.

(b) A minor who is otherwise eligible will be eligible for payments under this part only if such person meets one of the following requirements:

(1) The minor establishes that the right of majority has been conferred on the minor by court proceedings or by statute;

(2) A guardian has been appointed to manage the minor's property and the applicable program documents are executed by the guardian; or

(3) A bond is furnished under which the surety guarantees any loss incurred for which the minor would be liable had the minor been an adult.

§ 1437.22 Death, incompetence, or disappearance.

In the case of death, incompetence or disappearance of any person who is eligible to receive payments under this part, such payments will be disbursed in accordance with part 18 of this title.

§ 1437.23 OMB control numbers.

These regulations amend the information collection requirements previously approved by the Office of Management and Budget ("OMB") under OMB control number 0563–0016.

BILLING CODE 3410–05–P

Agricultural Marketing Service

7 CFR Part 905

[Docket No. FV96–905–2FR]

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Procedures to Limit the Volume of Small Florida Red Seedless Grapefruit

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule adds a section to the rules and regulations currently prescribed under the marketing order for oranges, grapefruit, tangerines, and tangelos grown in Florida. The marketing order is administered locally by the Citrus Administrative Committee (committee). This rule establishes procedures for limiting the volume of small red seedless grapefruit entering the fresh market during the first 11 weeks of each season. The committee believes these procedures could be used, when necessary, to help stabilize the market and improve grower returns.

EFFECTIVE DATE: January 30, 1997.

FOR FURTHER INFORMATION CONTACT: William G. Pimental, Southeast Marketing Field Office, AMS, USDA, P.O. Box 2276, Winter Haven, Florida 33883–2276; telephone: (941) 299–4770, Fax: (941) 299–5169; or Caroline Thorpe, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2522–S, Washington, D.C. 20090–6456; telephone: (202) 720–8139, Fax: (202) 720–5698. Small businesses may request information on compliance with this regulation by contacting: Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 720–5698.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement and Marketing Order No. 905 (7 CFR Part 905), as amended, regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (Department) is issuing this final rule in conformance with Executive Order 12866.

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect. This final rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided an action is filed not later than 20 days after date of the entry of the ruling.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 100 handlers subject to regulation under the marketing order and approximately 11,000 producers of citrus in the regulated area. Small agricultural service firms, which include handlers, have been defined by the Small Business Administration (13 CFR

VOL 61 ISS 252 DEC 31 1996 UMI

121.601) as those whose annual receipts are less than $5,000,000 and small agricultural producers, are defined as those whose annual receipts are less than $500,000. The majority of these handlers and producers of citrus grown in Florida may be classified as small entities.

This final rule adds procedures to the rules and regulations sections of the order. It does not establish any volume regulation. Any implementation of these procedures concerning regulation will require further committee action and additional public rulemaking by the Department.

However, if the procedures in this rule were used and volume regulations established, all growers and handlers would be impacted equitably. Before any implementation would occur, the committee would meet and consider any and all economic data available. The goal of this rule is to provide an additional tool, if needed, to help stabilize the price of red grapefruit. In the past three seasons, during the period covered by this rule, prices of red seedless grapefruit have fallen from an average f.o.b. of $7.80 per box to an average f.o.b. of $5.50 per box. On tree prices for fresh red seedless grapefruit have declined steadily from $9.60 per box during the 1989–90 season, to $3.45 per box during the 1994–95 season. In many cases, prices during the past two seasons have provided returns less than production costs. This price reduction is forcing many small producers out of business. A stabilized price that returns a fair market value would be beneficial to both small and large producers and handlers.

Therefore, based on this information, the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

The order provides for the establishment of grade and size requirements for Florida citrus. These grade and size requirements are designed to provide fresh markets with citrus fruit of acceptable quality and size, thereby maintaining consumer confidence for fresh Florida citrus. This helps create buyer confidence and contributes to stable marketing conditions. This is in the interest of producers, handlers, and consumers, and is designed to increase returns to Florida citrus producers. The current minimum grade standard for red seedless grapefruit is U.S. No. 1, and the minimum size requirement is size 56 (at least 3$^{5}/_{16}$ inches in diameter).

This rule establishes procedures for limiting the volume of small red seedless grapefruit entering the fresh market during the first 11 weeks of each season. The red seedless grapefruit season runs from mid-September to May. This rule provides an additional tool under the order to help stabilize the market and improve returns to growers. These changes were recommended by the committee at its meeting on May 24, 1996, by a 10 to 4 vote.

Section 905.52 of the Florida citrus marketing order provides authority to limit shipments of any grade or size, or both, of any variety of Florida citrus. Such limitations may restrict the shipment of a portion of a specified grade or size of a variety. Under such a limitation, the quantity of such grade or size that may be shipped by a handler during a particular week shall be established as a percentage of the total shipments of such variety by such handler in a prior period, established by the committee and approved by the Secretary, in which the handler shipped such variety. This rule adds § 905.153 to the rules and regulations, establishing a specified prior period and other procedures necessary to limit the volume of small red seedless grapefruit, sizes 48 and 56, entering the fresh market during the first 11 weeks of the season.

Currently, there are no limitations on the amount of size 48 and size 56 red seedless grapefruit that can be shipped to market. This rule in itself does not limit shipments, but outlines procedures to do so if needed. Implementation of these procedures to limit shipments would require further rulemaking.

The committee recommended this rule to address problems currently facing the industry. For the past few seasons, returns on red seedless grapefruit have been at all time lows, often not returning the cost of production. Fifty-nine percent of red seedless grapefruit is shipped to fresh market channels. There is a processing outlet for grapefruit not sold into the fresh market. The vast majority of processing is squeezing the grapefruit for juice. Because of the properties of the juice of red seedless grapefruit, including problems with color, the processing outlet is limited, and not currently profitable.

Several areas of new plantings in the southern growing region are just beginning to bear fruit. Young trees normally produce mostly small fruit when they first come into production. Florida producers and handlers realize that these new acres will add to the abundance of small sizes of red seedless grapefruit.

The committee believes that to stabilize the market and improve returns to producers, demand for fresh red seedless grapefruit must be stabilized and increased. One problem contributing to the current state of the market is the excessive number of small sized grapefruit shipped early in the marketing season. While there is a market for early grapefruit, the shipment of large quantities of small red seedless grapefruit in a short period, oversupplies the fresh market for these sizes and negatively impacts the market for all sizes.

The committee believes that the overshipment of smaller sized red seedless grapefruit early in the season has contributed to below production cost returns for producers. Based on statistical information from past seasons, there is an indication that once shipments of sizes 48 and 56 reach levels above 250,000 cartons a week, prices decline on those and most other sizes of red seedless grapefruit. Thus, even though later in the season the crop has sized to naturally limit the amount of smaller sizes available for shipment, the price structure in the market has already been negatively affected.

For the majority of the season, larger sizes return better prices than smaller sizes. If these small grapefruit were allowed to remain on the tree to increase in size and maturity, they could provide greater returns to producers. Delaying the harvest of small sizes may also extend the season, thereby increasing the total volume of fresh shipments and improving producer returns. Without volume regulation, the industry has been unable to limit the shipments of small sizes. The committee believes that if shipments of small sizes could be maintained at around 250,000 cartons a week, prices should stabilize and demand for larger, more profitable sizes should increase.

Similar procedures to this rule are already in place for Dancy tangerines under § 905.152. While the committee has not utilized these procedures for several years, they were successfully implemented for several seasons.

Under these procedures, the authority to limit the shipment of sizes 48 and 56 red seedless grapefruit will only be available for the 11-week period from the third Monday in September (week #1) through the first Sunday in December (week #11), hereinafter called the regulatory period. The committee recommended these weeks for regulation because the majority of small sizes are shipped during this period. By the end of the regulatory period, fruit has begun to size naturally, and there are fewer small sizes available.

The committee may recommend that only a certain percentage of size 48 (3$^{9}/_{16}$ minimum diameter in inches) and size 56 (3$^{5}/_{16}$ minimum diameter in inches) red seedless grapefruit be made available for shipment into fresh market channels for any week or weeks during the regulatory period. Should the committee decide to recommend the limitation of shipments of sizes 48 and 56 red seedless grapefruit, they would meet and recommend to the Secretary a percentage on which to base the amount of sizes 48 and 56 that could be shipped during a particular week or weeks during the regulatory period. The committee realizes that markets for those sizes do exist. Therefore, the percentage set could not be less than 25 percent of the calculated shipment base. These procedures are designed not to eliminate shipments of sizes 48 and 56, but to keep them from saturating the entire market.

Section 905.52 provides that whenever any size limitation restricts the shipment of a portion of a specified size, the quantity of such size that may be shipped by a handler during a particular week shall be established as a percentage of the total shipments of such variety by such handler in such prior period as established by the committee and approved by the Secretary.

This final rule establishes the prior period as an average week within the immediately preceding five seasons. An average week would be calculated as follows. The total red seedless grapefruit shipments by a handler during the 33-week period beginning the third Monday in September and ending the first Sunday in May during the past five seasons would be added and divided by five to establish an average season. This average season is then divided by the 33 weeks in a season to derive the average week. This week is the basis for each shipper for each of the 11 weeks contained in the regulation period.

To illustrate, suppose Handler A shipped a total of 50,000 cartons, 65,000 cartons, 45,000 cartons, 80,000 cartons, and 25,000 cartons of red seedless grapefruit in the last five seasons, respectively. Adding these season totals and dividing by five yields an average season of 53,000 cartons. The average season would then be divided by 33 weeks to yield an average week, in this case, 1,606 cartons. This would be Handler A's base.

The committee chose to use the past five seasons for the average season to provide the most accurate picture of an average season. The use of an average week helps adjust for variations in growing conditions that may affect when fruit matures in different seasons and growing areas. The committee believes that this definition of prior period provides each handler with an equitable base from which to establish shipments.

The average week for handlers with less than five previous seasons of shipments is to be calculated by averaging the total shipments for the seasons they did ship red seedless grapefruit during the immediately preceding five years and dividing that average by 33. New handlers with no record of shipments would have no prior period on which to base their average week. Therefore, if a volume regulation was established before such handlers have shipped any red seedless grapefruit, the new handlers could ship small sizes as a percentage of their total shipments equal to the percentage applied to other handlers' base. Once new handlers have established shipments, the average week would be calculated as an average of the weeks they have shipped during the current season.

To use these new procedures, the committee would meet and recommend a base percentage of sizes 48 and 56 that could enter the fresh market in any week or weeks from the first Monday in September through the first Sunday in December. If approved by the Secretary, this percentage would be applied to each handler's average week of fresh shipments to determine the amount (allocation) of sizes 48 and 56 red grapefruit each handler could ship. Each regulation period would begin Monday at 12:00 a.m. and end at 11:59 p.m. the following Sunday, since most handlers keep records based on Monday being the beginning of the work week.

When a size limitation is recommended to restrict the shipment during a particular week, the committee would compute each handler's allotment by multiplying the handler's average week by the percentage established by regulation for that week. Such set percentage could vary from week to week, but could not be less than 25 percent. The committee would notify each handler prior to the particular week of the quantity of sizes 48 and 56 red seedless grapefruit such handler could handle during a particular week.

To provide handlers with some flexibility, these procedures provide allowances for overshipments, loans, and transfers of allotment. These allowances should allow handlers the opportunity each week to supply their markets while limiting the impact of small sizes.

During any regulation week for which the Secretary has fixed the percentage of sizes 48 and 56 red seedless grapefruit, any person who has received an allotment could handle, in addition to their weekly allotment, an amount of size 48 and 56 red seedless grapefruit not to exceed 10 percent of that week's allotment. The quantity of overshipments would be deducted from the handler's allotment for the following week. Overshipments would not be allowed during week 11 because there would be no allotments the following week from which to deduct the overshipments.

If handlers fail to use their entire allotments in a given week, the amounts undershipped would not be carried forward to the following week. However, a handler to whom an allotment has been issued could lend or transfer all or part of such allotment (excluding the overshipment allowance) to another handler. In the event of a loan of allotment, each party would, prior to the completion of the loan agreement, notify the committee of the proposed loan and date of repayment. If a transfer of allotment is desired, each party would promptly notify the committee so that proper adjustments of the records could be made. In each case, the committee would confirm in writing all such transactions prior to the following week. The committee could also act on behalf of handlers wanting to arrange allotment loans or participate in the transfer of allotment. Repayment of an allotment loan would be at the discretion of the handlers party to the loan.

In considering these procedures, the committee discussed several possible alternatives. One alternative considered was an amendment to the marketing order. The amendment would have changed the language regarding the "prior period" in section 905.52. However, this alternative was rejected because of the time required to amend the order.

The committee also discussed limiting or eliminating only shipments of size 56 grapefruit. However, the committee found that it is important to include both sizes 48 and 56 for this regulation to be effective. Also, the committee did not want to eliminate a size entirely. They realize there is a market for small sizes and wish to allow handlers to take advantage of this market without negatively affecting the market for other sizes.

Other concerns were raised during discussion of these procedures. One committee member questioned whether these procedures would allow him to continue to increase his business. It was explained that this action would only put tools in place to allow the limitation

of just a certain percentage of the smaller sized red seedless grapefruit. A handler would not in any way be limited from shipping any amount of larger sizes. Another concern raised was the impact these procedures would have on harvesting. It was explained again that this rule would just establish procedures. However, if implemented, it would require more selective picking of only the sizes desired, something that many producers are doing already.

After a lengthy discussion, the committee decided that it needs to have available a tool to regulate shipments of small sized red seedless grapefruit early in each marketing season. The committee voted to recommend the establishment of these procedures to provide them with that tool.

The committee reports that it expects that more red seedless grapefruit will be produced in Florida during the 1996–97 season than last season. The committee also expects that supplies of fresh Florida red seedless grapefruit will be adequate to meet consumer demand during the entire 1996–97 season.

This rule does not affect the order provision that handlers may ship up to 15 standard packed cartons (12 bushels) of fruit per day exempt from grade and size requirements. Fruit shipped in gift packages that are individually addressed and not for resale, and fruit shipped for animal feed are also exempt from grade and size requirements under specific conditions. Also, fruit shipped to commercial processors for conversion into canned or frozen products or into a beverage base are not subject to the handling requirements under the order.

Section 8(e) of the Act requires that whenever grade, size, quality or maturity requirements are in effect for certain commodities under a domestic marketing order, including grapefruit, imports of that commodity must meet the same or comparable requirements. This rule does not change the minimum grade and size requirements under the order. Therefore, no change is necessary in the grapefruit import regulations as a result of this action.

The proposed rule concerning this action was published in the August 28, 1996, **Federal Register** (61 FR 44187), with a 30-day comment period ending September 27, 1996. Twenty four comments were received, thirteen in favor and seven in opposition to the proposed rule. The thirteen comments in favor were from handlers and growers. In addition, four comments were received from handlers and growers after the closing date for comments. These comments were in favor of the proposed rule and raised no new issues for those received prior to the close of the comment period.

In his comment, the manager of the committee stated that the committee went to great lengths to ensure that the entire Florida citrus industry was included in the development of the proposed rule. At all times the interests of consumers of fresh Florida grapefruit were foremost.

Ten commenters supporting this action mentioned that past history has shown that the overshipment of small sizes early in the season has resulted in reduced prices. They believe the provisions of this rule should be sufficient to address this problem. One commenter stated that this rule, if instituted, would allow the committee to bring the early volume of small size red grapefruit more closely in line with the normal industry shipments occurring later in the season. Historically, it is in the early weeks of a season when shipments of these small size red grapefruit have substantially exceeded 25 percent of total shipments, resulting in market gluts and the collapse of prices.

Ten commenters stated that regulation to control small sizes in the early season would have a stabilizing effect on the market. Several stated that the rule would provide a mechanism to improve orderly marketing of small size red grapefruit during the early season without causing hardships for any growers or handlers.

Nine of the commenters in favor of the regulation mentioned the provision that limits the percentage set to a minimum of 25 percent. Many of these believe that this will prevent excessive limitation, while allowing handlers to service their customers. Several also said that the 25 percent lower limit assures a good flow to market of these small size red grapefruit. Implementing these procedures could hold shipments of small sizes closer to the percentage shipped during the latter part of the season.

In five of the comments supporting the regulation, the regulatory period of eleven weeks was referenced. The commenters believe that the period of regulation contemplated is when the industry has repeatedly experienced overshipment of small sizes. After the first week in December, the movement of smaller fruit becomes more stable, reducing the need for regulation.

In regards to allotment, eight of the comments cited and supported the flexibility the provisions afford handlers to acquire additional allotment when needed. In their comments, they recognized the overshipment provisions, the ability to transfer allotment, and allotment loans, indicating that handlers should be able to find adequate allotment to meet market demand.

Seven comments in opposition to the proposed rule were received. One of the opposing comments stated that grapefruit should be marketed when ripe. Although grapefruit is a perishable commodity, mature red grapefruit can be stored on the tree and picked as needed to provide the market with a more even distribution of supplies during the season. This on-tree storage feature is particularly valuable early in the season when a large portion of the crop is often mature but small in size. By leaving the fruit on the tree, it can continue to grow to a larger size, and larger sizes usually yield a higher price, thereby increasing returns to growers.

Another of the opposing comments stated that early picking and shipping help avoid losses from weather related problems (frost). A freeze is a possibility in any season. Industry practices and grove location have combined to work to minimize freeze damage and to extend the grapefruit marketing season. The provisions of this rule would not prevent handlers from marketing fruit early. Implementing these procedures would only restrict the movement of small red grapefruit. It is the glut of small red grapefruit that damages the market for all sizes. Based on its analysis, the Economic Analysis Branch, of the Fruit and Vegetable Division, of the AMS, (EAB) has determined that during each of the last three seasons, the on-tree equivalent price for sizes 48 and 56 red Florida grapefruit has dropped below $1.00 per carton. These low prices also pulled the prices for larger sizes down. With on-tree prices dropping below cost of production, the impact on the industry may be similar to the effects of the freeze.

One opposing comment stated that under this regulation, returns to the packinghouse and grower would be lower, the season would be shortened, and that farm laborers would be dismissed earlier. The committee believes using these procedures could increase returns to growers while providing consumers an adequate supply of the commodity in the marketplace. Implementing these procedures could actually lengthen the season. If the grapefruit remain on the tree longer, they will increase in size and be of greater value later in the season. An extended season would also benefit laborers who would be needed for a longer period of time. The aim of this rule is to establish procedures that may be used to provide steady supplies at reasonable and stable prices, thereby

protecting the interests of growers, packers, workers in the industry, and consumers of red grapefruit.

Several opposing comments were received concerning the rule and the possible loss of market share, particularly in export markets that demand sizes 48 and 56, to other grapefruit growing areas. If the provisions of this rule are implemented, handlers will still be able to ship a percentage of small size grapefruit to those markets that require them and use larger sizes to fill their other markets. The provisions established by this rule would prevent market restrictions below 25 percent. Based on past seasons, even if percentages were established at 25 percent, ample quantities should be available to furnish those markets which demand small sizes.

The purpose of implementing this rule would not be to eliminate small size red grapefruit. It is merely to prevent a surplus of small size red grapefruit from damaging the overall grapefruit market.

Another commenter opposing the rule expressed concern that market share could be lost to Texas. According to the EAB, limiting shipments of small Florida grapefruit would probably not result in a major shift to Texas grapefruit because the Texas industry is much smaller and would have higher freight costs to some markets supplied by Florida.

One opposing comment stated that the rule had not been fully explained. The committee has had this rule under advisement since it received industry requests in December 1995. The committee started holding subcommittee meetings in February 1996 and held many informal meetings with industry groups to discuss the proposal. On May 16, 1996, another subcommittee meeting was held, and people who had demonstrated opposition were specifically invited to make comments and get their opinions on record. Throughout the process, the proposal was modified based on questions and concerns of the industry. These changes were shared at industry meetings and through committee mailings.

On May 23, 1996, the committee met and recommended this regulation after much discussion. Several different motions were offered at this meeting. Prior to any vote, the motions were carefully restated, so that members understood the issue they were voting on. All motions advanced were discussed and there was opportunity for questions.

One commenter opposed the method of calculating allotments. He believes that because he has not shipped much fruit early in past seasons that his allotment will not reflect his true shipments. The committee discussed several methods of measuring a handler's volume to determine this base. It was decided that shipments for the five previous years from the period from the third Monday in September to the first Sunday the following May should be used for calculation purposes. This bases allotment on a 33 week period of shipments, not just a handler's early shipments. This was done specifically to accommodate small shippers or light volume shippers, who may not have shipped much grapefruit in the early season. This method of calculation provides a fair allocation of allotment.

This commenter also expressed concern regarding whether his allotment would be enough to cover his customer base. The provisions of this rule provide flexibility through several different options. Handlers have the privilege to transfer, borrow or loan allotment based on their needs in a given week. Handlers also have the option of overshipping their allotment by 10 percent in a week, as long as the overshipment is deducted from the following week's shipments.

One opposing comment stated that restricting movement of grapefruit could do more harm than good and interfere with the orderly marketing of this product. These procedures are designed to promote orderly marketing. The purpose is to furnish sufficient supplies of red grapefruit to fresh markets early in the season, while avoiding the possible price-depressing effect of saturating the market with small sizes. This is particularly important during the first few months of the season when supplies of small sizes are heaviest. The declaration of policy in the Act includes a provision concerning establishing and maintaining such orderly marketing conditions as will provide, in the interest of producers and consumers, an orderly flow of the supply of a commodity throughout the normal marketing season to avoid unreasonable fluctuations in supplies and prices.

Utilizing these procedures will contribute to the Act's objectives of orderly marketing and improving producers' returns. According to EAB, since sizes 48 and 56 red grapefruit are a small part of the total supply of Florida red grapefruit, limiting shipments of these sizes would have only a moderate effect on the total quantity shipped. It may, however, help to prevent the average price for all Florida red grapefruit from being reduced to below the cost of production.

Many opposition comments addressed the proposed rule as if it were in place and implemented. As previously stated, this rule merely establishes procedures. To implement these procedures, the committee would hold public meetings to discuss and recommend a percentage of size regulation to the Secretary. Additional rulemaking would be required, and there would be additional opportunity to comment.

After thoroughly analyzing the comments received and other available information, the Department has concluded that this final rule is appropriate, and that no changes to the rule are being made in response to the comments.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the information collection requirements that are contained in this rule have been previously approved by the Office of Management and Budget (OMB) and have been assigned OMB No. 0581–0094.

After consideration of all relevant material presented, including the information and recommendations submitted by the committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

List of Subjects in 7 CFR Part 905

Grapefruit, Marketing agreements, Oranges, Reporting and recordkeeping requirements, Tangelos, Tangerines.

For the reasons set forth in the preamble, 7 CFR part 905 is amended as follows:

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

1. The authority citation for 7 CFR Part 905 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. A new § 905.153 is added to read as follows: § 905.153 Procedure for determining handlers' permitted quantities of red seedless grapefruit when a portion of sizes 48 and 56 of such variety is restricted.

(a) For the purposes of this section, the prior period specified in § 905.52 is hereby established as an average week within the immediately preceding five seasons. Each handler's average week shall be computed by adding the total volume of red seedless grapefruit handled in the immediately preceding five seasons and dividing the total by 165. The average week for handlers with less than five previous seasons of

shipments shall be calculated by adding the total volume of shipments for the seasons they did ship red seedless grapefruit, divide by the number of seasons, divide further by 33. New handlers with no record of shipments could ship size 48 and 56 red seedless grapefruit as a percentage of total shipments equal to the percentage applied to other handlers' average week; once such handlers have recorded shipments, their average week shall be calculated as an average of total shipments for the weeks they have shipped red seedless grapefruit during the current season. When used in the regulation of red seedless grapefruit, the term season means the weeks beginning the third Monday in September and ending the first Sunday in the following May. The term regulation period means the 11 weeks beginning the third Monday in September and ending the first Sunday in December of the current season.

(b) When a size limitation restricts the shipment of a portion of sizes 48 and 56 red seedless grapefruit during a particular week as provided in § 905.52, the committee shall compute the quantity of sizes 48 and 56 red seedless grapefruit that may be shipped by each handler by multiplying the handler's calculated average week shipments of such grapefruit by the percentage established by regulation for red seedless grapefruit for that week.

(c) The committee shall notify each handler of the quantity of size 48 and 56 red seedless grapefruit such handler may handle during a particular week.

(d) During any regulation week for which the Secretary has fixed the percentage of sizes 48 and 56 red seedless grapefruit, any person who has received an allotment may handle, in addition to their total allotment available, an amount of size 48 and 56 red seedless grapefruit up to 10 percent greater than their allotment. The quantity of the overshipment shall be deducted from the handler's allotment for the following week. Overshipments will not be allowed during week 11. If the handler fails to use his or her entire allotment, the under shipment is not carried forward to the following week.

(e) Any handler may transfer or loan any or all of their shipping allotment (excluding the overshipment allowance) of size 48 and 56 red seedless grapefruit to any other handler. Each handler party to such transfer or loan shall promptly notify the committee so the proper adjustment of records may be made. In each case, the committee shall confirm in writing all such transactions, prior to the following week, to the handlers involved. The committee may act on behalf of handlers wanting to arrange allotment loans or participate in the transfer of allotments.

Dated: December 24, 1996.

Robert C. Keeney,

Director, Fruit and Vegetable Division.

[DA–96–15]

Milk in the Middle Atlantic, Carolina, Southeast, Tennessee Valley and Louisville-Lexington-Evansville Marketing Areas; Termination of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This document terminates the base-excess payment plan provisions of the Middle Atlantic, Carolina, Southeast, Tennessee Valley, and Louisville-Lexington-Evansville Federal milk marketing orders due to the expiration of legislative authority to incorporate base-excess plans in Federal milk marketing orders on December 31, 1996.

EFFECTIVE DATE: January 1, 1997.

FOR FURTHER INFORMATION CONTACT: Nicholas Memoli, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2971, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 690–1932, e-mail address Nicholas__X__Memoli@usda.gov.

SUPPLEMENTARY INFORMATION: The Department is issuing this final rule in conformance with Executive Order 12866.

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have a retroactive effect. This rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may request modification or exemption from such order by filing with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with the law. A handler is afforded the opportunity for a hearing on the petition. After a hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Small Business Consideration

In accordance with the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended, the Agricultural Marketing Service has considered the economic impact of this action on small entities and believes that this rule could have a significant economic impact on a substantial number of small entities. For the purpose of the Regulatory Flexibility Act, a dairy farm is considered a "small business" if it has an annual gross revenue of less than $500,000, and a dairy products manufacturer is a "small business" if it has fewer than 500 employees. For the purposes of determining which dairy farms are "small businesses," the $500,000 per year criterion was used to establish a production guideline of 326,000 pounds per month. Although this guideline does not factor in additional monies that may be received by dairy producers, it should be an inclusive standard for most "small" dairy farmers. For purposes of determining a handler's size, if the plant is part of a larger company operating multiple plants that collectively exceed the 500 employee limit, the plant will be considered a large business even if the local plant has fewer than 500 employees.

This rule terminates the base-excess plan provisions of five Federal milk orders. Producers with earned base will no longer receive base prices as in the past, but will be paid at least the uniform price throughout the year for their hundredweight of milk.

Under a base-excess payment plan, a producer is paid a "base price" for "base milk" and an "excess price" for production in excess of base milk. During the base-paying period of a base-excess plan, base prices are higher than the uniform prices computed for those months, while the excess prices are below the uniform prices. Using a representative period of May 1996, the difference between the base and uniform prices in the five orders was not greater than $0.26/cwt., while the difference between the uniform and excess prices ranged from $0.45 to $2.81/cwt.

The economic impact of the termination of base-excess plans is likely to be threefold. First, for those producers who have been most successful in shifting their herd's production from the spring to the fall, there will be a reduction in total revenue. The loss in revenue would be determined by multiplying the producer's total hundredweight of milk by the uniform price and subtracting that figure from the producer's base milk at the estimated base price plus the excess milk at the estimated excess price. This calculation would have to be computed for each month of the base-paying period. On the other hand, for those producers who have made no effort to shift production from the spring to the fall, there is likely to be an economic windfall at the difference between the uniform price multiplied by their total production and what the producer's milk would have earned using base and excess prices.

A second economic impact for producers under Orders 5, 7, 11, and 46 will be experienced by those producers who were planning to go out of business and sell their base at the end of the base-building period, but before the start of the base-paying period. These producers will lose the amount of money that they could have realized by selling their base. For example, during the 1995 base-building period, 5500 producers earned base in the Southeast market. The average daily base for a single producer was 2,933 lbs. Based on the average price per pound for base in 1995 ($1.62/lb. based on figures obtained from the Market Administrator's office), an average producer in the Southeast could have obtained $4,751.46 from the sale of such base in 1997.

The final effect of the base-excess plan termination is impossible to measure in advance of the facts. Under the base and excess plans in Orders 5, 7, 11 and 46, dairy farmers who were not on a market during the base-building period are discouraged from pooling their milk on the market during the base-paying period because they would only receive the excess price for their milk. Without a base and excess plan, however, there would be no such disincentive. Theoretically, therefore, it is possible that producers who are not normally associated with these markets will become associated with them during the flush production months to take advantage of a price difference between these generally deficit, high Class I utilization markets and the producers' normal, lower utilization, lower-priced market. To what extent the attachment of this additional milk will lower the uniform price in the 5 base-excess plan markets cannot be determined at this time.

Regardless of the possible economic effects which may result from termination of seasonal base plans upon small entities, there is no alternative to this termination action since the underlying statutory authority expires on December 31, 1996.

In considering the impact of this action on small businesses, the termination of seasonal base plans will also cause a reduction in paperwork. Base-excess plans generate a large volume of paperwork for the Market Administrator's office, as well as for cooperative associations and handlers' with non-member supplies. Termination of such plans will place less of a regulatory burden on those responsible for recordkeeping, administration, and compliance with these provisions.

Statement of Consideration

This order of termination is issued pursuant to the provisions of the Agricultural Marketing Agreement Act and of the orders regulating the handling of milk in the Middle Atlantic, Carolina, Southeast, Tennessee Valley, and Louisville-Lexington-Evansville marketing areas.

It is determined that notice of proposed rulemaking and public procedure thereon is impracticable, unnecessary and contrary to the public interest. The expiration of authority to incorporate seasonal base plans in Federal milk marketing orders on December 31, 1996, necessitates the termination of base-excess plan provisions.

The Department received several letters requesting that seasonal base plans be suspended, rather than terminated. While the Department considered suspending the provisions, we concluded that an order provision cannot be suspended once the underlying legislative authority for that provision has expired. Nevertheless, should Congress pass future legislation authorizing seasonal base plans, it could provide for an expedited procedure to reinstate the order provisions.

After consideration of all relevant material, and other available information, it is hereby found and determined that effective January 1, 1997, the provisions of each of the orders specified below do not tend to effectuate the declared policy of the Act:

List of Subjects in 7 CFR Parts 1004, 1005, 1007, 1011, and 1046

Milk marketing orders.

For the reasons set forth in the preamble, 7 CFR Parts 1004, 1005, 1007, 1011, and 1046 are amended as follows.

1. The authority citation for 7 CFR Parts 1004, 1005, 1007, 1011, and 1046 continues to read as follows:

Authority: 7 U.S.C. 601–674.

PART 1004—MILK IN THE MIDDLE ATLANTIC MARKETING AREA

§ 1004.61 [Amended]

2. In § 1004.61, paragraph (b) is removed and reserved, and the section heading and introductory text are revised to read as follows:

§ 1004.61 Computation of weighted average differential price and producer nonfat milk solids price.

For each month the market administrator shall compute a "weighted average differential price" and a "producer nonfat milk solids price", as follows:

* * * * *

§ 1004.63 [Amended]

3. In § 1004.63, the words "the weighted average differential price for base milk and" are removed, and the section heading is revised to read as follows:

§ 1004.63 Announcement of weighted average differential price, nonfat milk solids price and producer nonfat milk solids price.

* * * * *

§ 1004.73 [Amended]

4. In § 1004.73, paragraph (a) introductory text is amended by removing the word "base", paragraph (a)(1) is amended by removing the phrase "for base milk computed pursuant to § 1004.61(b)" and the word "base", and paragraph (b) is removed.

§ 1004.75 [Amended]

5. In § 1004.75, paragraph (a), the words "for-base milk computed pursuant to § 1004.61(b)" are removed.

§§ 1004.90, 1004.91, 1004.92, 1004.93, 1004.94 and 1004.95 [Removed]

6. § 1004.90 and the undesignated centerheading preceding it, and §§ 1004.91 through 1004.95 are removed.

PART 1005—MILK IN THE CAROLINA MARKETING AREA

§ 1005.32 [Amended]

7. In § 1005.32, paragraph (a) is removed and reserved.

§ 1005.61 [Amended]

8. In § 1005.61, paragraph (a) introductory text is amended by removing the words "of June through January", paragraph (a)(6) is amended by removing the words "for the months of June through January", paragraph (b)

is removed, and the section heading is revised to read as follows:

§ 1005.61 Computation of uniform price (including weighted average price).

* * * * *

§ 1005.62 [Amended]

9. In § 1005.62 paragraph (b) is revised to read as follows:

§ 1005.62 Announcement of uniform price and butterfat differential.

* * * * *

(b) The 11th day after the end of each month the uniform price pursuant to § 1005.61 for such month.

§ 1005.71 [Amended]

10. In § 1005.71, paragraph (a)(2)(i), the letter "(s)" at the end of the word "price(s)" is removed.

§ 1005.73 [Amended]

11. In § 1005.73, paragraph (a)(2) introductory text is amended by removing the letter "(s)" at the end of the word "price(s)" and the words "or base milk and excess milk", paragraph (c)(2) is amended by removing the word "appropriate" and the letter "(s)" at the end of the word "price(s)", paragraphs (d)(4) and (5) are amended by removing the letter "(s)" at the end of the word "rate(s)" everywhere it appears, and paragraph (d)(3) is removed and reserved.

§ 1005.74 [Amended]

12. § 1005.74 is amended by removing the letter "(s)" at the end of the word "price(s)".

§ 1005.75 [Amended]

13. In § 1005.75, paragraph (a) is amended by removing the words "and the uniform price for base milk".

§§ 1005.90, 1005.91, 1005.92, 1005.93, and 1005.94 [Removed]

14. § 1005.90 and the undesignated centerheading preceding it, and §§ 1005.91 through 1005.94 are removed.

PART 1007—MILK IN THE SOUTHEAST MARKETING AREA

§ 1007.32 [Amended]

15. In § 1007.32, paragraph (a) is removed and reserved.

§ 1007.61 [Amended]

16. In § 1007.61, paragraph (a) introductory text is amended by removing the words "of June through January", paragraph (a)(6) is amended by removing the words "for the months of June through January", paragraph (b) is removed, and the section heading is revised to read as follows:

§ 1007.61 Computation of uniform price (including weighted average price).

* * * * *

§ 1007.62 [Amended]

17. In § 1007.62, paragraph (b) is amended by removing the word "applicable" and the letter "(s)" at the end of the word "price(s)".

§ 1007.71 [Amended]

18. In § 1007.71, paragraph (a)(2)(i) is amended by removing the letter "(s)" at the end of the word "price(s)".

§ 1007.73 [Amended]

19. In § 1007.73, paragraph (a)(1) is amended by removing the phrase "or if the producer had no established base upon which to receive payments during the base paying months of February through May,", paragraph (a)(2) introductory text is amended by removing the letter "(s)" at the end of the word "price(s)" and the words "or base milk and excess milk", paragraph (d)(2) is amended by removing the word "appropriate" and the letter "(s)" at the end of the word "price(s)", paragraphs (f)(4) and (5) are amended by removing the letter "(s)" at the end of the word "rate(s)" and the word "(are)" wherever they appear, and paragraph (f)(3) is removed and reserved.

§ 1007.74 [Amended]

20. In § 1007.74, the letter "s" at the end of the word "prices" and the words "for base and excess milk" are removed.

§ 1007.75 [Amended]

21. In § 1007.75, paragraph (a) is amended by removing the phrase "and the uniform price for base milk".

§§ 1007.90, 1007.91, 1007.92, 1007.93, and 1007.94 [Removed]

22. § 1007.90 and the undesignated centerheading preceding it, and §§ 1007.91 through 1007.94 are removed.

PART 1011—MILK IN THE TENNESSEE VALLEY MARKETING AREA

§ 1011.32 [Amended]

23. In § 1011.32, paragraph (a) is removed and reserved.

§ 1011.61 [Amended]

24. In § 1011.61, paragraph (a) introductory text is amended by removing the words "of July through February", paragraph (b) is removed, and the section heading is revised to read as follows:

§ 1011.61 Computation of uniform price (including weighted average price).

* * * * *

§ 1011.62 [Amended]

25. In § 1011.62 paragraph (b) is amended by removing the word "applicable" and the letter "s" at the end of the word "prices".

§ 1011.71 [Amended]

26. In § 1011.71, paragraph (a)(2)(i) is amended by removing the letter "s" at the end of the word "prices".

§ 1011.73 [Amended]

27. In § 1011.73, paragraph (a)(2) introductory text is amended by removing the phrase "or base milk and excess milk" and the letter "(s)" at the end of the word "price(s)", paragraph (c)(2) is amended by removing the word "appropriate" and the letter "(s)" at the end of the word "price(s)", paragraphs (d) (4) and (5) are amended by removing the letter "(s)" at the end of the word "rate(s)" wherever it appears, and paragraph (d)(3) is removed and reserved.

§ 1011.74 [Amended]

28. In § 1011.74, the letter "(s)" at the end of the word "price(s)" is removed.

§ 1011.75 [Amended]

29. In § 1011.75, paragraph (a) is amended by removing the words "and the uniform price for base milk".

§§ 1011.90, 1011.91, 1011.92, 1011.93, and 1011.94 [Removed]

30. § 1011.90 and the undesignated centerheading preceding it, and §§ 1011.91 through 1011.94 are removed.

PART 1046—MILK IN THE LOUISVILLE-LEXINGTON-EVANSVILLE MARKETING AREA

§ 1046.32 [Amended]

31. In § 1046.32, paragraph (d) is removed and reserved.

§ 1046.61 [Amended]

32. In § 1046.61, paragraph (a) introductory text is amended by removing the words "of July through February", paragraph (b) is removed, and the section heading is revised to read as follows:

§ 1046.61 Computation of uniform price (including weighted average price).

* * * * *

§ 1046.62 [Amended]

33. In § 1046.62, paragraph (b) is amended by removing the word "applicable" and the letter "(s)" at the end of the word "price(s)".

§ 1046.71 [Amended]

34. In § 1046.71, paragraph (a)(2)(i) is amended by removing the word

"applicable" and the letter "(s)" at the end of the word "price(s)".

§ 1046.73 [Amended]

35. In § 1046.73, the last sentence in paragraph (a) is removed, paragraph (b) introductory text is amended by removing the letter "(s)" at the end of the word "price(s)" and the words "or base milk and excess milk", paragraphs (d) (4) and (5) are amended by removing the letter "(s)" at the end of the word "rate(s)" everywhere it appears, and paragraph (d)(3) is removed and reserved.

§ 1046.74 [Amended]

36. In § 1046.74, the letter "(s)" at the end of the word "price(s)" is removed.

§ 1046.75 [Amended]

37. In § 1046.75, paragraph (a) is amended by removing the phrase "and the uniform price for base milk".

§§ 1046.90, 1046.91, 1046.92, 1046.93, and 1046.94 [Removed]

38. § 1046.90 and the undesignated centerheading preceding it, and §§ 1046.91 through 1046.94 are removed.

Dated: December 23, 1996.

Michael V. Dunn,

Assistant Secretary, Marketing and Regulatory Programs.

Administrative Deportation Procedures for Aliens Convicted of Aggravated Felonies Who Are Not Lawful Permanent Residents

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: In accordance with section 442(d) of the Antiterrorism and Effective Death Penalty Act of 1996 (AEDPA), this final rule adds a new paragraph to the administrative deportation proceedings regulation. The new paragraph explains how the Immigration and Naturalization Service (Service) will conduct administrative deportation proceedings without immigration court hearings for certain aliens convicted of aggravated felonies in light of two recent statutory changes. The Service is promulgating this final rule to comply with the statutory requirement that the Service publish an implementing regulation by January 1, 1997. The final rule states that the Service will continue to process aliens under the current regulation until March 3, 1997, and will suspend administrative deportation proceedings from March 3, 1997, until the effective date of the implementing regulations for the Illegal Immigration Reform and Immigrant Responsibility Act of 1996.

EFFECTIVE DATE: March 3, 1997.

FOR FURTHER INFORMATION CONTACT: Leonard C. Loveless, Detention and Deportation Officer, Immigration and Naturalization Service, 425 I Street, NW., Washington, D.C. 20536, Telephone (202) 514–2865.

SUPPLEMENTARY INFORMATION: Section 130004(a) of the Violent Crime Control and Law Enforcement Act of 1994, Public Law 103–322, created a new section 242A(b) of the Act, 8 U.S.C. 1252a(b), to provide for the deportation without an immigration court hearing of certain aliens convicted of aggravated felonies. On August 24, 1995, the Service published a final rule at 60 FR 43954 to create 8 C.F.R. 242.25 that implemented section 242A(b) of the Act. Section 442 of the Antiterrorism and Effective Death Penalty Act of 1996 (AEDPA) modified section 242A(b) and required that the Attorney General publish implementing regulations by January 1, 1997, to take effect 60 days after publication.

On September 30, 1996, however, Congress passed the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA), Public Law 104–208. Section 304(c) of the IIRIRA, effective April 1, 1997, further amended administrative deportation proceedings by nullifying some of the amendments made by the AEDPA and by renumbering the statutory section from section 242A(b) of the Act to section 238(b).

The AEDPA amendments would require significant changes in operational procedures and forms that are not worthwhile, given that those amendments will be effective only for approximately 1 month. For example, the AEDPA added the requirement that administrative deportation proceedings be "conducted in, or translated for the alien into, a language the alien understands." This provision would require the Service to translate all documents used in the proceedings, rather than only the Form I–851, Notice of Intent to Issue Final Administrative Deportation Order. (Current translation and explanation requirements are set forth in 8 CFR 242.25(b)(2)(iv)). Since the IIRIRA has eliminated the statutory translation requirement, it would be unduly burdensome to implement this requirement for 1 month.

Accordingly, as a policy matter, the Service has determined that these implementing regulations will simply announce a suspension of the operation of administrative deportation proceedings, which includes the issuance of both Form I–851 and Form I–851A, Final Administrative Order of Deportation, until the implementing regulations for the IIRIRA, under separate notice of proposed rulemaking, are effective. The Service will continue to process aliens under the current version of 8 CFR 242.25 until March 3, 1997. From that date until the IIRIRA amendments to administrative deportation take effect, the Service will cease all administrative deportation proceedings. During that period, aliens otherwise amenable to administrative deportation will be placed instead in regular deportation proceedings before an immigration judge. This change does not affect the enforceability of administrative deportation orders previously entered.

The Service has determined that the publication of this rule as a final rule is based upon the "good cause" exceptions found at 5 U.S.C. 553(b)(3)(B). The Service has determined that public notice and comment on this rule is impracticable because of the January 1, 1997, statutory deadline for publishing a final rule. In addition, public notice and comment is unnecessary because the final rule makes no change that affects an individual's rights. It simply continues until March 3, 1997, the existing rules governing administration deportation. On that date, the Service will suspend administrative deportation proceedings, and proceed under existing regulations governing regular deportation proceedings. Since there will be public notice and comment on the IIRIRA amendments to administrative deportation proceedings, public notice and comment on this final rule is unnecessary.

Regulatory Flexibility Act

The Commissioner of the Immigration and Naturalization Service, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this regulation and, by approving it, certifies that this rule will not have a significant economic impact on a substantial number of small entities because the affected parties are individual aliens who have been ordered deported from the United States.

Executive Order No. 12866

This rule is not considered by the Department of Justice, Immigration and Naturalization Service, to be a "significant regulatory action" under Executive Order 12866, section 3(f), Regulatory Planning and Review, and the Office of Management and Budget has waived its review process under section 6(a)(3)(A).

Executive Order No. 12612

The regulation adopted herein will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Executive Order No. 12988

The rule meets the applicable standards set forth in sections 3(a) and (3)(b)(2) of E.O. 12988.

Administrative practice and procedure, Aliens, Deportation.

Accordingly, part 242 of chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 242—PROCEEDINGS TO DETERMINE DEPORTABILITY OF ALL ALIENS IN THE UNITED STATES: APPREHENSION, CUSTODY, HEARING, AND APPEAL

1. The authority citation for part 242 continues to read as follows:

Authority: 8 U.S.C. 1103, 1182, 1186a, 1251, 1252, 1252 note, 1252a, 1252b, 1254, 1362; 8 CFR part 2.

2. In section 242.25 a new paragraph (i) is added to read as follows:

§ 242.25 Proceedings under section 242A(b) of the Act.

* * * * *

(i) Effective March 3, 1997, the Service will cease issuance of both Form I–851 and Form I–851A. The Service retains the authority to execute at any time Form I–851A that is final before March 3, 1997. The Service will resume the issuance of Form I–851 and Form I–851A after April 1, 1997, pursuant to regulations implementing section 238(b) of the Act, as amended by the Illegal Immigration Reform and Responsibility Act of 1996.

Dated: December 20, 1996.

Doris Meissner,

Commissioner, Immigration and Naturalization Service.

FEDERAL ELECTION COMMISSION

11 CFR Part 9038

[Notice 1996–22]

Examinations and Audits

AGENCY: Federal Election Commission.

ACTION: Correcting amendments.

SUMMARY: This document contains a correction to final regulations which were published June 16, 1995 (60 FR 31854). The regulations relate to the notification of repayment determinations.

EFFECTIVE DATE: December 31, 1996.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, 999 E Street, N.W., Washington, D.C. 20463, (202) 219–3690 or toll free (800) 424–9530.

SUPPLEMENTARY INFORMATION: On June 16, 1995, the Commission published final rules revising its regulations governing public financing of presidential primary election candidates. 60 FR 31854 (June 16, 1995). These regulations implement provisions of the Presidential Primary Matching Payment Account Act. Unfortunately, the June 16, 1995 **Federal Register** document contained a nonsubstantive error which may prove to be confusing. The error occurred when the **Federal Register** typeset the document for publication. The Commission is publishing this document to correct the error.

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Regulation D; Docket No. R–0929]

Reserve Requirements of Depository Institutions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors of the Federal Reserve System is amending its Regulation D regarding reserve requirements of depository institutions issued pursuant to section 19 of the Federal Reserve Act in order to simplify and update it and reduce regulatory burden. The amendments to modernize Regulation D are in accordance with the Board's policy of regular review of its regulations and the Board's review of its regulations under section 303 of the Riegle Community Development and Regulatory Improvement Act of 1994.

EFFECTIVE DATE: April 1, 1997.

FOR FURTHER INFORMATION CONTACT: Ann Owen, Economist, Division of Monetary Affairs (202/736–5671); Sue Harris, Economist, Division of Research and Statistics (202/452–3490); or Rick Heyke, Staff Attorney, Legal Division (202/452–3688), Board of Governors of the Federal Reserve System. For the hearing impaired only, Telecommunications Device for the Deaf (TDD), Dorothea Thompson (202/452–3544), Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, N.W., Washington, DC 20551.

SUPPLEMENTARY INFORMATION:

Background

As part of its policy of regular review of its regulations, and consistent with section 303 of the Riegle Community Development and Regulatory Improvement Act of 1994 (Riegle Act), the Board of Governors of the Federal Reserve System (Board) is amending its Regulation D regarding reserve requirements of depository institutions (12 CFR part 204) issued pursuant to section 19 of the Federal Reserve Act. Section 303 of the Riegle Act requires each federal banking agency to review and streamline its regulations and written policies to improve efficiency, reduce unnecessary costs, and remove

inconsistencies and outmoded and duplicative requirements. The amendments are designed to reduce regulatory burden and simplify and update the Regulation.

The Board published a notice of proposed rulemaking in the **Federal Register** on June 17, 1996 (61 FR 30545) that solicited comments on the proposed amendments described below. In general, the amendments deleted transitional rules relating to the expansion of reserve requirements to nonmember depository institutions, the authorization of NOW accounts nationwide, and other matters that no longer have a significant effect. The Board received a total of 22 comments on the proposal. Comments were received from 9 banking organizations, 8 trade associations, 4 Federal Reserve banks, and one savings bank. Of the comments, 17 generally expressed agreement with the proposal as far as it went.

An issue by issue discussion follows.

Time Deposits

Section 204.2(c)(1) currently defines time deposits as deposits from which the depositor may not make withdrawals within six days after the date of deposit (or notice of withdrawal) or partial withdrawal unless such withdrawals are subject to an early withdrawal penalty. Under certain circumstances specified in footnote 1, a time deposit may be paid before maturity without imposing the early withdrawal penalty. A time deposit generally may be paid without penalty from the seventh day after deposit through maturity, absent partial withdrawals. The imposition of an early withdrawal penalty is required under the time deposit definition only during the first six days after deposit. The proposal clarified that the footnote is not intended to impose a prohibition on withdrawals before maturity, but to permit penalty-free withdrawals under certain circumstances during the period when the imposition of an early withdrawal penalty otherwise would otherwise be required.

Six commenters supported the proposal to reword footnote 1 in order to avoid any implication that time deposits generally may not be paid before maturity without penalty, while three others, without disagreeing with the proposal, noted that they had no experience of confusion resulting from the footnote. The final rule adopts the proposal as proposed.

Nonpersonal Time Deposits

The definition of nonpersonal time deposit in § 204.2(f)(1)(iii) and (iv) distinguishes between transferable time deposits originally issued before October 1, 1980, and those issued on or after that date. Since the Board believes that most of these deposits have since matured, the Board believes that this distinction is no longer meaningful and proposed to delete it. Three commenters specifically supported the proposal on the basis that this was an obsolete distinction. The Board is adopting this proposal as proposed.

Section 204.2(f)(3) requires that a nonpersonal time deposit with a stated maturity or notice period of 1½ years or more either be subject to a minimum withdrawal penalty of 30 days' interest (if withdrawn more than six days but within 1½ years after the date of deposit) or be treated as a deposit with an original maturity or notice period of less than 1½ years. Since 1991, the reserve requirement ratio has been set at zero for all time deposits regardless of maturity. Moreover, since 1991, the form for reporting reservable liabilities (Form FR 2900) has not required depository institutions to report the amount of time deposits by category of maturity. The requirement to treat time deposits not subject to a minimum penalty of 30 days' interest as having an initial maturity of less than 1½ years is thus of no practical significance. The Board therefore proposed to delete it and footnote 2 to § 204.2(c)(1)(i), which refers to it.

Three commenters specifically supported this proposal. Another commenter expressed concern that by eliminating the requirement, the Board would be unable to distinguish between maturities of time deposits in the future. If, in the future, the Board should wish to distinguish between time deposits based on maturity, the Board could amend Regulation D and/or its reporting forms as appropriate, and could consider at that time whether an additional early withdrawal penalty would be warranted for longer-term deposits. Therefore, the Board is adopting this proposal as proposed.

Eurocurrency Liabilities

The definition of Eurocurrency liabilities in § 204.2(h)(1) includes an amount equal to certain assets that were held by a depository institution's International Banking Facility or by non-United States offices of the depository institution or of an affiliated Edge or agreement corporation and that were acquired from the depository institution's United States offices on or after October 7, 1979. The Board proposed to delete the exclusion of assets acquired before October 7, 1979, because the Board believes that the amount of these assets is immaterial. The Board received no specific comments on this proposal and is adopting it as proposed.

Allocation of Reserve Requirements Exemption

The allocation of the reserve requirements exemption specified in § 204.3(a)(3)(i) requires that the exemption be allocated first to net transaction accounts in the form of NOW (and similar) accounts and second to other transaction accounts. This provision was related to the phase-in of reserve requirements for nonmember banks and the authorization of NOW and similar transaction accounts nationwide. Since the phase-in is now complete and nonmember institutions are subject to the same reserve requirements as member banks, the provision has ceased to have any effect, and the Board proposed to delete it. Two commenters expressed support for the proposed deletion. Another commenter, while noting that the requirement is obsolete, described its elimination as entirely technical. The Board is adopting this proposal as proposed.

Deductions Allowed in Computing Reserves

The deduction in § 204.3(f)(1) limits the amount of cash items in process of collection and balances subject to immediate withdrawal due from domestic depository institutions that may be subtracted from an institution's NOW accounts. Amounts in excess of this limit may be subtracted from other transaction accounts. Since the phase-in of reserve requirements for nonmember banks is now complete, all types of transaction accounts are subject to the same reserve requirements. Therefore, this limitation has ceased to have any effect and the Board proposed to delete it. One commenter specifically supported the Board's proposed deletion, and the Board is adopting this proposal as proposed.

Federal Reserve Credit for Depository Institutions Maintaining Pass-Through Balances

Section 19(e) of the Federal Reserve Act prohibits member banks from acting as the medium or agent of a nonmember bank in applying for or receiving discounts from a Federal Reserve Bank except by permission of the Board. Regulation A, Extensions of Credit by Federal Reserve Banks (12 CFR Part 201), was amended in 1993 to delegate authority for granting this permission to the Federal Reserve Bank that extends the credit. 12 CFR 201.6(d). The Board

VOL 61 ISS 252 DE 31 1996 UMI

correspondingly proposed to amend § 204.3(i)(5)(iv) of Regulation D effectively to complete the delegation of this authority to the Federal Reserve Bank that extends the credit. One commenter specifically supported this proposal, and the Board is adopting it as proposed.

Transition Rules

The regulation currently includes in § 204.4(a) a transition rule for depository institutions outside of Hawaii that were nonmembers of the Federal Reserve System on July 1, 1979, and that remained nonmembers. With the completion of the phase-in of reserves for such nonmembers on September 10, 1987, this rule ceased to have any effect. Section 204.4(b) contains a transition rule for depository institutions that were not members between July 1, 1979, and September 1, 1980, and that subsequently became members; since reserve requirements for nonmember institutions are fully phased in, this rule also has ceased to have any effect. Section 204.4(d) contains a transition rule for nonmember depository institutions that were engaged in business in Hawaii on August 1, 1978, and that remained nonmembers; this rule ceased to have any effect on January 7, 1993. Therefore, the Board proposed to delete these rules. The Board received three comments supporting the proposed deletion of §§ 204.4(a) and (b), and no comments on its proposed deletion of § 204.4 (d). The Board is adopting these proposals as proposed.

Section 204.4(c) sets forth a transition rule for *de novo* depository institutions with daily average reservable liabilities of less than $50 million whereby their reserve requirement is 40 percent of the reserves otherwise required in maintenance periods during the first quarter after commencing business, increasing to 100 percent in maintenance periods during the eighth and succeeding quarters. The low reserve tranche of a depository institution's net transaction accounts is currently subject to a reserve requirement of 3 percent, as compared with 10 percent for its net transaction accounts in excess of the low reserve tranche. The *de novo* transition rules precede creation of the low reserve tranche in 1982. The low reserve tranche cutoff is indexed to net transaction accounts of all depository institutions; as a result, the cutoff has increased from $25 million initially to $49.3 million for 1997. Thus, almost all transaction accounts of *de novo* depository institutions that could avail themselves of this transition rule are now covered by the low reserve tranche. Moreover, beginning in 1982, $2 million of reservable deposits have been subject to a zero percent reserve requirement; this exemption is indexed to total reservable liabilities of all depository institutions and has increased to $4.4 million for 1997.

In addition, a depository institution's vault cash may be used to meet its reserve requirement. Since *de novo* depository institutions generally have relatively low levels of deposits in relation to the reserve requirement exemption and the low reserve tranche cutoff, most are able to meet reserve requirements with vault cash and the others maintain minimal reserve balances. (Currently 56 depository institutions are receiving *de novo* phase-ins, and 52 of them are fully meeting their reserve requirements with vault cash.) This rule provides minimal benefits in terms of reducing required reserve balances of *de novo* institutions and unnecessarily complicates the processing of deposit reporting and reserve calculations. Consequently, the Board proposed to delete it. In order to avoid disrupting economic expectations based on the *de novo* transition rule, however, the Board proposed to grandfather any institution covered by the *de novo* transition rule on the effective date of the amendments for purposes of determining its required reserves. The Board received two comments supporting its proposal to delete § 204.4(c) and is adopting this proposal as proposed. As proposed, the Board will also grandfather any institution covered by the *de novo* transition rule on the effective date of the amendments.

Section 204.4(e) governs transition requirements in cases of mergers and consolidations. Paragraph (e)(1) covers "similar" mergers, where all depository institutions are subject to the same transition rules, and paragraph (e)(2) covers "dissimilar" mergers, where the institutions are subject to different transition rules. Currently, no institution is subject to the "dissimilar" merger transition rules. With the phase-in of reserve requirements for nonmember institutions, the transition rules (other than the merger and *de novo* rules) have become inoperative. Moreover, as discussed above, the *de novo* rules no longer have a significant effect in most cases. Therefore, the difference between the "similar" and "dissimilar" merger rules is minimal. In addition, the *de novo* rules would be eliminated under the proposal, with the result that all mergers would be "similar" mergers and the "dissimilar" merger rule would be inapplicable. Therefore, the Board proposed to delete the "dissimilar" merger transition rule and apply the current "similar" merger transition rule to all mergers. The Board received two comments supporting its proposed deletion of § 204.4(e), and is adopting this proposal as proposed.

Reserve Ratios

Section 204.9(b) sets forth the reserve ratios in effect during the last reserve computation period prior to September 1, 1980, for use in transition adjustments that are no longer applicable. The Board proposed to delete the section, and received two comments supporting its proposal. The Board is adopting this proposal as proposed.

Deposit Definitions

Many commenters also commented on provisions of Regulation D other than the proposed changes. Nine commenters suggested that the Board clarify the definition of "savings deposit," and a number of them also suggested that the Board also rewrite the definitions of "time deposit," "demand deposit," and/or "transaction account." One commenter suggested the use of bullet points to distinguish limitations on transfers from exceptions to such limitations. Two commenters appended suggested language designed to clarify the definition of savings account, principally by shortening the sentences.

The Board is publishing concurrently with this notice in the **Federal Register** a notice of proposed rulemaking to amend the definition of "savings deposit" in order to clarify it, and to amend the definition of "transaction account" in order to clarify it and conform it to the amended definition of "savings account."

One commenter, a trade association, pointed out that many of the questions that it receives regarding the savings deposit definition reflect increased interest in home banking and a consequent desire to avoid any limitation on transfers effected by means of a home computer. Another commenter opined that aggregating the different types of transfers and withdrawals affected by the limitation adds to consumer confusion and increases the monitoring problem for depository institutions, and, together with two other commenters, suggested that the Board eliminate all restrictions on point-of-sale and telephone transfers.[1]

[1] One of these commenters also suggested that the Board pay interest on reserve balances or support legislation to that effect.

On the issue of transfers by means of home computers, the current regulation states explicitly that any "telephonic (including data transmission) agreement, order, or instruction" is included in the six transfers and withdrawals limitation. Therefore home banking transfers are included in the limitation.

One commenter requested guidance on the requirement for a penalty of 7 days' simple interest in the event of a withdrawal from a time deposit within 6 days. In particular, this commenter expressed confusion in the case of a second withdrawal within 6 days after a partial withdrawal. In the case of a time deposit account deposited in one lump sum, the Board regards a partial withdrawal from the time deposit as a withdrawal of the entire deposit followed by a new deposit of the balance retained. The regulation therefore provides that a "time deposit from which partial early withdrawals are permitted must impose additional early withdrawal penalties of at least seven days' simple interest on amounts withdrawn within six days after each partial withdrawal." 12 CFR 204.2(c)(1)(i).

The same commenter, in reliance upon a service purporting to explain the Board's regulations, believed that 7 days' simple interest must be charged on withdrawals within 6 days of an additional deposit to the same time deposit. The Board believes that a bank may account for deposits and withdrawals either in order of deposit (FIFO) or in inverse order of deposit (LIFO).[2] Therefore, the regulation does not prescribe an accounting policy to be applied to such withdrawals. However, the Board does expect that a depository institution will be consistent in its choice of policy in this regard.

Another commenter, a trade association, asked if all demand deposits should contain the right to require 7 days' notice of withdrawal pursuant to § 204.2(b)(2). The demand deposits described in § 204.2(b)(2) are in addition to the demand deposits described in § 204.2(b)(1), which do not require 7 days' notice of withdrawal. The demand deposits described in § 204.2(b)(2) are considered demand deposits despite the fact that they may require 7 days' notice of withdrawal.

The Board, in light of the comments received, also considered whether substantive revisions to the definitions of the different types of deposits could be implemented in an effort to simplify the regulation further. It concluded that the practical scope for any such redefinitions is limited. The Board notes that Section 19 of the Federal Reserve Act establishes separate ranges for required reserve ratios on transaction accounts and nonpersonal time and savings deposits, and provides no authority for imposing reserve requirements on personal time and savings deposits. This statutory requirement for different reserve treatment of the various types of deposits creates a need for regulatory definitions to distinguish between the various types of deposits. Moreover, technological change and financial innovation have led to a proliferation of types of deposits and transfer arrangements. Many depository institutions have implemented so-called "retail sweep" programs in order to reduce their reserve requirements. These programs have already resulted in a substantial decline in transaction accounts and required reserves. The more widespread adoption of these programs that is evidently in process could impair the predictability of overall reserve demand and hence adversely affect the ability of the Federal Reserve to gauge the supply of reserves consistent with its intended monetary policy stance. These developments could eventually suggest changes in the structure of reserve requirements, potentially including changes in deposit definitions. Depending on the type of change that might be found appropriate, such a change could require legislation or be implemented administratively. The Federal Reserve will continue to monitor closely developments in the federal funds market for evidence about how lower levels of required reserves may influence the implementation of monetary policy and the appropriate structure of reserve requirements. Under the circumstances, the Board believes that a major revision of the definitions that serve as the basis for determining the liabilities against which reserves are required is not appropriate at the present time.

Other Comments

One commenter suggested that Regulation D contain an explicit cross reference to the Board Interpretation on multiple savings accounts treated as transaction accounts (12 CFR 204.133, FRRS 2–286). Another believed that the Board's notice of August 25, 1992 (57 **Federal Register** 38417) discussing several Regulation D issues should be included in the regulation because of difficulty in obtaining a copy. A third suggested that Board Interpretations and Staff Opinions related to Regulation D be streamlined and made consistent with the final rule. Two others suggested that this guidance be replaced with an official staff commentary. The Board will consider streamlining its guidance related to Regulation D or issuing an official staff commentary.

However, the Board believes that specific cross references in the regulation to selected interpretations could be construed to mean that the other guidance is of less importance, and therefore the Board believes that such cross references generally should be avoided.

A Federal Reserve Bank commented that sweeps into and out of retail savings accounts should be prohibited, because of the economic waste involved in this form of avoidance of the transaction limitations otherwise applicable to savings accounts. Alternatively, if the Board permits these sweep accounts, the applicable limitations should be spelled out in the regulation. Another commenter and an industry trade association similarly requested clarification on sweep accounts in the regulation. Regulation D currently limits transfers from savings accounts, with certain exceptions, to six per month or monthly statement cycle. The Board believes that the regulation is clear that two separate accounts, established by agreement with the depositor, one of which is a transaction account and the other of which is a savings account, can be structured so that transfers between the two accounts can take place provided that no more than six transfers and/or withdrawals from the savings account will take place in any month or statement cycle, and so that the savings account will otherwise meet the qualifications required by Regulation D.

A bank holding company objected to the transfer limitations on savings accounts, stating that competitive pressures in the market for business deposits combine with these limitations to make necessary alternative products such as sweep repurchase agreements, with consequent additional legal and system support costs that serve no economic purpose. The commenter suggested that the Board support possible legislation to remove some of these restrictions. Section 19 of the Federal Reserve Act requires the Board to distinguish transaction accounts from other accounts, because it requires different reserve requirements for transaction accounts and other accounts. (Currently, net transaction accounts in excess of the low reserve tranche are subject to a 10 percent

[2] The Board proposed in 1991 to require LIFO accounting in the case of multiple credits. See 56 FR 15522, 15526. In response to comments opposing the proposal, the Board withdrew it.

reserve requirement whereas nonpersonal time deposits are subject to a zero percent reserve requirement and personal time deposits are exempt from reserve requirements by statute.) The Board has based the distinction between transaction accounts and other accounts on the depositor's convenience of access and consequent ability to use savings deposits for transactional purposes.

Another bank requested additional guidance on sweeps from major accounts, principally those held by corporations and partnerships. The commenter has implemented a master repurchase agreement for these accounts to replace a previous arrangement involving funds secured by Treasury and federal agency securities, and requested guidance with respect to agreements and collateral. Regulation D clearly excludes from the definition of deposit any obligation that "arises from a transfer of direct obligations of, or obligations that are fully guaranteed as to principal and interest by, the United States government or any agency thereof that the depository institution is obligated to repurchase." 12 CFR 204.2(a)(1)(vii)(B). In order for a repurchase obligation to qualify under this exclusion and be thus exempted, in effect, from the requirements of Regulations D and Q, the transaction generally must meet regulatory requirements for agreements to repurchase government securities under the Government Securities Act of 1986 (as amended). See, *e.g.*, 17 CFR parts 403, 404, and 450.

A trade association suggested that the Regulation D definition of demand deposit should preempt a state law provision applicable to its members, which defines demand deposit to include any deposit withdrawable within 30 days. The definition in Regulation D is for the purpose of calculating reserve requirements (since demand deposits are included in transaction accounts) and is also employed in Regulation Q. The Board is not aware of any circumstances under which the state law impairs the effectiveness of these regulations.

One Federal Reserve bank reported receiving a number of requests from depository institutions and bank holding companies for the elimination of member bank pass-through restrictions and of the requirement that reserves passed through a correspondent be held in the Federal Reserve district where the respondent is located. The pass-through restrictions are based on section 19(c) of the Federal Reserve Act, which states that reserve balances of member banks must be held at the Federal Reserve bank of which the bank maintaining the balance is a member, and on operating considerations. The Board will be considering these issues further in light of the growth in interstate banking arrangements that span Federal Reserve district lines.

Finally, § 204.3(i)(1)(ii), which specifies procedure for changes in correspondent-respondent relationships for required reserve balances, incorrectly refers to Reserve Banks' operating circulars that do not exist; § 204.3(i)(4)(ii), which assigns to correspondents responsibility for respondents' required reserve balances, incorrectly refers to "penalties" for reserve deficiencies rather than "charges"; and § 204.7(a)(1), which discusses charges for reserve deficiencies, incorrectly refers to "the 2 percent carryover provided in § 204.3(h)," whereas § 204.3(h) provides a carryover of 4 percent or $50,000, whichever is greater. Accordingly, the Board is replacing "in its operating circular" by "in its discretion," replacing "penalties" by "charges" in § 204.3(i)(4)(ii) and simplifying § 204.7(a)(1) to refer to "the carryover provided in § 204.3(h)." Similarly, the references to "penalty-free band" in § 204.3(h) are replaced by references to "charge-free band."

Final Rule

The Board is adopting the revisions to Regulation D substantially as proposed. In addition, the Board is correcting the references to penalties in the sections on correspondent's responsibility and reserve deficiencies, and clarifying the carryover reference in the section on reserve deficiencies. No substantive change to these two sections is intended.

Final Regulatory Flexibility Analysis

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires an agency to publish a final regulatory flexibility analysis with any notice of proposed rulemaking. One of the requirements of a final regulatory flexibility analysis (5 U.S.C. 604(a))—a statement of the need for, and the objectives of, the rule—is contained in "Background" above. The Regulation D amendments being proposed require no additional reporting or recordkeeping requirements and do not overlap with other federal rules.

A second requirement for the final regulatory flexibility analysis is a summary of the issues raised by the public comments in response to the initial regulatory flexibility analysis that was included in the notice of proposed rulemaking. The Board received no comments specifically related to the initial regulatory flexibility analysis, and the comments it received on the rule are discussed in "Background" above.

The third requirement for the final regulatory flexibility analysis is a description of any significant alternatives to the rule consistent with the stated objectives of the applicable statutes and designed to minimize any significant impact of the rule on small entities. The rule will apply to all depository institutions regardless of size, except that the transition rule for *de novo* institutions applies only to institutions with total transaction accounts, nonpersonal time deposits, and Eurocurrency liabilities of less than $50 million.

Except for the transition rules relating to dissimilar mergers and *de novo* institutions, the amendments are burden-reducing and no appropriate alternatives to the provisions in the proposal were found which would further reduce burdens. (The Board considered whether substantive revisions to the definitions of deposits could be implemented in an effort to simplify the regulation further, and concluded that a major revision of the definitions is not appropriate at present. See "Background" above.) The current transition rules for dissimilar mergers provide a minor temporary potential reduction in reserve requirements for certain merged institutions. However, no institution is currently benefitting from the dissimilar merger rules. The transition rules for *de novo* institutions, which are only applicable to institutions with reservable liabilities of less than $50 million and provide only a temporary benefit, have become much less significant with the increase in the low-reserve tranche cutoff ($49.3 million for 1997). Partly for this reason, only 56 institutions are currently receiving *de novo* phase-in benefits and only 4 of these institutions are not fully meeting their reserve requirements with vault cash. In order to avoid disrupting economic expectations based on the *de novo* transition rule, any institution covered by the *de novo* transition rule on the effective date of the amendments will be grandfathered for the purpose of determining its required reserves. Therefore, the Board believes that the amendments will not have a significant adverse economic impact on a substantial number of small entities.

A number of the comments included suggestions with respect to other provisions of Regulation D that could reduce burdens on all depository institutions, especially with respect to distinguishing time and savings deposits from transaction accounts. The

Board's responses to these comments are set forth under "Background" above.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act notice of 1995 (44 U.S.C. Ch. 3506; 5 CFR Part 1320, Appendix A.1), the Board has reviewed the rule under the authority delegated to the Board by the Office of Management and Budget. No collection of information pursuant to the Paperwork Reduction Act is contained in the rule.

List of Subjects in 12 CFR Part 204

Banks and banking, Federal Reserve System, Reporting and recordkeeping requirements.

Authority and Issuance

For the reasons set forth in the preamble, the Board is amending part 204 of chapter II of title 12 as follows:

PART 204—RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS (REGULATION D)

1. The authority citation for part 204 continues to read as follows:

Authority: 12 U.S.C. 248(a), 248(c), 371a, 461, 601, 611, and 3105.

2. Section 204.2 is amended as follows:

a. In paragraph (c)(1)(i) introductory text, the introductory text of footnote 1 is amended by removing "before maturity" and adding in its place "during the period when an early withdrawal penalty would otherwise be required under this part", removing "the" after "imposing" and adding in its place "an", removing "penalties" and adding in its place "penalty", and footnote 2 is removed.

b. In paragraphs (c)(1)(iv)(C), (c)(1)(iv)(E), and (d)(2), footnotes 3 through 5 are redesignated as footnotes 2 through 4, respectively, and footnote 6 is removed.

c. Paragraph (f)(1)(iii) is revised.

d. Paragraph (f)(1)(iv) is removed and paragraph (f)(1)(v) is redesignated as paragraph (f)(1)(iv).

e. In newly redesignated paragraphs (f)(1)(iv)(C) and (f)(1)(iv)(E), footnotes 7 and 8 are redesignated as footnotes 5 and 6, respectively.

f. Paragraph (f)(3) is removed and footnote 9 is removed.

g. In paragraph (h)(1)(ii)(A), footnote 10 is redesignated as footnote 7 and is amended by removing "(1) that were acquired before October 7, 1979, or (2)".

h. In paragraph (h)(2)(ii), footnote 11 is redesignated as footnote 8 and is amended by revising "Footnote 10" to read "footnote 7".

i. In paragraph (t), footnote 12 is redesignated as footnote 9, and footnote reference 2 is redesignated as footnote reference 9. The revisions are as follows:

§ 204.2 Definitions.

* * * * *

(f)(1) * * *

(iii) A transferable time deposit. A time deposit is transferable unless it contains a specific statement on the certificate, instrument, passbook, statement or other form representing the account that it is not transferable. A time deposit that contains a specific statement that it is not transferable is not regarded as transferable even if the following transactions can be effected: a pledge as collateral for a loan, a transaction that occurs due to circumstances arising from death, incompetency, marriage, divorce, attachment, or otherwise by operation of law or a transfer on the books or records of the institution; and

* * * * *

3. Section 204.3 is amended as follows:

a. Paragraph (a)(3)(i) is removed and the paragraph designation (a)(3)(ii) is removed.

b. Paragraph (f)(1) is revised.

c. In paragraphs (h)(1) and (h)(2), the words "required clearing balance penalty-free band" are revised to read "required charge-free band".

d. Paragraph (i)(1)(ii) is amended in the last sentence by removing "in its operating circular" and adding in its place "in its discretion".

e. Paragraph (i)(4)(ii) is amended by removing "penalties" in the second sentence and "penalty" in the third sentence and adding in their place "charges" and "charge", respectively.

f. Paragraph (i)(5)(iv) is removed.

The revisions are as follows:

§ 204.3 Computation and maintenance

* * * * *

(f) *Deductions allowed in computing reserves.* (1) In determining the reserve balance required under this part, the amount of cash items in process of collection and balances subject to immediate withdrawal due from other depository institutions located in the United States (including such amounts due from United States branches and agencies of foreign banks and Edge and agreement corporations) may be deducted from the amount of gross transaction accounts. The amount that may be deducted may not exceed the amount of gross transaction accounts.

* * * * *

4. Section 204.4 is revised to read as follows:

§ 204.4 Transitional adjustments in mergers

In cases of mergers and consolidations of depository institutions, the amount of reserves that shall be maintained by the surviving institution shall be reduced by an amount determined by multiplying the amount by which the required reserves during the computation period immediately preceding the date of the merger (computed as if the depository institutions had merged) exceeds the sum of the actual required reserves of each depository institution during the same computation period, times the appropriate percentage as specified in the following schedule:

Maintenance periods occurring during quarters following merger or consolidation	Percentage applied to difference to compute amount to be subtracted
1	87.5
2	75.0
3	62.5
4	50.0
5	37.5
6	25.0
7	12.5
8 and succeeding	0

§ 204.7 [Amended]

5. Section 204.7 is amended in paragraph (a)(1) by removing "after application of the 2 percent carryover provided in § 204.3(h)" and adding in its place "after application of the carryover provided in § 204.3(h)".

6. Section 204.8 is amended as follows:

a. In paragraph (a)(2)(i)(B)(*5*), footnotes 13 and 14 are redesignated as footnotes 10 and 11, respectively.

b. In paragraph (a)(3)(v), footnotes 15 and 16 are redesignated as footnotes 12 and 13, respectively, and revised to read as follows:

§ 204.8 International banking facilities.

(a) *Definitions.* * * *

(3) * * *

(v) * * * [12] * * * [13] * * *

* * * * *

§ 204.9 [Amended]

7. Section 204.9 is amended by removing paragraph (b), by redesignating paragraphs (a)(1) and (a)(2) as paragraphs (a) and (b), respectively.

[12] See footnote 10.

[13] See footnote 11.

VOL 61 ISS 252 DE 31 1996 UMI

By order of the Board of Governors of the Federal Reserve System, December 24, 1996.

William W. Wiles,

Secretary of the Board.

[Docket No. 96–NM–279–AD; Amendment 39–9867; AD 96–26–04]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Boeing Model 747 series airplanes. This action requires a one-time inspection to detect fatigue cracking of the vertical beam webs and chords of the nose wheel well (NWW) at body station (BS) 300 and BS 320, and repair, if necessary. This action also requires inspections to detect fatigue cracking of the inner chord and web of the fuselage frames at BS 300 and BS 320, and repair, if necessary. This amendment is prompted by a report indicating that the fuselage frames at BS 300 and BS 320 severed approximately 10 inches outboard of the NWW side panel and resulted in accelerated fatigue cracking and subsequent failure of the adjacent NWW vertical beams. The actions specified in this AD are intended to detect and correct such fatigue cracking, which could result in collapse of the NWW pressure bulkhead and subsequent rapid decompression of the airplane.

DATES: Effective January 6, 1997.

Comments for inclusion in the Rules Docket must be received on or before March 3, 1997.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 96–NM–279–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

FOR FURTHER INFORMATION CONTACT: Bob Breneman, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington; telephone (206) 227–2776; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION: The FAA has received a report indicating that the flight crew of a Boeing Model 747–200 series airplane heard a loud noise below the cockpit area during flight descent. The flight continued with an uneventful landing. Investigation revealed that the left-hand side wall of the nose wheel well (NWW) was bulging. Further investigation revealed that the fuselage frames at body stations (BS) 300 and BS 320 had severed approximately 10 inches outboard of the NWW side panel. Additionally, the vertical beam of the NWW at BS 300 contained multiple cracks in the inner chord, a severed web, and a cracked and deformed outer chord. The vertical beam of the NWW at BS 320 also was found to have a severed web and cracks in the radius of the inner chord, as well as severe damage to numerous horizontal stiffeners and clips. The apparent cause of this cracking is fatigue.

Fatigue cracking of the BS 300 and BS 320 fuselage frames in the area of the NWW, if not detected and corrected in a timely manner, could result in collapse of the NWW pressure bulkhead, and subsequent rapid decompression of the airplane.

Other Relevant Rulemaking

The FAA previously issued AD 90–06–14, amendment 39–6544 (55 FR 10045, March 19, 1990), which is applicable to certain Boeing Model 747 series airplanes. [A correction of that rule was published in the **Federal Register** on May 18, 1990 (55 FR 20590).] That AD requires repetitive visual inspections to detect fatigue cracking of the vertical beams, webs, clips, side wall web, top panel and intercostals of the NWW. That AD requires that the initial inspection be accomplished prior to the accumulation of 10,000 total flight cycles, and that repetitive inspections be accomplished at intervals of 1,500 or 3,000 flight cycles, depending on the inspection method used.

The FAA also issued AD 91–11–01, amendment 39–6997 (56 FR 22306, May 15, 1991), which also is applicable to certain Boeing Model 747 series airplanes. That AD requires the inspection to detect fatigue cracking of the fuselage frames adjacent to the NWW, prior to the accumulation of 16,000 flight cycles. That AD provides an optional terminating modification that entails installing new fuselage frames (including the frames adjacent to the NWW) with improved durability. That modification is required prior to the accumulation of 20,000 flight cycles in accordance with AD 90–06–06 (aging fleet AD).

The airplane involved in the incident described previously had accumulated 14,341 total flight cycles at the time of structural failure. A visual inspection to detect cracking of the vertical beams of the NWW in accordance with AD 90–06–14 had been performed only 621 cycles prior to the reported failure. The fuselage frames in its NWW area had not yet been replaced with the new, improved durability frames in accordance with AD 91–11–01.

Explanation of the Requirements of the Rule

Since an unsafe condition has been identified that is likely to exist or develop on other Boeing Model 747 series airplanes of the same type design, this AD is being issued to detect and correct fatigue cracking of BS 300 and BS 320 fuselage frames adjacent to the NWW, which could result in collapse of the NWW pressure bulkhead and possibly result in rapid decompression of the airplane. This AD requires repetitive visual inspections to detect fatigue cracking of the inner chord and web of the left and right side of fuselage frames at BS 300 and BS 320, from the NWW side panel outboard to stringer 39. This AD also requires a one-time visual inspection to detect fatigue cracking of the vertical beam webs and chords of the NWW at BS 300 and BS 320. This AD also requires that any cracking detected during those inspections be repaired in accordance with a method approved by the FAA.

Interim Action

This is considered to be interim action until final action is identified, at which time the FAA may consider further rulemaking.

Determination of Rule's Effective Date

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the

Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 96–NM–279–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

96–26–04 Boeing: Amendment 39–9867. Docket 96–NM–279–AD.

Applicability: Model 747 series airplanes having line numbers 1 through 678 inclusive; on which the Section 41 frame replacement in zone 1 specified in Boeing Service Bulletin 747–53–2272 has not been accomplished; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To detect and correct fatigue cracking of body station (BS) 300 and BS 320 fuselage frames adjacent to the nose wheel well (NWW), which could result in collapse of the NWW pressure bulkhead, and subsequent rapid decompression of the airplane, accomplish the following:

(a) Prior to the accumulation of 10,000 total flight cycles, or within 50 flight cycles after the effective date of this AD, whichever occurs later, perform a detailed visual inspection to detect fatigue cracking of the inner chord and web of the left side and right side of BS 300 and BS 320 fuselage frames from the nose wheel well (NWW) side panel outboard to stringer 39, in accordance with normal maintenance practices. Pay particular attention to the area where the NWW vertical beam inner chord interfaces with the fuselage frame.

(1) If no cracking is detected, repeat the detailed visual inspection thereafter at intervals not to exceed 100 flight cycles.

(2) If any cracking is detected, prior to further flight, repair in accordance with a method approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

(b) Prior to the accumulation of 10,000 total flight cycles, or within 50 flight cycles after the effective date of this AD, whichever occurs later, perform a detailed one-time visual inspection to detect fatigue cracking of the left and right side vertical beam webs and chords of the NWW at BS 300 and BS 320, in accordance with normal maintenance procedures.

(1) If no cracking is detected, no further action is required by this paragraph.

(2) If any cracking is detected, prior to further flight, repair in accordance with a method approved by the Manager, Seattle ACO.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) This amendment becomes effective on January 6, 1997.

Issued in Renton, Washington, on December 20, 1996.

S. R. Miller,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Automatic Extension of Time for Filing Individual Income Tax Returns; Automatic Extension of Time To File Partnership Return of Income, Trust Income Tax Return, and U.S. Real Estate Mortgage Investment Conduit Income Tax Return

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

VOL 61 ISS 252 DEC 31 1996 UMI

SUMMARY: This document contains final regulations that reflect new and simpler procedures for an individual to obtain an automatic extension of time to file an individual income tax return. This document also contains final regulations that provide new and simpler procedures for a partnership, trust, and Real Estate Mortgage Investment Conduit (REMIC) to obtain an automatic extension of time to file partnership, trust, and REMIC returns.

EFFECTIVE DATE: The regulations are effective December 31, 1996.

FOR FURTHER INFORMATION CONTACT: Margaret A. Owens, (202) 622–6232 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act (44 U.S.C. 3504(h)) under control numbers 1545–1479 and 1545–0148. Responses to this collection of information are required to obtain a benefit (an automatic 4-month extension of time to file an individual income tax return or an automatic 3-month extension of time to file a partnership return of income, a trust income tax return, or a REMIC income tax return).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

Estimates of the reporting burden in these final regulations are reflected in the burden estimates of either Form 4868, Application for Automatic Extension of Time to File U.S. Individual Income Tax Return, or Form 8736, Application for Automatic Extension of Time To File U.S. Return for a Partnership, REMIC or for Certain Trusts.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be sent to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224, and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

Extensions for Individual Income Tax Returns

On January 4, 1996, temporary regulations (TD 8651) providing new and simpler procedures for individuals to obtain an automatic extension of time to file an individual income tax return were published in the **Federal Register** (61 FR 260). A notice of proposed rulemaking (IA–41–93) cross-referencing the temporary regulations was published in the **Federal Register** for the same day (61 FR 338).

Written comments responding to the notice of proposed rulemaking were received. No public hearing was requested or held. After consideration of all the comments, the temporary regulations under sections 6081 and 6651 relating to the automatic extension of time to file individual income tax returns are adopted as revised by this Treasury Decision, and the corresponding temporary regulations are removed. The comments and revisions are discussed below in the section on Explanation of Provisions and Summary of Comments.

Extensions for Partnership Returns of Income and Trust Income Tax Returns

On April 5, 1988, temporary regulations (TD 8190) relating to the automatic extension of time to file partnership returns of income and trust income tax returns were published in the **Federal Register** (53 FR 11066). A notice of proposed rulemaking (LR–29–88) cross-referencing the temporary regulations was published in the **Federal Register** for the same day (53 FR 11103).

In accordance with section 860F(e), REMICs have been generally treated as partnerships with regard to extensions of time to file. A REMIC has been allowed an automatic 3-month extension of time to file if (1) an application was prepared on Form 8736, (2) the application was signed by the person duly authorized, (3) the application was filed on or before the date Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return, was due, (4) the application showed the full amount properly estimated as tax, and (5) the application was accompanied by full remittance of the amount properly estimated as tax that was unpaid as of the date prescribed for filing Form 1066.

Written comments responding to the notice of proposed rulemaking and the request for comments were received. No public hearing was requested or held. After consideration of all the comments, the temporary regulations under section 6081 relating to the automatic extension of time to file partnership returns of income, trust income tax returns, and REMIC income tax returns are adopted as revised by this Treasury decision, and the corresponding temporary regulations are removed. The comments and revisions are discussed below.

Explanation of Provisions and Summary of Comments

These final regulations provide that individuals may obtain an automatic 4-month extension of time to file an individual income tax return without remitting the unpaid amount of any tax properly estimated to be due with the application for extension of time to file. Under these final regulations, an individual's inability to pay is not a condition for obtaining an automatic 4-month extension. However, taxpayers are encouraged to make payments in order to minimize interest and penalties imposed on unpaid amounts.

The final regulations remove the regulatory requirement that Forms 4868 be signed.

Most commentators responded favorably to the proposed and temporary regulations. Some commentators suggested that the IRS should develop a bulk method for submitting applications for automatic extensions so that return preparers could submit a list of the required information for all their clients on one Form 4868. The final regulations provide that the IRS may prescribe other methods for submitting an application in lieu of a paper application on Form 4868. In April 1996, the IRS provided a method of filing Forms 4868 electronically through the Electronic Transmitted Documents System. See Publication 1346. The IRS continues to offer this method of filing Forms 4868. If there is still a need for other methods, suggestions should be sent to: CC:DOM:CORP:R (REG–209643–93), Room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044.

One commentator recommended that the requirement to "properly estimate" the tax be dropped, since payment of the unpaid amount of tax due is not a condition of obtaining an automatic 4-month extension of time to file an individual income tax return. The requirement has been retained to assist taxpayers in determining the amount of interest and penalties for which they will be liable if timely tax payments are not made, and to thereby encourage

payments, as large as possible, with the application for extension of time to file.

The final regulations provide the requirements for partnerships, trusts, and REMICs to obtain an automatic 3-month extension of time to file partnership, trust, and REMIC returns. The final regulations remove the regulatory requirement that Forms 8736 be signed. Notwithstanding the current instructions to Form 8736, an unsigned Form 8736 will be processed. In addition, these final regulations provide that trusts and REMICs may obtain an automatic 3-month extension of time to file a trust income tax return or a REMIC income tax return without remitting the unpaid amount of any tax properly estimated to be due with the application for extension of time to file.

The final regulations provide that the IRS may prescribe additional methods of obtaining an extension of time to file in lieu of a paper application on Form 8736.

Some commentators suggested that allowing automatic extensions for partnership returns of income and trust income tax returns will give rise to filing difficulties for partners and trust beneficiaries. The Treasury and the IRS took this concern into account when limiting partnership and trust extensions to 3 months rather than the 4 months permitted individuals.

Special Analyses

It has been determined that these final regulations are not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the notices of proposed rulemaking preceding the regulations were issued prior to March 29, 1996, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, a copy of the notice of proposed rulemaking providing an automatic extension of time to file an individual income tax return that precedes these regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal authors of these regulations are Margaret A. Owens, and Philip E. Bennet, Office of the Assistant Chief Counsel (Income Tax & Accounting), IRS. However, other personnel from the IRS and the Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 1, 301, and 602 are amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding new entries in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.6081–2 also issued under 26 U.S.C. 6081(a).

Section 1.6081–4 also issued under 26 U.S.C. 6081(a).

Section 1.6081–6 also issued under 26 U.S.C. 6081(a).

Section 1.6081–7 also issued under 26 U.S.C. 6081(a). * * *

Par. 2. Section 1.6081–2 is added to read as follows:

§ 1.6081–2 Automatic extension of time to file partnership return of income.

(a) *In general.* A partnership required to file a return of income on Form 1065, U.S. Partnership Return of Income, for any taxable year will be allowed an automatic 3-month extension of time to file the return after the date prescribed for filing the return if an application under this section is filed in accordance with paragraph (b) of this section. In the case of a partnership described in § 1.6081–5(a)(1), the automatic extension allowed under this section runs concurrently with an extension of time to file granted pursuant to § 1.6081–5(a).

(b) *Requirements.* In order to satisfy this paragraph (b), an application for an automatic extension under this section must be—

(1) Submitted on Form 8736, Application for Automatic Extension of Time To File U.S. Return for a Partnership, REMIC or for Certain Trusts, or in any other manner as may be prescribed by the Commissioner;

(2) Filed on or before the later of—

(i) The date prescribed for filing the partnership return (without regard to any extensions of the time for filing such return); or

(ii) The expiration of any extension of time to file granted such partnership pursuant to § 1.6081–5(a); and

(3) Filed with the Internal Revenue Service office designated in the application's instructions.

(c) *Payment of section 7519 amount.* An automatic extension of time for filing a partnership return under this section does not extend the time for payment of any amount due under section 7519, relating to required payments for entities electing not to have a required taxable year.

(d) *Section 444 election.* An automatic extension of time for filing a partnership return will run concurrently with any extension of time for filing a return allowed because of section 444, relating to the election of a taxable year other than a required taxable year.

(e) *Effect of extension on partner.* An automatic extension of time for filing a partnership return under this section does not operate to extend the time for filing a partner's income tax return or the time for the payment of any tax due on the partner's income tax return.

(f) *Termination of automatic extension.* The district director, including the Assistant Commissioner (International), or the director of a service center may terminate at any time an automatic extension by mailing to the partnership a notice of termination. The notice must be mailed at least 10 days prior to the termination date designated in such notice. The notice of termination must be mailed to the address shown on Form 8736 or to the partnerships's last known address.

(g) *Penalties.* See section 6698 for failure to file a partnership return.

(h) *Coordination with § 1.6081–1.* Except in undue hardship cases, no extension of time for filing a partnership return of income will be granted under § 1.6081–1 until an automatic extension has been allowed pursuant to the provisions of this section.

(i) *Effective date.* This section is effective for applications for an automatic extension of time to file a partnership return of income filed on or after December 31, 1996.

§ 1.6081–2T [Removed]

Par. 3. Section 1.6081–2T is removed.

§ 1.6081–3T [Removed]

Par. 4. Section 1.6081–3T is removed.

Par. 5. Section 1.6081–4 is amended as follows:

1. Paragraphs (a) and (c) are revised.

2. Paragraphs (d) and (e) are added.

The revised and added provisions read as follows:

VOL 61 ISS 252 DEC 31 1996 UMI

§ 1.6081–4 Automatic extension of time for filing individual income tax returns.

(a) *In general*—(1) *Period of extension.* An individual who is required to file an individual income tax return will be allowed an automatic 4-month extension of time to file the return after the date prescribed for filing the return provided the requirements contained in paragraphs (a)(2), (3), and (4) of this section are met. In the case of an individual described in § 1.6081–5(a)(5) or (6), the automatic 4-month extension will run concurrently with the extension of time to file granted pursuant to § 1.6081–5.

(2) *Manner for submitting an application.* An application must be submitted—

(i) On Form 4868, Application for Automatic Extension of Time to File U.S. Individual Income Tax Return; or

(ii) In any other manner as may be prescribed by the Commissioner.

(3) *Time and place for filing application.* Except in the case of an individual described in § 1.6081–5(a)(5) or (6), the application must be filed on or before the date prescribed for filing the individual income tax return. In the case of an individual described in § 1.6081–5(a)(5) or (6), the application must be filed on or before the expiration of the extension of time to file granted pursuant to § 1.6081–5. The application must be filed with the Internal Revenue Service office designated in the application's instructions.

(4) *Proper estimate of tax.* An application for extension must show the full amount properly estimated as tax for the taxable year.

(5) *Coordination with § 1.6081–1.* Except in undue hardship cases, no extension of time for filing an individual income tax return will be granted under § 1.6081–1 until an automatic extension has been allowed pursuant to the provisions of this paragraph (a).

* * * * *

(c) *Termination of automatic extension.* The district director, including the Assistant Commissioner (International), or the director of a service center may terminate at any time an automatic extension by mailing to the taxpayer a notice of termination. The notice must be mailed at least 10 days prior to the termination date designated in such notice. The notice of termination must be mailed to the taxpayer at the address shown on Form 4868 or to the taxpayer's last known address.

(d) *Penalties.* See section 6651 for failure to file an individual income tax return or failure to pay the amount shown as tax on the return. In particular, see § 301.6651–1(c)(3) of this chapter (relating to a presumption of reasonable cause in certain circumstances involving an automatic extension of time for filing an individual income tax return).

(e) *Effective date.* This section is effective for applications for an automatic extension of time to file an individual income tax return filed on or after December 31, 1996.

§ 1.6081–4T [Removed]

Par. 6. Section 1.6081–4T is removed.

Par. 7. Section 1.6081–6 is added under the undesignated centerheading "Extension of Time for Filing Returns" to read as follows:

§ 1.6081–6 Automatic extension of time to file trust income tax return.

(a) *In general.* A trust required to file an income tax return on Form 1041, U.S. Income Tax Return for Estates and Trusts, for any taxable year will be allowed an automatic 3-month extension of time to file the return after the date prescribed for filing the return if an application under this section is filed in accordance with paragraph (b) of this section.

(b) *Requirements.* To satisfy this paragraph (b), an application for an automatic extension under this section must—

(1) Be submitted on Form 8736, Application for Automatic Extension of Time To File U.S. Return for a Partnership, REMIC or for Certain Trusts, or in any other manner as may be prescribed by the Commissioner;

(2) Be filed on or before the date prescribed for filing the trust income tax return with the Internal Revenue Service office designated in the application's instructions; and

(3) Show the full amount properly estimated as tax for the trust for the taxable year.

(c) *Effect of extension on beneficiary.* An automatic extension of time to file a trust income tax return under this section will not operate to extend the time for filing the income tax return of a beneficiary of the trust or the time for the payment of any tax due on the beneficiary's income tax return.

(d) *Termination of automatic extension.* The district director, including the Assistant Commissioner (International), or the director of a service center may terminate at any time an automatic extension by mailing to the trust a notice of termination. The notice must be mailed at least 10 days prior to the termination date designated in such notice. The notice of termination must be mailed to the address shown on Form 8736 or to the trust's last known address.

(e) *Penalties.* See section 6651 for failure to file a trust income tax return or failure to pay the amount shown as tax on the return.

(f) *Coordination with § 1.6081–1.* Except in undue hardship cases, no extension of time for filing a trust income tax return will be granted under § 1.6081–1 until an automatic extension has been allowed pursuant to the provisions of this section.

(g) *Effective date.* This section is effective for applications for an automatic extension of time to file a trust income tax return filed on or after December 31, 1996.

Par. 8. Section 1.6081–7 is added under the undesignated centerheading "Extension of Time for Filing Returns" to read as follows:

§ 1.6081–7 Automatic extension of time to file Real Estate Mortgage Investment Conduit (REMIC) income tax return.

(a) *In general.* A Real Estate Mortgage Investment Conduit (REMIC) required to file an income tax return on Form 1066, U.S. Real Estate Mortgage Investment Conduit Income Tax Return, for any taxable year will be allowed an automatic 3-month extension of time to file the return after the date prescribed for filing the return if an application under this section is filed in accordance with paragraph (b) of this section.

(b) *Requirements.* To satisfy this paragraph (b), an application for an automatic extension under this section must—

(1) Be submitted on Form 8736, Application for Automatic Extension of Time To File U.S. Return for a Partnership, REMIC or for Certain Trusts, or in any other manner as may be prescribed by the Commissioner;

(2) Be filed on or before the date prescribed for filing the REMIC income tax return with the Internal Revenue Service office designated in the application's instructions; and

(3) Show the full amount properly estimated as tax for the REMIC for the taxable year.

(c) *Effect of extension on residual or regular interest holders.* An automatic extension of time to file a REMIC income tax return under this section will not operate to extend the time for filing the income tax return of a residual or regular interest holder of the REMIC or the time for the payment of any tax due on the residual or regular interest holder's income tax return.

(d) *Termination of automatic extension.* The district director, including the Assistant Commissioner (International), or the director of a

service center may terminate at any time an automatic extension by mailing to the REMIC a notice of termination. The notice must be mailed at least 10 days prior to the termination date designated in such notice. The notice of termination must be mailed to the address shown on Form 8736 or to the REMIC's last known address.

(e) *Penalties.* See sections 6698 and 6651 for failure to file a REMIC income tax return or failure to pay the amount shown as tax on the return.

(f) *Coordination with § 1.6081–1.* Except in undue hardship cases, no extension of time for filing a REMIC income tax return will be granted under § 1.6081–1 until an automatic extension has been allowed pursuant to the provisions of this section.

(g) *Effective date.* This section is effective for applications for an automatic extension of time to file a REMIC income tax return filed on or after December 31, 1996.

PART 301—PROCEDURE AND ADMINISTRATION

Par. 9. The authority citation for part 301 continues to read in part as follows:

Authority: 26 U.S.C. 7805. * * *

Par. 10. Section 301.6651–1 is amended by revising paragraph (c)(3) to read as follows:

§ 301.6651–1 Failure to file tax return or to pay tax.

* * * * *

(c) * * *

(3) If, for a taxable year ending on or after December 31, 1995, an individual taxpayer satisfies the requirement of § 1.6081–4(a) of this chapter (relating to automatic extension of time for filing an individual income tax return), reasonable cause will be presumed, for the period of the extension of time to file, with respect to any underpayment of tax if—

(i) The excess of the amount of tax shown on the individual income tax return over the amount of tax paid on or before the regular due date of the return (by virtue of tax withheld by the employer, estimated tax payments, and any payment with an application for extension of time to file pursuant to § 1.6081–4 of this chapter) is no greater than 10 percent of the amount of tax shown on the individual income tax return; and

(ii) Any balance due shown on the individual income tax return is remitted with the return.

* * * * *

§ 301.6651–1T [Removed]

Par. 11. Section 301.6651–1T is removed.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 12. The authority citation for part 602 continues to read as follow:

Authority: 26 U.S.C. 7805.

Par. 13. In § 602.101, paragraph (c) is amended by removing the entries for §§ 1.6081–2T, 1.6081–3T, and 1.6081–4T from the table, revising the entry for § 1.6081–4, and adding the following entries in numerical order to the table to read as follows:

§ 602.101 OMB Control numbers.

BILLING CODE 4830–01–P

DEPARTMENT OF JUSTICE

28 CFR Part 92

RIN 1105–AA47

Office of Community Oriented Policing Services; FY 1996 Police Corps Program

AGENCY: Office of the Police Corps and Law Enforcement Education, Office of Community Oriented Policing Services, Department of Justice.

ACTION: Final rule.

SUMMARY: This rule adopts without change an interim rule published by the Office of Community Oriented Policing Services, U.S. Department of Justice, in the **Federal Register** on September 24, 1996, which established a framework for the Police Corps, authorized by the Police Corps Act, Title XX, Subtitle A of the Violent Crime Control and Law Enforcement Act of 1994. One comment was received before the comment period expired on October 24, 1996.

DATES: Final rule is effective December 31, 1996.

FOR FURTHER INFORMATION CONTACT: L. Anthony Sutin, Deputy Director/General Counsel, Office of Community Oriented Policing Services, U.S. Department of Justice, 1100 Vermont Avenue, NW., Washington, DC 20530; telephone (202) 514–3750.

SUPPLEMENTARY INFORMATION: The purpose of this rule is to provide guidance to States and individuals interested in applying to participates in the Police Corps. The rule addresses eligibility requirements, application criteria and procedures, and certain post-application requirements. The rule is not intended to be a comprehensive compilation of the administrative requirements of the Police Corps; the authorizing statute (42 U.S.C. 14091 *et seq.*) is quite detailed in a number of respects and those requirements and provisions are not repeated in the regulation (but are set forth in the following overview). In addition, other program requirements and procedures will be formulated by the participating States in light of their circumstances and needs.

One commenter requested that college and university police forces be made eligible for assignment of Police Corps officers. The rule does not address this issue beyond restating the statute's requirement that Police Corps participants be assigned to a "State or local police force." The Office intends to defer to participating States the determination of whether a particular college or university police force qualifies as a "State or local police force" under the laws of those particular States and meet the other statutory requirements for receiving an assignment of Police Corps officers.

Based on other inquiries received by the Office relating to the program, the following additional points of background clarification are offered. First, while the Police corps does make available educational assistance to dependent children of fallen law enforcement officers, this assistance is limited to children of officers who served in a State that participate in the Police Corps. See 28 CFR 92.2(c)(3). Second, nothing in the statute or rule requires Police Corps participants who will receive scholarships for graduate study to resign their officer position upon commencement of graduate study,

to the extent consistent with their employment and educational commitments.

The Office of Community Oriented Policing Services is adopting the interim rule as final without change.

The Catalog of Federal Domestic Assistance Number for the Police Corps is 16.712.

Administrative Requirements

Executive Order 12866

This regulation has been drafted and reviewed in accordance with Executive Order 12866, section 1(b), Principles of Regulation. The Office of Community Oriented Policing Services has determined that this final rule is not a "significant regulatory action" under Executive Order 12866, section 3(f), Regulatory Planning and Review, and, accordingly, this final rule has not been reviewed by the Office of Management and Budget.

Regulatory Flexibility Act

The Director, Office of the Police Corps and Law Enforcement Education, Office of Community Oriented Policing Services, in accordance with the Regulatory Flexibility Act, codified at 5 U.S.C. 605(b), has reviewed this regulation and, by approving it, certifies that this regulation will not have a significant economic impact on a substantial number of small entities. This final rule builds upon the statutory outline of a program providing scholarships and educational assistance to individuals in exchange for a commitment to serve as a law enforcement officer for four years, and the award of such scholarships or assistance imposes no requirements on small businesses or other small entities.

Paperwork Reduction Act

Information collection associated with this regulation has been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1995. The OMB control number for this collection is 1103–0035.

List of Subjects in 28 CFR Part 92

Law enforcement officers, Scholarships and fellowships, Student aid.

Accordingly, the interim rule adding 28 CFR part 92, which was published in the **Federal Register** on September 24, 1996, at 61 FR 49971, is adopted as a final rule without change.

Dated: December 19, 1996.

Joseph E. Brann,

Director.

[FR Doc. 96–33294 Filed 12–30–96; 8:45 am]

BILLING CODE 4410–AT–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 244 and 245

[FRL–5670–6]

Solid Waste Programs; Management Guidelines for Beverage Containers and Resource Recovery Facilities Guidelines; Removal of Obsolete Guidelines

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is removing from the Code of Federal Regulations (CFR) two guidelines pertaining to solid waste management which are obsolete. The activities addressed in these 1976 guidelines have been included in numerous state and local statutes and regulations and other Federal rules, or have been superseded by such Presidential actions as Executive Order 12873, "Federal Acquisition, Recycling, and Waste Prevention." Deleting these guidelines from the CFR will have no measurable impact on solid waste management.

In the proposed rules section of today's **Federal Register**, EPA is proposing to withdraw Parts 244 and 245 from Title 40 of the CFR. The accompanying proposal incorporates the contents of this direct final rule. If adverse comments are received on that notice of proposed rulemaking, EPA will withdraw the direct final rule and address the comments received in a subsequent final rule. No additional opportunity for public comment will be provided.

DATES: This final rule will be effective on March 3, 1997 unless EPA receives adverse comments on the accompanying proposal within January 30, 1997. If such adverse comment is received, EPA will withdraw this direct final rule, and provide timely notice in the **Federal Register**.

ADDRESSES: Written comments (one original and two copies) should reference docket number F–96–MRBF–FFFFF and be addressed to: RCRA Docket and Information Center (RIC), Office of Solid Waste (5305W), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460. Supporting docket materials can be viewed at and hand deliveries of comments can be made to the following address: Crystal Gateway I, first floor, 1235 Jefferson Davis Highway, Arlington, VA. The RIC is open from 9 a.m. to 4 p.m. Monday through Friday, excluding federal holidays. To review docket materials, it is recommended that the public make an appointment by calling 703 603–9230. The public may copy a maximum of 100 pages from any regulatory docket at no charge. Additional copies cost $0.15/page.

FOR FURTHER INFORMATION CONTACT: Deborah Gallman, (703) 308–7276, U.S. EPA, Office of Solid Waste and Emergency Response, 401 M Street, S.W., (5306W), Washington, D.C. 20460, or the RCRA Hotline, phone (800) 424–9346 or TDD (800) 553–7672 (hearing impaired) or (703) 412–9810 or TDD (703) 412–3323 in the Washington, D.C., metropolitan area.

SUPPLEMENTARY INFORMATION:

I. Authority

This rule is being issued under the authority of sections 1008, 2002, 6001, and 6004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 and the Hazardous and Solid Waste Amendments of 1984; 42 U.S.C. 6961.

II. Introduction

On March 4, 1995, the President directed all Federal agencies and departments to conduct a comprehensive review of the regulations they administer and by June 1, 1995, to identify those rules that are obsolete or unduly burdensome. EPA has conducted a review of all its rules, including rules issued under the Resource Conservation and Recovery Act (RCRA). Based on that review, EPA is today withdrawing parts 244 and 245 from the CFR. In addition to the removal of parts 244 and 245, the EPA of Office of Solid Waste and Emergency Response identified a number of other rules that were obsolete as a matter of law or policy, and rules that needed clarifications in order to make certain provisions easier to read and understand. EPA has already published rules to address this (see 60 FR 33912 and 61 FR 18501) and plans to publish additional actions to further eliminate unnecessary rules and clarify others as appropriate. The Office of Solid Waste and Emergency Response intends to continue to evaluate its regulations to determine if they can be further simplified or stremlined.

III. Obsolete Guidelines

A. 40 CFR Part 244—Solid Waste Management Guidelines for Beverage Containers

On September 21, 1976, EPA issued guidelines for reducing beverage container waste. The guidelines, published in 40 CFR Part 244, were mandatory for Federal facilities and recommended for adoption by state and local governments and private agencies. These guidelines were intended to achieve a reduction in beverage container solid waste and litter, resulting in savings in waste collection and disposal costs to the Federal government. They were also intended to achieve the conservation and more efficient use of energy and other resources through the development of effective beverage distribution and container collection systems. The guidelines would achieve these goals by making all beverage containers on Federal facilities returnable and by encouraging reuse or recycling of the returned containers. To accomplish the return of a beverage container, a deposit of at least five cents on each returnable beverage container was to be paid upon purchase by the consumer and refunded to the consumer. The guidelines allowed Federal agencies not to implement the provisions in various situations where the requirements were not practical.

When these guidelines were promulgated in 1976, there were few other requirements for recycling beverage containers or other materials. Since then, Federal agencies have met the challenge of recycling by implementing, in-house or by contract, programs for collection of a number of recyclable materials, including beverage containers. Many state and local governments now require or encourage such collection programs. Under RCRA Section 6001, Federal facilities must meet such municipal or state recycling requirements. Furthermore, in 1993, President Clinton issued Executive Order 12873, "Federal Acquisition, Recycling, and Waste Prevention." Section 705 of the Executive Order requires each Executive agency that has not already done so to initiate a program to promote cost effective waste prevention and recycling of reusable materials at all of its facilities. Recycling programs implemented pursuant to Section 705 must be compatible with applicable state and local governments to promote recycling and waste reduction in the community.

During the first year after E.O. 12873 was signed, many Federal departments and agencies implemented or expanded recycling programs. To make this effort more efficient, the General Services Administration (GSA) provides contracts for collection of recyclables in many Federal offices. For more information on Federal collection programs and examples of agency accomplishments, see the docket to this rule.

With the implementation of RCRA Section 6001, E.O. 12873, and state and local recycling collection mandates and programs, there is no longer a need for separate guidelines for Federal facilities on beverage containers. Indeed, these other requirements establish a more comprehensive and integrated recycling program. Therefore, EPA is withdrawing 40 CFR Part 244.

B. 40 CFR Part 245—Resource Recovery Facilities Guidelines

On September 21, 1976, EPA issued guidelines for resource recovery facilities that were applicable to the recovery of resources from residential, commercial, or institutional solid wastes. The guidelines delineated minimum actions for Federal agencies for planning and establishing resource recovery facilities. Resource recovery facilities were defined in the guidelines as "any physical plant that processes residential, commercial, or institutional solid wastes biologically, chemically, or physically, and recovers useful products, such as shredded fuel, combustible oil or gas, steam, metal, glass, etc. for recycling." In addition, the guidelines included recommended actions for state, interstate, regional, and local governments. These guidelines applied to all Federal agencies with jurisdiction over any real property or facility, the operation or administration of which involved such agency in residential, commercial, or institutional solid waste disposal activities either in-house or by contract. Federal land that was used solely for the disposal of non-Federal solid waste was not considered real property or a facility for the purpose of these guidelines.

Since the promulgation of Part 245, more comprehensive programs and guidelines have been developed to address Federal and state solid waste activities related to resource recovery facilities. For example, the 40 CFR Part 256 guidelines, promulgated in July, 1979, were developed to assist in the development and implementation of state solid waste management plans, in accordance with Section 4002(b) of the Solid Waste Disposal Act as amended by RCRA. These guidelines address the minimum requirements for approval of state plans, including resource recovery programs, facility planning and implementation. In particular, Section 256.30 requires that state plans address policies and strategies for resource recovery, conservation activities, and local government contracts for the supply of solid waste to resource recovery facilities. Also, § 256.40 requires that state plans "provide for adequate resource conservation, recovery, storage, treatment and disposal facilities and practices necessary to use or dispose of solid and hazardous waste in an environmentally sound manner." Since the promulgation of Part 256, many states have developed Federally approved solid waste management plans, and in some cases the state requirements are more stringent than the Federal guidelines. Under RCRA section 6001 Federal facilities must comply with such state resource recovery requirements.

The activities promoted under 40 CFR Part 245, dealing with recovery of resources and resource recovery facilities, are also addressed in many state and local recycling programs mentioned above and in many comprehensive statewide solid waste management laws enacted since 1976. These laws and programs provide a more integrated framework for resource recovery facilities than 40 CFR Part 245 does. Since 40 CFR Part 256 and related state and local laws incorporate the older Part 245 requirements for facility planning and implementation for resource recovery programs, the guidelines in 40 CFR Part 245 are considered obsolete. Accordingly, EPA is removing these resource recovery guidelines from the CFR.

IV. Analysis under Executive Order (E.O.) 12866, the Unfunded Mandates Reform Act of 1995, and the Paperwork Reduction Act

Because the withdrawal of these guidelines from the CFR reflects their current obsolescence and has no regulatory impact, this action is not a "significant" regulatory action within the meaning of E.O. 12866, and does not impose any Federal mandate on state, local, or tribal governments or the private sector within the meaning of the Unfunded Mandates Reform Act of 1995. For the same reasons, their deletion from the CFR does not affect requirements under the Paperwork Reduction Act.

V. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, generally requires an agency to prepare, and make available for public comment, a

regulatory flexibility analysis that describes the impact of a proposed or final rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies the rule will not have a significant adverse economic impact on a substantial number of small entities. Today's rule is deregulatory in nature. The effect of today's final rule is to remove obsolete guidelines which are mandatory only for Federal facilities. Therefore, I certify that today's rule will not have a significant economic impact on a substantial number of small entities. As a result, no Regulatory Flexibility Analysis is needed.

VI. Submission To Congress And The General Accounting Office

Under 5 U.S.C. 801(a)(1)(A) as added by the Small Business Regulatory Enforcement Fairness Act of 1996, EPA submitted a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives and the Comptroller General of the General Accounting Office prior to publication of the rule in today's **Federal Register**. This rule is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects

40 CFR Part 244

Environmental Protection, Beverages, Government property, Recycling.

40 CFR Part 245

Government property, Recycling.

Dated: December 20, 1996.

Carol M. Browner,

Administrator.

For the reasons set forth in the preamble and under the authority of 42 U.S.C. sections 6907, 6912, 6961, and 6964, Title 40, Chapter I of the Code of Federal Regulations is amended as follows:

PART 244—[REMOVED]

1. Part 244 is removed.

PART 245—[REMOVED]

2. Part 245 is removed.

Medicare Program; Waiver of Recovery of Overpayments

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Correction notice.

SUMMARY: On September 19, 1996, we published a final rule (61 FR 49269), which duplicated in HCFA's regulations the content of two sections of the Social Security Administration's (SSA) regulations concerning waiver of recovery of overpayments. Since SSA was restructuring its regulations to apply only to the Federal Old-Age, Survivors and Disability Insurance Program, we established the content of these sections in 42 CFR part 405 to preserve the content of the SSA regulations that are applicable to the Medicare Program. This notice corrects an error in the authority citation in that document.

EFFECTIVE DATE: These regulations are effective on October 21, 1996.

FOR FURTHER INFORMATION CONTACT: David Walczak, (410) 786–4475.

SUPPLEMENTARY INFORMATION: On September 19, 1996, we published a final rule (61 FR 49269) concerning waiver of recovery of overpayments. This notice corrects an error in the authority citation in that document.

On page 49271, in column one, under part 405, amendment 1, the authority citation for part 405, "**Authority:** Secs. 1102, 1862, and 1871 of the Social Security Act (42 U.S.C. 1302, 1395y, and 1895hh)." is corrected to read, "**Authority:** Secs. 1102, 1861, 1862(a), 1871, 1874, and 1881 of the Social Security Act (42 U.S.C. 1302, 1395x, 1395y(a), 1395hh, 1395kk, and 1395rr), and sec. 353 of the Public Health Service Act (42 U.S.C. 263a), unless otherwise noted."

Medicare and Medicaid Programs; Requirements for Physician Incentive Plans in Prepaid Health Care Organizations

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This final rule amends the regulations established by a March 27, 1996, final rule with comment period. The regulations govern physician incentive plans operated by Federally-qualified health maintenance organizations and competitive medical plans contracting with the Medicare program, and certain health maintenance organizations and health insuring organizations contracting with the Medicaid program.

As explained in the March 27 rule, the provisions of this final rule will also have an effect on certain entities subject to the physician referral rules in section 1877 of the Social Security Act.

DATES: *Effective date.* These regulations are effective on January 1, 1997.

FOR FURTHER INFORMATION CONTACT: Beth Sullivan, (410) 786–4596.

SUPPLEMENTARY INFORMATION:

I. Background

A. Introduction

Prepaid health care organizations, such as health maintenance organizations (HMOs), competitive medical plans (CMPs), and health insuring organizations (HIOs) are entities that provide enrollees with comprehensive, coordinated health care in a cost-efficient manner. The goal of prepaid health care delivery is to control health care costs through preventive care and case management and provide enrollees with affordable, coordinated, quality health care services. Titles XVIII and XIX of the Social Security Act (the Act) authorize contracts with prepaid health care organizations (hereinafter referred to as "organizations" or "prepaid plans") for the provision of covered health services to Medicare beneficiaries and Medicaid recipients, respectively. Such organizations may contract under either a risk-based or cost-reimbursed contract.

B. Medicare

Section 1876 of the Act authorizes the Secretary to enter into contracts with eligible organizations (HMOs that have been Federally qualified under section

1310(d) of the Public Health Service Act and CMPs that meet the requirements of section 1876(b)(2) of the Act) to provide Medicare-covered services to beneficiaries and specifies the requirements the organizations must meet. Payment under these contracts may either be made on a risk capitation basis, under which a fixed amount is paid per Medicare enrollee per month, or on a reasonable cost basis, under which costs are reimbursed retrospectively. Implementing Federal regulations for the organization and operation of Medicare HMOs and CMPs, contract requirements, and conditions for payment are located at 42 CFR 417.400 through 417.694.

The amount paid to risk HMOs/CMPs is the projected actuarial equivalence of 95 percent of what Medicare would have paid if the beneficiaries had received services from fee-for-service providers or suppliers. Organizations paid on a risk basis are liable for any difference between the Medicare prepaid amounts and the actual costs they incur in furnishing services, and they are therefore "at risk."

Cost-reimbursed organizations are paid monthly interim per capita payments that are based on a budget. Later, a retrospective cost settlement occurs to reflect the reasonable costs actually incurred by the organization for the covered services it furnished to its Medicare enrollees.

C. Medicaid

Section 1903(m) of the Act specifies requirements that must be met for States to receive Federal financial participation (FFP) for contracts with organizations (HMOs, and certain HIOs) to furnish, either directly or through arrangements, specific arrays of services on a risk basis. Federal implementing regulations for these contract requirements and conditions for payment are located at 42 CFR part 434.

States determine the per capita monthly rates that are to be paid to risk-based organizations. FFP is available for these payments at the matching rate applicable in the State as long as HCFA determines that the contracts comply with detailed requirements in section 1903(m)(2)(A) and 42 CFR part 434.

II. Legislative and Regulatory History

Section 9313(c) of the Omnibus Budget Reconciliation Act of 1986 (OBRA '86), Public Law 99–509, prohibited, effective April 1, 1989, hospitals and prepaid health care organizations with Medicare or Medicaid risk contracts from knowingly making incentive payments to a physician as an inducement to reduce or limit services to Medicare beneficiaries or Medicaid recipients. Under the OBRA '86 provisions, parties who knowingly made or accepted these payments would have been subject to specified civil money penalties. Additionally, the provisions required that the Secretary report on incentive arrangements in HMOs and CMPs. Section 4016 of the Omnibus Budget Reconciliation Act of 1987 (OBRA '87), Public Law 100–203, extended the original implementation date for the OBRA '86 physician incentive provisions to April 1, 1991. Subsequently, sections 4204(a) and 4731 of the Omnibus Budget Reconciliation Act of 1990 (OBRA '90), Public Law 101–508, repealed, effective November 5, 1990, the prohibition of physician incentive plans in prepaid health care organizations and enacted requirements, effective January 1, 1992, for regulating these plans.

Specifically, section 4204(a)(1) of OBRA '90 added paragraph (8) to section 1876(i) of the Act to specify that each Medicare contract with a prepaid health care organization must stipulate that the organization must meet the following requirements if it operates a physician incentive plan:

- That it not operate a physician incentive plan that directly or indirectly makes specific payments to a physician or physician group as an inducement to limit or reduce medically necessary services to a specific individual enrolled with the organization.
- That it disclose to us its physician incentive plan arrangements in detail that is sufficient to allow us to determine whether the arrangements comply with Departmental regulations.
- That, if a physician incentive plan places a physician or physician group at "substantial financial risk" (as defined by the Secretary) for services not provided directly, the prepaid health care organization: (1) Provide the physician or physician group with adequate and appropriate stop-loss protections (under standards determined by the Secretary) and (2) conduct surveys of currently and previously enrolled members to assess the degree of access to services and the satisfaction with the quality of services.

Section 4204(a)(2) of OBRA '90 amended section 1876(i)(6)(A)(vi) of the Act to add violations of the above requirements to the list of violations that could subject a prepaid health care organization to intermediate sanctions and civil money penalties.

Section 4731 of OBRA '90 enacted similar provisions for the Medicaid program by amending sections 1903(m)(2)(A) and 1903(m)(5)(A) of the Act.

Section 13562 of OBRA '93 amended section 1877 of the Act, which prohibits physicians from referring Medicare patients to an entity for the furnishing of certain designated health services if the physician (or an immediate family member) has a financial relationship with that entity. A financial relationship can consist of either an ownership or investment interest in the entity or a compensation arrangement with the entity. OBRA '93 provides an exception to the section 1877 physician referral prohibition that incorporates the physician incentive plan rules implemented in this final rule. Under this exception, compliance with these physician incentive rules is one of several conditions that must be satisfied if a physician's or family member's personal services compensation arrangement with an entity involves compensation that varies based on the volume or value of referrals. OBRA '93 also extended the provisions in section 1877 to Medicaid.

In the December 14, 1992 issue of **Federal Register**, we published, in conjunction with the Office of Inspector General, our proposal for implementing the requirements in sections 4204(a) and 4731 of OBRA '90 (57 FR 59024). On March 27, 1996, again in conjunction with the Office of Inspector General, we published, at 61 FR 13430, a final rule with comment period that set forth in regulations incentive plan requirements that govern Federally-qualified HMOs and CMPs contracting with the Medicare program and certain HMOs and HIOs contracting with the Medicaid program. On September 3, 1996, we published, at 61 FR 46384, a final rule correction that clarified and changed some of the dates by which prepaid health plans had to comply with the requirements of the March 27 rule. Readers who desire additional background information are referred to the above cited **Federal Register** documents.

III. Provisions of the March 27, 1996 Rule

This section contains a brief summary of the provisions of the March 27, 1966 rule. If we received public comments on a particular provision, a fuller description of the provision is given in section IV of this preamble (Analysis of and Responses to Public Comments), and we indicate that in this section. Note that we do not describe below those provisions of the March 27, 1996 rule that amended 42 CFR Part 1003 (Civil Money Penalties, Assessments

VOL 61 ISS 252 DE 31 1996 UMI

and Exclusions) since they are not the subject of this revised final rule.

The requirements for physician incentive plans are set forth in § 417.479. Paragraph (a) of that section specifies that the contract between HCFA and an HMO or CMP must specify that the HMO or CMP may operate a physician incentive plan only if: (1) No specific payment is made directly or indirectly under the plan to a physician or physician group as an inducement to reduce or limit medically necessary services furnished to an individual enrollee, and (2) the stop-loss protection, enrollee survey, and disclosure requirements of § 417.479 are met.

Section 417.479(b) provides that the physician incentive plan requirements apply to physician incentive plans between HMOs/CMPs and individual physicians or physician groups with whom the HMOs or CMPs contract to provide medical services to enrollees. It further provides that the requirements apply only to physician incentive plans that base compensation (in whole or in part) on the use or cost of services furnished to Medicare beneficiaries or Medicaid recipients.

Section 417.479(c) defines the following terms for purposes of § 417.479: Bonus, capitation, payment, physician group, physician incentive plan, referral services, risk threshold, and withhold.

Section 417.479(d) prohibits payment of any kind made directly or indirectly under the incentive plan as an inducement to reduce or limit medically necessary services covered under the HMO's or CMP's contract that are furnished to an individual enrollee.

Section 417.479(e) sets forth a general rule for determining when substantial financial risk occurs. (See section IV.)

Section 417.479(g) mandates that, if an HMO or CMP operates an incentive plan that places physicians or physician groups at substantial financial risk, it must conduct enrollee surveys that meet specified requirements and ensure that all physicians and physician groups at substantial financial risk have either aggregate or per-patient stop-loss protection that meets specified requirements. (See section IV.)

Section 417.479(h) requires that organizations with physician incentive plans disclose information about those plans to us and to any Medicare beneficiary who requests it. (See section IV.)

Section 417.479(i) sets forth requirements related to subcontracting arrangements. (See section IV.)

Section 417.479(j) specifies that we may apply intermediate sanctions, or the Office of Inspector General may apply civil money penalties, if we determine that an HMO or CMP fails to comply with the physician incentive plan requirements. In addition, failure to comply with the physician incentive plan requirements was added to the list of bases for imposition of sanctions at § 417.500.

The March 27, 1996 final rule also amended the Medicaid rules at § 434.70 (Conditions for Federal financial participation (FFP)) to specify that FFP is available in expenditures for payments to an HMO or HIO only if it complies with the physician incentive plan requirements. The final rule also incorporated these requirements into §§ 434.44 (Special rules for certain HIOs) and 434.67 (Sanctions against HMOs with risk comprehensive contracts).

IV. Analysis of and Responses to Public Comments

We received 38 timely items of correspondence on the March 27, 1996 final rule with comment period. Commenters included prepaid plans, national and local associations of managed care providers, physician associations, a State medical association, and consumer advocacy groups. This section of the preamble contains a summary of the comments and our responses. Note that a national association that indicated that it represents approximately 1,000 health plans and identified below as "a major association" submitted comments. Although some of the comments below are attributed only to the major association, individual health plans also made some of these same comments.

Applicability

Comment: A commenter asked whether the regulations apply to enrollees who are enrolled through the prepaid plan's commercial line of business if the enrollees are also Medicare beneficiaries. For example, if an individual who is over 65 but is actively working is covered by the prepaid plan's commercial product through his or her employer, would the physician incentive arrangement between the prepaid plan and the physician(s) treating that individual under the commercial product be subject to the regulations?

Response: Yes, the regulations apply to these plans. The employer's plan is the first payer, and the Medicare capitation payment is adjusted downward, but the enrollee is still a Medicare beneficiary.

Comment: One commenter stated that the regulation defines "physician group" as a corporation or other group that "*distributes income* from the practice among *members*." [Emphasis added by commenter.] The commenter stated that community health centers (CHCs) are clearly not included within this definition. As a result, the commenter is unable to ascertain whether plans contracting with CHCs will be required to provide to CHCs the stop-loss protection described in the regulation. The commenter recommends that the definition of "physician group" be changed as regards distribution of income and membership so as to include CHCs. The commenter pointed out the following: CHCs are by definition public or private nonprofit entities. As tax-exempt entities, they cannot "distribute" income like a for-profit entity does. CHC physicians are not "members" of the corporation. Usually they are employees or, in some instances, contractors.

Response: We disagree that the definition needs to be revised. We believe the commenter has misinterpreted the definition as describing profit sharing among the members of a for-profit entity. The term "income" does not equate to "profits." The definition does include CHCs.

Disclosure

We received several comments concerning the disclosure requirements in the March 27 rule. Specifically, § 417.479(h)(1) requires each HMO or CMP with a physician incentive plan to provide us with information concerning its physician incentive plans as required or requested by us. The disclosure must contain the following information in detail sufficient to enable us to determine whether the incentive plan complies with the requirements of § 417.479:

- Whether services not furnished by the physician or physician group are covered by the incentive plan. If only the services furnished by the physician or physician group are covered by the plan, disclosure of other aspects of the plan need not be made.
- The type of incentive arrangement.
- If the incentive plan involves a withhold or bonus, the percent of the withhold or bonus.
- The amount and type of stop-loss protection.
- The panel size, and if patients are pooled, the pooling method used.
- In the case of a capitated physician or physician group, capitation paid to primary care physicians for the most recent year broken down by percent for primary care services, referral services to specialists, and hospital and other types of provider services.

• In the case of an HMO or CMP that is required to conduct beneficiary surveys, the survey results.

Section 417.479(h)(2) requires an HMO or CMP to provide the above information to us (1) upon application for a contract; (2) upon application for a service area expansion; and (3) within 30 days of a request by us. This section also requires an HMO or CMP to notify us at least 45 days before implementing a change in the type of incentive plan, a change in the amounts of risk or stop-loss protection, or expansion of the risk formula to cover services not furnished by the physician group that the formula had not included previously.

Section 417.479(h)(3) of the March 27 rule requires an HMO or CMP to provide the following information to any Medicare beneficiary who requests it:

• Whether it uses a physician incentive plan that affects the use of referral services.

• The type of incentive arrangement.

• Whether stop-loss protection is provided.

• If it was required to conduct a beneficiary survey, a summary of the survey results.

Section 417.479(i) requires a prepaid plan that contracts with a physician group that places the individual physician members at substantial financial risk for services they do not furnish to disclose to us any incentive plan between the physician group and its individual physicians that bases compensation to the physician on the use or cost of services furnished to Medicare beneficiaries or Medicaid recipients. The disclosure must include the information specified in § 417.479 (h)(1)(i) through (h)(1)(vii) and be made at the times specified in § 417.479(h)(2).

Section 434.70(a) provides that Federal financial participation is available in expenditures for payment to HMOs or HIOs only for periods that the HMO or HIO has (1) supplied the information listed in § 417.479(h)(1) to the State Medicaid agency; and (2) supplied the information on physician incentive plans listed in § 417.479(h)(3) to any Medicaid recipient who requests it. The timeframes for disclosure to the State Medicaid agency are the same as those for Medicare.

Comment: One commenter suggested that health plans be permitted to deem themselves to have transferred substantial financial risk without having to describe to us the specific incentive arrangements and analyses of each arrangement. The commenter also questioned our authority for requiring disclosure of incentive arrangements and believed that disclosure presents an enormous administrative burden. The commenter asked: If an HMO agrees to provide stop-loss and to conduct surveys, must it still disclose the information to HCFA as required by the regulation?

Response: Yes, under the statute and the regulation, health plans must disclose this information. This information serves many purposes. For example, it will be used to monitor compliance, evaluate the impact of the regulation, and ensure the delivery of high quality health care. In addition, this information will be useful to beneficiaries in ensuring that they get needed care. Section 1876(i)(8) of the Act requires the HMO or CMP provide the Secretary with descriptive information regarding the plan that is sufficient to permit the Secretary to determine whether the plan is in compliance with the physician incentive plan requirements. Congress clearly intended health plans to disclose information about the nature of physician incentive compensation arrangements and the extent to which physicians are being placed at substantial risk by the arrangements.

In preparing both the March 27 regulation and these amendments and clarifications, we have tried to limit the information being reported to only that which is essential for us to carry out this explicit statutory responsibility to ensure that plans are in compliance. We are not requiring extensive detail about the compensation arrangements being used, but rather are seeking information about the general nature and scope of these arrangements.

Comment: One commenter believed that the information to be disclosed to us under the regulation is proprietary and should be protected under the Freedom of Information Act (FOIA). The commenter stated that we should adopt the same policy we use for disclosure of a risk contractor's adjusted community rating (ACR). The commenter believed that the physician incentive information merits comparable treatment.

Response: To the degree that physician incentive information constitutes "trade secrets or commercial or financial information obtained from a person [that is] privileged or confidential," the information will be protected from release under exemption (b)(4) of the FOIA (5 U.S.C. 552(b)(4).) In accordance with 45 CFR 5.65 (c) and (d), the submitter of such information may designate all or part of the information as confidential and exempt from disclosure at the time the information is submitted to the government. Also, the Freedom of Information and Privacy Office, HCFA, upon receipt of a FOIA request for the information, will ask that the involved submitter specify what it believes to be confidential commercial or financial information. In both situations, we will follow procedures set forth at 45 CFR 5.65(d), with the initial disclosure decisions independently made by our Freedom of Information Officer. The information specified as available to a beneficiary upon request will be available under FOIA. For instance, whether or not the incentive plan covers referral services, the type of incentive arrangement (for example, withhold or capitation), and whether adequate stop-loss protection is in place would be available under FOIA.

Comment: One commenter did not believe that disclosure requirements would pose an undue burden on plans, because "plans routinely provide information to patients at the time of enrollment." The commenter stresses the time that notice is provided as well as the substance of what is provided. The commenter believed that all financial information should be provided at enrollment (and annually thereafter), but also notes that plans should report information regarding the scope of benefits and procedures for review of grievances. The commenter stated that one of its internal publications includes a statement on incentive plans, asserting that these plans "should be disclosed to the patient upon enrollment and at least annually thereafter." The commenter elaborated on that assertion by stating, "[we] strongly support disclosure to patients of physician incentive plans affecting Medicare and Medicaid patients" and "strongly support disclosure by all managed care plans to patients of information regarding the scope of benefits and procedures for review of grievances."

The commenter also stated the disclosures are necessary to serve as notice to patients that incentives exist. The commenter went on to state that it believes the information is necessary in place of outcomes measures until such measures are widely accepted and available.

In contrast, a major association of health plans asked that we give plans broad discretion to decide how this information will be presented.

Another commenter contended that section 1876(i)(8) of the Act does not give us the authority to require that a prepaid plan release information about its incentive plans to Medicare beneficiaries and Medicaid recipients, and that there is no such grant of authority in parallel medical provisions. The commenter added that, even if it

VOL 61 ISS 252 DE 31 1996 UMI

were to assume that a general authority conferred upon us allows us to impose this obligation, the regulation goes far beyond what the commenter believes to be reasonable. The commenter noted that, under the regulation, every beneficiary or recipient in the country, regardless of location and regardless of the relationship to the prepaid plan, may obtain information about the incentive plan. The commenter recommended that only enrollees of the prepaid plan or beneficiaries or recipients who file an application to join the plan should be entitled to obtain the information. The commenter also recommended that the information be limited to the following: (1) Whether the physician has an arrangement with the prepaid plan that has the potential to compensate him or her for controlling the services he or she provides; (2) that the amount of risk is limited because of stop-loss protection; and (3) the results of any enrollee survey will be provided, upon request, including information about quality of care.

Response: Some of the information may be confidential and will be protected by FOIA. Nonetheless, we intend to require plans to publish in the evidence of coverage (EOC) notices that beneficiaries can request summary information on the HMO's physician incentive plans. These EOC notices are available at enrollment. We will provide further guidance on this in the future.

On the question of our legal authority to require disclosure to beneficiaries, we believe that in requiring disclosure of information on physician incentive plans, Congress intended that this information be used in the best interests of the beneficiary. While the statute refers only to disclosure of this information to the Secretary, this information is clearly of interest to beneficiaries as well. Requiring plan disclosure directly is simply more efficient than having the Secretary provide this information to beneficiaries, which the Secretary clearly has legal authority to do.

We do not agree that this information should be made available only to an enrollee or applicant for enrollment in a managed care plan. This information is potentially very important and useful to a beneficiary in deciding whether to select managed care rather than fee-for-service care and which of the available managed care plans to select.

Comment: A major association of health plans stated that we should make available to the public all the information on incentive plans that we and the States receive. The commenter did not explain why the information should be made public, but just noted that there is "no valid reason to keep this information from the public" and that publication would allow health policy researchers to better understand the relationship between specific risk arrangements and access and quality of care provided to enrollees.

Response: We plan to publish aggregate information on physician incentive plans obtained under the regulation; therefore, the information will be public. Publication of additional information, beyond that specified in the regulation, however, would be a substantial administrative task and would not advance the purposes of the law.

Comment: One commenter stated that requiring the HMO or CMP to collect information about incentive plans operated by physician groups or subcontractors is not the most efficient or effective means of collecting the necessary information. The commenter suggested that we collect the information directly from the physician groups and subcontractors. This commenter believed we should allow a physician group to attest that it has no physician incentive plan or no physician incentive plan related to use of referral services for Medicare or Medicaid enrollees and that HMOs should be allowed to rely upon that attestation.

Response: The HMO/CMP is responsible for ensuring that the requirements of this regulation are met if a physician group or individual physicians are placed at substantial financial risk by a subcontractor or physician group. Requiring that the HMO or CMP collect the information ensures that it is aware of all arrangements subject to the regulations. In addition, since lines of communication between the physician group or subcontractor and the prepaid plan are already in place, the HMO or CMP is the most efficient conduit for the disclosure of information. We will allow physician groups to make attestations and will provide further guidance on this item. We will also develop a disclosure form that will describe the minimum amount of information that the prepaid plan must obtain from physician groups.

Substantial Financial Risk

We received significant comments on our definition of "substantial financial risk." Section 417.479(e) provides that substantial financial risk occurs when an incentive arrangement places a physician or physician group at risk for amounts beyond the risk threshold (25 percent), if the risk is based on the use or costs of referral services. Amounts at risk based solely on factors other than a physician's or physician group's referral levels do not contribute to the determination of substantial financial risk.

Section 417.479(f) provides that physician incentive plans with any of the following features place physicians at substantial financial risk if the risk is based (in whole or in part) on use or costs of referral services, and the patient panel size is not greater than 25,000 patients, or is greater than 25,000 patients.only as a result of pooling patients:

- Withholds greater than 25 percent of potential payments.
- Withholds less than 25 percent of potential payments if the physician or physician group is potentially liable for amounts exceeding 25 percent of potential payments.
- Bonuses greater than 33 percent of potential payments minus the bonus.
- Withholds plus bonuses if the withholds plus bonuses equal more than 25 percent of potential payments. The threshold bonus percentage for a particular withhold percentage may be calculated using the formula: Withhold % = −0.75(Bonus %)+25%.
- Capitation arrangements if—
  + The difference between the maximum possible payments and minimum possible payments is more than 25 percent of the maximum possible payments; or
  + The maximum and minimum possible payments are not clearly explained in the physician's or physician group's contract.
- Any other incentive arrangements that have the potential to hold a physician or physician group liable for more than 25 percent of potential payments.

Section 417.479(f) defines "potential payments" as the maximum anticipated total payments (based on the most recent year's utilization and experience and any current or anticipated factors that may affect payment amounts) that could be received if use or costs of referral services were low enough.

Comment: A major association contended that the methodology for determining substantial financial risk is flawed because a substantial number of affected prepaid plans will be viewed as transferring substantial financial risk and be subject to the stop-loss and enrollee survey requirements. The association pointed out that we stated in the proposed rule that the original choice of a 25 percent threshold for substantial financial risk was based on the assumption that only "outlier" risk levels would be considered "substantial." The association contends

that our methodology in fact covers "mainstream" arrangements, and thus implicitly suggests that they are outliers. The association believes that the proportion of outliers in a given population should be quite small (typically in the range of 5 percent) and that a methodology that purports to only identify outliers is invalid to the extent it includes a proportion of the population beyond that represented by the extreme. The association has concluded, based on extensive communications with its membership and its work group, that application of the methodology in the March 27 rule will result in the inclusion of substantial numbers of what it contends to be "mainstream" incentive arrangements as involving substantial financial risk. The association stated that, based upon information from its member organizations, a large number of plans combine capitation or withholds with bonuses, and the result is that the risk level exceeds 25 percent.

The association reminded us that, in the preamble of the proposed rule, we stated that we anticipate most prepaid plans will not incur significant additional costs because most of them already meet the requirements that are specified in this regulation, but that if new information regarding the influence of various elements of physician incentive plans becomes available, we will evaluate it to determine if the approach in our proposed regulations should be reconsidered. The association contended that a reevaluation of this structure is clearly necessary at this time and that the regulations need to be modified to address five areas: (1) The association believes that the risk threshold should be refined to allow for the transfer of a larger portion of risk for referral services; (2) the association believes that the regulation needs a mechanism to estimate the amount of risk transferred if a precise calculation cannot be made; (3) the association recommends that maximum and minimum thresholds be calculated based on standards that are more "realistic" in its view; (4) the association would like more latitude in the pooling rules to allow large physician groups that spread risk across large total numbers of health plan patients to be exempt from the requirements; and (5) the association suggests that a good cause exemption be available to allow for the approval of physician incentive plans that, for policy reasons, should not be considered as transferring substantial financial risk, although the circumstances were not envisioned when the regulations were drafted.

To achieve the above objectives, the association presented a number of recommendations. These recommendations and our response to each of them follow, but first we respond to the above comment that many plans would be identified as outliers.

Response: At the time we were developing these regulations in proposed form, it was our understanding that most physician incentive plans created financial incentives to reduce unnecessary referrals through the use of bonuses or withholds or some combination of the two. On the assumption that a specific amount of payment was "at risk" (whether an amount withheld when referrals are high or a bonus paid if they are low), we had to come up with a threshold beyond which risk would be considered "substantial." As the commenting association correctly notes, we used an outlier approach to determine what level of risk would be considered "substantial" under this methodology. This resulted in a figure of 25 percent of potential payments. It is our view that 25 percent represents a significant amount of income to lose. This may be in addition to discounts that physicians may give to various patients or prepaid plans. Many consumer and physician groups, in fact, believe that 25 percent is too high. We now recognize that an increasing number of plans use capitation arrangements under which referral service costs must be covered with capitation amounts, and that these plans will be determined to be at substantial financial risk if the maximum and minimum potential payments are not clearly explained in the physician's or physician group's contract. Raising the risk threshold to a higher level will not affect these plans since they would still be deemed to involve substantial financial risk and trigger stop-loss insurance requirements. However, in most of these cases, the physicians already have stop-loss protection comparable to the requirements of this regulation. With regard to suggestions to lower the threshold, here, again, changing the threshold would not affect these plans. We thus believe that the 25 percent threshold should remain in place.

Recommendation: The association recommended that an exception to the 25 percent risk threshold be created for certain bonus arrangements. This exception would permit prepaid plans to supplement their incentive programs by offering an opportunity for a bonus, in addition to capitation payments or withholds, or an opportunity for an additional bonus where a bonus is already in place. The supplemental bonus could not exceed 15 percent of the "payments."

Response: Under the March 27, 1996 rule, any combination of incentive arrangements that exceeds the 25 percent threshold, whether labeled a bonus or withhold, puts the physician or physician group at substantial financial risk. We adopted this policy towards bonuses because (1) if the same amount of money is at risk based on referral levels, it should not matter whether this money is labeled a withhold or a bonus, and (2) we did not want plans to avoid these rules merely by "re-labeling" withholds or other arrangements as bonuses. The incentive arrangement described in this comment would exceed the 25 percent threshold for substantial financial risk as we interpret this term and, accordingly, should not be permitted in our view.

Recommendation: The association recommended that a prepaid plan that capitates physicians or physician groups be permitted to estimate the portion of the capitation allocated to referral services for purposes of determining whether there is substantial financial risk. This is because it is the association's belief that many large prepaid plans do not have, and cannot obtain, this information. The association believes that the regulatory requirement that contracts specify the allocation between services provided by the physician or physician group and the amount allocated for referral services (provided outside the physician group or the physician's practice) has two objectives: (1) To provide a basis for the calculation of risk transference to determine whether substantial financial risk is transferred; and (2) to apprise the physician or physician group of the portion of its capitation "at risk." The association contends that we could achieve the first of these two objectives by allowing the prepaid plan to estimate the expected portion of referrals through the use of historical data or actuarial tables. The prepaid plan could be required to certify that its decision was made in good faith based on the best available data. In accepting this proposal, the association contends that we would be meeting our responsibilities under E.O. 12866 to find an alternative regulatory approach that imposes the least burden on society while still achieving its objective.

The association questioned whether the second objective it has presumed, to apprise the physician or physician group of the portion of its capitation "at

risk," is meaningful today since physicians are far more aware of the implications of risk assumption than they once were.

As an alternative approach, the association suggested that the physician/physician group put in the contract the estimated portion of services that would not be provided by the physician or physician group. The association stated that, although this amount may change over time, it would not support revisions to the contract to reflect changes made within the discretion of the individual physician or physician group. The association notes that this alternative approach would not be the most desirable because it would require the burdensome step of recontracting with large numbers of physicians.

Response: As indicated in the March 27, 1996 rule, prepaid plans have the option of specifying in the contract maximum and minimum payment amounts. As long as the difference between these amounts does not exceed 25 percent of the maximum amount, the physician or physician group is not at substantial financial risk. Without specifying these limits, physicians who are capitated for all services are potentially at risk of losing 100 percent of their income. Given this potential loss, they may feel the pressure to reduce necessary services.

Prepaid plans have the opportunity to include a provision in their contract with a physician group that would require the physician group to specify the level of potential risk for referral services. Relying on historical or actuarial data may not be reflective of risk in current contracts. While it may be true that physicians today are more aware of the implications of risk assumption, there is no evidence that the ability to manage this risk has substantially changed. Further, while physician groups may want the flexibility to change risk sharing arrangements on an ad hoc basis, we have to question the impact of these changes on patient care decisions.

Recommendation: The association recommends that the regulation be amended to allow for the pooling of the total prepaid enrollment from the prepaid plan and across prepaid plans for purposes of determining substantial financial risk. The regulation exempts from the requirements of the regulations physicians or physician groups who provide services to 25,000 Medicare or Medicaid enrollees of the prepaid plan. The association maintains that this approach, which does not allow for the pooling of patients, is unnecessarily and inappropriately rigid and conservative. The association stated that it believed the 25,000 patient exemption is permitted because physician groups with a patient base this large can assume the risk for referral services greater than the risk threshold without the need for stop-loss coverage. As the number of enrollees under the responsibility of the physician group increases, so does the ability of the physician group to assume that risk. The association believed that this risk is reduced regardless of whether the patients are Medicare, Medicaid, or commercial. Similarly, this risk is reduced regardless of whether the patients are the enrollees of a single prepaid plan or the enrollees of several prepaid plans. Thus, for purposes of qualifying for the substantial financial risk exemption, a prepaid plan should be allowed to consider the total number of prepaid enrollees served by a physician group. These pooled enrollees should, in the association's view, include all enrollees of that prepaid plan and enrollees of other prepaid plans that have selected the physician or physician group, provided that the physician or physician group is at risk for the provision of services to those enrollees.

Response: In the preamble, we provided evidence from analyses by Rossiter and Adamache (1990) (Health Care Financing Review, vol. 12, prepaid plan. 19–30) that supported the decision that physician groups with more than 25,000 patients are able to adequately spread risk and are so unlikely to lose money that we could determine them to not be at substantial financial risk.

We have decided to allow pooling of Medicare, Medicaid, and commercial members for purposes of determining substantial financial risk because this kind of pooling is consistent with the rationale for permitting pooling (that is, the spreading of risk). The physician group may also pool patients across more than one managed care plan with which it has a contract. Note, however, that, as revised by this final rule, § 417.479(h)(1)(v) allows for pooling of patients for purposes of determining substantial financial risk and meeting various stop-loss requirements. This section then specifies that pooling is permitted only if: (1) Pooling is otherwise consistent with the relevant contracts governing the compensation arrangements for the physician or physician group; (2) the physician or physician group is at risk for referral services with respect to each of the categories of patients being pooled; (3) the terms of the compensation arrangements permit the physician or physician group to spread the risk across the categories of patients being pooled; (4) the distribution of payments to physicians from the risk pool is not calculated separately by patient category; and (5) the terms of the risk borne by the physician or physician group are comparable for all categories of patients being pooled.

In general, the purpose of these conditions is to ensure that all patients included in the risk pool are being treated under comparable payment arrangements; that is, the risk or reward to the physician or physician group would be the same for referring services for any individual patient in the pool. The patient categories refer to Medicare, Medicaid, and commercial members. The type of incentive arrangements, such as withholds and capitation would usually be the same throughout the pool to be considered comparable. Pools over the 25 percent risk threshold can be combined with those arrangements below the 25 percent risk threshold. The pool represents the total dollars on which the payout is made to the doctor or the stop-loss threshold is assessed.

This final rule, however, eliminates the arrangement that allows the HMO, CMP, or HIO to pool across physician groups to reduce the stop-loss requirements. We believe physician behavior is influenced by the number of patients using the physician group, rather than total enrollment in the HMO, CMP, or HIO. A physician group that has a small number of patients does not spread its risk throughout the prepaid plan, but only within its group. Allowing pooling across groups does not provide patients enough protection.

Recommendation: The association recommended that the regulations apply a "reasonableness test" in calculating compensation under a physician incentive plan. The association noted that plans often use formulas to calculate the amount of the withhold to be returned or the bonus to be distributed. These formulas allow for distributions of a certain percentage of savings to the physician or physician group when utilization or costs are less than projected. These arrangements often do not cap the upside potential gain from a bonus although natural limits may exist because there is no expectation that the scenario in which no services are provided will occur. The physicians and physician groups understand these de facto limits, and it would be unnecessarily burdensome to require prepaid plans to amend thousands of contracts to insert bonus limits in their contracts. The regulations should be amended to confirm that prepaid plans may use an amount for purposes of determining the maximum

payment that is realistic rather than the theoretical highest payment level. The same standard should be applied in calculating minimum levels.

Response: We believe that past behavior is no guarantee of future behavior. Physicians could still feel the pressure if they are placed at substantial financial risk, regardless of past payments. Therefore, the incentive plan contracts must contain these limits explicitly.

Recommendation: The association recommends that the regulation should allow for a "good cause" exemption from the requirements of the regulation in the event that substantial financial risk is transferred. The association argued that in an ever-changing health care delivery system, the regulation should provide for flexibility to adapt to unanticipated circumstances. The association notes that our regulations frequently allow for good cause exemptions from requirements, and it contends that circumstances may arise in the future that merit an exemption from the regulatory requirements. According to the association, inclusion of a good cause exemption would give us the flexibility to approve appropriate physician incentive plans without the need to amend our regulations. An example of one instance in which a good cause exemption may be appropriate is if the prepaid plan can demonstrate that the physician group is assured of receiving compensation on an encounter basis comparable to or at a certain percentage of the resource-based relative value scale fee schedule amount.

The association stated that it is currently exploring functional ways in which a good cause exemption could be designed and appropriately implemented.

Response: We have no legal authority to permit plans to fail to comply with the rules in section 1876(i)(8) for "good cause." Moreover, even if we did, we do not know of any systematic basis for providing a good cause exemption to this regulation. The example cited by the commenter can be written into the contract to ensure that the physician receives a certain percentage of the fee schedule amount. However, the issue is not guaranteeing a minimum level of income. Rather it is setting parameters so that decisions are not made because of a concern with unforseen circumstances, such as adverse selection, bad incentive plan design, etc. Our goal is to protect beneficiaries in these circumstances.

Comment: A group that advocates on behalf of individuals with disabilities recommended that we consider alternative methods to determine the appropriate levels of stop-loss insurance for those involved in the care of persons or communities who are at high risk for unexpected, adverse medical events (For example, urban providers with a high patient load of pregnant women with histories of substance abuse). The group stated that these providers may have difficulties determining an accurate estimate of expected expenditures based on a previous year's per-patient costs. The group suggested that other methods to determine substantial financial risk may include:

(1) The use of several years of longitudinal data to determine a realistic substantial risk level (in order to adjust for the periodicity of certain illnesses); or

(2) The use of retrospective analyses to determine the incidence of unexpected events within the provider's pool, with adjustments made to correct for current levels of expected "substantial risk" related to the likelihood of these previous events.

This group further recommended that we examine alternative methods of determining substantial risk for providers who are likely to care for "medically needy" eligibles. The association gave the following example, a preferred provider organization (PPO) medical specialist provider may care for a substantial number of persons with life-threatening illness, such as cancer, Alzheimer's or AIDS. If patients switch from private to public health insurance while under the care of the medical provider (due to "spending down" into poverty), the provider's determination of "substantial risk" may be underestimated. In this case, the PPO medical specialist may be subject to various levels of financial incentives (through both private and public funded health plans) without having to demonstrate adequate quality of care or financial liability provisions.

Response: The goal of the substantial financial risk analysis is to determine whether stop-loss protection is needed. The stop-loss protection is designed to provide protection if the physician group experiences patients with a greater than average risk. Thus, there is no need to set a different substantial financial risk threshold for high risk cases. The stop-loss protection addresses this concern.

Comment: A commenter recommended that we consider lowering the threshold at which plans are required to provide stop-loss coverage for CHCs. The commenter suggested that we consider whether it is appropriate to compare risks to CHCs with risks to other kinds of primary care providers. The commenter pointed out that CHCs provide services almost exclusively to Medicaid/Medicare beneficiaries and impoverished uninsured patients. Thus, CHCs essentially have no capacity to generate revenues to offset losses sustained on referrals under a capitated rate. In addition, the commenter suggested that the schedule reducing the amount of protection required should be modified so that it decreases more slowly as a CHC's patient panel increases. The commenter said such a change is justified because CHCs may incur even greater risk as their capitated patient enrollment increases because the CHC's patients are likely to be in poorer health than the average patient.

Response: We are giving additional consideration to the impact of the current risk threshold on physician incentive plans with CHCs. During the implementation of this regulation, we will collect data on the impact of the 25 percent threshold on CHCs, and consider whether some form of relief may be appropriate. We are concerned, however, that lowering the threshold as the commenter suggests would require a substantial number of these centers to provide stop-loss protection to their physicians that they may not be able to afford.

Comment: A commenter asked whether ancillary services are considered referral services.

Response: For purposes of § 411.479, if the physician group performs the ancillary services then the services are not referral services. If the physician group refers patients to other providers of services for the ancillary services, then the services are referral services.

Comment: A commenter pointed out that a response in the March 27 final rule at 61 FR 13438, column 2, states that, if the HMO uses a combination of withhold and/or bonus arrangements, these arrangements will be aggregated for purposes of determining whether the physician is placed at substantial financial risk. The commenter adds that, in column 3 of that page, however, the response states that we are not requiring disclosure of every incentive arrangement between a physician group and its physicians, only those under which the physician is placed at substantial financial risk. A prepaid plan wanted to know how it could be expected to know that in the aggregate the arrangements created substantial financial risk if the physician group is not required to disclose the individual arrangements.

Response: The above comment reflects a misconception. The quote from the third column addresses what

information must be disclosed by the prepaid plan to us, not what information the physician group must disclose to the prepaid plan. It is incumbent upon the prepaid plan to obtain from the physician group all the information that it needs to determine whether individual physicians are placed at substantial financial risk. This can be a subject addressed as part of the contract negotiations between the prepaid plan and the physician group.

Comment: A commenter stated that the methodology used to determine substantial financial risk has consequences that they believe we never intended. For example, certain bonus arrangements could be construed as transferring substantial financial risk. The commenter described a program under which bonuses that are added to a base capitation are aimed at rewarding the primary care physician (PCP) for high quality care, full service capacity, long office hours, accepting all new patients, and cost-effectiveness. The commenter offered the following illustration: a PCP might get $10.50 per member/per month (PMPM) as capitation, $1.50 PMPM for scoring well on member surveys and office record reviews, $1.00 PMPM for being open to new patients, and $1.50 PMPM for having average utilization. The total compensation would then be $14.50 PMPM. The commenter stated it does not believe that these quality performance and service bonuses are the "substantial financial risk" with which we are concerned. The commenter stated that there is no downside risk here, but there is the ability to add to income for good performance. If the intent is to include these bonus arrangements, the commenter wanted to know whether the relevant amount was the maximum attainable bonus or the average bonus paid to all PCPs in the network. The commenter also pointed out that, in applying our methodology to calculate substantial financial risk, a physician who is paid a higher quality office component than a second physician (both with the same utilization), would be found to have assumed a greater financial risk than the second, even though the first physician's revenues were greater.

Response: While we are supportive of a quality bonus payment, there is very limited experience with its use, and whether a physician will actually receive it is speculative. We will revisit the issue when more information is available on the nature, extent, and experience with quality bonuses.

Subcontracting

A number of commenters, including a major association, made the same comment on the provisions of section 417.479(i), which requires that the disclosure, stop-loss protection, and survey requirements of § 417.479 be satisfied when an HMO or CMP contracts with a physician group that places the individual physician members at substantial financial risk for services they do not furnish. The major association's comment, which was the most comprehensive, is presented below.

Comment: One major association challenged our legal authority to reach arrangements between a contracting physician group and its individual physicians (or between an "intermediate entity" and physicians or a physician group). The association pointed out that section 1876(i)(8)(B) of the Act defines a physician incentive plan as—

> any compensation arrangement *between* an eligible organization and physician or physician group that may directly or indirectly have the effect of reducing or limiting services provided with respect to individuals enrolled with the organization. [Emphasis added by the association.]

The association argued that, regardless of the policy considerations that favor extending the reach of these rules to subcontracts (for example, the possibility that failure to do so could create a "loophole" that could be abused), doing so was inconsistent with the "plain meaning" of this statute. The association accordingly contended that our interpretation was legally impermissible, regardless of the policy considerations in its favor.

The association also argued that expanding the scope of the regulation to cover other incentive plans without a new opportunity for notice and comment violated the Administrative Procedure Act (APA). The association pointed out that the APA requires that there be a general notice of proposed rulemaking published in the **Federal Register** that includes, among other things, the terms or substance of a proposed rule or a description of the subjects and issues involved. The association included the following quotation from a decision by the Court of Appeals for the District of Columbia Circuit discussing a standard that the court applied for determining whether the APA requirement has been met:

> Statutory duty to submit proposed rule for comment does not include obligation to provide new opportunities for comments whenever final rule differs from proposed rule; rather, an agency adopting final rules that differ from proposed rules is required to renotice when changes are so major that original notice did not adequately frame subjects for discussion. (*Air Transport Association of America* v. *C.A.B.*, 732 F.2d 219 (D.C. Cir. 1984))

The association argued that revising the proposed rule to extend its provisions to subcontractor arrangements was a sufficiently "major" change that a new notice and opportunity for comment was required under the above standard.

Finally, the association contended that support for its position could be found in language from earlier legislation directing HHS to study incentive arrangements. This language referred to "incentive arrangements offered by health maintenance organizations and competitive medical plans to physicians."

Response: We believe that in referring both to individual "physician[s]" and to "physician group[s]," Congress intended to cover all incentive arrangements that could provide incentives for a physician treating an HMO enrollee to reduce or limit services; both those affecting only an individual physician and those affecting a group of physicians as a whole. A letter from the original author of this legislation confirms that this was his intent in drafting this language.

As noted above, the association attempts to place significance on the use of the word "between" in the definition of physician incentive plan in section 1876(i)(8)(B) (quoted above). The association reads this as limiting the scope of the definition of physician incentive plan to arrangements in a contract directly between a prepaid plan and a physician or physician group. In fact, however, an individual physician who serves a prepaid plan's enrollees as a member of a physician group does have a relationship with that prepaid plan, albeit an indirect one. There is an indirect but clear link "between" that physician and the prepaid plan whose enrollees the physician treats. The only difference is that instead of a single direct contract between the physician and the prepaid plan, the physician has a contract with the group, and the group in turn contracts with the prepaid plan.

Even though this is a two or more step arrangement rather than a single direct contract, there nonetheless is a physician incentive plan involving the prepaid plan's enrollees that exists "between" the physician providing services to a prepaid plan's enrollees and the prepaid plan that is accountable for these services. There is simply an added layer of organization and legal arrangements "between" the physician and the prepaid plan. During our review

of applications for Medicare contracts, we currently review the plan's contracting arrangements to ensure that subcontracts actually signed by the physician at the "retail" end of the prepaid plan's health care delivery network inform physicians of their responsibility to carry out the prepaid plan's obligations under section 1876. This longstanding practice is fully consistent with our view that an individual physician contract with a physician group is part of the total arrangement "between" that physician and the prepaid plan that is accountable for the services the physician is providing to the plan's members. For instance, we hold the plan accountable for the quality of care delivered by all components subcontracting with the plan including the care delivered by the physicians.

For all of the above reasons, we believe that it is fully consistent with the words of the statute to reach all incentive arrangements that exist "between" doctors providing the care and a prepaid plan accountable for that care, whether they are contained in a physician's contract with a physician group or other intermediate entity, or in the contract the group or entity has with the prepaid plan. (With respect to the association's reliance on language in past legislation, we do not believe that it has any relevance in interpreting section 1876(i)(8). Indeed, it is inconsistent with the language in section 1876(i)(8), since it references only arrangements with a physician, and not those with a physician group.)

In addition to being consistent with the words of the statute, we believe that our interpretation is consistent with the purpose of the statute, which is to protect Medicare beneficiaries enrolled in prepaid plans from the possible effects of financial incentives to deny or limit medically necessary care. It is irrelevant to this statutory objective whether incentives are contained in the prepaid plan's contract with a physician group, or in the group's contract with the physician. It is fully consistent with the intent and purpose of section 1876(i)(8) to reach any plan that could contain the incentives Congress wanted to address. As suggested above, it also would make no sense to establish a regulatory scheme that could be circumvented simply by erecting a "protective shield" between the prepaid plan and individual physicians in the form of an intermediate entity or physician group structure. The possibility of such a "loophole" permitting plans to circumvent these regulations was a major factor in our decision to extend the reach of these regulations to subcontractors.

We also disagree with the association that the change we made in the final rule violated the APA under the standards of the *Air Transport Association* case cited by the association. Indeed, we believe that this type of revision is precisely the kind the court had in mind when it wrote that there is no "obligation to provide new opportunities for comments whenever a final rule differs from a proposed rule." We believe that it is clear that this is *not* a change "so major that original notice did not adequately frame [the] subject [] for discussion." Clearly the "original notice" *did* "frame" this as a "subject [] for discussion," since commenters in fact commented on this question. A second notice thus was not required under the *Air Transport* decision.

In any event, even if a second opportunity to comment had been required under the *Air Transport* standard, any such requirement has now been satisfied through the notice and comment process culminating in this revised rule.

Stop-loss

We received several comments on the stop-loss requirements in the March 27 rule. Section 417.479(g)(2) requires that HMOs or CMPs that operate incentive plans that place physicians or physician groups at substantial financial risk ensure that these physicians or physician groups have either aggregate or per-patient stop-loss protection in accordance with the following requirements:

- If aggregate stop-loss protection is provided, it must cover 90 percent of the costs of referral services (beyond allocated amounts) that exceed 25 percent of potential payments.
- If the stop-loss protection provided is based on a per-patient limit, the stop-loss limit per patient must be determined based on the size of the patient panel. In determining patient panel size, the patients may be pooled using one of the approved methods (discussed below) if pooling is consistent with the relevant contract between the physician or physician group and the prepaid plan. Stop-loss protection must cover 90 percent of the costs of referral services that exceed the per patient limit. The per-patient stop-loss limit is as follows:
  - Less than 1,000 patients—$10,000.
  - 1,000 to 10,000 patients—$30,000.
  - 10,000 to 25,001 patients—$200,000.
  - Greater than 25,000 patients:
    + Without pooling patients—none; and
    + As a result of pooling patients—$200,000.

Section 417.479(h)(1)(v) provides that, for purposes of determining panel size, patients may be pooled according to one of the following methods:

- Including commercial, Medicare, and/or Medicaid patients in the calculation of the panel size.
- Pooling together, by the HMO or CMP, of several physician groups into a single panel.

Section 417.479(g)(2)(iii) provides that the HMO or CMP may provide the stop-loss protection directly or purchase it, or the physician or physician group may purchase the stop-loss protection. This section also provides that, if the physician or physician group purchases the stop-loss protection, the HMO or CMP must pay the portion of the premium that covers its enrollees or reduce the level at which the stop-loss protection applies by the cost of that protection.

Comment: A major association stated that enormous confusion exists among its membership as to the meaning and application of the stop-loss provisions. The association urged us to reevaluate not only the substantive requirements, but the manner in which we expressed the information and to explain more clearly our intentions. The association's comments on this issue fall into two categories: (1) The obligation for payment of the stop-loss coverage and (2) the substantive requirements for stop-loss. In making its comments, the association also offered recommendations for amendments to the regulations. We summarize the association's comments and recommendations below:

Comment 1. The association believed that the responsibility of paying for the stop-loss protection should be a negotiable issue between the HMO or CMP and its physician group or physician. The association argued that the language used in section 1876(i)(8) of the Act requiring HMOs or CMPs to provide stop-loss can be reasonably interpreted to impose an obligation that the stop-loss coverage be made available to the physician or physician group.

The association also maintained that public policy supports allowing the financial responsibility for stop-loss coverage to be determined between the parties and not mandated by us. The association noted that a common element in a capitation arrangement between an organization and a physician group is a requirement that stop-loss be obtained to protect the physician group from undue risk. This stop-loss could be purchased by the prepaid plan or by the physician group.

The association stated that typically, these arrangements provide that the physician group, and not the prepaid plan, has the responsibility to pay for the stop-loss coverage. Another option the association noted would be to give the physician group the option either of purchasing the stop-loss coverage made available by the prepaid plan or purchasing the stop-loss coverage itself. The association pointed out that in all cases, the cost of the stop-loss coverage is an element of the compensation (the capitation would be reduced if the prepaid plan pays for the stop-loss coverage and would be higher if the physician group does).

The association stated that stop-loss coverage at the levels required by the regulations is very expensive to obtain and that requiring prepaid plans to bear that cost would result in an enormous financial burden shifted from physician groups to prepaid plans. To avoid this, and consistent with the discussion above, the association recommended that we allow the prepaid plan and the physician group or physician to negotiate the financial responsibility for the stop-loss coverage.

Response: After further analysis, and for the reasons set forth in the above comment, we are amending the regulation to require only that the HMO or CMP provide us proof that the physician groups have adequate stop-loss protection in place. We believe this is consistent with the primary goal of the regulation of ensuring that if the physicians are at substantial risk, they have adequate stop-loss protection. In addition, we have further information that physician groups may have access to more affordable stop-loss as a result of their participation in a number of HMOs or CMPs.

Comment 2. The association recommended that we revise the regulations to reflect what it believes to be more appropriate stop-loss levels, to account for existing stop-loss arrangements, and to provide an appropriate means of applying the stop-loss requirements to bonus and withhold arrangements. The association believed that the stop-loss limits are inappropriately low. It stated that a $10,000 limit might be appropriate for a panel size less than 250 patients, but is not reasonable for a 1,000 patient panel. The association stated that one of its members projects that the cost of stop-loss over $10,000 for hospital services for a Medicare enrollment would be about 20 percent of the total medical cost; this could be about $80 to $100 per member per month depending on geographic area. Therefore, the association believed that it is incumbent upon us to reevaluate the stop-loss limits and to replace the existing limits with ones that are more appropriate and less costly to obtain.

In addition, the association maintained that the stop-loss requirements fail to identify how prepaid plans can analyze stop-loss coverage that is already being provided to the physicians or physician groups to determine whether it meets the regulatory standard. The association stated that while it assumes we would allow prepaid plans to obtain "credit" for stop-loss coverage that already exists, it may be exceedingly difficult to compare the coverage. For example, existing stop-loss coverage may have a lower attachment point (that is, deductible), but higher coinsurance amounts or vice versa. Some stop-loss coverage may vary by disease. Also, some coverage may vary depending on whether the cost is related to inpatient care or specialty care. Some prepaid plans apply individual and aggregate stop-loss simultaneously. Some stop-loss limits are linked to utilization levels and not cost levels. Some physician groups decline the coverage offered by the prepaid plan because it may be less costly to obtain the coverage for all their patients rather than only those who are enrollees of a single prepaid plan. In light of this, the association recommended that we do the following:

- Reevaluate the stop-loss limits in light of actuarial input on the appropriate need for stop-loss coverage and its cost.
- Allow a prepaid plan to retain the services of an actuary who would assign an actuarial value to the stop-loss coverage currently being provided to the physician or physician group. Allow the prepaid plan to meet the stop-loss requirements by providing (that is, making available) the difference between the actuarial value of the requirement and the value of the stop-loss currently being provided to the physician or physician group. The prepaid plan, in consultation with its actuary, could convert this difference into an actuarial equivalent in order that the new coverage be consistent with the nature of the stop-loss coverage already provided to the physician or physician group. The association stated that this recommendation is intended to accomplish two objectives: (1) The prepaid plan would obtain credit for stop-loss coverage already provided to the physician or physician group; (2) the prepaid plan would have more flexibility in determining how the requirement was met; for example, if it wished, the prepaid plan could meet the requirement by building on the structure of its existing stop-loss coverage.

A second issue raised by the association concerns the applicability of the stop-loss requirements to withhold and bonus arrangements. When physicians or physician groups are at risk for referral services under a capitation arrangement, stop-loss coverage would protect the physician group or physician from excessive costs. In contrast, when an organization uses withholds or bonuses as its incentive arrangements, no large potential economic loss would occur at which the stop-loss would attach. The association recommended that we rethink the application of the stop-loss requirements to withhold and bonus situations. It also argued that we should amend our regulation to allow for adjustments in the stop-loss attachment points to account for inflation; that is, as health care costs increase, the limits need to be raised accordingly. Otherwise, the stop-loss coverage provided by the prepaid plan would become unduly and inappropriately comprehensive.

Response: Based on actuarial analyses and consultation with experts knowledgeable about current stop-loss insurance practices, this final rule makes a number of changes to the stop-loss provision. Because many of the stop-loss arrangements currently in place differentiate between professional services and hospital or other institutional services, we are revising § 417.478(g)(2)(ii) to permit prepaid plans and physician groups to choose either a single combined limit or separate limits for professional services and institutional services. We are also revising the categories of patient panel size to increase the number of categories and smooth out the gradation of attachment points. This final rule establishes the following limits:

Panel Size	Single Combined Limit	Separate Institutional Limit	Separate Professional Limit
1–1000	*$6,000	*$10,000	*$3,000
1,001–5000	30,000	40,000	10,000
5,001–8,000	40,000	60,000	15,000
8,001–10,000	75,000	100,000	20,000*
10,001–25,000	150,000	200,000	25,000
> 25,000	none	none	none

The asterisks indicate that, at this level, stop-loss insurance is impractical. The premiums would be prohibitively expensive. Plans and physician groups clearly should not be putting physicians at financial risk for panel sizes this small. It is our understanding that doing so is not common. For completeness, however, we do show what the limits would be in these circumstances.

In regard to the comments on bonuses and withholds, we specifically indicated that when bonuses and withholds put physicians at substantial financial risk, the physicians need to have stop-loss protection. The legislation and regulation require that all forms of incentive arrangements that put physicians at substantial financial risk have stop-loss protection. Even though current stop-loss policies may not cover bonuses and withholds, this is the requirement of this regulation. Thus, if current policies do not cover these arrangements, the prepaid plans, physician groups, and/or the reinsurance companies must arrange for protection against losses that can occur due to withholds or the potential loss of bonus payments.

With regard to the suggestion that we account for inflation, we will be periodically reviewing the requirements of this regulation in light of new or more complete information about compensation arrangements and their impact on patients. We will consider this and other recommendations again in the future.

Comment: A commenter asked how frequently panel size can be updated and how soon this increased panel size can be reflected in higher stop-loss limits for the group. The commenter also asked whether an HMO that increases enrollment in a physician panel and correspondingly raises its stop-loss limits must refile its physician incentive arrangement with us.

Response: There is no limitation on the frequency with which panel size can be updated.

Comment: One commenter noted that the stop-loss protection required by this regulation would cover only 90 percent of the costs of referral services that exceed 25 percent of potential payments. The commenter believed that the financial incentive to reduce or withhold referral services to Medicare patients could, in this situation, be overwhelming. The commenter said this would be particularly true in situations in which the physician treated an atypical mix of patients requiring referrals for specialty care.

Response: We adopted our position based upon comments on the proposed rule. As indicated in the preamble to the March 27, 1996 final rule, this policy is currently used by many prepaid plans and has worked well to ensure that physicians are sensitive to avoid the furnishing of unnecessary services. Recent information from prepaid plans and actuaries confirms that this 90/10 standard is consistent with actual practices and policies. We set the ratio at the high end of the continuum of ratios used in the industry since they range from 90/10 to 75/25. Thus, we have allowed for limited risk sharing beyond the stop-loss limits. Further, as indicated in the preamble to the March 1996 rule, we made changes in the stop-loss limits to adjust for the incorporation of this additional risk sharing.

Comment: A major organization representing physicians believed that we should require a reduced, but still substantial, amount of stop-loss for plans with enrollment in excess of 25,000 patients.

Response: As stated earlier, evidence from analyses by Rossiter and Adamache supports the decision that physician groups with more than 25,000 patients are able to adequately spread risk. Therefore we concluded that they are not at substantial financial risk. The commenter did not provide any data or rationale that would lead us to a different conclusion. Note also that the change made by this final rule discussed earlier that eliminates pooling by the prepaid plan across physician groups to achieve the 25,000 base should alleviate the commenter's concern.

Survey

We received a single comment on the enrollee survey provisions in the rule. Section 417.479(g)(1) requires that HMOs or CMPs that operate incentive plans that place physicians or physician groups at substantial financial risk conduct enrollee surveys. These surveys must—

- Include either all current Medicare/Medicaid enrollees of the HMO or CMP and those who have disenrolled (other than because of loss of eligibility in Medicaid or relocation outside the HMO's or CMP's service area) in the past 12 months, or a sample of these same enrollees and disenrollees.
- Be designed, implemented, and analyzed in accordance with commonly accepted principles of survey design and statistical analysis.
- Address enrollees/disenrollees satisfaction with the quality of the services provided and their degree of access to the services.
- Be conducted no later than 1 year after the effective date of the incentive plan, and at least every 2 years thereafter.

Comment: A major organization suggested that we require health plans to use a standardized survey questionnaire designed by HCFA; require health plans to oversample disenrollees and persons with chronic conditions or high cost illnesses; provide detailed instructions to plans on survey design; and publish a comparison report card of all survey results.

Response: The final rule did not specify that the plans conduct a separate survey for this regulation because most plans already administer surveys that meet the requirements of this regulation. We do, however, recognize the value of having a standardized survey instrument and have developed one, as part of our effort to measure and improve quality of care, that can be used to satisfy the requirements of this regulation.

We have, in concert with the Agency for Health Care Policy and Research through the latter's CAHPS process

VOL 61 ISS 252 DE 31 1996 UMI

(Consumer Assessments of Health Plans Study), sponsored the development of a Medicare-specific consumer satisfaction instrument, so that the unique health care concerns of the senior population are adequately addressed. CAHPS is a 5-year project whose purpose is to develop a set of standardized consumer satisfaction instruments usable across all populations; subpopulation specific modules are being developed not only for the Medicare population, but also for Medicaid, the chronically ill and disabled, and children.

We have notified plans of our intention to require all Medicare contracting plans that have had a Medicare contract for at least 1 year as of January 1, 1997 to participate in this CAHPS survey. The CAHPS Medicare survey will be administered by an independent third-party contractor to the Government, secured through an open, competitive bidding process. The primary purpose of the survey is to provide information to consumers that will enable them to make plan-to-plan comparisons and thereby to make better-informed health plan choices. Key results of the survey will be published in a comparability chart that contains cost and benefit information on all Medicare contracting plans.

We will consider participation by a plan in the CAHPS survey as satisfying the requirements of this regulation, subject to the following two additional considerations. First, the current version of CAHPS does not contain a module addressed to disenrollees. Efforts are underway to develop such a module, which may be available by 1998. For 1997, we are preparing guidelines to managed care plans on how to satisfy the requirement to survey disenrollees. That guidance will be available in the spring of 1997.

Second, as noted above, under the requirements of our quality initiative, plans that received their initial Medicare contract after January 1, 1996, are not required to participate in the CAHPS survey until calendar year 1998. There will likely be plans, however, that received their first contract after January 1, 1996, that will be required to meet the enrollee and disenrollee survey requirements of this regulation in calendar year 1997. Those plans may wish to use the CAHPS survey to meet this requirement.

We have issued an operational policy letter explaining this requirement in more detail (See OPL number 96.045, December 3, 1996).

Oversampling for the chronically ill and disabled, dually eligible, and various racial and ethnic groups is a complex issue. Strategies for doing so are being seriously considered. We will be forwarding additional guidance to managed care plans.

It should also be noted that the CAHPS survey collects information at the level of the managed care plans, without distinguishing among patients of various physician groups within the plan. Ideally, the survey required under this regulation, however, should do so. We will accept the CAHPS survey as satisfying this regulation at this time, while we continue to evaluate additional measures that might be taken to collect information by physician group.

Finally, we will not require that the Medicaid version of the CAHPS survey be administered by HMOs with Medicaid contracts. However, we are willing to assist States that wish to require administration of the CAHPS Medicaid survey.

Other Comments

We received other comments that were not specifically directed to the provisions of the regulation. Since these comments do not directly address the regulations, we are not responding to them in this preamble.

We also want to clarify an inconsistency that occurred in the preamble to the March 27, 1996 final rule. While the regulation text was accurate in specifying that subcontracts were covered by the regulations, we were inconsistent in different sections of the preamble. In the first column at 61 FR 13439, we indicated that subcontracts are covered, while in the second and third column of the same page we indicated that they were not covered. The statements in the second and third column were incorrect.

V. Provisions of this Final Rule

This final rule reflects the March 27, 1996 final rule with comment period, with changes. Many of the substantive change listed below have been discussed in section IV of this preamble. Those that have not are explained below.

- Section 417.479(b) is revised to clarify that the physician incentive plan requirements also apply to subcontracting arrangements.
- Section 417.479(f), which describes arrangements that cause substantial financial risk, is revised to permit pooling by physician groups of patients across prepaid plans. A technical change is also made to change "possible payments" wherever it appears to "potential payments". This latter change reflects the fact that "potential payments" is the term defined in the paragraph's introductory text.
- In § 417.479(g), which sets forth the requirements that HMOs and CMPs that place physicians or physician groups at substantial financial risk must meet, the following changes are made:

+ Paragraph (g)(1) is revised to require that the enrollee survey be conducted no later than 1 year after the effective date of the Medicare contract and at least annually thereafter.

+ Paragraph (g)(2)(ii) is revised to establish new stop-loss limits based either on a single combined limit or on separate limits for professional services and institutional services.

+ Paragraph (g)(2)(iii) is removed to eliminate the requirement that the HMO or CMP pay for the stop-loss protection.

- In § 417.479(h), which concerns disclosure requirements, the following changes are made:

+ Paragraph (h)(1)(iv) is revised to specify that the HMO or CMP must provide us with proof that the physician or physician group has adequate stop-loss protection, including the amount and type of stop-loss protection.

+ Existing paragraph (h)(1)(v) is removed to eliminate, as an approved method of pooling, pooling together, by the organization, of several physician groups into a single panel. A new paragraph (h)(1)(v) is added to permit pooling, by a physician group, of patients across prepaid plans. New paragraph (h)(1)(v) also specifies the conditions under which pooling is permitted.

+ Paragraph (h)(2) is revised to change when the HMO or CMP must provide the required information. The current regulation requires this to be done upon application for a contract, upon application for a service area expansion, within 30 days of a request by us, and at least 45 days before implementing certain changes in the incentive plan. We have changed this to make it an annual requirement. This first submission must be done prior to approval of a new contract, with subsequent submissions prior to each renewal of the contract. This change is intended to simplify the requirement and reduce the reporting burden on the prepaid plans.

In addition we now specify, in paragraph (h)(2)(ii), that an HMO or CMP must provide the capitation data for the previous calendar year to us by April 1 of each year. This change is being made to eliminate confusion about the reporting period and ensure consistency.

- In § 434.70, which concerns conditions for FFP, paragraph (a)(3) is revised to—

+ Eliminate the requirement that the HMO or HIO must disclose certain

information within 30 days of a request by the State or HCFA.

+ To specify that an HMO or HIO must provide the capitation data for the previous calendar year to the State Medicaid agency by April 1 of each year.

+ Eliminate the requirement that the HMO or HIO submit the required information at least 45 days before implementing certain changes in its incentive plan.

VI. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995, agencies are required to provide 60-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. This final rule contains information collections that are subject to review by OMB under the Paperwork Reduction Act of 1995. The title, description, and respondent description of the information collections are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and collecting and reviewing the collection of information.

We are, however, requesting an emergency review of these regulations. In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, we have submitted to OMB the following requirement for emergency review. We are requesting an emergency review because the collection of this information is needed prior to the expiration of the normal time limits under OMB's regulations at 5 CFR part 1320, to ensure compliance with the physician incentive regulation necessary to implement congressional intent with respect to incentive arrangements between managed care entities and their contracting providers. We cannot reasonably comply with the normal clearance procedures because public harm is likely to result due to the delay in reporting and monitoring of these incentives. If emergency clearance is not provided, we will be forced to postpone the collection of these data for 12 months due to the timing of contract cycles.

We are requesting that OMB provide a 5-day public comment period with a 2-day OMB review period and a 180-day approval. During this 180-day period, we will publish a separate **Federal Register** notice announcing the initiation of an extensive 60-day agency review and public comment period on these requirements. Then we will submit the requirements for OMB review and an extension of this emergency approval.

Type of Information Request: New collection.

Title of Information Collection: Incentive Arrangement Disclosure Form and Supporting Regulations 42 CFR 417.479 (g)(1), 417.479(h)(1) and (h)(2), 417.479(i), and 434.70(a)(3).

Form Number: HCFA–R–201.

Use: Incentive Arrangement Form and supporting regulations will be used to monitor physician incentive plans.

Frequency: Annually.

Affected Public: Nonprofit and for profit HMOs, CMPs, and HIOs.

Number of Respondents: 450.

Total Annual Responses: 450.

Total Annual Hours Requested: 45,000.

To request copies of the proposed paperwork collections referenced above, call the Reports Clearance Office at (410) 786–1326.

The sections in these final regulations that contain information collection requirements are:. §§ 417.479 (h)(1) and (h)(2), 417.479(i), 434.70(a)(3), and 417.479(g)(1), (and § 434.70(a)(3) for Medicaid) of this document. However, the information collection requirements referenced in §§ 417.479(g)(1) and 434.70(a)(3) of this final rule, described below, are currently pending approval by OMB (under the title "HEDIS 3.0 (Health Plan Data and Information Set) and supporting regulations 42 CFR 417.470 and 42 CFR 417.126").

The information collection requirements at existing §§ 417.470(h)(1) and (h)(2), 417.479(i), and 434.70(a)(3) were established by the March 27, 1996 final rule with comment period. These sections of the regulations specify that disclosure concerning physician incentive plans must be made to us or the State, as appropriate. The requirements apply to physician incentive plans between prepaid plans and individual physicians or physician groups with whom they contract to furnish medical services to enrollees. The requirements apply only to physician incentive plans that base compensation on the use or cost of services furnished to Medicare beneficiaries or Medicaid recipients. Under the existing regulations, a prepaid plan must provide the information upon application for a contract; upon application for a service area expansion; at least 45 days before implementing certain changes in its incentive plan, and within 30 days of a request by us or the State. This rule would amend the regulations by removing the requirements that disclosure be made upon application for a service area expansion, within 30 days of a request by us or the State, and at least 45 days before implementing certain changes in the incentive plan. It would add that disclosure must be made prior to the approval of a new contract or agreement and annually thereafter. These changes should reduce the reporting burden on prepaid plans. At the time we published the March 1996 rule, we estimated that approximately 600 entities will submit the information. We estimated the burden as 8 hours per response. As discussed in section IV above, we received numerous comments stating that we greatly underestimated the burden associated with complying with the disclosure requirements and suggesting alternative approaches. We now estimate that approximately 450 prepaid plans will disclose information. We estimate that the burden per response will be 100 hours, for an annual total burden of 45,000 hours. This estimate includes time spent by subcontractors in furnishing information to the prepaid plan.

Existing § 417.479(g)(1) (and § 434.70(a)(3) for Medicaid) concern prepaid plans that operate physician incentive plans that place physicians or physician groups at substantial financial risk and require them to conduct enrollee surveys that include either all current Medicare/Medicaid enrollees in the prepaid plan and those who have disenrolled (other than because of loss of eligibility in Medicaid or relocation outside the prepaid plan's) in the past 12 months, or a sample of these same enrollees and disenrollees. These surveys are required to be conducted annually.

The information collection and recordkeeping requirements, referenced in § 417.479 (h)(1) and (h)(2), 417.479(g)(1), 417.479(i), and 434.70(a)(3) of these regulations are not effective until they have been approved by OMB. The agency has submitted a copy of this final rule with comment period to OMB for its review of these information collections. A notice will be published in the **Federal Register** when approval is obtained. Interested persons are invited to send comments regarding this burden or any other aspect of these collections of information, including any of the following subjects: (1) The necessity and utility of the information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection

techniques or other forms of information technology to minimize the information collection burden.

Comments on these information collections should be mailed directly to the following address:

Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503, Attn: Allison Herron Eydt, HCFA Desk Officer.

In addition, comments may be faxed to: Allison Herron Eydt at (202) 395–6974.

A copy of the comments may be mailed to the following address: Health Care Financing Administration, Office of Financial and Human Resources, Management Analysis and Planning Staff, Room C2–26–17, 7500 Security Boulevard, Baltimore, MD 21244–1850.

We will also be undertaking an overall evaluation of all of the reporting and disclosure requirements in this regulation within the next year, to assess the value of the information compared with the burden of reporting. All of the disclosure and reporting requirements, and any related forms, will continue to be subject to review under the Paperwork Reduction Act.

VII. Regulatory Impact Statement

Consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), we prepare a regulatory flexibility analysis unless the Secretary certifies that a rule will not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, we consider all HMOs, CMPs, and HIOs to be small entities.

In addition, section 1102(b) requires the Secretary to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b), we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

In the preambie to the March 27, 1996 rule, which provided an opportunity for comments, we stated that we had decided not to prepare a regulatory flexibility analysis because we believed that few incentive plans will require changes to comply with the regulations. A major association of health plans, which submitted comments on behalf of its membership, strongly disagreed with this position.

The association maintained that the regulations, as adopted, will result in substantial administrative and financial burdens on a large number of organizations. The association requested that, in light of the information it was providing to us in its other comments, we reconsider our decision not to prepare a regulatory impact analysis.

A number of commenters believed that, in estimating a burden of 8 hours per response, we had grossly underestimated the time and financial resources that need to be expended to comply with the disclosure requirements. These commenters stated that this problem may be alleviated to some extent if the prepaid plans were allowed to agree that all or some of their physician incentive programs resulted in substantial financial risk without having to disclose to us the detailed information specified in the Regulations. One commenter added that the regulations, in essence, require prepaid plans to act as information gathering conduits for information related to physician group and/or subcontractor incentive plans. The commenter stated that this is not the most efficient or effective means and that a preferable approach is for us to solicit the information directly from the physician group or subcontractor. The commenter recommended that we adopt a uniform and standardized calculation and attestation form that prepaid plans could use to solicit the information.

Another commenter stated that the stop-loss limits are inappropriately low and, because of this, the cost of stop-loss coverage is very high. The commenter maintains that this rule results in substantial financial burdens on a large number of prepaid plans.

The suggestions offered by the commenters have been addressed in section IV above. With regard to our assessment of the impact of the March 27, 1966 rule, we have reviewed our assessment. In this review, we used information developed by a major accounting firm at the request of a major association, which was shared with us.

Based on survey data from Mathematica (1995), approximately one-third of prepaid plans capitate their physicians for all services. This means that, of approximately 300 Medicare prepaid plans, about 100 plans will capitate for all services. Of approximately 300 Medicaid HMOs and HIOs, approximately one-half will have Medicare contracts and, thus, do not add to the total. Of the remaining 150 Medicaid plans, many will be relatively new Medicaid plans. Most new Medicaid plans do not capitate their physicians for all services. Therefore, we estimate that there will be a total of 25 Medicaid prepaid plans in addition to the 100 Medicare plans that capitate for all services. These 125 plans will have to provide stop-loss insurance. Very few plans that use bonuses or withholds will exceed the substantial risk threshold.

Of the 125 plans that will need to provide stop-loss insurance, most of these plans already have such coverage. Taking into account the changes made by this final rule, we estimate that approximately 44 prepaid plans (35 percent) will need to increase their stop-loss coverage. The cost of this additional coverage is estimated at approximately $65 million. Since the affected entities are large, $65 million represents a very small percentage of their gross annual income. In addition, we expect that some of the $65 million will be offset by monies received from the insurers because of the increased coverage.

With regard to the financial burden associated with complying with the disclosure requirements, we continue to estimate that approximately 450 plans will need to comply with the disclosure requirements. We now estimate the burden to be 100 hours per response, at a cost of $20 per hour. This includes the burden on the physician groups and subcontractors in furnishing information to the prepaid plan. Thus, we estimate the total impact of the disclosure requirements at $900,000 per year.

This rule changes the frequency of the survey requirements (from biennially to annually), we believe that this imposes very little additional burden on prepaid plans since most plans already conduct annual surveys. In addition, as discussed in section V of the preamble, this rule changes when disclosure must be made to HCFA or the State Medicaid agency. While this rule adds that disclosure must be made upon the contract or agreement renewal or anniversary date, it removes other circumstances under which disclosure must be made. We believe the overall effect of these changes as to when disclosure must be made is to reduce the reporting burden on the affected prepaid plans.

We are not preparing analyses of this final rule for either the RFA or section 1102(b) of the Act because we have determined, and the Secretary certifies, that this rule will not have a significant economic impact on a substantial number of small entities or a significant economic impact on the operations of a substantial number of small rural hospitals.

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

VIII. Waiver of Delayed Effective Date

We ordinarily provide for final rules to be effective no sooner than 30 days after the date of publication unless we find good cause to waive the delay.

This final rule amends existing regulations that set forth the requirements that certain managed care organizations must meet in order to contract with the Medicare and/or Medicaid program. A number of the changes made by this final rule either reduce the burden associated with the regulations or recognize existing industry practices. Since many managed care Medicare and Medicaid contracts renew on January 1, if this final rule does not become effective until after that date, the benefits that result from the changes made by this rule will not be realized until 1998. Therefore, we find that it would be against the public interest to delay the effective date of this final rule.

Chapter IV of title 42 is amended as set forth below:

PART 417—HEALTH MAINTENANCE ORGANIZATIONS, COMPETITIVE MEDICAL PLANS, AND HEALTH CARE PREPAYMENT PLANS

A. Part 417 is amended as follows:

1. The authority citation for part 417 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

2. In § 417.479, paragraph (g) introductory text and paragraph (g)(1) introductory text are republished; paragraph (g)(2)(iii) is removed; paragraph (b), paragraph (f) introductory text, paragraphs (f)(5), (g)(1)(iv), (g)(2)(ii), (h)(1)(iv), (h)(1)(v), and (h)(2) are revised to read as follows:

§ 417.479 Requirements for physician incentive plans.

* * * * *

(b) *Applicability.* The requirements in this section apply to physician incentive plans between HMOs and CMP and individual physicians or physician groups with which they contract to provide medical services to enrollees. The requirements in this section also apply to subcontracting arrangements as specified in § 417.479(i). These requirements apply only to physician incentive plans that base compensation (in whole or in part) on the use or cost of services furnished to Medicare beneficiaries or Medicaid recipients.

* * * * *

(f) *Arrangements that cause substantial financial risk.* For purposes of this paragraph, *potential payments* means the maximum anticipated total payments (based on the most recent year's utilization and experience and any current or anticipated factors that may affect payment amounts) that could be received if use or costs of referral services were low enough. The following physician incentive plans cause substantial financial risk if risk is based (in whole or in part) on use or costs of referral services and the patient panel size is not greater than 25,000 patients:

* * * * *

(5) Capitation, arrangements, if—

(i) The difference between the maximum potential payments and the minimum potential payments is more than 25 percent of the maximum potential payments; or

(ii) The maximum and minimum potential payments are not clearly explained in the physician's or physician group's contract.

* * * * *

(g) *Requirements for physician incentive plans that place physicians at substantial financial risk.* HMOs and CMPs that operate incentive plans that place physicians or physician groups at substantial financial risk must do the following:

(1) Conduct enrollee surveys. These surveys must—

* * * * *

(iv) Be conducted no later than 1 year after the effective date of the Medicare contract and at least annually thereafter.

(2) * * *

(ii) If the stop-loss protection provided is based on a per-patient limit, the stop-loss limit per patient must be determined based on the size of the patient panel and may be a single combined limit or consist of separate limits for professional services and institutional services. In determining patient panel size, the patients may be pooled in accordance with paragraph (h)(1)(v) of this section. Stop-loss protection must cover 90 percent of the costs of referral services that exceed the per patient limit. The per-patient stop-loss limit is as follows:

Panel size	Single combined limit	Separate institutional limit	Separate professional limit
1–1000	$6,000	$10,000	$3,000
1,001–5000	30,000	40,000	10,000
5,001–8,000	40,000	60,000	15,000
8,001–10,000	75,000	100,000	20,000
10,001–25,000	150,000	200,000	25,000
> 25,000	none	none	none

* * * * *

(h) * * *

(1) * * *

(iv) Proof that the physician or physician group has adequate stop-loss protection, including the amount and type of stop-loss protection.

(v) The panel size and, if patients are pooled, the method used. Pooling is permitted only if: it is otherwise consistent with the relevant contracts governing the compensation arrangements for the physician or physician group; the physician or physician group is at risk for referral services with respect to each of the categories of patients being pooled; the terms of the compensation arrangements permit the physician or physician group to spread the risk across the categories of patients being pooled; the distribution of payments to physicians from the risk pool is not calculated separately by patient category; and the terms of the risk borne by the physician or physician group are comparable for all categories of patients being pooled. If these conditions are met, the physician or physician group may use either or both of the following methods to pool patients:

(A) Pooling any combination of commercial, Medicare, or Medicaid patients enrolled in a specific HMO or CMP in the calculation of the panel size.

(B) Pooling together, by a physician group that contracts with more than one HMO, CMP, health insuring organization (as defined in § 434.2 of

this chapter), or prepaid health plan (as defined in § 434.2 of this chapter) the patients of each of those entities.

* * * * *

(2) *When disclosure must be made to HCFA.* (i) HCFA will not approve an HMO's or CMP's application for a contract unless the HMO or CMP has provided to it the information required by paragraphs (h)(1)(i) through (h)(1)(v) of this section. In addition, an HMO or CMP must provide this information to HCFA upon the effective date of its contract renewal.

(ii) An HMO or CMP must provide the capitation data required under paragraph (h)(1)(vi) for the previous calendar year to HCFA by April 1 of each year.

* * * * *

PART 434—CONTRACTS

B. Part 434 is amended as follows:

1. The authority citation for part 434 continues to read as follows:

Authority: Secs. 1102 of the Social Security Act (42 U.S.C. 1302).

2. In § 434.44, paragraph (a)(1) is revised to read as follows:

§ 434.44 Special rules for certain health insuring organizations.

(a) * * *

(1) Subject to the general requirements set forth in § 434.20(d) concerning services that may be covered; § 434.20(e), which sets forth the requirements for all contracts; the additional requirements set forth in §§ 434.21 through 434.38; and the Medicaid agency responsibilities specified in subpart E of this part; and

* * * * *

3. In § 434.70, paragraph (a) introductory text is republished, and paragraph (a)(3) is revised to read as follows:

§ 434.70 Condition for FFP.

(a) FFP is available in expenditures for payments to contractors only for the periods that—

* * * * *

(3) The HMO, HIO (or, in accordance with § 417.479(i) of this chapter, the subcontracting entity) has supplied the information on its physician incentive plan listed in § 417.479(h)(1) of this chapter to the State Medicaid agency. The information must contain detail sufficient to enable the State to determine whether the plan complies with the requirements of §§ 417.479 (d) through (g) of this chapter. The HMO or HIO must supply the information required under §§ 417.479 (h)(l)(i) through (h)(1)(v) of this chapter to the State Medicaid agency as follows:

(i) Prior to approval of its contract or agreement.

(ii) Upon the contract or agreements anniversary or renewal effective date.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 960129018–6018–01; I.D. 122396A]

Fisheries of the Exclusive Economic Zone Off Alaska; Groundfish of the Gulf of Alaska; Pacific Cod for Processing by the Inshore Component in the Western and Central Regulatory Areas

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Directed fishing opening.

SUMMARY: MFS is opening directed fishing for Pacific cod for vessels catching Pacific cod for processing by the inshore component in the Western and Central Regulatory Areas of Gulf of Alaska (GOA). This action is necessary to fully utilize the total allowable catch (TAC) of Pacific cod for the inshore component in the Western and Central Regulatory Areas of the GOA.

EFFECTIVE DATE: 1200 hrs, Alaska local time (A.l.t.), January 1, 1997, until 2400 hrs, A.l.t., December 31, 1997.

FOR FURTHER INFORMATION CONTACT: Mary Furuness, 907–586-7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the GOA exclusive economic zone is managed by NMFS according to the Fishery Management Plan for Groundfish of the GOA (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at subpart H of 50 CFR part 600 and 50 CFR part 679.

In accordance with § 679.20 (c)(2)(i), the interim TAC of Pacific cod for vessels catching Pacific cod for processing by the inshore component in the Western and Central Regulatory Areas was established by the Interim 1997 Harvest Specifications for Groundfish (61 FR 64299, December 4, 1996) as 3,393 metric tons (mt) and 7,722 mt, respectively.

Vessels catching Pacific cod for processing by the inshore component in the Western and Central Regulatory Areas were prohibited from directed fishing for Pacific cod under § 679.20 (d)(1)(iii) in order to reserve amounts anticipated to be needed for incidental catch in other fisheries (61 FR 64299, December 4, 1996). NMFS has determined that sufficient TAC is available to allow a directed fishery. Therefore, NMFS is terminating the previous closure and is opening directed fishing for Pacific cod for processing by the inshore component in the Western and Central Regulatory Areas.

Classification

This action is taken under 50 CFR 679.20 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 24, 1996.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 61, No. 252
Tuesday, December 31, 1996

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 94

[Docket No. 96–077–1]

Change in Disease Status of Costa Rica Because of Exotic Newcastle Disease

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to declare Costa Rica free of exotic Newcastle disease (END). Declaring Costa Rica free of END appears to be appropriate because the country has had no clinical, pathological, or laboratory confirmation of END for the last 5 years. This proposed rule would remove the prohibition on the importation into the United States, from Costa Rica, of poultry and poultry products.

DATES: Consideration will be given only to comments received on or before March 3, 1997.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 96–077–1, Regulatory Analysis and Development, PPD, APHIS, suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 96–077–1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690–2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Dr. Michael David, Senior Staff Veterinarian, Animal Program, National Center for Import and Export, VS, APHIS, 4700 River Road Unit 39, Riverdale, MD 20737–1228, (301) 734–5034.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 94 (referred to below as the regulations) govern the importation into the United States of specified animals and animal products in order to prevent the introduction into the United States of various animal diseases, including exotic Newcastle disease (END). END is a contagious, infectious, and communicable disease of poultry.

Section 94.6(a)(1) of the regulations provides that END exists in all countries of the world except those listed in § 94.6(a)(2), which have been declared to be free of END. We will consider declaring a country to be free of END if there have been no reported cases of the disease in that country for at least the previous 1-year period and no vaccinations for END have been administered to poultry in that country for at least the previous 1-year period.

There has been no documented case of END in Costa Rica for the last 5 years, based on morbidity and mortality reports provided by the industry and the government of Costa Rica, on clinical reports from the field, and on the lack of any typical lesions noted on necropsies. Based on these considerations, the government of Costa Rica has requested that the U.S. Department of Agriculture (USDA) declare Costa Rica free of END.

The Animal and Plant Health Inspection Service (APHIS) reviewed the documentation submitted by the government of Costa Rica in support of its request, and a team of APHIS officials traveled to Costa Rica in 1994 to conduct an on-site evaluation of the country's animal health program with regard to the END situation in Costa Rica. The evaluation consisted of a review of Costa Rica's official veterinary services, laboratory and diagnostic procedures, vaccination practices, and administration of laws and regulations intended to prevent the introduction of END into Costa Rica through the importation of animals, meat, or animal products. The results of this on-site visit, and subsequent evaluation, allows APHIS officials to conclude that Costa Rica is free of END.

Therefore, based on the information discussed above, we are proposing to amend § 94.6(a)(2) by adding Costa Rica to the list of countries declared to be free of END. This proposed action would remove the prohibition on the importation, from Costa Rica, of poultry and poultry products.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required by Executive Order 12866.

This proposed rule, if adopted, would amend the regulations in 9 CFR part 94 by adding Costa Rica to the list of countries declared to be free of END. This action would remove the prohibition on the importation into the United States, from Costa Rica, of poultry and fresh, chilled, and frozen meat of poultry, although those importations would be subject to certain restrictions. Based on available information, the Department does not anticipate a major increase in exports of poultry or poultry products from Costa Rica into the United States as a result of this proposed rule.

The commercial chicken industry in Costa Rica is very small relative to the industry in the United States. Costa Rica has about two million mature multipliers (those birds producing other birds for human consumption). By comparison, there are nearly 120 million multiplier hens and pullets of laying age in the United States. We do not expect any movement from Costa Rica into the United States of live chickens, chicks, or hatching eggs. These products are used for genetic stock, and, as Costa Rica imports most of its genetic stock (much of it from the United States), it would not be economically feasible for them to produce genetic stock for export.

We also do not expect a significant change in the importation of poultry products from Costa Rica as a result of this proposed rule. We expect that any poultry product imports would most likely be chicken meat. Costa Rica produced 60,424 metric tons of chicken meat in 1995, while the United States produced 11.5 million metric tons of chicken meat in the same year. Before any poultry meat could be imported into the United States from Costa Rica, the packing facilities in Costa Rica would require the approval of the Food Safety and Inspection Service (FSIS), USDA. Further, it is unlikely that Costa Rica would or could direct a significant portion of its chicken meat production

VOL 61 ISS 252 DE 31 1996 UMI

exclusively to the United States. Even if Costa Rica were to export all of its chicken meat production to the United States, however, that amount would represent less than one percent of U.S. production. Therefore, declaring Costa Rica free of END should not lead to a significant change in the importation of chicken meat into the United States. Thus, this proposed rule is expected to have no more than a minimal impact on domestic producers of poultry products, whether small or large.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This proposed rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 9 CFR Part 94

Animal diseases, Imports, Livestock, Meat and meat products, Milk, Poultry and poultry products, Reporting and recordkeeping requirements.

Accordingly, 9 CFR part 94 would be amended as follows:

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), EXOTIC NEWCASTLE DISEASE, AFRICAN SWINE FEVER, HOG CHOLERA, AND BOVINE SPONGIFORM ENCEPHALOPATHY: PROHIBITED AND RESTRICTED IMPORTATIONS

1. The authority citation for part 94 would continue to read as follows:

Authority: 7 U.S.C. 147a, 150ee, 161, 162, and 450; 19 U.S.C. 1306; 21 U.S.C. 111, 114a, 134a, 134b, 134c, 134f, 136, and 136a; 31 U.S.C. 9701; 42 U.S.C. 4331 and 4332; 7 CFR 2.22, 2.80, and 371.2(d).

§ 94.6 [Amended]

2. In § 94.6, paragraph (a)(2) would be amended by adding "Costa Rica," immediately after "Chile,".

Done in Washington, DC, this 20th day of December 1996.

A. Strating,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

9 CFR Part 94

[Docket No. 96–076–1]

Pork and Pork Products from Mexico Transiting the United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to allow fresh, chilled, and frozen pork and pork products from the Mexican State of Baja California to transit the United States, under certain conditions, for export to another country. Currently, we allow such pork and pork products from the Mexican States of Sonora, Chihuahua, and Yucatan to transit the United States for export. Otherwise, the movement of fresh, chilled, or frozen pork and pork products into the United States from Mexico is prohibited because of hog cholera in Mexico. Baja California has not had an outbreak of hog cholera since 1985 and it appears that fresh, chilled, and frozen pork and pork products from Baja California could transit the United States under seal with minimal risk of introducing hog cholera.

DATES: Consideration will be given only to comments received on or before March 3, 1997.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 96–076–1, Regulatory Analysis and Development, PPD, APHIS, suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 96–076–1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690–2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Dr. Michael David, Senior Staff Veterinarian, Animals Program, National Center for Import and Export, VS, APHIS, USDA, 4700 River Road Unit 39, Riverdale, MD 20737–1231, (301) 734–5034.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 94 (referred to below as the regulations) prohibit or restrict the importation of certain animals and animal products into the United States to prevent the introduction of certain animal diseases. Section 94.9 of the regulations prohibits the importation of pork and pork products into the United States from countries where hog cholera exists, unless the pork or pork products have been treated in one of several ways, all of which involve heating or curing and drying.

Because hog cholera exists in Mexico, pork and pork products from Mexico must meet the requirements of § 94.9 to be imported into the United States. However, under § 94.15, pork and pork products that are from certain Mexican States and that are not eligible for entry into the United States in accordance with the regulations may transit the United States for immediate export if certain conditions are met. This provision was added to the regulations in 1992, following a United States Department of Agriculture investigation of the hog cholera situation in Sonora, Mexico, and a determination that pork and pork products from Sonora could transit the United States, under certain conditions, with minimal risk of introducing hog cholera. The Mexican State of Chihuahua was included in this provision in a final rule published in the **Federal Register** on November 15, 1995 (60 FR 57313–57315, Docket No. 95–037–2). The Mexican State of Yucatan was included in this provision in a final rule published in the **Federal Register** on June 25, 1996 (61 FR 32646–32647, Docket No. 95–093–2).

Mexico's Director of Animal Health has requested that we allow pork and pork products from the Mexican State of Baja California to transit the United States for export under the same conditions that currently apply to pork and pork products from Sonora, Chihuahua, and Yucatan. In response, officials of the Animal and Plant Health Inspection Service (APHIS) met in August 1096 in Baja California with Mexican representatives knowledgeable in disease prevention, epidemiology, and diagnostic methods. The team reviewed the hog cholera situation in Baja California (discussed below) and recommended granting Mexico's request.

The last outbreak of hog cholera in the Mexican State of Baja California occurred in March 1985. Vaccination for hog cholera was discontinued in 1986. Mexico officially recognized Baja

California as free of hog cholera on October 16, 1991.

The team found three factors contributing to Baja California's apparent successes in remaining free of hog cholera: The lack of any significant swine production in the State of Baja California; Baja California's location; and controls by Mexico's Division of Animal Health on the movement into Baja California of pork, pork products, and live swine.

There is little swine production in Baja California. Pork processed in Baja California is obtained primarily from the Mexican State of Sonora and from the United States. There are only two Federal inspection system Tipo de Internacional Federal (TIF) plants that handle pigs in the State of Baja California. Of these facilities, one is a slaughter plant that kills an average of 200 pigs per week, and the other is a processing plant that receives mostly frozen carcasses from either a TIF plant in Sonora or from the United States.

Baja California is bordered on the north and northwest by the United States and the Mexican State of Sonora, which are both free of hog cholera. To the west of Baja California is the Pacific Ocean and to the east is the Gulf of California. South of Baja California is the Mexican State of Baja California Sur, which was declared hog cholera free by Mexico in May of 1994.

As required by the Mexican Government, Baja California and other States recognized by Mexico as free of hog cholera may only import live swine and pork from other hog cholera-free States and countries. The Mexican Government requires shipments from hog cholera-free countries to be accompanied by a certificate of origin issued by that country's veterinary authorities and by a certificate of import issued by the Mexican veterinary authorities. Baja California and other States recognized by Mexico as being free of hog cholera also require and issue their own permits and health certificates, further ensuring that the products originate in a hog cholera-free area. In addition, live swine and pork imported into these hog cholera-free States must be shipped in sealed trucks, and all shipments are inspected at inspection stations located either on State lines or at international ports of entry.

Under these circumstances, we believe that there would be little, if any, risk of introducing hog cholera into the United States by allowing pork and pork products from Baja California to transit the United States for export under the same conditions that currently apply to pork and pork products from Sonora, Chihuahua, and Yucatan.

As applied to pork and pork products from Baja California, these conditions would be as follows:

1. Any person wishing to transport pork or pork products from Baja California through the United States for export must first obtain a permit for importation from APHIS. The application for the permit tells APHIS who will be involved in the transportation, how much and what type of pork and pork products will be transported, when they will be transported, and the method and route of shipment.

2. The pork or pork products must be packaged in Baja California in a leakproof container and sealed with a serially numbered seal approved by APHIS. The container must remain sealed at all times while transiting the United States.

3. The person moving the pork or pork products through the United States must inform the APHIS officer at the United States port of arrival, in writing, of the following information before the pork or pork products arrive in the United States: The time and date that the pork or pork products are expected at the port of arrival in the United States, the time schedule and route of the shipments through the United States, the permit number, and the serial numbers of the seals on the containers.

4. The pork or pork products must transit the United States under Customs bond.

5. The pork or pork products must be exported from the United States within the time period specified on the permit.

Any pork or pork products exceeding the time limit specified on the permit or transiting in violation of any of the requirements of the permit or the regulations may be destroyed or otherwise disposed of at the discretion of the Administrator, APHIS, pursuant to section 2 of the Act of February 2, 1903, as amended (21 U.S.C. 111).

We believe that applying these same safeguards to shipments of pork and pork products from Baja California would prevent tampering with the shipments, ensure that the shipments actually leave the United States, and otherwise ensure that shipments would not present a risk of introducing hog cholera into the United States. Therefore, we are proposing to amend § 94.15 to allow pork and pork products from the Mexican State of Baja California to transit the United States for export under the same conditions that currently apply to pork and pork products from Sonora, Chihuahua, and Yucatan.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

This proposed rule would allow fresh, chilled, and frozen pork and pork products from the Mexican State of Baja California to transit the United States, under certain conditions, for export to another country.

There appears to be little risk of hog cholera exposure from shipments of pork and pork products from Baja California transiting the United States. Assuming that proper risk management techniques continue to be applied in Mexico, and that accident and exposure risk would be minimized by proper handling during transport, the risk of exposure to hog cholera from pork in transit from Mexico through the United States would be minimal.

Shipments of pork and pork products from Baja California transiting the United States could economically benefit some U.S. entities as a result of this rulemaking since they would be involved in the transportation of the pork and pork products within the United States (from the port of entry to the port of embarkation). The additional economic activity from such trucking activities is estimated to be no more than $49,250 per year, assuming 200 trips per year would be made, which is approximately the level of current shipments from Sonora through the United States. No interagency or governmental effects are expected in connection with this proposal.

Mexico is a net pork importer, with Mexican imports representing 7 to 8 percent of production. With favorable income growth expected in Mexico due to trade liberalization, pork exports are expected to be limited. Furthermore,

facilitating export opportunities for the Mexican pork industry may provide incentives for continued efforts to eradicate hog cholera from infected Mexican States where it still exists.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12778

This proposed rule has been reviewed under Executive Order 12778, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and

VOL 61 ISS 252 DE 31 1996 UMI

regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

The information collection and recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.) included in this proposed rule have been approved under OMB control number 0579–0040.

List of Subjects in 9 CFR Part 94

Animal diseases, Imports, Livestock, Meat and meat products, Milk, Poultry and poultry products, Reporting and recordkeeping requirements.

Accordingly, 9 CFR part 94 would be amended as follows:

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), VELOGENIC VISCEROTROPIC NEWCASTLE DISEASE, AFRICAN SWINE FEVER, HOG CHOLERA, AND BOVINE SPONGIFORM ENCEPHALOPATHY: PROHIBITED AND RESTRICTED IMPORTATIONS

1. The authority citation for part 94 would continue to read as follows:

Authority: 7 U.S.C. 147a, 150ee, 161, 162, and 450; 19 U.S.C. 1306; U.S.C. 111, 114a, 134a, 134b, 134c, 134f, 136, and 136a; 31 U.S.C. 9701; 42 U.S.C. 4331 and 4332; 7 CFR 2.22, 2.80, and 371.2(d).

§ 94.15 [Amended]

2. In § 94.15, paragraph (b), the introductory text and paragraph (b)(2) would be amended by adding the words "Baja California," immediately before the word "Chihuahua".

Done in Washington, DC, this 20th day of December 1996.

A. Strating,

Acting Administrator, Animal and Plant Health Inspection Service.

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Regulation D, Docket No. R–0956]

Reserve Requirements of Depository Institutions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of proposed rulemaking.

SUMMARY: In conjunction with a final rule printed elsewhere in today's **Federal Register**, the Board of Governors of the Federal Reserve System is proposing to amend its Regulation D regarding reserve requirements of depository institutions issued pursuant to section 19 of the Federal Reserve Act, in order further to reduce regulatory burden and simplify and update requirements. This proposal would clarify the definition of "savings deposit," consistent with comments the Board received on its earlier proposal, and similarly clarify the definition of "transaction account" and conform it to the amended definition of "savings deposit." This proposal is in accordance with the Board's policy of regular review of its regulations and the Board's review of its regulations under section 303 of the Riegle Community Development and Regulatory Improvement Act of 1994.

DATES: Comments must be received by February 4, 1997.

ADDRESSES: Comments should be directed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, NW., Washington, DC 20551, Attention: Docket No. R–0956, or delivered to Room B–2222, Eccles Building, between 8:45 a.m. and 5:15 p.m. Comments may be inspected in Room MP–500 between 9:00 a.m. and 5:00 p.m. weekdays, except as provided in § 261.8 of the Board of Governors' rules regarding availability of information, 12 CFR 261.8.

FOR FURTHER INFORMATION CONTACT: Ann Owen, Economist, Division of Monetary Affairs (202/736–5671); Sue Harris, Economist, Division of Research and Statistics (202/452–3490); Rick Heyke, Staff Attorney, Legal Division (202/452–3688). For the hearing impaired only, Telecommunications Device for the Deaf (TDD), Earnestine Hill or Dorothea Thompson (202/452–3544).

SUPPLEMENTARY INFORMATION:

Background

The Board of Governors of the Federal Reserve System (Board) published a notice of proposed rulemaking in the **Federal Register** on June 17, 1996 (61 FR 30545) that solicited comments on proposed amendments to its Regulation D, Reserve Requirements of Depository Institutions (12 CFR Part 204). The Board received nine comments suggesting that the Board clarify the definition of "savings deposit," and a number of them also suggested that the Board rewrite the definitions of "time deposit," "demand deposit," and/or "transaction account." One commenter suggested the use of bullet points to distinguish limitations on transfers from exceptions to such limitations. Two commenters appended suggested language designed to clarify the definition of savings account, principally by shortening the sentences.

In response to these comments, the Board is proposing to amend the definition of "savings deposit" in an effort to clarify it. The proposal similarly would amend the definition of "transaction account" to clarify it and to conform it to the amended definition of "savings deposit." The amendments are intended to be nonsubstantive and would codify certain Board and staff interpretations. For example, the proposal makes clear that a transfer ordered by messenger does count against the limitation on transfers applicable to savings accounts if the messenger is in the employ of, or acting as agent of, the depository institution. The proposal also clarifies that transfers from savings accounts to repay overdrafts do not benefit from the exception for transfers to repay loans and associated expenses at the same depository institution. The proposal distinguishes more clearly between transfers from savings accounts subject to both the 6 per month and the 3 per month limitations and those subject only to the 6 per month limitation by specifying that the 6 per month limitation applies to preauthorized transfers, telephone and data transmission orders, checks, drafts, debit cards and similar orders to the depository institution whether given directly to the depository institution by the depositor or delivered to the depository institution through and payable to third parties. In contrast, the 3 per month limitation applies to transfers made by check, draft, debit card, or similar order to the depository institution delivered through and payable to third parties. Home banking transfers remain subject to the six per month limitation.

Initial Regulatory Flexibility Analysis

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires an agency to publish an initial regulatory flexibility analysis with any notice of proposed rulemaking. Two of the requirements of an initial regulatory flexibility analysis (5 U.S.C. 603(b))—a description of the reasons why action by the agency is being considered and a statement of the objectives of, and legal basis for, the proposed rule—are contained in "Background" above. The proposed rules require no additional reporting or recordkeeping requirements and do not overlap with other federal rules.

Another requirement for the initial regulatory flexibility analysis is a

description of and, where feasible, an estimate of the number of small entities to which the proposed rule will apply. The proposal will apply to all depository institutions regardless of size.

The amendments are burden-reducing. Therefore, the Board believes that the amendments will not have a significant adverse economic impact on a substantial number of small entities.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act notice of 1995 (44 U.S.C. Ch. 3506; 5 CFR Part 1320, Appendix A.1), the Board has reviewed the rule under the authority delegated to the Board by the Office of Management and Budget. No collection of information pursuant to the Paperwork Reduction Act is contained in the rule.

List of Subjects in 12 CFR Part 204

Banks, banking, Federal Reserve System, Reporting and recordkeeping requirements.

Authority and Issuance

For the reasons set forth in the preamble, the Board proposes to amend part 204 of chapter II of title 12 as follows:

PART 204—RESERVE REQUIREMENTS OF DEPOSITORY INSTITUTIONS (REGULATION D)

1. The authority citation for part 204 continues to read as follows:

Authority: 12 U.S.C. 248(a), 248(c), 371a, 461, 601, 611, and 3105.

2. Section 204.2 is amended as follows:

a. Paragraphs (b)(2) and (b)(3)(ii)(A) are amended by removing "paragraph (d)(2) of this section" and adding in its place "paragraph (d) of this section".

b. Paragraph (d) is revised.

c. In the introductory text of paragraph (e) and in paragraphs (e)(2), (e)(3), and (e)(4), all references to "paragraph (d)(2) of this section" are revised to read "paragraph (d) of this section".

d. Paragraph (e)(4) is further amended by removing "another account of the depositor at the same institution (including *transaction account*)" and adding in its place "another account of the depositor (including a *transaction account*)", and by removing the third and fourth sentences in their entirety. The revision reads as follows:

§ 204.2 Definitions.

* * * * *

(d)(1) *Savings deposit* means a deposit or account—

(i) With respect to which the depositor may be (but is not ordinarily) required by the depository institution to give written notice of an intended withdrawal not less than seven days before withdrawal is made;

(ii) That is not payable on a specified date, or after a specified period of time after the date of deposit;

(iii) From which the depositor is limited to no more than six transfers per month (or similar period of at least four weeks) to another account (including a transaction account) of the depositor or to a third party, by means of a preauthorized transfer, a telephone or data transmission order, or a check, draft, debit card, or similar order to the depository institution whether given directly to the depository institution by the depositor or delivered to the depository institution through and payable to third parties; and

(iv) From which no more than three of such six transfers may be made by check, draft, debit card, or similar order to the depository institution by the depositor delivered to the depository institution through and payable to third parties.[4]

(2) The limitations in paragraph (d)(1) of this section do not apply to:

(i) Transfers from a savings account for the purpose of repaying loans (other than overdrafts on a transaction account) and associated expenses at the same depository institution (as originator or servicer);

(ii) Transfers of funds from a savings account to another account of the same depositor at the same institution when the transfers are requested by mail, by messenger (not in the employ of or acting as agent of the depository institution), at an automated teller machine, or in person at an office of the depository institution;

(iii) Withdrawals from a savings account when such withdrawals are requested by mail, by messenger (not in the employ of, or acting as agent of, the depository institution), or at an automated teller machine, or in person at an office of the depository institution; or

(iv) Withdrawals requested by telephone or data transmission and paid by means of a check mailed to the depositor.

(3)(i) A *preauthorized transfer* means any transfer from the account of the depositor by the depository institution to pay a third party:

(A) Upon written or oral instruction to the institution (including any order received through an automated clearing house (ACH)); or

(B) At a predetermined time or on a fixed schedule.

(ii) A *withdrawal* means any payment to the depositor.

(4) *Savings deposit* does not include funds deposited to the credit of the depository institution's own trust department where the funds involved are utilized to cover checks or drafts. Such funds are *transaction accounts*.

* * * * *

By order of the Board of Governors of the Federal Reserve System, December 24, 1996.

William W. Wiles,

Secretary of the Board.

[FR Doc. 96–33159 Filed 12–30–96; 8:45 am]

BILLING CODE 6210–01–P

[4] In order to ensure that no more than the permitted number of withdrawals or transfers are made, for an account to come within the definition in paragraph (d) of this section, a depository institution must either:

(a) Prevent withdrawals or transfers of funds from this account that are in excess of the limits established by paragraph (d) of this section, or

(b) Adopt procedures to monitor those transfers on an *ex post* basis and contact customers who exceed the established limits on more than an occasional basis.

For customers who continue to violate those limits after they have been contacted by the depository institution, the depository institution must either close the account and place the funds in another account that the depositor is eligible to maintain, or take away the transfer and draft capacities of the account.

An account that authorizes withdrawals or transfers in excess of the permitted number is a transaction account regardless of whether the authorized number of transactions are actually made. For accounts described in paragraph (d) of this section, the institution at its option may use, on a consistent basis, either the date on the check, draft, or similar item, or the date the item is paid in applying the limits imposed by that section.

Advance Notice of Proposed Rulemaking on Improvement of Disclosures Under the Real Estate Settlement Procedures Act and the Truth in Lending Act

AGENCIES: Office of the Assistant Secretary for Housing—Federal Housing Commissioner (HUD); Board of Governors of the Federal Reserve System (the Board) (collectively, the agencies).

ACTION: Advance notice of proposed rulemaking.

VOL 61 ISS 252 DEC 31 1996 UMI

SUMMARY: This notice is issued jointly by HUD and the Board to initiate fact finding that will assist the agencies in revising disclosures to consumers under the Real Estate Settlement Procedures Act (RESPA) and the Truth in Lending Act (TILA). The Economic Growth and Regulatory Paperwork Reduction Act of 1996 requires the agencies to simplify and improve these disclosures where possible, and to provide a single format satisfying the requirements of RESPA and TILA. To ensure that these disclosures meet the consumer protection goals of the statutes with minimal compliance burdens, HUD and the Board are soliciting comments from the public on what specific regulatory or legislative changes might achieve these goals. Following the consideration of the public comments and the agencies' own reviews, HUD and the Board plan to publish proposed amendments to their respective regulations, as appropriate, by March 1997.

DATES: Comments are due January 30, 1997.

ADDRESSES: Comments regarding this advance notice of proposed rulemaking may be sent to either agency.

HUD: Comments to HUD should be addressed to the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410–0500. Communications should refer to the above docket number and title. Facsimile (FAX) comments are not acceptable. A copy of comments received will be available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays at the above address.

Board: Comments to the Board should refer to Docket No. R–0954, and may be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, N.W., Washington, D.C. 20551. Comments also may be delivered to Room B–2222 of the Eccles Building between 8:45 a.m. and 5:15 p.m. weekdays, or to the guard station in the Eccles Building courtyard on 20th Street, N.W. (between Constitution Avenue and C Street) at any time. When possible, comment letters should use a standard Courier typeface with a type size of 10 or 12 characters per inch. This will enable the Board to convert the text into machine-readable form through electronic scanning, and will facilitate automated retrieval of comments for review. Also, if accompanied by an original document in paper form, comments may be submitted on 3½ inch or 5¼ inch computer diskettes in any IBM-compatible DOS-based format. Comments received will be available for inspection in Room MP–500 of the Martin Building between 9:00 a.m. and 5:00 p.m. weekdays, except as provided in 12 CFR 261.8 of the Board's rules regarding availability of information.

FOR FURTHER INFORMATION CONTACT:

HUD: David R. Williamson, Director, Office of Consumer and Regulatory Affairs, Room 9146, telephone (202) 708–4560; or for legal questions, Kenneth A. Markison, Assistant General Counsel for GSE/RESPA, Grant E. Mitchell, Senior Attorney for RESPA, or Rodrigo J. Alba, Attorney, Office of General Counsel, Room 9262, telephone (202) 708–1550. For hearing- and speech-impaired persons, these numbers may be accessed via TTY (text telephone) by calling the Federal Information Relay Service at 1–800–877–8339. The address for the above-listed persons is: Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, DC 20410.

Board: Sheilah A. Goodman or Manley Williams, Staff Attorneys, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, at (202) 452–3667 or (202) 452–2412; for the hearing impaired only, Dorothea Thompson, Telecommunications Device for the Deaf, at (202) 452–3544. The telephone numbers for the agencies are not toll-free.

SUPPLEMENTARY INFORMATION:

I. Background

On September 30, 1996, the President approved the Economic Growth and Regulatory Paperwork Reduction Act of 1996 (Title II of the Omnibus Consolidated Appropriations Act, 1997) (Pub. L. 104–208, 110 Stat. 3009) (the 1996 Act). Section 2101 of the 1996 Act requires the Board and HUD to simplify and improve the disclosures given in a mortgage transaction subject to TILA and RESPA, and to create a single disclosure that will satisfy the requirements of both statutes. The 1996 Act imposes a six-month deadline for the publication of any proposed regulations necessary to carry out the required changes within the context of the existing statutes. If legislation is necessary to accomplish the purpose of section 2101, the Board and HUD are required to submit legislative recommendations to the Congress.

A. The Real Estate Settlement Procedures Act

The Real Estate Settlement Procedures Act of 1974 (12 U.S.C. 2601 *et seq.*) was enacted in large measure to ensure that the home-buying public is afforded timely and effective information about costs of settlement in mortgage transactions. To achieve this goal, RESPA mandates disclosures at various points in the home financing process for transactions involving "federally related mortgage loans," which include most financial transactions creating a lien on owner-occupied residential structures. RESPA is implemented by HUD's Regulation X (24 CFR part 3500).

Section 5 of RESPA (12 U.S.C. 2604) and §§ 3500.6 and 3500.7 of Regulation X, require that no later than three days after loan application, potential borrowers be provided with a Special Information Booklet and a good faith estimate of charges that they are likely to incur in connection with the settlement. If the lender requires the use of a particular settlement service provider and imposes any part of the cost on the borrower, the lender must provide an additional disclosure informing the borrower of the required use and identifying the designated provider and its relationship to the lender, along with an estimate of the charges imposed by the provider.

Section 6 of RESPA (12 U.S.C. 2605) requires that borrowers be provided with disclosures regarding the possibility of mortgage servicing transfers. These disclosure requirements are subject to the same delivery requirements as the good faith estimate.

Section 4 of RESPA (12 U.S.C. 2603) and § 3500.8 of Regulation X provide that, at or before closing, the borrower must receive a HUD-prescribed settlement statement, the HUD–1 form, or in transactions where there is no seller (refinancings, home equity loans and lines of credit), either the HUD–1 or the HUD–1A form. Under section 4, the forms must itemize all costs imposed on the borrower and the seller in connection with the settlement. Under § 3500.10 of Regulation X, the person conducting the settlement must, if requested, provide the borrower with a preliminary settlement statement one day prior to settlement.

Section 8 of RESPA (12 U.S.C. 2607) and § 3500.15 of Regulation X set forth additional disclosure requirements for referrals among related business entities. Specifically, RESPA creates an exemption providing that referrals to affiliates do not violate section 8 so long as certain conditions are satisfied. This provision's disclosure component provides that the business arrangement must be disclosed and a written estimate of the charges or range of charges generally made by the provider

must be supplied to the person being referred.

For purposes of this fact finding effort, the agencies are focusing on those disclosures for which consolidation between RESPA and TILA is possible. RESPA and Regulation X impose other disclosure requirements in the mortgage finance process, including initial and annual escrow account statements (12 U.S.C. 2609(c); 24 CFR 3500.17(g)–(i)) and notice of transfer of servicing (12 U.S.C. 2605(b); 24 CFR 3500.21(d)). Since these two areas of RESPA do not seem amenable to consolidation, however, the agencies do not contemplate any joint action regarding them at this time.

B. The Truth in Lending Act

The purpose of the Truth in Lending Act (TILA) (15 U.S.C. 1601 *et seq.*) is to promote the informed use of consumer credit by requiring disclosures about credit terms and costs. The TILA requires creditors to disclose the cost of credit as a dollar amount (the finance charge) and as an annual percentage rate (the APR). Uniformity in creditors' disclosures is intended to assist consumers in comparison shopping. The TILA requires additional disclosures for a loan secured by a consumer's home and permits consumers to rescind certain transactions that involve their principal dwelling. The act is implemented by the Board's Regulation Z (12 CFR part 226). An official staff commentary interprets the regulation.

The disclosure rules that creditors must follow depend upon the type of credit the creditor is offering. For example, Subpart B of Regulation Z (§§ 226.5 through 226.16) concerns open-end credit, such as home equity lines of credit. Subpart C (§§ 226.17 through 226.24), sets forth the provisions for closed-end credit, including purchase-money and refinance mortgage transactions.

Section 226.5a sets forth general disclosure requirements for home equity lines of credit, including format and timing rules. Section 226.17 contains the general disclosure requirements for closed-end credit, including format and timing rules. Section 226.18 provides the specific disclosures that must be given in all closed-end credit transactions, such as the APR, finance charge, and payment schedule. Section 226.19 provides that in purchase-money mortgage transactions subject to RESPA, good faith estimates of the disclosures required under § 226.18 must be provided within three days of application. That section also describes the special disclosures required for variable-rate transactions secured by the consumer's principal dwelling.

Disclosure requirements for assumptions, refinancings, and variable-rate adjustments are set forth in § 226.20. The requirements for transactions subject to the right of rescission appear in § 226.23. The agencies are focusing only on those disclosures where consolidation seems possible. Since the disclosures related to variable-rate adjustments and the right of rescission do not seem to be ones which could be consolidated, the Board does not contemplate any changes to these disclosures at this time.

Subpart E (§§ 226.31 through 226.33) contains the disclosure requirements for particular types of home mortgage transactions. Section 226.31 sets forth general disclosure requirements for these transactions, including format and timing rules. Section 226.32 contains the disclosure requirements for certain closed-end home mortgages with an annual percentage rate or points and fees above a certain level. Section 226.33 sets out the disclosure requirements for reverse mortgages.

II. The Simplification Process

HUD and the Board have begun a review of Regulations X and Z to simplify, improve, and unify the disclosure requirements under RESPA and TILA as those statutes currently exist. The following table illustrates certain disclosures that may be relevant to this simplification process—most of which are mandated by the statutes.

Timing	TILA 12 CFR 226	RESPA 24 CFR 3500
At or before referral		Affiliated business arrangement disclosure (3500.15).
At or before application	Home equity line of credit booklet and disclosure (226.5a). Adjustable rate booklet and disclosure (226.19b).	
Within three days of application	TILA disclosure (including APR and finance charge) (226.19a).	Special information booklet (3500.6). Good faith estimate (3500.7). Required providers (3500.7). Initial transfer of servicing disclosure (3500.21).
Three days before closing/consummation.	Section 32 disclosures (226.32). Reverse mortgage disclosures (226.33).	
One day before closing/consummation.		Right to inspect HUD–1 or HUD–1A (3500.10).
At closing/consummation	TILA disclosure (226.18) Rescission notice (226.23)	HUD–1 or HUD–1A (3500.8). Initial escrow account statement (within 45 days of closing) (3500.17).

A. Past Efforts

During the past several years, the agencies have been actively working together to try to ensure that TILA and RESPA regulations are as consistent as possible. Much of this was addressed in 1994 by HUD when it amended Regulation X to cover subordinate lien loans, and subsequently by the Board in updates to the Regulation Z commentary. For example, the regulations now use similar definitions for the terms "assumption," "refinance," "business day," and "business purpose."

Where possible, the agencies also have worked to streamline disclosure requirements. For example, Regulation Z permits creditors to substitute both the good faith estimate and the settlement statement required under RESPA for the itemization of the "amount financed" under TILA. Similarly, Regulation X permits Regulation Z's disclosure for home equity lines of credit to substitute for RESPA disclosures.

Where the requirements of the statutes do not overlap but are related, the agencies have provided guidance on

compliance issues. For example, the Regulation Z commentary has been revised to avoid conflict between the RESPA escrow accounting rules and TILA's rules on calculating prepaid finance charges, such as private mortgage insurance.

HUD and the Board recognize that this revision process requires a careful balancing of competing interests. Consumers need timely and accurate information in order to make decisions, but too much information may confuse or intimidate the consumer, and thus may be counterproductive. Creditors need clear and workable rules that do not unnecessarily drive up compliance costs, which could lead to higher settlement costs for consumers. Therefore, the benefits of improvements to the regulations will be weighed against the cost of implementing and complying with those changes.

B. Issues for Comment

HUD and the Board request public comment on specific ways to simplify and improve the present disclosure scheme. To the extent possible, comments should be clearly separated into two parts: (1) Those that entail regulatory changes within the existing statutory framework, and (2) Those that require legislative change. The agencies request:

1. Specific recommendations on how disclosures presently required under RESPA and TILA can be made more consistent (including how the disclosures can be combined, simplified, or improved); and how the timing and format of such disclosures can be made more compatible.

2. Recommendations about ways to enhance the educational value for consumers of any of the present disclosures, including suggestions as to alternative methods of disclosure.

3. Any reports, documents, articles or other material that will assist the agencies in the present task.

After consideration of the public comments on this advance notice of proposed rulemaking and the agencies' own review, HUD and the Board will coordinate the publication of proposed amendments to their regulations to simplify and improve the present disclosure scheme, to the extent that the current statutory framework permits. Subsequently, the agencies also may submit recommendations to the Congress for legislative changes necessary to improve disclosure requirements.

By order of the Board of Governors of the Federal Reserve System, December 26, 1996.

William W. Wiles,

Secretary of the Board.

Dated: December 23, 1996.

Nicolas P. Retsinas,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210–27–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1915

[Docket No. S–051]

RIN No. 1218–AB51

Safety Standards for Fire Protection for Shipyard Employment

AGENCY: Occupational Safety and Health Administration (OSHA), U.S. Department of Labor.

ACTION: Notice of public meeting.

SUMMARY: The Occupational Safety and Health Administration is announcing the second public meeting of the Fire Protection for Shipyard Employment Negotiated Rulemaking Advisory Committee.

DATES: The public meeting will be held on February 4 through February 6, 1997. The sessions will run from 9:00 a.m. to approximately 4:00 p.m. each day.

Membership for this Committee has been drawn from shipyard operators, labor, professional associations, public interests and government agencies. Members of the Committee represent the interests of all groups interested in, or significantly affected by, the outcome of the rulemaking.

ADDRESSES: The public meeting will be in Jacksonville, Florida, at the Holiday Inn, 1617 North First Street, Jacksonville, Florida 32250; telephone numbers (904) 249–9071 and (800) 590–4767.

Any written comments in response to this notice should be sent, in quadruplicate, to the following address: Docket Office, Docket S–051, Room N–2625, 200 Constitution Ave., N.W., Washington, D.C. 20210; Telephone (202) 219–7894.

FOR FURTHER INFORMATION CONTACT: OSHA, U.S. Department of Labor, Office of Information and Consumer Affairs, Room N–3647, 200 Constitution Avenue, N.W., Washington, D.C. 20210; Telephone: (202) 219–8151.

SUPPLEMENTARY INFORMATION:

I. Background

Fire protection in shipyard employment has been regulated by OSHA'S general industry standards for fire protection, 29 CFR 1910.155 through 1910.165, Subpart L. In enforcement activities, OSHA has also used Section (5)(a)(1) of the Occupational Safety Health Act ("the Act"), the General Duty Clause, which requires each employer to,

> furnish to each of his employees employment and a place of employment which are free from recognized hazards causing or likely to cause death or serious physical harm.

The general industry standards, which address fire brigades, portable fire extinguishers, standpipe and hose systems, automatic sprinkler systems, fixed extinguishing systems, fire detection systems, and employee alarm systems, cover primarily landside shipyard operations. Fire hazards on board vessels are not covered by the general industry standards. Moreover, the general industry standards are in need of review and revision and do not completely address hazards that are unique to shipyard employment. The Agency believes a standard promulgated under § 6(b) of the Act will more effectively reduce the risks of fire in the shipyard and on board vessels.

OSHA is using the negotiated rulemaking (Neg/Reg) process to develop a proposed standard for fire protection covering all shipyard employment. The shipyard stakeholders from all sectors strongly support consensual rulemaking efforts like negotiated rulemaking. OSHA believes this process will result in a proposed standard whose provisions will effectively protect employees working throughout the shipyard. (See OSHA's Notice of Intent to Form a Negotiated Rulemaking Committee to Develop a Proposed Rule on Fire Protection in Shipyard Employment, 61 FR 28824, June 6, 1996, for a detailed explanation of why OSHA is using negotiated rulemaking to develop its proposed standard and for general information on the negotiated rulemaking process). The goal of this negotiated rulemaking is a proposed rule and supporting documentation that is acceptable to all members.

The first meeting of this Advisory Committee took place in Portland, Oregon, October 15–17, 1996. The Members were introduced and the negotiated rulemaking process and the legal requirements for OSHA rulemaking were explained to them. Following discussion, the Members

adopted ground rules for the Committee. In addition, the Committee set forth substantive issues that needed to be resolved, established work groups and began discussing scope and application, fire prevention and fire fighting.

II. The Key Issues in this Rulemaking

The key issues to be addressed as part of these negotiations include:

1. *Scope and Application*

Should Subpart P apply to all shipyard employment? How will the standard affect out-of-yard/plant firefighters such as those employed by a municipal fire department?

2. *Controls and Work Practices*

What controls and work practices will provide adequate protection for employees? Should OSHA require hot work permits? Should OSHA require training for all fire fighters? Should OSHA incorporate U.S. Coast Guard regulations in this standard? Is there any difference in controls and work practices on landside vs. onboard vessels and vessel sections? Should OSHA require the employer to secure (deactivate) all fire fighting systems onboard vessels when they arrive in the yard?

3. *Fire Brigades*

Should OSHA require each shipyard to have an in-yard/plant fire brigade?

4. *Written Fire Plans*

Should OSHA require written fire plans for landside and onboard vessels? If so, what provisions need to be included in the plans? Should OSHA include a requirement for de-watering (removal of firefighting water from the vessel) of vessels when fighting a fire on board a vessel?

5. *Technological Advances*

What advances in fire technology have occurred since OSHA's general industry standards were promulgated? Which of these advances should be incorporated into the shipyard standard?

6. *Costs of Fire Protection*

What costs would be incurred by shipyards in meeting the various provisions of a new standard? Calculations should include costs of acquiring new equipment, instituting new engineering controls and work practices, and costs of training employees. Are there cost savings or other benefits that could be expected with the promulgation of identical rules for all of shipyard employment? If so, what would be the magnitude of savings?

7. *Appendices*

Should OSHA include technical information in an appendix or appendices? If so, should it (they) be mandatory?

III. The Agenda for the February 4–6, 1996, Meeting

1. The meeting will be opened and the roll taken.
2. The minutes from the first meeting which was held October 15–17, 1996, in Portland, Oregon will be presented for acceptance by the Committee.
3. The tentative agenda for this meeting will be reviewed and changes made, if necessary.
4. The Fire Watches work group will present its draft regulatory text and preamble.
5. Each work group chairperson will report on his or her work group's progress.
6. The draft Scope and Application section will be presented for the Committee's review.
7. Breakout sessions will occur as needed throughout the meeting.
8. The Committee will establish the time and date for the next meeting.

The Advisory Committee's facilitator, relying on the information presented to him by OSHA as well as the considerable input from the various interests during convening efforts, will identify and present other substantive issues to be resolved by this Committee, as time permits. OSHA requests that all interested parties bring their calendars to facilitate the development of a tentative schedule of committee meetings, site visits and workgroup meetings.

IV. Public Participation

All interested parties are invited to attend this public meeting at the time and place indicated above. No advanced registration is required. Seating will be available to the public on a first-come, first-served basis. Individuals with disabilities wishing to attend should contact Ms. Theda Kenney at (202) 219–8061 to obtain appropriate accommodations no later than January 17, 1997.

In addition, members of the general public may request an opportunity to make oral presentations to the Committee. The facilitator of the Committee will decide to what extent oral presentations by members of the public may be permitted at the meeting. Oral presentations may include statements of fact and opinions, but shall not include any questioning of the Committee Members or other participants unless these questions have been specifically approved by the facilitator.

Part 1912 of Title 29 of the Code of Federal Regulations will apply generally. The reporting requirements of § 1912.33 have been changed pursuant to § 1912.42 to help meet the special needs of this Committee. Specifically, § 1912.33 requires that verbatim transcripts be kept of all advisory committee meetings. Producing a coherent transcript requires a certain degree of formality. The Assistant Secretary has determined pursuant to § 1912.42 that such formality might interfere with the free exchange of information and ideas during the negotiations, and that the OSH Act would be better served by simply requiring detailed minutes of the proceedings without a formal transcript.

Minutes of the previous meeting and materials prepared for the Committee will be available for public inspection at the OSHA Docket Office, N–2625, 200 Constitution Ave., NW., Washington, D.C. 20210; Telephone (202) 219–7894.

Any written comments should be directed to Docket No. S–051, and sent in quadruplicate to the following address: OSHA Docket Office, U.S. Department of Labor, Room N–2625, 200 Constitution Ave., NW., Washington, DC 20210; Telephone (202) 219–7894.

V. Authority

This document was prepared under the direction of Joseph A. Dear, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210, pursuant to section 3 of the Negotiated Rulemaking Act of 1990, 104 Stat. 4969, Title 5 U.S.C. 561 *et seq.*; and Section 7(b) of the Occupational Safety and Health Act of 1970, 84 Stat. 1597, Title 29 U.S.C. 656.

Signed at Washington, D.C., this 24th day of December, 1996.

Joseph A. Dear,

Assistant Secretary of Labor.

[FR Doc. 96–33223 Filed 12–30–96; 8:45 am]

BILLING CODE 4510–26–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 244 and 245

[FRL–5670–7]

Solid Waste Programs; Management Guidelines for Beverage Containers and Resource Recovery Facilities Guidelines; Removal of Obsolete Guidelines

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: On March 4, 1995, the President directed all Federal agencies

VOL 61 ISS 252 DE 31 1996 UMI

and departments to conduct a comprehensive review of the regulations they administer and, by June 1, 1995, to identify those rules that are obsolete or unduly burdensome. EPA has conducted a review of its rules, including rules issued under the Resource Conservation and Recovery Act (RCRA). Based on the review, EPA is today proposing to remove from the Code of Federal Regulations (CFR) two guidelines pertaining to solid waste management which are obsolete. The activities addressed in these 1976 guidelines have been included in numerous state and local statutes and regulations and other Federal rules, or have been superseded by such Presidential actions as Executive Order 12873, "Federal Acquisition, Recycling, and Waste Prevention." These guidelines are now obsolete because: the need for Part 244 guidelines for Federal facilities on beverage containers has passed with the implementation of state and local recycling mandates and requirements, RCRA Section 6001 requirements, and Executive Order 12873, and Part 245 requirements are incorporated into state and local laws and Part 256, which addresses the requirements for facility planning and implementation of resource recovery programs.

Therefore, deleting these guidelines from the CFR will have no measurable impact on solid waste management.

In the rules and regulations section of today's **Federal Register**, EPA is also promulgating a direct final rule to withdraw Parts 244 and 245 from Title 40 of the Code of Federal Regulations (CFR). A detailed rationale for the removal of these guidelines is set forth in the direct final rule and is incorporated herein. Potential commenters should consult that notice. If no adverse comments are received in response to this notice, no further activity is contemplated in relation to this proposed rule and Parts 244 and 245 will be withdrawn. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on the proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time.

DATES: Written comments on this proposed rule must be received by January 30, 1997.

ADDRESSES: Written comments (one original and two copies) should reference docket number F–96–MRBP-FFFFF and be addressed to: RCRA Docket and Information Center (RIC), Office of Solid Waste (5305W), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460. Supporting docket materials can be viewed at and hand deliveries of comments can be made to the following address: Crystal Gateway I, first floor, 1235 Jefferson Davis Highway, Arlington, VA. The RIC is open from 9 a.m. to 4 p.m. Monday through Friday, excluding federal holidays. To review docket materials, it is recommended that the public make an appointment by calling 703 603–9230. The public may copy a maximum of 100 pages from any regulatory docket at no charge. Additional copies cost $0.15/page.

FOR FURTHER INFORMATION CONTACT: Deborah Gallman (703) 308–7276, U.S. EPA, Office of Solid Waste and Emergency Response, 401 M Street, S.W., (5306W), Washington, D.C. 20460, or the RCRA Hotline, phone (800) 424–9346 or TDD (800) 553–7672 hearing impaired or (703) 412–9810 or TDD (703) 412–3323 in the Washington, D.C., metropolitan area.

SUPPLEMENTARY INFORMATION:

I. Authority

This rule is being proposed under the authority of sections 1008, 2002, 6001, and 6004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976 and the Hazardous and Solid Waste Amendments of 1984; 42 U.S.C. 6961.

II. Additional Information

For additional information, see the corresponding direct final rule published in the rules and regulations section of this **Federal Register**.

III. Analysis under Executive Order (E.O.) 12866, the Unfunded Mandates Reform Act of 1995, and the Paperwork Reduction Act

Because the withdrawal of these guidelines from the CFR reflects their current obsolescence and has no regulatory impact, this action is not a "significant" regulatory action within the meaning of E.O. 12866, and does not impose any Federal mandate on state, local, or tribal governments or the private sector within the meaning of the Unfunded Mandates Reform Act of 1995. For the same reasons, their deletion from the CFR does not affect requirements under the Paperwork Reduction Act.

IV. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, generally requires an agency to prepare, and make available for public comment, a regulatory flexibility analysis that describes the impact of a proposed or final rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies the rule will not have a significant adverse economic impact on a substantial number of small entities. This proposed rule is deregulatory in nature. The effect of the proposed rule is to remove obsolete guidelines which are mandatory only for Federal facilities. Therefore, I certify that this proposed rule will not have a significant economic impact on a substantial number of small entities. As a result, no Regulatory Flexibility Analysis is needed.

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Inspector General

42 CFR Part 1001

Solicitation of New Safe Harbors and Modifications to Existing Safe Harbors

AGENCY: Office of Inspector General (OIG), HHS.

ACTION: Notice of intent to develop regulations.

SUMMARY: In accordance with section 205 of the Health Insurance Portability and Accountability Act of 1996, this notice solicits proposals and recommendations for developing new and modifying existing safe harbor provisions under the Medicare and State health care programs' anti-kickback statute, as well as developing new OIG Special Fraud Alerts.

DATES: To assure consideration, public comments must be delivered to the address provided below by no later than 5 p.m. on March 3, 1997.

ADDRESSES: Please mail or deliver your written comments to the following

address: Office of Inspector General, Department of Health and Human Services, Attention: OIG–11–N, Room 5246, Cohen Building, 330 Independence Avenue, S.W. Washington, DC 20201.

Because of staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commencing, please refer to file code OIG–11–N. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of a document, in Room 5541 of the Office of Inspector General at 330 Independence Avenue, S.W., Washington, D.C., on Monday through Friday of each week from 8:00 a.m. to 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Joel Schaer, (202) 619–0089, OIG Regulations Officer.

SUPPLEMENTARY INFORMATION:

I. Background

A. The OIG Safe Harbor Provisions

Section 1128B(b) of the Social Security Act (42 U.S.C. 1320a–7b(b)) provides criminal penalties for individuals or entities that knowingly and willfully offer, pay, solicit or relieve remuneration in order to induce business reimbursed under the Medicare or State health care programs. The offense is classified as a felony, and is punishable by fines of up to $25,000 and imprisonment for up to 5 years.

The types of remuneration covered specifically include kickbacks, bribes, and rebates, whether made directly or indirectly, overtly or covertly, or in cash or in kind. In addition, prohibited conduct includes not only remuneration intended to induce referrals of patients, but remuneration intended to induce the purchasing, leasing, ordering, or arranging for any good, facility, service, or item paid for by Medicare or State health care programs.

Since the statute on its face is so broad, concern has been expressed for many years that some relatively innocuous commercial arrangements are technically covered by the statute and are, therefore, subject to criminal prosecution. As a response to the above concern, the Medicare and Medicaid Patient and Program Protection Act of 1987, section 14 of Public Law 100–93, specifically required the development and promulgation of regulations, the so-called "safe harbor" provisions, designed to specify various payment and business practices which, although potentially capable of inducing referrals of business under the Medicare and State health care programs, would not be treated as criminal offenses under the anti-kickback statute (section 1128B(b) of the Social Security Act; 42 U.S.C. 1320a–7b(b)) and would not serve as a basis for a program exclusion under section 1128(b)(7) of the Social Security Act; 42 U.S.C. 1320a–7(b)(7). The OIG safe harbor provisions have been developed "to limit the reach of the statute somewhat by permitting certain non-abusive arrangements, while encouraging beneficial and innocuous arrangements" (56 FR 35952, July 29, 1991). Health care providers and others may voluntarily seek to comply with these provisions so that they have the assurance that their business practices are not subject to any enforcement action under the anti-kickback statute or program exclusion authority.

To date, the OIG has developed and codified in 42 CFR 1001.952 a total of 13 final safe harbors that describe practices that are sheltered from liability, and is continuing to finalize 8 additional safe harbor provisions (see the OIG notice of proposed rulemaking at 58 FR 49008, September 21, 1993).

B. OIG Special Fraud Alerts

In addition, the OIG has also periodically issued Special Fraud Alerts to give continuing guidance to health care providers with respect to practices the OIG regards as unlawful. These Special Fraud Alerts provide the OIG with a means of notifying the health care industry that we have become aware of certain abusive practices which we plan to pursue and prosecute, or bring civil and administrative action, as appropriate. The Special Fraud Alerts also serve as a tool to encourage industry compliance by giving providers an opportunity to examine their own practices. The OIG Special Fraud Alerts are intended for extensive distribution directly to the health care provider community, as well as those charged with administering the Medicare and Medicaid programs.

In developing these Special Fraud Alerts, the OIG has relied on a number of sources and has consulted directly with experts in the subject field, including those within the OIG, other agencies of the Department, other Federal and State agencies, and from those in the health care industry. To date, eight individual Special Fraud Alerts have been issued by the OIG and subsequently reprinted in the **Federal Register** on December 19, 1994 (59 FR 65372), August 10, 1995 (60 FR 40847) and June 17, 1996 (61 FR 30623)

II. Section 205 of Public Law 104–191

The Health Insurance Portability and Accountability Act of 1996, Public Law 104–191, effective August 21, 1996, now requires the Department to provide additional formal guidance regarding the application of the anti-kickback statute and the safe harbor provisions, as well as other OIG health care fraud and abuse sanctions. Among the provisions set forth in section 205 of Public Law 104–191 is the requirement that the Department develop and publish an annual notice in the **Federal Register** formally soliciting proposals for (1) modifying existing safe harbors, (2) developing new safe harbors and OIG Special Fraud Alerts, and (3) issuing requests for advisory opinions. After considering such proposals and recommendations, the Department, in consultation with the Department of Justice, will consider the issuance of new and modified safe harbor regulations, as appropriate. In addition, the OIG will consider the issuance of additional Special Fraud Alerts. Finally, in accordance with the statute, the OIG will formally begin accepting requests for advisory opinions on February 21, 1997. Regulations establishing the procedures and a process for accepting and issuing advisory opinions are being prepared for separate publication in the **Federal Register** and will be issued in the near future.

Criteria for Modifying and Establishing Safe Harbor Provisions

In accordance with the statute, we will consider a number of factors in considering proposals for new or modified safe harbor provisions, such as the extent to which the proposals would affect an increase or decrease in—

- Access to health care services;
- The quality of health care services;
- Patient freedom of choice among health care providers;
- Competition among health care providers;
- The cost to Federal health care programs;
- The potential overutilization of the health care services; and
- The ability of health care facilities to provide services in medically underserved areas or to medically underserved populations.

In addition, we will also take into consideration the existence (or nonexistence) of any potential financial benefit to a health care professional or provider that may vary based on their decisions of whether to (1) order a health care item or service, or (2) arrange for a referral of health care items or services to a particular practitioner or provider.

VOL 61 ISS 252 DE 31 1996 UMI

Criteria for Developing Special Fraud Alerts

In determining whether to issue additional Special Fraud Alerts, we will also consider whether, and to what extent, those practices that would be identified in new Fraud Alerts may result in any of the consequences set forth above, and the volume and frequency of the conduct that would be identified in these Special Fraud Alerts.

III. Solicitation of Public Comments

In order to address the requirements of section 205 of Public Law 104–191, we are requesting public comments from affected provider, practitioner, supplier and beneficiary representatives regarding the development of proposed or modified safe harbor regulations and new Special Fraud Alerts. A detailed explanation of justification or empirical data supporting the suggestion would prove helpful in our considering and drafting new or modified safe harbor regulations and Special Fraud Alerts.

Dated: December 20, 1996.

June Gibbs Brown,

Inspector General, Department of Health and Human Services.

Approved: December 20, 1996.

Donna E. Shalala,

Secretary.

BILLING CODE 4150–04–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 25

[IB Docket No. 96–220; FCC 96–426]

Non-Voice Non-Geostationary Mobile Satellite Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has proposed rules and policies to govern the second processing round for the non-voice, non-geostationary mobile satellite service ("NVNG MSS") also referred to as the "Little LEO" service. The Commission's proposals include limiting the licensees in the second processing round to "new entrants;" adopting strict financial rules; adopting rules requiring licensees to time-share spectrum with existing commercial and government licensees; and seeking comment on conducting auctions if mutual exclusivity arises.

DATES: Comments must be submitted on or before January 6, 1997; reply comments must be submitted on or before January 13, 1997.

ADDRESSES: Federal Communications Commission, 1919 M Street, N.W., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Paula Ford, International Bureau, Satellite Policy Branch, (202) 418–0760; Brian Carter, International Bureau, Satellite Policy Branch, (202) 418–2119; Kathleen Campbell, International Bureau, Satellite Policy Branch (202) 418–0753.

Summary of Notice of Proposed Rulemaking

1. This Notice of Proposed Rulemaking ("NPRM") reflects the Commission's commitment to licensing applicants in the second processing round to provide Little LEO service and the Commission's continued efforts to promote competition in the U.S. satellite services market. With this NPRM, we propose service rules and polices for the licensing of three applicants in the second processing round.

2. In order to promote multiple entry and competition, the Commission proposes to limit the participation in the second processing round to pending applicants who are not Little LEO licensees or affiliated with a Little LEO licensee. We propose to identify an applicant as an affiliate if the applicant: (1) Directly or indirectly controls or influences a licensee; (2) is directly or indirectly controlled or influenced by a licensee; or (3) is directly or indirectly controlled or influenced by a third party or parties that also have the power to control or influence a licensee.

3. Given that future entry may not be possible in the Little LEO service and grant to an under-financed applicant will likely prevent a capitalized applicant from going forward, we propose to amend the current financial standard to require that each applicant demonstrate that it has finances necessary to construct, launch, and operate the entire system for a year. In cases where there are more applicants than the spectrum can accommodate, a grant to an under-financed space station applicant may preclude a capitalized applicant from implementing its system, and delay service to the public. In the past we have required a stringent financial showing in such cases.

4. We propose to license three Little LEO systems to operate in particular spectrum blocks: the first system in the 149.81 MHz/400.5050–400.5517 MHz bands; the second in the 148.905–149.81 MHz/137–138 MHz bands; the third system in the 149.95–150.05 MHz/400.150–400.5050 MHz/400.645–401.0 MHz bands. The proposal requires all systems to time-share the spectrum and coordinate use of the spectrum with users of the bands. In the 137–138 MHz band, the Little LEO licensee would have to time-share spectrum with meteorological satellites of the National Oceanic and Atmospheric Administration. The Little LEO system operating in the 400.150–400.5050 MHz and 400.645–401 MHz bands would have to time-share the spectrum with meteorological satellites of the Department of Defense.

5. We also request comments on a number of other issues. If we have more qualified applicants than available spectrum in which they can operate, we asked for comment on how to resolve mutually exclusive applications and whether we should conduct an auction. We also ask for comment on effective methods of preventing transmissions into countries which have not authorized Little LEO service. Little LEO earth terminals have the physical capability to roam from one region or country to the next. Because of their inherent mobility, users may attempt to operate their earth terminals in a country in which the Little LEO licensee is not authorized to operate. In order to protect against this, we seek comment on methods to address this such as requiring each Little LEO user terminal to be equipped with position determination capabilities. In addition, we seek comment on whether we should adopt limitations on licensee's ability to enter into exclusive arrangements with other countries concerning communications to and from the United States. An exclusive arrangement may foreclose other Little LEO licensees from serving a foreign market and preventing that licensee from providing global service.

6. Finally, we also ask parties to submit amended applications on or before January 27, 1997 to operate in the spectrum blocks outlined in the NPRM. Amended applications must comply with the proposed rules. However, applicants are required to demonstrate finances sufficient to construct and operate only two satellites in their system for a year. Applicants will be allowed to further amend their applications once the Report and Order has been released only to the extent necessary because of the new obligations we have proposed that are different from the proposals in the Notice. If we adopt a strict financial standard we will allow applicants to amend their applications.

Ordering Clauses

7. Accordingly, it is ordered that pursuant to the authority contained in Sections 1, 4(i), 4(j), 301, 303, 308, and 309(j) of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154(i), 154(j), 301, 303, 308, and 309(j), notice is hereby given of our intent to adopt the policies and rules set forth in this Notice and that comment is sought on all the proposals in this Notice.

8. It is further ordered that E-SAT, Inc.'s Petition for Rulemaking in Establishing Rules for Licensing Second-Round Applicants in the Non-voice, Non-geostationary Mobile Satellite Service dated February 14, 1996 and requesting that the Commission initiate a rulemaking proceeding to develop regulations for processing the second-round Little LEO applications is granted.

9. It is further ordered that the Secretary shall send a copy of this Notice of Proposed Rulemaking, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act, Public Law No. 96–354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.* (1981).

Administrative Matters

10. This is a non-restricted notice and comment rulemaking proceeding. *Ex parte* presentations are permitted, except during the Sunshine Agenda period, provided they are disclosed as provided in the Commission's rules. See generally 47 CFR §§ 1.1202, 1.1203, and 1.1206(a). The Sunshine Agenda period is the period of time that commences with the release of public notice that a matter has been placed on the Sunshine Agenda and terminates when the Commission (1) releases the text of a decision or order in the matter; (2) issues a public notice stating that the matter has been deleted from the Sunshine Agenda; or (3) issues a public notice stating that the matter has been returned to the staff for further consideration, whichever occurs first. 47 CFR 1.1202(f). During the Sunshine Agenda period, no presentations, *ex parté* or otherwise, are permitted unless specifically exempted. 47 CFR 1.1203.

11. Pursuant to applicable procedures set forth in Sections 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before January 6, 1997 and reply comments on or before January 13, 1997. To file formally in this proceeding, you must file an original and five copies of all comments, reply comments, and supporting comments. If you want each Commissioner to receive a personal copy of your comments send additional copies to Office of the Secretary, Federal Communications Commission, Washington, D.C. 20554. Comments and reply comments will be available for public inspection during regular business hours in the Federal Communications Commission, Reference Center, Room 239, 1919 M Street, N.W. Washington, D.C. 20554. For further information concerning this rulemaking contact Paula Ford at (202) 418–0760 or Virginia Marshall (202) 418–0778.

Initial Regulatory Flexibility Act Statement

12. As required by Section 603 of the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis ("IRFA") of the expected impact on small entities of the proposals suggested in this document. The IRFA is set forth in Appendix A of the NPRM. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing deadlines as comments on the rest of the NPRM, but they must have a separate and distinct heading designating them as responses to the Initial Regulatory Flexibility Analysis. The Secretary shall send a copy of this NPRM, including the Initial Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration in accordance with paragraph 603(a) of the Regulatory Flexibility Act, Public Law 96–354, 94 Stat. 1164, 5 U.S.C. 601 *et seq.* (1981).

Chief, Publications Branch.

Rule Changes

Part 25 of the Commission's Rules and Regulations, Chapter I of Title 47 of the Code of Federal Regulations is proposed to be amended as follows:

PART 25—SATELLITE COMMUNICATIONS

1. The authority citation for Part 25 continues to read as follows:

Authority: Secs. 25.101 to 25.601 issued under Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interpret or apply secs. 101–104, 76 Stat. 419–427; 47 U.S.C. 701–744; 47 U.S.C. 554.

2. Sections 25.259 and 25.260 are added to Subpart C to read as follows:

§ 25.259 Time Sharing Between NOAA Meteorological Satellites and NVNG Satellites in the 137–138 MHz Band.

(a) An NVNG licensee time-sharing spectrum in the 137–138 MHz band shall not transmit signals into the "protection areas" of National Oceanic and Atmospheric Administration ("NOAA") satellites. The protection area shall be calculated by using ephemeris data and an earth station elevation angle of zero degrees towards the NOAA satellite. The NVNG licensee is responsible for obtaining the necessary ephemeris data. This information shall be updated system-wide on at least a biweekly basis.

(b) NVNG licensees shall establish a 24-hour per day contact person and telephone number so that claims of harmful interference into the NOAA earth stations and other issues can be reported and resolved expeditiously. This contact information shall be made available to NOAA.

(c) NVNG satellites shall be designed to cease transmissions automatically if, within a forty-eight hour period, a valid reset signal has not been received from the NVNG gateway Earth station. All NVNG satellites shall be capable of instantaneous shutdown on any sub-band upon command from the gateway earth station.

§ 25.260 Time Sharing Between DoD–NOAA Meteorological Satellites and NVNG Satellites in the 400.15–401 MHz band.

(a) An NVNG licensee time-sharing spectrum in the 400.15–401.0 MHz band shall not transmit signals into the "protection areas" of Department of Defense ("DoD")-National Oceanic and Atmospheric Administration ("NOAA") meteorological satellites. The protection area shall be calculated by using ephemeris data and an earth station elevation angle of zero degrees toward the DoD–NOAA meteorological satellite. The NVNG licensee is responsible for obtaining the necessary ephemeris data. This information shall be updated system-wide on at least a weekly basis.

(b) NVNG licensees shall establish a 24-hour per day contact person and telephone number so that claims of harmful interference into DoD–NOAA earth station users and other operational issues can be reported and resolved expeditiously. This contact information shall be made available to DoD–NOAA.

(c) NVNG satellites shall be designed to cease transmissions automatically if, within forty-eight hours, a valid reset signal has not been received from the NVNG gateway earth station. All NVNG satellites shall be capable of instantaneous shutdown on any sub-

VOL 61 ISS 252 DE 31 1996 UMI

band upon command from the gateway earth station.

(d) Notwithstanding other provisions of this section, NVNG satellites sharing the 400.15–401 MHz with DoD–NOAA meteorological satellites shall implement within ninety minutes of receiving notice of a DoD–NOAA system frequency change, all appropriate modifications and updates to operate on a non-interference basis in accordance with subsection (a), above.

(e) At DoD–NOAA's instruction, the Little LEO System-3 operator will test, up to four times a year, the Little LEO system's ability to implement a DoD–NOAA requested frequency change.

47 CFR Part 61

[CC Docket Nos. 87–313 and 93–197, FCC 96–454]

Policy and Rules Concerning Rates for Dominant Carriers; Revisions to Price Cap Rules for AT&T

AGENCY: Federal Communications Commission.

ACTION: Proposed Rules; termination.

SUMMARY: This Order terminates as moot proceedings concerning the treatment of AT&T Corp.'s (AT&T) offerings of promotions and optional calling plans (OCPs) under price cap regulation in light of the Commission's determination that AT&T is non-dominant and the resultant removal of AT&T's services from price cap regulation.

DATES: Proceedings were terminated November 26, 1996.

FOR FURTHER INFORMATION CONTACT: Joel Taubenblatt, 202–418–1513.

SUPPLEMENTARY INFORMATION: The text of the Commission's Order in CC Dockets Nos. 87–313 and 93–197, FCC 96–454, adopted November 21, 1996, and released November 26, 1996, appears below:

I. Introduction

1. In this Order, we terminate as moot proceedings concerning the treatment of AT&T Corp.'s (AT&T) offerings of promotions and optional calling plans (OCPs) under price cap regulation [1] in light of our determination that AT&T is non-dominant and the resultant removal of AT&T's services from price cap regulation.[2]

II. Background

2. In 1989, the Commission replaced traditional rate of return regulation with an incentive-based system of regulation, called price caps, for most of AT&T's services.[3] To implement the price cap system, the Commission defined three categories of AT&T services, or baskets, and defined a price cap index (PCI) for each basket.[4] The basket structure was designed so that AT&T would not be able to raise prices for services in one basket in order to lower prices for dissimilar services in another basket. Therefore, a change in rates in one basket or in services outside of price caps would not affect either the PCI or the actual price index (API) [5] for the other baskets.

3. The Commission was silent in the AT&T Price Cap Order as to the treatment of promotional rates under price caps.[6] After the Commission adopted the price cap rules, AT&T filed tariffs for a significant number of promotions in which it treated the rates associated with these offerings as rate reductions for purposes of API calculations. MCI Telecommunications Corporation (MCI) and Sprint Communications Company LP (Sprint) sought reconsideration of the AT&T Price Cap Order, requesting clarification of the price cap treatment of promotions. In the AT&T Price Cap Reconsideration Order, the Commission decided to exclude promotions from the price cap index prospectively. It reasoned that including promotional rates in price caps would give AT&T a greater degree of flexibility than warranted to offset the discounted promotional rates with increases in residential and small business rates within Basket 1.[7]

4. AT&T sought judicial review of the AT&T Price Cap Reconsideration Order. The United States Court of Appeals for the District of Columbia Circuit found that the Commission's decision to exclude promotional tariffs from the price cap index was not a reasoned decision supported by the record. The court remanded the AT&T Price Cap Reconsideration Order to the Commission with instructions either to show that its action was a clarification of the original AT&T Price Cap Order, or to "offer a reasoned explanation of why promotional rates should be treated differently from other rates." [8]

5. In response, the Commission vacated its prior decision on this issue and issued the Promotions NPRM in Docket 87–313.[9] In the Promotions NPRM, the Commission tentatively concluded that promotions should be excluded from price cap regulation prospectively. The Commission found that AT&T was able to insulate itself from revenue losses created by promotional discounts by raising its rates for other residential services in Basket 1.[10] The Commission relied upon evidence that AT&T had taken advantage of any downward price flexibility generated by promotions to raise other rates in Basket 1, thereby keeping aggregate rates at the price cap maximum. According to the Commission, "[p]ermitting promotional offerings to be used as a basis for raising basic schedule rates, without limitation, would strongly encourage the proliferation of excessive promotional offerings and undercut the efficiency incentives of the price cap program." [11] As an alternative, the Commission sought comment on whether to treat promotions as either new or restructured services.[12]

---

[1] Policy and Rules Concerning Rates for Dominant Carriers, CC Docket No. 87–313, Order and Notice of Proposed Rulemaking, 8 FCC Rcd 3715 (1993), 58 FR 31936, June 7, 1993 (Promotions NPRM); Revisions to Price Cap Rules for AT&T, CC Docket No. 93–197, Notice of Proposed Rulemaking, 8 FCC Rcd 5205 (1993), 58 FR 44157, August 19, 1993 (OCP NPRM); Policy and Rules Concerning Rates for Dominant Carriers, CC Docket No. 87–313, and Revisions to Price Cap Rules for AT&T, CC Docket No. 93–197, Further Notice of Proposed Rulemaking, 10 FCC Rcd 7854 (1995), 60 FR 28774, June 2, 1995 (Further NPRM).

[2] Motion of AT&T Corp. to be Reclassified as a Non-Dominant Carrier, 11 FCC Rcd 3271 (1995) (AT&T Reclassification Order), recon. pending. In a subsequent order, the Commission removed AT&T's remaining price cap services, international services, from price cap regulation. Motion of AT&T Corp. to be Declared Non-Dominant for International Service, Order, FCC 96–209 (rel. May 14, 1996).

[3] Policy and Rules Concerning Rates for Dominant Carriers, CC Docket No. 87–313, Notice of Proposed Rulemaking, 2 FCC Rcd 5208 (1987), 52 FR 33962, September 9, 1987; Further Notice of Proposed Rulemaking, 3 FCC Rcd 3195 (1988), 53 FR 22356, June 15, 1988; Report and Order and Second Further Notice of Proposed Rulemaking, 4 FCC Rcd 2873 (1989), 54 FR 19836, May 8, 1989 (AT&T Price Cap Order); Erratum, 4 FCC Rcd 3379 (1989); Memorandum Opinion and Order on Reconsideration, 6 FCC Rcd 665 (1991), 56 FR 5952, February 14, 1991 (AT&T Price Cap Reconsideration Order), remanded sub nom. AT&T v. FCC, 974 F.2d 1351 (D.C.Cir. 1992) (Remand Order). Those services that are not under price cap regulation are subject to streamlined regulation, which reduces their regulatory obligations under Part 61 of the Commission's rules, 47 CFR Part 61.

[4] See Further NPRM, 10 FCC Rcd at 7855–56, for an explanation of how the price cap index is calculated.

[5] The API represents a weighted average of actual prices of the services within the basket. *Id.*

[7] AT&T Price Cap Reconsideration Order at 671.

[8] Remand Order, 974 F.2d at 1355.

[9] Promotions NPRM, 8 FCC Rcd 3715.

[10] *Id.* at 3716.

[11] *Id.*

[12] *Id.* at 3717. Under price cap regulation, a service is classified as new if it provides an additional option to a service, but does not replace the existing service. A service is classified as a restructured offering if it replaces an existing service. See Sections 61.44(g), 61.46(b), and 61.47(b) of the Commission's rules, 47 CFR §§ 61.44(g), 61.46(b), and 61.47(b).

6. In the OCP NPRM, the Commission tentatively concluded that the ReachOut category of services (i.e., most domestic MTS OCPs) should be removed from Basket 1 because there is substantial competition among providers of discounted residential services.[13] The Commission sought comment on whether the treatment of OCPs under the AT&T price cap plan should be changed, and, if so, in what manner. Specifically, the Commission sought comment on whether it should adjust the API or the PCI for Basket 1 to reflect the removal of OCPs from Basket 1. As an alternative to removal of OCPs from price cap regulation, it asked for comment on whether OCPs should remain subject to price cap regulation, but be placed in a separate basket.[14]

7. Because the issues presented in determining the regulatory treatment of promotions and OCPs were closely related, we consolidated these issues in a Further Notice of Proposed Rulemaking.[15] In the Further NPRM, we made several tentative conclusions. We determined that Basket 1 domestic MTS promotions, domestic MTS OCPs, and basic schedule MTS offerings exhibit significant cross-elasticities of demand and are generally offered to the same class of customers, *i.e.*, residential customers, following the removal of AT&T's domestic commercial services from price cap regulation.[16] If we removed domestic MTS OCPs and promotions from price caps, the result would be that some of AT&T's offerings of domestic MTS for residential customers would be streamlined while retaining price cap regulation for similar offerings to the same class of customers. We declined to take this step and determined that the issue of further streamlining of OCPs and promotions might be better considered together with AT&T's motion for non-dominant status in a separate proceeding. We did propose, however, a number of related modifications to AT&T's price cap plan. Specifically, we recommended that, because promotions and OCPs are simply different ways of pricing the same service, they should be redefined as alternative pricing plans (APPs) for domestic, residential MTS, which co-exist with the basic domestic MTS rate schedule.[17]

8. On October 23, 1995, we released an order granting AT&T's motion to be reclassified as a non-dominant carrier.[18] The Commission defined the relevant product and geographic market for AT&T, under the Competitive Carrier paradigm,[19] as the interstate, domestic, interexchange market.[20] We then decided that the appropriate standard to evaluate AT&T's reclassification request was whether AT&T possessed market power in the overall relevant market, even if AT&T has the ability to control the prices of one or more services. Applying this standard to the record, the Commission concluded that the market structure characteristics and the indicia of market conduct and performance all indicate that AT&T lacks market power in the interstate, domestic, interexchange market.[21]

9. The Commission noted that the reclassification of AT&T as a non-dominant carrier would free AT&T from price cap regulation for its residential, operator, 800 directory assistance, and analog private line services.[22] By subsequent order, we removed AT&T's international services from price cap regulation as well, thus completing the process of ending price cap regulation of AT&T.[23]

III. Discussion

10. In the AT&T Reclassification Order, we granted AT&T's motion to be reclassified as a non-dominant carrier.[24] The reclassification of AT&T as a non-dominant carrier resulted in the end of price cap regulation for AT&T's residential, operator, 800 directory assistance, and analog private line services. Since AT&T's domestic MTS, including promotions and OCPs, is no longer subject to price caps, the issues raised in our tentative conclusions and proposals in the Further NPRM concerning whether to remove promotions and OCPs from price cap regulation are now moot. Similarly, the issues raised by the D.C. Circuit in the Remand Order in CC Docket No. 87–313 are moot. Accordingly, we will terminate as moot CC Docket Nos. 87–313 and 93–197.

IV. Ordering Clause

11. Accordingly, it is ordered that CC Docket Nos. 87–313 and 93–197 are terminated as moot.

[13] OCP NPRM, 8 FCC Rcd at 5205–6. The price cap system's treatment of OCPs differs from that accorded promotions. OCPs are included in a separate service category (the ReachOut service category) from the basic MTS service categories within Basket 1, whereas promotions are included in the applicable MTS service categories. Changes in OCP rates, therefore, are not subject to the same limitations on rate changes as the basic schedule service categories. Further NPRM, 10 FCC Rcd at 7859.

[14] The Commission also proposed a number of other changes to the price cap rules in the OCP NPRM, including whether to remove commercial, 800 Directory Assistance, and analog private line services from price caps. In the Report and Order in CC Docket No. 93–197, 10 FCC Rcd 3009 (1995), 60 FR 4569, January 24, 1995 (Commercial Services Price Cap Order), the Commission resolved these issues, removed commercial services from price cap regulation, and deferred the question of the regulatory treatment of OCPs to this proceeding.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Notice of Status Reviews for the Alexander Archipelago Wolf and Queen Charlotte Goshawk

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of status reviews; extension of comment period.

SUMMARY: The Fish and Wildlife Service (Service) provides notice that the comment period on the rangewide status reviews for the Queen Charlotte goshawk (*Accipiter gentilis laingi*) and the Alexander Archipelago wolf (*Canis lupus ligoni*) is extended. The Service solicits any information, data,

VOL 61 ISS 252 DE 31 1996 UMI

comments, and suggestions from the public, other government agencies, the scientific community, industry, or other interested parties concerning the status of these species.

DATES: The comment period, originally scheduled to close January 21, 1997, is extended and will now close on February 5, 1997. Any comments received by the closing date will be considered in the findings.

ADDRESSES: Comments and materials should be sent to Field Supervisor, U.S. Fish and Wildlife Service, Ecological Services, 3000 Vintage Blvd., Suite 201, Juneau, Alaska 99801-7100.

FOR FURTHER INFORMATION CONTACT: Mr. John Lindell at the above address (907/586-7240).

SUPPLEMENTARY INFORMATION:

Background

The Service will issue separate findings on petitions to list the Queen Charlotte goshawk and the Alexander Archipelago wolf under the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Queen Charlotte Goshawk

The Queen Charlotte goshawk occurs in forested areas throughout coastal mainland and insular areas of British Columbia, Canada, and southeastern Alaska. On May 9, 1994, the Service received a petition to list the Queen Charlotte goshawk as endangered under the Act, from Mr. Peter Galvin of the Greater Gila Biodiversity Project, Silver City, New Mexico, and nine copetitioners including, the Southwest Center for Biological Diversity, the Biodiversity Legal Foundation, Greater Ecosystem Alliance, Save the West, Save America's Forests, Native Forest Network, Native Forest Council, Eric Holle, and Don Muller. On August 26, 1994, the Service announced a 90-day finding (59 FR 44124) that the petition presented substantial information indicating that the requested action may be warranted, and opened a public comment period until November 25, 1994. The Service extended the public comment period until February 28, 1995, through two subsequent **Federal Register** notices on January 4, 1995 (60 FR 425), and February 24, 1995 (60 FR 10344). The Service issued its 12-month finding on June 29, 1995 (60 FR 33784), indicating that listing the Queen Charlotte goshawk under the Act was not warranted.

On July 16, 1995, the petitioners filed a 60-day notice of intent to sue the Service over its 12-month finding, and on November 17, 1995, they filed suit in the United States District Court for the District of Columbia challenging the not warranted finding made by the Service. As a result of the court proceedings the Service is reevaluating the status of the Queen Charlotte goshawk. The Service is requesting any information, data, comments, and suggestions from the public, other government agencies, the scientific community, industry, or other interested parties concerning the status of this species.

Alexander Archipelago Wolf

The Alexander Archipelago wolf occurs in forested areas of insular and mainland southeast Alaska, from Dixon Entrance (US/Canada border) to Yakutat Bay, including all large islands of the Alexander Archipelago except Admiralty, Baranof, and Chichagof islands. On December 17, 1993, the Service received a petition to list the Alexander Archipelago wolf as threatened under the Act, from the Biodiversity Legal Foundation, Eric Holle and Martin J. Berghoffen. A 90-day finding was made by the Service that the petition presented substantial information indicating that the requested action may be warranted. The 90-day finding was announced (59 FR 26476) and a status review was initiated on May 20, 1994. The public comment period was open between May 20, and October 1, 1994 (59 FR 26476 and 59 FR 44122). The Service announced its finding that listing the Alexander Archipelago wolf was not warranted on February 23, 1995 (60 FR 10056).

The petitioners issued a 60-day notice of intent to sue over the Service's not warranted finding on November 13, 1995. On February 7, 1996, they filed suit in the United States District Court for the District of Columbia challenging the not-warranted finding made by the Service. As a result of the court proceedings the Service is reevaluating the status of the Alexander Archipelago wolf. The Service is requesting any information, data, comments, and suggestions from the public, other government agencies, the scientific community, industry, or other interested parties concerning the status of this species.

Pure Magnesium from the People's Republic of China (PRC): Initiation of New Shipper Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) has received a request to conduct a new shipper administrative review of the antidumping duty order on pure magnesium from the PRC. In accordance with 19 CFR 353.22(h), we are initiating this administrative review.

EFFECTIVE DATE: December 31, 1996.

FOR FURTHER INFORMATION CONTACT: Everett Kelly or Dorothy Tomaszewski, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone (202) 482–4194 or 482–0631, respectively.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to the current regulations, as amended by the interim regulations published in the **Federal Register** on May 11, 1995 (60 FR 25130).

SUPPLEMENTARY INFORMATION:

Background

The Department has received a timely request from Taiyuan Heavy Machinery Import and Export Corporation (Taiyuan), in accordance with interim regulation 19 CFR 353.22(h) (1995), for a new shipper review of the antidumping duty order on pure magnesium from the PRC which has a May anniversary date. Taiyuan has certified that it did not export pure magnesium to the U.S. during the period of investigation (POI), and that it is not affiliated with any exporter or producer which did export pure magnesium during the POI. This certification is in accordance with section 751(a)(2)(B)) of the Tariff Act of 1930 as amended, and the Department's interim regulations, 19 CFR 353.22(h). Therefore, we are initiating the new shipper review as requested. However, it is the Department's usual practice with non-market economies to require information regarding *de Jure* and *de facto* government control over a company's export activities to establish its eligibility for an antidumping duty rate separate from the country-wide rate. Accordingly we will issue a separate rates questionnaire to Taiyuan and seek additional information from the PRC government (as appropriate), allowing 30 days for response. If the responses from Taiyuan and the PRC government indicate adequately that Taiyuan is not subject to either *de Jure* or *de facto* government control with respect to its exports of pure magnesium, the review will proceed. If, on the other hand, Taiyuan does not demonstrate its eligibility for a separate rate, Taiyuan will be deemed to be affiliated with other companies that exported during the POI that did not establish their entitlement to a separate rate, and the review will be terminated.

Initiation of Review

In accordance with section 751(a)(2)(B)(ii) of the Act and 19 CFR 353.22(h)(6), we are initiating a new shipper review of the antidumping duty order on pure magnesium from the PRC. We intend to issue the final results of review not later than 270 days from the date of publication of this notice.

Antidumping Duty Proceeding	Period to be Reviewed
PRC: Pure Magnesium, A-570–832:	
Taiyuan Heavy Machinery Import and Export	05/01/96–10/31/96

Upon an affirmative separate rates determination, we will instruct the U.S. Customs Service to allow, at the option of the importer, the posting, until the completion of the review, of a bond or security in lieu of a cash deposit for each entry of the merchandise exported by the above listed companies, in accordance with 19 CFR 353.22(h)(4).

Interested parties must submit applications for disclosure under administrative protective orders in accordance with 19 CFR 353.34(b).

This initiation and this notice are in accordance with section 751(a) of the Act (19 U.S.C. 1675(a)) and 19 CFR 353.22(h).

Dated: December 20, 1996.

Jeffrey P. Bialos,

Principal Deputy Assistant Secretary, Import Administration.

Notice of Final Results of Antidumping Duty Administrative Review: Certain Welded Carbon Steel Pipe and Tube From Turkey

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On July 5, 1996, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on certain welded carbon steel pipe and tube from Turkey. The review covers shipments of this merchandise to the United States during the period May 1, 1994, through April 30, 1995.

Based on our analysis of the comments received, the correction of certain clerical and computer program errors, and the correction of errors found at verification, we have changed the preliminary results. The final results

VOL 61 ISS 252 DEC 31 1996 UMI

are listed below in the section "Final Results of Review."

EFFECTIVE DATE: December 31, 1996.

FOR FURTHER INFORMATION CONTACT: Jennifer Stagner, Brian Smith (Erbosan), or Gabriel Adler (Borusan), Office of AD/CVD Enforcement II, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482–1673, (202) 482–1766, and (202) 482–1442, respectively.

SUPPLEMENTARY INFORMATION:

Background

This review covers two manufacturers/exporters to the United States of the subject merchandise, the Borusan Group (Borusan) and Erviyas Boru Sanayii ve Ticaret A.S. (Erbosan), and the period May 1, 1994, through April 30, 1995. On July 5, 1996, the Department of Commerce (the Department) published in the **Federal Register** the Preliminary Results of Administrative Review of the Antidumping Duty Order on Certain Welded Carbon Steel Pipe and Tube from Turkey (61 FR 35188) (Preliminary Results). We issued supplemental questionnaires to Borusan and Erbosan in July 1996; we received the responses in August 1996. Verification was conducted in September 1996. We received case and rebuttal briefs on November 12, 1996, and November 19, 1996, respectively.

The Department has now completed this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Review

Imports covered by this review are shipments of certain welded carbon steel pipe and tube products with an outside diameter of 0.375 inch or more but not over 16 inches, of any wall thickness. These products are currently classifiable under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 7306.30.10.00, 7306.30.50.25, 7306.30.50.32, 7306.30.50.40, 7306.30.50.55, 7306.30.50.85, and 7306.30.50.90. These products, commonly referred to in the industry as standard pipe and tube, are produced to various American Society for Testing and Materials (ASTM) specifications, most notably A–120, A–53 or A–135.

Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 (the Act) by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to the current regulations, as amended by the interim regulations published in the **Federal Register** on May 11, 1995 (60 FR 25130).

Product Comparisons

In accordance with section 777A(d)(2) of the Act, we calculated for Borusan transaction-specific Export Prices (EPs) and compared them to normal value (NV) based on either weighted-average home market prices or constructed values. For Erbosan, we calculated transaction-specific EPs and compared them to NV based on weighted-average home market prices only. The EPs and NVs were calculated and compared by product characteristics and, where possible, at the same level of trade (see "Level of Trade" section below). For price-to-price comparisons, we compared identical merchandise, where possible. Where there were no sales of identical merchandise in the home market to compare to U.S. sales, we made similar comparisons based on the characteristics listed in the Department's antidumping questionnaire. For both Borusan and Erbosan, we excluded certain reported products in the home market from our analysis because the merchandise was not part of the foreign like product. For Erbosan, we found that there were U.S. sales of certain products for which there were no home market sales of identical or similar products sold in the same month. As discussed in the *Preliminary Results*, we did not apply the Department's 90/60 day rule because Turkey experienced hyperinflation during the period of review (POR). In general, where no match can be found for a U.S. sale, the Department would normally resort to CV as the basis of NV. In this case, however, no specific request was made by the Department that Erbosan provide CV in these instances. Therefore, as facts available, we assigned the U.S. sales without home market matches the average of the calculated margins. In determining what to use as facts available, we considered whether Erbosan cooperated to the best of it ability using the criteria set for in section 776(b) of the Act. We determined that Erbosan met all these criteria and concluded that an adverse inference should not be made (see Erbosan Sales Comment 1 below).

Level of Trade

As set forth in section 773(a)(1)(B)(i) of the Act and in the Statement of Administrative Action (SAA) accompanying the URAA at 829–831, to the extent practicable, the Department will calculate NV based on sales at the same level of trade as the U.S. sale. When the Department is unable to find sale(s) in the comparison market at the same level of trade as the U.S. sale(s), the Department may compare sales in the U.S. and foreign markets at a different level of trade. See Final Determination of Sales at Less than Fair Value; Certain Pasta from Italy, 61 FR 30326 (June 14, 1996) (Pasta from Italy).

In accordance with section 773(a)(7)(A) of the Act, in comparing U.S. sales to NV sales, the Department will adjust the NV to account for any difference in level of trade if two conditions are met. First, the sales must in fact be made at different levels of trade, which can exist only if there are differences between the actual selling functions performed by the seller at the level of trade of the U.S. sale and the level of trade of the NV sale. Second, the difference must affect price comparability as evidenced by a pattern of consistent price differences between sales at the different levels of trade in the market in which NV is determined.

In order to determine that there is a difference in level of trade, the Department must find that two sales have been made at different stages of marketing, or the equivalent. Different stages of marketing necessarily involve differences in selling functions, but differences in selling functions (even substantial ones) are not alone sufficient to establish a difference in the level of trade. Similarly, seller and customer descriptions (such as "distributor" and "wholesaler") are useful in identifying different levels of trade, but are insufficient to establish that there is a difference in the level of trade. See Certain Corrosion-Resistant Carbon Steel Flat Products and Certain Cut-to-Length Carbon Steel Plate from Canada: Preliminary Results of Antidumping Duty Administrative Review, 61 FR 51891, 51895–96 (October 4, 1996) (Steel from Canada).

In implementing this principle in this review, we examined information regarding the selling activities of the producers/exporters associated with each stage of marketing, or the equivalent. In addition, we examined any claimed levels of trade (LOTs) reported by each respondent.

In reviewing the selling functions reported by the respondents, we considered all types of selling activities, both claimed and unclaimed, that had been performed. In analyzing whether separate LOTs existed in this review, we found that no single selling activity in the pipe and tube industry was sufficient to warrant a separate LOT (see Notice of Proposed Rulemaking and Request for Public Comments, 61 FR 7307, 7348 (February 27, 1996)). For this review, we determined that the following selling functions and activities are relevant to the pipe and tube industry: (1) Inventory maintenance; (2) technical services; (3) warranty services; (4) customer advice and product information; (5) delivery arrangements; (6) sales from warehouse vs. direct sales; and (7) direct advertising. We did not consider trade discounts as a selling function (see Pasta from Italy).

When examining claimed LOTs, we analyzed the selling activities associated with the classes of customers and marketing stages the respondents reported. In applying this analysis, we expect that, if claimed LOTs are the same, the functions and activities of the seller should be similar. Conversely, if a party claims that LOTs are different for different groups of sales, the functions and activities of the seller should be dissimilar. The Department not only counts activities, but weighs the overall function performed for each claimed level of trade. In determining whether separate LOTs existed in the home market, pursuant to section 773(a)(1)(B)(i) of the Act, we considered the selling functions reflected in the starting price of the home market sales before any adjustment.

A. Borusan

Borusan claimed that it has three LOTs in the home market: (1) Direct sales; (2) reseller back-to-back sales; and (3) reseller inventory sales. It reported only one LOT in the U.S. market (i.e., trading companies). We agree with Borusan that one LOT exists in the U.S. market because Borusan has one chain of distribution and one customer category in the U.S. market. However, based on our practice, as stated recently in Steel from Canada, we have determined, for the reasons described below, that there are not three, but only two LOTs in the home market.

The first step in this analysis requires that the Department identify the different stages of marketing. We find that there are two stages of marketing: (1) Sales shipped directly to distributors/wholesalers (direct sales and reseller back-to-back sales); and (2) warehouse sales to retailers (reseller inventory sales).

After determining the number of marketing stages, we must then examine whether the selling functions performed by the seller support Borusan's claimed LOTs or the separate marketing stages determined by the Department. For the claimed LOTs in the home market, we did not find that there were three distinct sets of selling functions performed by the seller. Rather, we found two distinct sets of selling functions performed by the seller, which reflected the two marketing stages determined by the Department. Thus, we concluded that there are two distinct LOTs in the home market based on the marketing stages and selling functions performed by the seller at those stages.

Next we examined the selling functions performed by the seller with respect to both markets to determine if U.S. sales can be matched to home market sales at the same LOT. See Sales Comment 3 for a complete discussion; see also Memorandum to the File from the Team, dated December 17, 1996.

Based on our analysis, we determined that there is one U.S. LOT and two home market LOTs, one of which we determined to be identical in aggregate selling functions to that at which sales are made to the United States. We compared sales at the sole LOT in the U.S. market to sales at the identical home market LOT. If no home market match was available at the same LOT in the same month as the U.S. sale, we compared sales at the sole LOT in the U.S. market to sales at the other LOT in the home market. We then examined whether a LOT adjustment was appropriate for Borusan when comparing sales at its U.S. LOT to sales at the non-identical LOT.

To determine whether an LOT adjustment was necessary, we examined, on a monthly basis, the prices of comparable product categories, net of all adjustments, between sales at the identical home market LOT and sales at the non-identical home market LOT. We did not find a consistent pattern of price differences between sales at these LOTs. Therefore, for non-identical LOT matches, we made no LOT adjustments. If no home market match was found, we compared EP to constructed value.

It is now the Department's practice to calculate, to the extent possible, a CV by LOT, using the selling expenses and profit determined for each LOT in the comparison market. See Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From France, Germany, Italy, Japan, Romania, Singapore, Thailand and the United Kingdom; Preliminary Results of Antidumping Duty Administrative Reviews, Termination of Administrative Reviews, and Partial Termination of Administrative Reviews, 61 FR 35713, 35718 (July 8, 1996). However, because the record of this review does not include selling expense and profit data specific to each LOT, we have calculated a CV for each product without regard to LOTs.

B. Erbosan

Erbosan made no claim that different levels of trade existed. However, the Department must still examine whether there are different levels of trade when the information on the record permits adequate analysis of the issue (see Pasta from Italy). In determining whether separate levels of trade actually existed between the U.S. and home markets, we first examined Erbosan's marketing stages. In reviewing the chains of distribution and customer categories reported in the home market, we found no differences between the reported chains/categories. Thus, we found only one stage of marketing in the home market. For the U.S. market, Erbosan had only one chain of distribution and one customer category. Thus, we determined that Erbosan has one stage of marketing in the U.S. market.

As described above, it is still necessary to examine the selling functions performed to determine whether separate levels of trade exist between these market stages. Our analysis was based on the selling functions we examined at verification. Based on information contained on the record and our verification findings, we determine that there are no differences in the selling functions performed in the home market within the LOT. Thus, for purposes of our final results, we have considered all sales in the home market to be at one LOT. In reviewing the same selling functions for the U.S. market, we found that the home market LOT is not similar in aggregate selling functions to that found in the United States. Thus, we determined that Erbosan has one LOT in the home market and a different one in the U.S. market. See Memorandum to the File from the Team, dated December 17, 1996.

If the Department determines that a LOT adjustment is warranted, and if information on the same product and company is not available in order to make such an adjustment, the Department may consider the sales of other products by the same company or the selling experience of other producers in the foreign market for the same product (or other products) in

order to make an adjustment. See SAA at 830.

In this case, we found no information on the record which would enable us to make a level of trade adjustment. Thus, we compared Erbosan's sales at the sole LOT in the U.S. market to its sales at the sole home market LOT without making a LOT adjustment.

Fair Value Comparisons

To determine whether sales of pipe and tube to the United States were made at less than fair value, we compared the EP to the NV, as described in the "Export Price" and "Normal Value" sections of this notice.

Export Price

We calculated EP in accordance with section 772(a) of the Act, because the subject merchandise was sold directly to the first unaffiliated purchaser in the United States prior to importation and Constructed Export Price (CEP) methodology was not otherwise warranted based on the facts of this investigation.

A. Borusan

We calculated EP based on the same methodology used in the Preliminary Results, except that we deducted payments made by Borusan to its customers in the United States (see Sales Comment 4B below).

B. Erbosan

We based EP on prices to unaffiliated purchasers in the United States. We made deductions from the starting price (gross unit price), where appropriate, for foreign inland freight, foreign brokerage and handling expenses, and international freight. Furthermore, we added countervailing duties imposed on the subject merchandise to offset export subsidies, pursuant to section 772(c)(1)(C) of the Act.

Normal Value

A. Borusan

We calculated NV as noted in the "Price to Price Comparisons" and "Price to CV Comparisons" sections of this notice.

B. Erbosan

In order to determine whether there was a sufficient volume of sales in the home market to serve as a viable basis for calculating NV, we compared Erbosan's volume of home market sales of the foreign like product to the volume of its U.S. sales of the subject merchandise, in accordance with section 773(a)(1)(C) of the Act. Since Erbosan's aggregate volume of home market sales of the foreign like product was greater than five percent of its aggregate volume of its U.S. sales of the subject merchandise, we determined that the home market was viable. We calculated NV as noted in the "Price to Price Comparisons" section of this notice.

Cost of Production Analysis

As discussed in the Preliminary Results, the Department conducted an investigation to determine whether Borusan made home market sales during the POR at prices below its cost of production (COP) within the meaning of section 773(b) of the Act. No below-cost allegation was made with respect to Erbosan. Before making any fair value comparisons, we conducted the COP analysis described below.

A. Calculation of COP

We calculated the COP based on the sum of Borusan's cost of materials and fabrication for the foreign like product, plus amounts for home market selling, general, and administrative expenses (SG&A) and packing costs in accordance with section 773(b)(3) of the Act. As noted in the Preliminary Results, we used Borusan's reported monthly COP figures which were based on the current production costs incurred during each month of the POR. This was done in order to avoid the distortive effect of inflation on our comparison of costs and prices. We relied on the reported COP amounts with the following exceptions:

1. We calculated a weighted-average per-unit variable cost of manufacturing and total cost of manufacturing for each product;
2. We recalculated Borusan's SG&A expenses (*see* Cost Comment 2 below);
3. We recalculated Borusan's interest expenses (*see* Cost Comment 3 below);
4. We recalculated the reported product costs to reflect product-specific weight-savings ratios where available (*see* Cost Comment 4 below); and
5. We adjusted the cost of a product for which an average coil cost had been reported, to account for a more expensive input coil for that product.

B. Test of Home Market Prices

As stated in the Preliminary Results, we used Borusan's adjusted monthly COP amounts and the wholesale price index from the government of Turkey's State Institute of Statistics to compute an annual weighted average COP for the POR. We compared the weighted-average COP figures to home market sales of the foreign like product as required under section 773(b) of the Act, in order to determine whether these sales had been made at prices below the COP. On a product-specific basis, we compared the COP to the home market prices, less any applicable movement charges, rebates, and direct selling expenses.

C. Results of COP Test

Pursuant to section 773(b)(2)(C)(i) of the Act, where less than 20 percent of a respondent's sales of a given product were at prices less than the COP, we did not disregard any below-cost sales of that product because we determined that the below-cost sales were not made in "substantial quantities." Where 20 percent or more of a respondent's sales of a given product were at prices less than the COP, we disregarded the below-cost sales where such sales were found to be made at prices which would not permit the recovery of all costs within a reasonable period of time (in accordance with section 773(b)(2)(D) of the Act). Where all sales of a specific product were at prices below the COP, in accordance with section 773(b)(1) of the Act, we disregarded all sales of that product, and calculated NV based on CV, in accordance with section 773(e) of the Act.

We found that, for certain products, more than 20 percent of Borusan's home market sales were sold at below the COP and, therefore, that below-cost sales were made within an extended period of time in substantial quantities. We also determined that these below-cost sales were made at prices which would not permit recovery of all costs within a reasonable period of time, in accordance with section 773(b)(2)(D) of the Act. We therefore excluded these sales from our analysis and used the remaining above-cost sales as the basis for determining NV, in accordance with section 773(b)(1) of the Act. For those pipe and tube products for which there were no above-cost sales in the ordinary course of trade, we compared export prices to CV.

D. Calculation of CV

In accordance with section 773(e)(1) of the Act, we calculated CV based on the sum of Borusan's cost of materials, fabrication, SG&A and U.S. packing costs as reported in the U.S. sales databases. In accordance with section 773(e)(2)(A) of the Act, we based SG&A and profit on the actual amounts incurred and realized by Borusan in connection with the production and sale of the foreign like product in the ordinary course of trade (*i.e.*, sales disregarded under section 773(b)(1) of the Act pursuant to the cost test and under section 773(e)(2) of the Act not at arm's length), for consumption in the foreign country (see Sales Comment 8 below). We calculated CV based on the

methodology described in the calculation of COP above and added an amount for profit. For selling expenses, we used the weighted-average home market selling expenses.

Price-to-Price Comparisons

A. Borusan

For those comparison products for which there were sales at prices above the COP, we based NV on home market prices. We calculated NV based on FOB mill/warehouse or delivered prices to unaffiliated customers, or prices to affiliated customers which were determined to be at arm's length. We calculated NV based on the same methodology used in the Preliminary Results, with the following exceptions:

1. We deducted advertising and warranty expenses (see Sales Comment 9 below).

2. We set to zero the warehousing and freight expenses reported for back-to-back sales, based on our findings at verification. See sales verification report at 1.

3. For certain reseller sales, we revised the warehousing and freight expenses, based on our findings at verification. See sales verification report at 12–13.

B. Erbosan

We based NV on home market prices. We calculated NV based on FOB factory prices to unaffiliated customers. We made deductions, where appropriate, from the starting price for discounts and rebates, and we added interest revenue. In accordance with section 773(a)(6) of the Act, we deducted home market packing costs and added U.S. packing costs.

We adjusted for differences in the circumstances of sale, in accordance with section 773(a)(6)(C)(iii) of the Act. These circumstances included differences in imputed credit expenses. Based on our verification findings, we recalculated home market credit expenses.

We also made adjustments, where appropriate, for physical differences in the merchandise in accordance with section 773(a)(6)(C)(ii) of the Act. Based on our verification findings, we added an amount for thinner and lacquer costs to the variable manufacturing cost and total cost of manufacture for all U.S. products. We also added an amount for pipe straightening expenses to the costs for certain U.S. products. Finally, we removed the amount for packing expenses from the costs reported for all products. We indexed the reported monthly costs to the end of the period using the wholesale price index for Turkey. Next, we calculated average variable and total costs of manufacturing by product based on sales quantities of the U.S. and home market sales. (We used sales quantities because production quantities were not available and because we assume that sales quantities are a close approximation to production quantities.) We then indexed the average variable and total costs of manufacturing to restate them in the currency value of each respective month. The adjusted monthly variable costs of manufacturing for U.S. and home market products were then compared to arrive at the difference in merchandise adjustment. To determine whether Erbosan's affiliated sales were made at arm's length, we compared the gross unit prices of sales to affiliated and unaffiliated customers net of all movement charges, direct selling expenses, and packing (see Final Determination of Sales at Less Than Fair Value; Certain Cold-Rolled Carbon Steel Flat Products from Argentina, 58 FR 37062, 37077 (July 9, 1993)). We excluded all of these sales from our analysis because they did not pass the arm's length test in our analysis. See 19 CFR 353.45(a).

Price-to-CV Comparisons

For Borusan, where we compared CV to export prices, we deducted from CV the weighted-average home market direct selling expenses and added to CV the weighted-average U.S. product-specific direct selling expenses.

Currency Conversion

The Department's preferred source for daily exchange rates is the Federal Reserve Bank. However, the Federal Reserve Bank does not track or publish exchange rates for the Turkish Lira. Therefore, we made currency conversions based on the daily exchange rates from the Dow Jones Service, as published in the Wall Street Journal.

Section 773A(a) directs the Department to use a daily exchange rate in order to convert foreign currencies into U.S. dollars, unless the daily rate involves a "fluctuation." It is the Department's practice to find that a fluctuation exists when the daily exchange rate differs from a benchmark rate by 2.25 percent. The benchmark rate is defined as the rolling average of the rates for the past 40 business days. See Final Determination of Sales at Less Than Fair Value: Certain Pasta from Turkey, 61 FR 30309 (June 14, 1996) (Pasta from Turkey).

However, we believe that it is appropriate in this case to use actual daily exchange rates for currency conversion purposes, rather than the benchmark rate. As noted in Policy Bulletin 96–1: Currency Conversions, 61 FR 9434 (March 8, 1996), the Department is continuing to examine the appropriateness of the currency conversion policy in situations where the foreign currency depreciates substantially against the dollar over the POR. In those situations, it may be appropriate to rely on daily exchange rates. When the rate of domestic price inflation is significant, as it is in this case, it is important that we use as a basis for NV home market prices that are as contemporaneous as possible with the date of the U.S. sale. This is to minimize the extent to which calculated dumping margins are overstated or understated due solely to price inflation that occurred in the intervening time period between the U.S. and home market sales. For this reason, we have used the daily exchange rates for currency conversion purposes.

Further, section 773A(b) directs the Department to allow a 60 day adjustment period when a currency has undergone a sustained movement. Such an adjustment period is required only when the foreign currency is appreciating against the U.S. dollar. See SAA at 842. No adjustment period is warranted in this review, because the Turkish Lira generally remained constant or depreciated against the dollar during the POR.

Verification

In accordance with section 353.25(c)(2)(ii) of the Department's regulations, we verified information provided by Borusan and Erbosan using standard verification procedures, including on-site inspection of the manufacturer's facilities, the examination of relevant sales and financial records, and selection of original documentation containing relevant information. We found certain errors at verification of both Borusan and Erbosan, and have corrected for these errors in our final results. For reasons stated in our preliminary results, we verified the questionnaire responses submitted by both respondents after the preliminary results were issued.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. We received comments from the petitioners and Borusan. We received rebuttal comments from the petitioners and both respondents.

VOL 61 ISS 252 DE 31 1996 UMI

A. Borusan

Cost Comments

Comment 1: Facts Available

The petitioners argue that Borusan's COP and CV data should be rejected in favor of the facts available. According to the petitioners, Borusan deviated from its normal accounting system in preparing its COP and CV responses without obtaining authorization from the Department for the methodologies used.

Specifically, the petitioners argue that Borusan departed from its normal accounting practices in that it:

(a) Had the ability to track production costs on a product-specific basis, but did not do so;

(b) Reported costs for products that had no production in a particular month;

(c) Had the ability to report product-specific raw material costs but failed to do so;

(d) Did not provide yields on a product-specific basis even though it had at its disposal more accurate product-specific conversion factors;

(e) Provided a single weight conversion factor even though it had at its disposal more accurate product-specific conversion factors;

(f) Did not provide adequate verification support for the arm's length nature of materials purchases from affiliated parties;

(g) Failed to accurately report factory-specific overhead;

(h) Misled the Department about its interest rate calculation;

(i) Failed to report freight costs to its customers; and

(j) Provided incorrect difference in merchandise (difmer) information because of the same deficiencies alleged with respect to the general cost data.

According to the petitioners, these departures from Borusan's normal accounting system might have resulted in the allocation of costs away from the subject merchandise and the foreign like product, with little chance of detection. The petitioners contend that the burden of creating an adequate response, including fully disclosing its record keeping and reporting capabilities, rested with Borusan. Citing *Olympic Adhesives, Inc.* v. *United States*, 899 F.2d 1565, 1572 (Fed. Cir. 1990), the petitioners contend that if respondents are allowed to make unilateral decisions about the information to be provided they would be able to artificially lower antidumping margins by providing selected information.

Borusan argues that the submitted COP data was based on its normal cost accounting system to the extent permitted by the Department's questionnaires, and that departures from the normal system were made only in response to the Department's questionnaire requirements. According to Borusan, the Department requested that COP data be submitted on a basis different than that used in the normal course of business to record costs. Borusan claims that it attempted to recalculate current costs with as much product-specificity as possible, and that the underlying source data was verified satisfactorily by the Department. Borusan further contends that no elements of the reported costs were unverified.

DOC Position

We disagree with the petitioners' contention that the methodologies used by Borusan to prepare its COP responses warrant wholesale rejection of those responses and the use of facts available. Section 776(a)(1) states that if necessary information is not available on the record, the Department "shall, subject to section 782(d), use the facts otherwise available in reaching the applicable determination under this title." Section 782(e) provides that the Department shall not decline to consider information that is submitted by an interested party and is necessary to the determination but does not meet all the applicable requirements established by the Department if: (1) The information is submitted by the deadline established for its submission; (2) the information can be verified; (3) the information is not so incomplete that it cannot serve as a reliable basis for reaching the applicable determination; (4) the interested party has demonstrated that it acted to the best of its ability in providing the information and meeting the requirements established by the Department with respect to the information; and (5) the information can be used without undue difficulties. Accordingly, in using the facts available, the Department may disregard information submitted by a respondent if any of the five criteria has not been met.

We conducted numerous tests, described in our cost verification report and summarized below, which supported the overall reasonableness of the reported data. Although we agree that, in certain instances, Borusan's reported costs did not reflect the same level of product-specificity as the costs maintained in its normal course of business, we have been able to adjust the reported costs to reflect more product-specific data available on the record. Further, in the case of unreported movement expenses affecting the integrity of our cost test for certain sales, we have applied partial facts available that ensure the viability of that test. Since Borusan's reported costs are in general reliable, and deficiencies in those costs can be remedied via data on the record and the application of partial facts available, we find that the application of total facts available is not warranted.

Below, we discuss each of the points raised by the petitioners as enumerated above:

(a) The petitioners have challenged the lack of product specificity of Borusan's material and overhead costs. With respect to material costs, we note that the cost questionnaire issued by the Department to Borusan on May 23, 1996, requested that Borusan submit its COP data on a current cost basis (*i.e.*, that materials costs for merchandise shipped in a particular month be valued at the average inventory value of those materials during the month of production) in order to account for the effect of hyperinflation on production costs. However, in the normal course of business, Borusan records production costs on a historical cost basis (*i.e.*, Borusan records material costs at the average purchase price during the month of production, a practice which does not reflect the effect of inflation between purchase and usage of the inputs). Consequently, Borusan was obligated to recalculate its material costs. Throughout this review, we have found no evidence that Borusan could have feasibly provided current costs at the same level of product-specificity as the historical costs that it records in the normal course of business. However, the reported material costs did reflect the grade of the input coil, which was the principal variant in material cost observed at verification, and we fully verified the material costs reported at this level of detail (see item (c) below). As for transformation costs, the reported figures reflect a reasonable level of product-specific detail (see item (g) below). Given that the current cost methodology was requested by the Department, and that Borusan provided such data at a more aggregate yet nonetheless reasonable level, it would be inappropriate to infer that the lesser degree of product specificity inherent in Borusan's reported costs reflects an attempt by Borusan to artificially reduce antidumping margins.

(b) Borusan's reporting of a current COP for all products in every month of the POR, despite the fact that certain products were not produced in every month, did not artificially lower the COP of the merchandise that was

actually produced. Borusan calculated the cost that would have been incurred to produce one unit of each unique product in their product line for each month of the POR based on the average per-unit material costs during that month (see, *e.g.*, Silicon Metal from Brazil; Final Results of Antidumping Duty Administrative Review, 59 FR 42806 (August 19, 1994)). The average per-ton cost of material inputs (*e.g.*, steel coil) in a particular month is independent of which particular models are produced, and thus Borusan's reporting of current costs for certain products for which there was no production does not imply an underallocation of costs.

(c) We agree that Borusan did not report material costs at the same level of product-specificity that is recorded in the normal course of business. (In the normal course of business, on a historical cost basis, Borusan tracks its material costs for every production run, so that each batch of pipe of a specified type and size absorbs the costs of the materials used in the production of that batch.) However, in submitting its costs on a current basis, Borusan did calculate grade-specific costs; as explained in our verification report, we observed that grade B pipe reflected a higher material cost for more expensive coil inputs than were used for grade A pipe. *See* cost verification report at 8. We fully verified that the submitted costs reconciled to the company's records by tracing the coil costs to invoices for material purchases and associated freight, material inventory subsidiary ledgers, and cost center records. *Id.* at 18–20.

In reviewing Borusan's material purchases and production techniques we did not find evidence that factors other than the grade of the input coil (such as coil thickness) would have had a significant impact on product-specific material costs. With respect to thickness, we noted that sample invoices for purchases of coils of varying thicknesses reflected identical per-ton coil costs regardless of the thickness of the coil. See cost verification report at 17, note 9.

We did discover at verification that Borusan had used high-cost API coil for one production run of a standard pipe product in April 1995. In its response, Borusan averaged the higher cost of the API coil across all pipe products rather allocating this cost to the specific product for which API coil was used as an input. API coil is a specialized input for the production of line pipe, and because of its comparatively high cost, Borusan does not normally use it for production of standard pipe. Borusan stated that it used such coil for one run of standard pipe in April 1995 due to excess inventory, and we found no evidence that Borusan routinely uses API coil in the production of standard pipe. We have adjusted the April 1995 cost of the pipe product manufactured from API coil to reflect the higher cost of the input.

(d) Borusan calculated average monthly yields (i.e., the percentage of each material input not wasted in the production process) across all pipe products, rather than providing the production-specific yields Borusan records in the normal course of business. (In the normal course of business, Borusan tracks slitting, welding, and testing scrap for each batch of pipe.) Borusan claimed that reporting product-specific yields under a current cost methodology would have required prohibitive work and effort because it would have had to individually identify the production run corresponding to each sale of subject merchandise. Borusan did not explain whether its records would have allowed it to submit an average monthly yield for each product, and due to time constraints this issue was not pursued at verification. We note, however, that during the plant tour we observed that the manufacturing process for the various dimensions and types of subject merchandise is uniform, and would be unlikely to generate significantly different yields for different products. (In other words, the material lost in the production of a ton of two inch galvanized pipe should not be significantly different than the material lost in the production of a ton of six-inch black ungalvanized pipe.) Given this, and the absence of evidence on the record of this review to suggest that different Borusan pipe products have materially different yields, we are accepting in this review the reported average figures as a reasonable measure of yields for the subject merchandise. However, we emphasize that the Department requires that yields (like other elements of cost) be reported on as product-specific a basis as is feasible given a respondent's records, and that Borusan should be prepared to demonstrate that reported yields are consistent with our practice in future reviews of the antidumping order.

(e) Borusan reported its costs using a single weight conversion factor even though it had at its disposal more accurate product-specific conversion factors. (See Cost Comment 4 below.) The more specific conversion factors are on the record of this review, and we have been able to adjust the reported costs using these data, obviating the need for the use of facts available.

(f) At verification we found, without exception, that sample purchases of materials by Kartal Boru (Borusan's affiliate producer) from affiliated parties had been marked up over the price charged by the manufacturer. The wording in our report was not meant to suggest that we had found any evidence of materials purchases at less than arm's length.[1]

(g) We disagree that Borusan failed to accurately report product- and size-specific overhead. In the normal course of business Borusan calculates an average transformation cost for all products passing through each cost center. However, given that the Gemlik plant has several welding lines and that welding costs are the largest component of total transformation costs, Borusan reported product- and size-specific welding costs using productivity ratios (i.e., by calculating the total tons of each product, by size, passing through each line per hour). See cost verification report at 22. Thus, Borusan calculated welding costs at a greater level of detail than is recorded in the normal course of business.

We saw no evidence at verification that this methodology resulted in an underallocation of transformation costs to subject merchandise. On the contrary, we noted that non-subject merchandise such as line pipe has much higher welding productivity ratios than standard pipe, and therefore it would have been in the respondent's interest to have reported an average welding cost for all pipe rather than the product-specific welding costs actually submitted.

(h) We disagree with the petitioners" claim that Borusan did not adequately explain the basis for its interest rate calculation. Borusan explained the basis for its calculation on pages 8–10 of the July 24, 1996, response, well before verification.[2]

(i) We agree that Borusan did not report freight expenses incurred in certain shipments of merchandise from affiliated resellers directly to customers. Section 776(a)(1) of the Act states that if necessary information is not available on the record, the Department shall use the facts otherwise available in reaching the applicable determination under this

[1] The cost verification report noted that "*for selected purchases of coil*, the affiliates mark-up the price from the unaffiliated producer of the coil in their invoice to [Kartal Boru]." (Emphasis added). See cost verification report at 17. This was not intended to imply that not all purchases of coil selected for verification reflected a mark-up.

[2] We note, however, that we have recalculated the interest expenses submitted in that response consistent with our practice of basing interest expenses on the consolidated group of companies (see Comment 3 below).

title. In this case, Borusan chose not to report these freight expenses. As Borusan did not act to the best of its ability in responding to our request for such information pursuant to section 782(e)(4) of the Act, we have therefore drawn an adverse inference under the authority provided by section 776 of the Act. As facts available, we are assigning the highest freight rate per kilogram to those sales with no freight reported from the affiliated resellers to the customers.

(j) As discussed above, we have found Borusan's cost calculations to be generally adequate, and the difmer data are no less reliable.[3]

In conclusion, we find that Borusan's cost calculations are, on the whole, reasonable. In those instances where Borusan's submitted calculations are not as product specific as possible or are otherwise deficient, we have adjusted the calculations based on more specific data on the record or applied partial facts available. Therefore, the application of total facts available is not warranted.

Comment 2: Adjustments to Borusan's SG&A

The petitioners argue that the Department should ensure that certain stockyard movement expenses, certain year-end adjustments by Borusan's auditor, and a net assets tax should be included in Borusan's SG&A. The petitioners also argue that certain home market freight expenses which were not reported in the sales database should be included in Borusan's SG&A for purposes of calculating COP.

Borusan agrees that the stockyard movement expenses should be included in SG&A for the final results of review, and notes that at verification it provided a revised schedule of SG&A expenses including the stockyard movement expenses. Borusan also agrees that the year-end adjustments and the net asset tax should be included in SG&A. However, Borusan argues that the freight expenses in question (involving shipments by affiliated resellers from their warehouse to end customers) are minimal in amount and unrelated to production of merchandise and, therefore, should not be included in SG&A.

DOC Position

We agree with both parties that Borusan's SG&A figure should include both the stockyard movement expenses, the auditor's year-end adjustments, and the net assets tax. We have revised the SG&A used in our final calculations accordingly.

We agree with the petitioners that Borusan failed to report movement expenses incurred by home market affiliated resellers, but disagree that these expenses should be included in Borusan's SG&A. The movement expenses incurred by the affiliated resellers are related to sales activities on behalf of Borusan's domestic sales, and are unrelated to Borusan's production activities. Had they been reported, these movement expenses would have been deducted from the home market prices for the specific sales in which they were incurred, rather than added to COP. Since Borusan failed to report these expenses, we have drawn the adverse inference that reporting of the expenses would have resulted in the affected sales failing the cost test. *See* Comment 1 above.

Comment 3: Interest Rate Factor

The petitioners argue that the Department should use an interest expense factor calculated on the basis of the monthly interest expenses of the consolidated group of companies of which Borusan is a member (*i.e.*, the interest expense of Borusan Holding Company). The petitioners also argue that the Department should not offset interest expenses by the amount of foreign exchange gains.

Borusan does not disagree that the Department should use an interest expense factor calculated on the basis of the interest expenses of the consolidated group of companies, but argues that the rate suggested by the petitioners is exaggerated and factually unfounded. Borusan notes that only annual (rather than monthly) consolidated interest expenses could be provided. Borusan also contends that the Department verified that foreign exchange income was primarily short-term in nature and that this income should be offset against interest expenses.

DOC Position

We agree with the petitioners that Borusan's interest expenses should be calculated on the basis of the interest expenses of the consolidated group of companies. While our normal practice is to require monthly interest calculations (see, e.g., Pasta from Turkey), we agree with Borusan that doing so in this case would have imposed an unreasonable burden (see section 782(c)(1) of the Act) given that many of the companies in the group do not prepare monthly schedules of interest expenses in the ordinary course of business and that the group as a whole prepares only semi-annual consolidation of expenses (see cost verification report at 25). We therefore have relied on the annual interest expenses for the consolidated group. However, in order to follow our normal practice as closely as possible, we have allocated these expenses to each month of the POR using the ratio of monthly to annual interest expenses for the four largest firms of the Borusan group, which Borusan provided in its cost response of June 10, 1996.

We agree with the petitioners that foreign exchange gains should not be used to offset the interest expenses. At verification, we found that the vast majority of the foreign exchange gains were not debt-related, but rather involved export sales activities (*i.e.*, the gains arising from foreign-currency denominated export receivables). Since the foreign exchange gains are unrelated to interest, it would be inappropriate to offset interest expenses by these gains and we have not done so.

Comment 4: Weight Savings Gains

The petitioners argue that Borusan had the ability to provide weight-savings ratios (*i.e.*, the ratio of theoretical weight of pipe to actual weight of pipe) for each product but deliberately provided an average ratio for all products. According to the petitioners, the Department should either disallow the weight-savings adjustment or, in the alternative, recalculate Borusan's costs to reflect product-specific weight-savings ratios wherever the record permits identification of such ratios.

Borusan argues that the weight-savings adjustment is necessary for an apples-to-apples comparison of prices to costs, since materials costs are incurred on an actual weight basis and sales prices are charged on a theoretical weight basis. According to Borusan, the Department verified the accuracy of the weight-savings data and the reasonableness of the underlying methodology. Borusan does not rebut the petitioners' argument that product-specific weight-savings data should be used wherever available on the record.

DOC Position

We agree with Borusan that the weight-savings adjustment is necessary for a proper comparison of Borusan's sales prices to costs because of the difference in the weight bases. At the same time, we agree with the petitioners that the product-specific weight-savings factors should be used wherever available. As discussed in our verification report, Borusan calculated a weight-savings rate on a product- and size-specific basis for pipe and tube with diameters between ½" and 6",

[3] As with the general cost data, we have recalculated Borusan's difmer data to reflect product- and size-specific weight savings ratio where available; see Comment 4 below.

VOL 61 ISS 252 DEC 31 1996 UMI

which account for a large majority of Borusan's sales. These rates were then averaged, and the average was applied to all products. See cost verification report at 16. Given that specific weight-savings ratios for Borusan's products are on the record for most sales, there is no reason to use an average ratio where product-specific ratios are available. Accordingly, for these final results, we have revised the submitted cost data to reflect product- and size-specific weight-savings gain ratios where available; where such ratios are not available, we have applied the weighted-average ratio calculated by Borusan.

Comment 5: Imputed Selling Expenses for Constructed Value

The petitioners argue that the Department neglected to include imputed selling expenses such as credit expenses and inventory carrying costs in the calculation of constructed value. The petitioners cite to Import Administration's Policy Bulletin 94.6 (March 25, 1994) in support of their position.

Borusan argues that, to the extent that the Department includes imputed selling expenses in the buildup of constructed value, imputed and actual interest expenses must not be double counted.

DOC Position

We disagree with the petitioners that imputed selling expenses must be included in the calculation of constructed value. Under the URAA, for both COP and CV, the statute provides that SG&A be based on actual amounts incurred by the exporter for production and sale of the foreign like product. Our previous practice with respect to COP was to compute selling expenses exclusive of credit and inventory carrying costs because these are imputed amounts that the Department relies on to measure the effect of specific respondent selling practices in the United States and the comparison market. Since the new law provides that the Department compute SG&A for both COP and CV using the actual data of the exporter, in order to ensure consistent treatment of COP and CV we no longer include imputed selling expenses in CV.

Comment 6: Weighted-Average Cost of Production

The petitioners argue that the Department should calculate a weighted-average COP, and apply facts available for any product for which production quantities or COP data are not available.

DOC Position

For the preliminary results, the Department calculated a simple-average COP because monthly production quantities had not yet been reported. At verification, we confirmed that Borusan had reported production quantities and cost data for all products. Since the Department's normal practice is to calculate weighted-average costs of production (see e.g., Pasta from Turkey), we have done so for these final results.

Comment 7: Initiation of Cost Investigation

Borusan argues that the Department should not have initiated a sales-below-cost investigation in this review because the petitioners' cost allegation was not submitted until over three months after the regulatory deadline for such allegations. Borusan further contends that the allegation did not provide reasonable grounds to suspect that Borusan had made below-cost sales, since it contained a number of errors and failed to account for hyperinflation in Turkey. In addition, Borusan claims that subsequent discovery of below-cost sales cannot justify the improper initiation of a below-cost investigation.

The petitioners argue that the Department has the discretion to extend the deadline for allegations of sales below cost when a questionnaire response is received after the deadline for such allegations, and that the deficiencies in the allegation alleged by Borusan were factually incorrect and immaterial to the decision to initiate a cost investigation. In addition, the petitioners contend that there is no "exclusionary" rule that would compel the Department to ignore a finding of sales below cost even if an investigation was initiated pursuant to an untimely and unsupported allegation.

DOC Position

We agree with the petitioners. With respect to the timeliness issue, as explained in detail in the memorandum from Laurie Parkhill to Holly Kuga dated May 3, 1996, initiating the sales-below-cost investigation, we found that a number of extenuating circumstances beyond the petitioners" control (including the delayed issuance of the questionnaire and receipt of the questionnaire response, and the extended closures of the Department due to the Federal budget crisis and a blizzard) warranted an extension of the deadline for filing of a sales-below-cost allegation, as permitted under 19 C.F.R. 353.31(c)(1)(ii). See also Notice of Final Results of Antidumping Duty Administrative Review: Certain Forged Steel Crankshafts From the United Kingdom, 60 FR 52150, 52153 (October 5, 1995) (noting that the Secretary will use its discretion in setting a deadline for a COP allegation where a relevant response is "untimely or incomplete").

With respect to the allegation itself, we found that it provided reasonable grounds to believe or suspect that Borusan had made below-cost sales. Borusan fails to note that the petitioners submitted a revised allegation correcting for the errors noted by the respondent, and that the revised allegation still provided evidence of below-cost sales. Moreover, the Department considered Borusan's hyperinflation argument, and determined that the petitioners' methodology was reasonable given the information available to them. (The Department made appropriate adjustments to account for the hyperinflation problem identified by Borusan in the course of conducting the sales-below-cost investigation.) Because the sales-below-cost investigation was initiated pursuant to a timely and reasonable allegation, Borusan's argument that a finding of sales below cost cannot be used to justify the improper initiation of a sales-below-cost investigation is moot.

Comment 8: Offset to Interest Expenses for Short-Term Interest Income

Borusan claims that short-term interest income should be allowed as an offset to interest expenses, since the Department verified the sources and short-term nature of such income. The petitioners do not dispute Borusan's claim that the sources and short-term nature of the income in question were adequately verified.

DOC Position

We agree with Borusan, and have offset interest expenses (based on the consolidated group of companies) accordingly.

Sales Comments

Comment 1: Home Market Sales of Bitumen-Coated Pipe

Borusan argues that it properly excluded sales of bitumen-coated pipe from its home-market sales listing. According to Borusan, bitumen-coated pipe is not within the scope of the antidumping order in this review, and in any event its cost is sufficiently high to ensure that the Department would never compare U.S. sales of standard pipe to home-market sales of bitumen-coated pipe.

The petitioners claim that bitumen-coated pipe is within the scope of the order on standard pipe from Turkey,

and should have been reported. According to the petitioners, the cost differences alleged by Borusan, although reviewed by the Department at the verification of Borusan's sales responses, were not subject to the same kinds of procedures followed at the verification of Borusan's cost responses. Therefore, they argue the difmer test performed at verification is not accurate.

DOC Position

In performing its dumping calculations, the Department's practice is to match U.S. sales of subject merchandise to home market sales of subject merchandise. Where no identical matches exist, the Department compares the U.S. sales to sales of the foreign like product, provided that merchandise is within a 20 percent difmer threshold (*i.e.*, the ratio of the difference of the variable cost of manufacture of the two products over the total cost of manufacture of the product sold in the United States must not exceed 20 percent). If there are no home market sales of similar merchandise within the 20 percent difmer threshold, the Department resorts to CV. See Import Administration Policy Bulletin: Number 92.2, July 28, 1992, Differences in Merchandise; 20 percent Rule. In the instant review, Borusan had no sales of bitumen-coated pipe in the United States, so sales of bitumen-coated pipe in the home market would not have served for identical matches. Further, at verification we noted that the difmer between a standard pipe product and that same product coated with bitumen exceeded the 20 percent threshold for comparison of similar products, so home-market sales of bitumen-coated pipe would not have served for comparison to U.S. sales of similar merchandise.[4]

In the Preliminary Results, the Department inadvertently included an incorrect description of the scope of this order. Based on the actual scope language, which makes no distinctions based on surface coating, we conclude that bitumen-coated pipe is within the scope. Because bitumen-coated pipe did not serve for comparison to U.S. sales of similar merchandise, however, it is immaterial that Borusan failed to report these sales.

Comment 2: VAT Drawback

Borusan argues that the Department failed to make a circumstance of sale (COS) adjustment for VAT drawback in the preliminary results. Borusan states that the statute (19 U.S.C. 1677b(a)(6)(C)(iii)) requires the Department to make an adjustment for circumstances of sale that are different between the U.S. and home market products—as the Department does with imputed credit expenses. It claims that under Turkish VAT law, Borusan is required to pay a 15 percent VAT on all imported materials used for domestic consumption. Eventually, the company will be reimbursed for the VAT at the time of the sale to the customer. However, in the time period between payment and reimbursement, Borusan bears the financial cost of the VAT (which it characterizes as an interest-free loan to the Turkish government). Borusan argues that this is a real and substantial cost because Turkey is a hyperinflationary economy. It states that it does not have to pay VAT on imported materials used in exported products and that this differing VAT treatment has a direct impact on the expense of making sales in the U.S. and home markets. According to Borusan, this difference is a difference in the circumstance of sale and therefore should be allowed for the final results.

The petitioners argue that the Department should not grant the VAT adjustment because eligibility for an adjustment for drawback of duties is limited to a rebate of duties paid and rebated (19 U.S.C. 1677a(c)(1)(B)). They contend that no case precedent nor statutory authority exists that would allow the Department to grant such an adjustment. The Department's regulations state that the Department will make a reasonable allowance for a bona fide difference in the circumstances of the sales when those circumstances bear a direct relationship to the sales compared. See 19 C.F.R. 353.56(a)(1). The petitioners argue that, unlike credit expenses which represent a cost of carrying the purchaser's debt (directly related to a sale), the VAT drawback relates to the cost of purchasing raw materials. It is an imputed cost associated with the purchase of raw materials, and is therefore a cost of production. They cite to Departmental practice which is to not make a circumstance of sale adjustment for differences in the costs of production. See Final Administrative Review: Certain Welded Carbon Steel Standard Pipe from India, 57 FR 54360 (November 18, 1992). According to the petitioners, if the Department does not consider the VAT to be part of the COP, it should consider it a general expense as it did in past cases; in Certain Welded Carbon Steel Pipes and Tubes from Thailand, 61 FR 56515 (November 1, 1996), the Department treated interest expenses on financing raw material imports as a general expense.

DOC Position

We agree with petitioners, and have disallowed a COS adjustment for imputed interest resulting from delayed "reimbursement" of VAT paid on inputs. Allowing Borusan such an adjustment would involve imputing an expense incurred not between Borusan and its customers, but between Borusan, its supplier, and the government. "[W]hile such a[n expense] may affect the notion of true economic cost to [Borusan], it tells us nothing about the difference in prices that result from the different circumstances of sale." See *Federal-Mogul Corp.* v. *United States*, 839 F. Supp. 881, 885 (November 30, 1993).

Furthermore, while the amount of the imputed expense cannot be quantified until Borusan makes a sale to a domestic customer, it is incurred regardless of whether Borusan actually makes such a sale. In other words, there is no direct relationship between the imputed expense and the sales being examined. Accordingly, there is no basis for the Department to make a COS adjustment.

Comment 3: Level of Trade

In the preliminary results, for Borusan, the Department determined that there was one LOT in the U.S. market and three levels of trade in the home market and did not distinguish between customer class within a LOT. The petitioners argue that the Department should reject Borusan's claimed distinctions between LOTs A (mill direct sales) and B (reseller back-to-back sales) and combine them into one LOT. They contend the selling functions between Borusan's claimed levels of trade show little differences in the sales staff functions between Borusan and its affiliates—only a difference in that LOT B involves handling of sales paperwork. The petitioners cite to the Department's proposed regulations (Proposed Regulations at 61 FR 7348), noting that "small differences in the functions of the seller will not alter the level of trade." According to the petitioners, the sales functions performed at LOT B are similar to those performed for export

[4] Contrary to the petitioners' argument, during the sales verification the Department verified the cost differences between standard pipe and similar pipe covered with bitumen using the identical procedures followed at the cost verification. *See* sales verification report at 5–6, stating that the cost differences were verified "using the same procedures followed in the [cost] verification"; see also sales verification exhibit 19, including Borusan records supporting the costs in question. Also, we note that Borusan did not volunteer the difmer data for bitumen-coated products; these data were requested by the Department's verifiers. *See* sales verification report at 5.

VOL 61 ISS 252 DEC 31 1996 UMI

sales. Thus, the petitioners argue that no adjustment should be made between U.S. sales and home market sales of LOT B.

The petitioners further argue that the Department should continue to make no distinctions between customer class within a LOT because the record does not indicate any consistent pricing differences between the customer classes within the claimed levels of trade.

Finally, the petitioners argue that no LOT adjustment should be granted for LOT C sales (reseller inventory sales) because any adjustments for differences in levels of trade must be linked to differences in selling functions resulting in a consistent pattern of price difference. They argue that Borusan did not establish such a link nor any consistent patterns of price differences.

Borusan states that the Department was correct in its analysis of the levels of trade in the preliminary results. It argues that it has demonstrated three distinct levels of trade in the home market, which the Department verified. Its LOT A sales involve high volume sales to a small number of customers; LOTs B and C involve smaller quantities and have relatively higher selling expenses. Borusan claims that this results in higher prices for sales at LOT B and C than those at LOT A. It further notes that the Department, in its own analysis, found a consistent pattern of price differences between sales at the different levels of trade in its preliminary results. Thus, Borusan argues that the Department should continue to make the same distinctions in the final results.

DOC Position

We agree with the petitioners with respect to finding one LOT for Borusan's claimed LOTs A and B. As discussed above in the "Level of Trade" section, the Department first examines whether there are separate market stages in a particular market. In this case, we found that there were two stages. The Department must then determine whether there are identical selling functions between the market stages. In this case, the selling functions examined are stated in the "Level of Trade" section above. (In the preliminary results, we also examined agent coordination of production and delivery and general vs. specialty sales staff—we discuss these two functions below as well.) We found that the selling functions were identical between Borusan's claimed LOTs A and B. Thus, we combined these sales into one LOT. See Memorandum from the Team to the File, dated December 17, 1996.

In our preliminary results, we considered agent coordination of production and delivery and general vs. specialty sales staff to be selling functions in our LOT analysis. At verification, we noted the differences between the sales staff among the Borusan Group. (We confirmed that the home market resellers had a general sales staff whereas Borusan and Dagitim had specialty sales staff.) However, the SAA states that "a sales subsidiary created merely to perform the role of a *de facto* sales department is not an appropriate basis for adjustment." Thus, for purposes of these final results, we did not consider these to be selling functions and did not incorporate them into the LOT analysis.

Finally, we agree with the petitioners with respect to not making a LOT adjustment for Borusan. However, we note the Department will normally make a LOT adjustment when there are consistent price differences at different levels of trade, not customer categories as stated by the petitioners. As discussed above in the "Level of Trade" section, we found that there were no consistent price differences between the two home market levels of trade. Thus, we made no adjustment when comparing U.S. sales to home market sales made at the non-identical level of trade.

Comment 4: Countervailing Duty Adjustment

A. Formula. The petitioners argue that Borusan's calculation of the amount of countervailing duty (CVD) to be added to U.S. selling price is incorrect. They argue that the Department should instead simply apply the CVD rate (7.26%) to the entered value of each transaction and use that amount for the addition and the rebate of CVD duties.

Borusan contends that the formula used to calculate the CVD adjustment is accurate and was examined by the Department at verification. Thus, the Department should use Borusan's reported amounts in its final results.

DOC Position

We tested the formula used by Borusan for the individual sales that were examined at verification and noted no discrepancies. See sales verification report (at page 9). Thus, we have used the values reported by Borusan in its sales listings for our calculations of export price.

B. Adjustment to export price. The petitioners argue that the Department must, in calculating export price, deduct funds that Borusan provides to its customers equal to the amount of countervailing duties. The petitioner contends that these payments are rebates, and that the Department normally reduces U.S. price by the amount of such rebates. Borusan argues that while applicable precedent supports the addition of countervailing duties in the export price calculation, it prohibits the Department from treating Borusan's payments to the importer of amounts equal to the countervailing duty as rebates.

DOC Position

We agree that the statute requires that we add to the price in the United States the amount of countervailing duties attributable to export subsidies, and have done so. However, the payments to Borusan's unaffiliated customer's amounted to a post-sale price adjustment or rebate and have been deducted in the calculation of export price.

Comment 5: Antidumping Duties

The petitioners contend that Borusan made an agreement to reimburse antidumping duties. Borusan argues that the petitioners' allegation is false because it has never reimbursed, nor agreed to reimburse, its customers for antidumping duties. Borusan further contends that the Department found no evidence of such at verification.

DOC Position

We agree with Borusan. The Department found no evidence of reimbursement of antidumping duties. Because of the proprietary nature of this comment, we are unable to further discuss this issue; a complete discussion of the issue is contained in a decision memorandum. *See* Memorandum from the Team to Barbara R. Stafford, dated December 23, 1996.

Comment 6: Duty Drawback

The petitioners argue that Borusan is not entitled to a drawback adjustment because its exported eligibility ratios exceeded certain limitations on drawback allowed by the Turkish government. They contend that Borusan's duty drawback should not be allocated to sales that were not eligible to receive such a drawback; to do so would violate the Department's duty drawback test, which requires importation of sufficient duty-exempted raw materials to cover the exports against which drawback is claimed. (See Steel Wire Rope from the Republic of Korea, 60 FR 63499, 63505–06 (December 11, 1995) (SWR from Korea).) They argue that, although the Turkish government allows this to occur, the adjustment must meet the Department's test.

Borusan argues that it reported drawback that it had actually received and that it complied with the Turkish provisions. It notes that the Department fully verified the drawback documentation and traced the information to Borusan's accounting records.

DOC Position

We agree with Borusan. In determining whether a duty drawback adjustment is appropriate, the Department applies a two-prong test to establish that: (1) The import duty and rebate are directly linked to, and dependent upon, one another; and (2) there were sufficient imports of raw materials to account for the drawback received on the exported product. See, *e.g.*, SWR from Korea.

Based on information contained in Borusan's questionnaire responses and on the Department's findings at verification, the respondent's methodology for calculating a duty drawback adjustment meets both elements of the test.

It is not disputed that Borusan meets the Department's first requirement. Regarding the second requirement, the Department verified Borusan's drawback applications, which documented sufficient imports of raw materials to account for the drawback claimed. In the drawback applications reviewed by the Department, it was shown on import certificates that sufficient imports of raw materials existed for the claimed exported amounts of finished pipe. Thus, duty drawback is being applied to all of Borusan's U.S. sales.

Comment 7: Credit Expense

The petitioners argue that the Department should calculate a single interest rate for credit expenses on both the U.S. and home markets because it treats money as fungible. They note that in Certain Welded Carbon Steel Pipes and Tubes from Thailand; Final Results of Antidumping Duty Administrative Review, 61 FR 56515, 56519 (November 1, 1996), the Department allowed the respondents to move credit expenses on imported coil purchases to the companies' SG&A from cost of manufacture on the basis that such financing is fungible. According to the petitioners, the Department should consider whether a company's foreign- and domestic-currency-denominated borrowing should be equally applied to all sales.

Borusan states that the Department's longstanding practice is to calculate credit expenses using a weighted-average short-term borrowing rate which reflects the currency in which the sale was invoiced (see Final Determination of Sales at Less Than Fair Value: Disposable Pocket Lighters from Thailand, 60 FR 14263, 14269 (March 16, 1995)). According to Borusan, interest rates are not fungible; they are tied to inflation rates of the currency in which the loan is denominated. Borusan cites a recent Departmental determination, where the Department stated that "the measure of the company's extension of credit would be based on an interest rate tied to the currency in which its receivables are denominated" (see Final Determination of Sales at Less Than Fair Value: Oil Country Tubular Goods from Austria, 60 FR 33551, 33555 (June 28, 1995) (OCTG from Austria)).

DOC Position

We agree with Borusan. As the Department has noted in a recent investigation:

> A company selling in a given currency * * * is effectively lending to its purchasers in the currency in which its receivables are denominated * * * for the period from shipment of its goods until the date it receives payment from its purchaser. Thus, when sales are made in, and future payments are expected in, a given currency, the measure of the company's extension of credit should be based on an interest rate tied to the currency in which its receivables are denominated. Only then does establishing a measure of imputed credit recognize both the time value of money and the effect of currency fluctuations on repatriating revenue.

See OCTG from Austria, 60 FR 33551, 33555. Thus, based on the Department's practice, we are valuing credit expenses using the interest rate applicable to the currency of the sale.

We find the petitioners argument regarding fungibility to be misguided. The Department's policy of using the interest rate applicable to the currency of a sale reflects the commercial reality that different currencies have different costs of borrowing.

Comment 8: CV Profit

The petitioners argue that the Department should base its CV profit calculation on above-cost sales and sales made at arm's length, in accordance with 19 U.S.C. 1677b(e)(2)(A) and 1677(15). According to the petitioners, the Department stated in Pipe from Thailand that its policy is to include only above cost sales in its calculation of profit.

Borusan states that the statute does not limit the sales to be used by the Department in calculating average profit, other than that the sales must be from the same "general category of products." Borusan notes that the SAA states that the "general category of merchandise" will encompass a category broader than the foreign like product and that the Department has the discretion to determine the general categories. SAA at 840. It argues that the statute does not imply that the exclusion of below-cost sales (19 U.S.C. 1677b(e)(2)(A)) is applicable to the alternative methodologies (19 U.S.C. 1677b(e)(2)(B)). Borusan claims that this interpretation was upheld by the Court of International Trade in *Torrington* v. *United States*, Slip. Op. 96–163 (CIT October 3, 1996). According to Borusan the statute states that for determining the amount of profit used for constructed value, the profit will be based on the "actual amounts incurred and realized" by the producer "in connection with the production and sale of a foreign like product." Thus, Borusan argues that the Department should include below cost sales in its profit calculation.

DOC Position

Section 773(e)(2)(A) of the Act specifies that profit for CV be computed using only those sales of the foreign like product that were made in the ordinary course of trade. Section 771(15) of the Act, in turn, provides that sales and transactions considered outside the course of trade include, "among others," sales disregarded under section 773(b)(1) pursuant to the cost test and under section 773(e)(2) as not at arm's length. See also SAA at 839–40. We found that Borusan had made sales in the home market that were disregarded either pursuant to the cost test or because they were not at arm's length (see the "Normal Value" and "Cost of Production Analysis" sections above). Thus, we have not used these sales in computing profit for CV.

The *Torrington* case cited by Borusan relates to the law as it existed before January 1995. In that case, the profit amount discussed was the statutory minimum of eight percent. As noted above, this practice has been superseded by the new statute.

Comment 9: Clerical Errors Contained in the Preliminary Results

Borusan states that the Department made the following clerical errors in its preliminary results: (1) It failed to deduct advertising and warranty expenses in calculating normal value when it had deducted these expenses in the LOT adjustment program; and (2) it eliminated certain products from the matching analysis that should have been included.

The petitioners agree that advertising and warranty expenses should be deducted. However, the petitioners argue that the products in question should not be included in the product concordance (*i.e.*, the matching analysis) and further argue that any products produced to the DIN 2458 specification should also be excluded. The petitioners contend that (a) the excluded products have not been proven to be an appropriate match to ASTM A–53 (U.S. products) as has the DIN 2440/44 standard; (b) DIN 2458 is not listed with other standard pipe products in Borusan's product brochure; and (c) the excluded products are made to nonstandard diameters.

DOC Position

We agree with Borusan. We have corrected for these errors in our final results. At verification, we examined those products that were excluded from our product comparison analysis. We found that all products but one—boiler tube—were subject merchandise, and, therefore, should have been included in our product comparisons.

B. Erbosan

Comment 1: Facts Available

The petitioners argue that the Department should base its final results for Erbosan on total adverse facts available for the following reasons: (1) Erbosan failed to comply with the Department's regulations regarding service of questionnaire responses; and (2) Erbosan's data is unusable. Regarding the first point, the petitioners contend that they were not served with Erbosan's questionnaire response until seven months after it was filed with the Department. A supplemental questionnaire response was filed without much supporting documentation and, according to the petitioners, contained serious deficiencies with the reported variable costs of manufacture. Thus, a large proportion of information was provided to the Department at verification which they had no opportunity to review. Furthermore, the petitioners argue that the verification exhibits were unreadable. Overall, the petitioners argue, Erbosan's failure to provide this information in proper form and on a timely basis precluded them from filing an allegation of sales made below the COP.

Regarding its second point, the petitioners contend that Erbosan's data is unusable because: (a) It failed to differentiate between grades of pipe; and, (b) there is a high rate of errors for its reporting of the dates of sale. If the Department does not find that adverse facts available is appropriate, they suggest applying an additional difference-in-merchandise adjustment for the differences in the grades.

The petitioners argue that with the absence of its due process rights [5] and usable data, the Department should base the final results for Erbosan on facts available. As facts available it should choose either (a) 28.28 percent, the highest margin assigned to any Turkish respondent since the order; or (b) the margin resulting from the use of Erbosan's submitted data.

Erbosan contends that it tried to cooperate and follow the Department's procedures to the best of its ability, without any outside assistance. It notes that, although late, the petitioners did receive Erbosan's questionnaire response and has possessed all of Erbosan's submissions for several months. It also notes that the petitioners did not argue that they had insufficient time to review information to provide comments on the Department's verification or preparing their case brief. Further, the petitioners were aware at the time of the preliminary determination that the Department would be requesting additional information from Erbosan and that it might use Erbosan's information for the final results. Erbosan agrees that certain copies of the verification exhibits were illegible, but notes that the petitioners did not request more legible copies. Erbosan contends that the petitioners had ample time to comment on the information submitted on the record and defend their interest in this proceeding. Therefore, the Department should not base Erbosan's final margin on facts available.

Regarding the grade differences, Erbosan argues that the record shows that there is no difference in its cost of producing both grades. It notes that the Department verified this and noted this in its verification report. Erbosan believes that, even if it should have reported the grades separately, it does not render the response unusable.

Regarding the misreporting of the dates of sale, Erbosan contends that the sales in question are outside the POR. It notes that the Department found no other occurrences in which the date of sale was reported in the wrong month. Thus, Erbosan argues that this is a minor error and does not undermine the data used for purposes of the Department's analysis.

DOC Position

We disagree with the petitioners that the Department should determine Erbosan's submissions as untimely and/or unusable and resort to total adverse facts available for the final results. As described in the preliminary results, a number of extenuating circumstances prevented the petitioners and the Department from performing adequate analyses of Erbosan's data before the preliminary results. Among these reasons are the delayed issuance of the questionnaire and, therefore, of receipt of the questionnaire response, and the extended closures of the Department due to a blizzard and the Federal budget crisis. This led to the Department's decision to assign facts available for the preliminary results, present an additional supplemental questionnaire to Erbosan, and verify Erbosan's response to that supplemental questionnaire.

We agree that the petitioners were not initially served with Erbosan's questionnaire response until seven months after it was filed with the Department. However, we disagree that this precluded the petitioners from making a cost allegation. In the case of Borusan, the petitioners were granted their request for additional time for filing of a sales below cost allegation despite the late date at which Borusan's questionnaire responses were submitted to the Department. Likewise, the petitioners could have made a similar request in the case of Erbosan.

We agree with the petitioners that there was not much support documentation on the record prior to verification and the reported variable costs of manufacture were deficient. However, as explained in the notice of preliminary results, although the Department requested the respondent to support its claim that there were identical matches for all U.S. sales, the Department failed to note the apparent discrepancy in the respondent's initial questionnaire response that differences in merchandise did exist. Furthermore, the Department failed to address Erbosan's claim that the Turkish economy was hyperinflationary at the time of the POR by providing standard instructions regarding administrative reviews conducted within hyperinflationary economies. (These instructions were provided to Borusan when the Department re-issued section D of the questionnaire with the

[5] The petitioners cite to (1) the statute which states that "[i]nformation that is submitted on a timely basis to the [Department] * * * shall be subject to comment by other parties to the proceeding" (see 19 U.S.C. 1677m(g)); and (2) the SAA which states "all interested parties be informed of the essential facts under consideration that form the basis for a determination in sufficient time for the parties to the proceeding to defend their interest" (see H. Doc. No. 316, 103d Cong., 2d Sec. 871).

VOL 61 ISS 252 DEC 31 1996 UMI

hyperinflation text.) Therefore, we find Erbosan's failure to report its cost data properly as inadvertent, not uncooperative.

Regarding the additional points the petitioners raised with respect to Erbosan's data as unusable, we disagree that Erbosan failed to differentiate between grades of pipe or that there is a high rate of errors for reporting dates of sale. Under section 776(a)(2)(D) of the Act, the Department is authorized to use facts available if an interested party provides necessary information, but the information cannot be verified. In this case, however, based on our verification findings, we find that Erbosan's cost data and sales data are accurate. Regarding the cost data, we found no distinction between the steel costs of grade A and grade B, and that Erbosan's cost accounting records indicate the cost of steel is inclusive of both grades for all products. Therefore, we disagree that the Department should apply an additional difmer adjustment for the differences in grades. Regarding the sales data, we find that the incorrect dates of sale for certain transactions resulted in either those sales now being outside the POR or resulted in minor changes in the month the sale was made for the remaining transactions. Since Erbosan's errors are minor in nature, we made the necessary corrections based on our verification findings and are using Erbosan's data in the final results.

Comment 2: Correction for Errors Found at Verification

The petitioners contend that, if the Department does not base the margin on facts available, it should correct for the errors discovered at verification. These errors include omitted home market sales, understated brokerage and handling, overstated discounts for home market sales, and incorrect variable and total costs of manufacture (including the grade differences as mentioned above in Comment 1).

Erbosan agrees that these errors, except for the grade differences (as noted in Comment 1), should be corrected for the final results.

DOC Position

We agree with the respondent. Except for the adjustment for steel grade differences, we have corrected the errors identified above in the final results. We did not make adjustment for steel grade differences to variable and total costs of manufacture because we found no difference between actual costs for pipes with different grades, but with the same dimension and size, sold in either market. Moreover, we found no cost difference between grade A and grade B steel in Erbosan's accounting records.

Final Results of Review

As a result of our review, we determine that the following margins exist for the period May 1, 1994, through April 30, 1995:

Manufacturer/ exporter	Review period	Margin (percent)
Borusan	5/1/94–4/30/94	3.15
Erbosan	5/1/94–4/30/94	25.01

The Department shall determine, and Customs shall assess, antidumping duties on all appropriate entries. The Department will issue appraisement instructions directly to Customs.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of these final results of this administrative review, as provided by section 751(a) of the Act: (1) The cash deposit rate for Borusan and Erbosan will be the rate established above; (2) for merchandise exported by manufacturers or exporters not covered in this review but covered in the original less than fair value (LTFV) investigation or a previous review, the cash deposit will continue to be the most recent rate published in the final determination or final results for which the manufacturer or exporter received a company-specific rate; (3) if the exporter is not a firm covered in this review, or the original investigation, but the manufacturer is, the cash deposit rate will be that established for the manufacturer of the merchandise in these final results of review or the LTFV investigation; and (4) if neither the exporter nor the manufacturer is a firm covered in this or any previous review, the cash deposit rate will be 14.74 percent, the "all others" rate established in the LTFV investigation.

These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as final reminder to importers of their responsibility to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also is the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 C.F.R. 353.34(d). Failure to comply is a violation of the APO.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 C.F.R. 353.22.

Dated: December 24, 1996.

Jeffrey P. Bialos,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Import Restraint Limits for Certain Wool and Man-Made Fiber Textile Products Produced or Manufactured in Bulgaria

December 24, 1996.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing limits.

EFFECTIVE DATE: January 1, 1997.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Uruguay Round Agreements Act.

Pursuant to the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing (ATC), the Bilateral Textile Agreement, effected by exchange of notes dated April 22 and May 2, 1996, between the Governments of the United States and Bulgaria establishes limits for the period beginning January 1, 1997 and extending through December 31, 1997.

In the letter published below, the Chairman of CITA directs the

Commissioner of Customs to establish the 1997 limits.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 61 FR 66263, published on December 17, 1996).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing, but are designed to assist only in the implementation of certain of their provisions.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 24, 1996.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), the Uruguay Round Agreements Act, the Uruguay Round Agreement on Textiles and Clothing (ATC) and the Bilateral Textile Agreement, effected by exchange of notes dated April 22 and May 2, 1996 between the Governments of the United States and Bulgaria; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1997, entry into the United States for consumption and withdrawal from warehouse for consumption of wool and man-made fiber textile products in the following categories, produced or manufactured in Bulgaria and exported during the twelve-month period beginning on January 1, 1997 and extending through December 31, 1997, in excess of the following levels of restraint:

Category	Twelve-month limit
410/624	2,282,937 square meters of which not more than 823,698 square meters shall be in Category 410.
433	12,300 dozen.
435	22,146 dozen.
442	14,350 dozen.
444	67,164 numbers.
448	25,345 dozen.

Imports charged to these category limits for the period January 1, 1996 through December 31, 1996 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future pursuant to the provisions of the Uruguay Round Agreements Act, the Uruguay Round Agreement on Textiles and Clothing and any administrative arrangements notified to the Textiles Monitoring Body.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

Adjustment of Import Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Costa Rica

December 24, 1996.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 30, 1996.

FOR FURTHER INFORMATION CONTACT: Jennifer Aldrich, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Uruguay Round Agreements Act.

The current limit for Category 443 is being increased by application of swing, reducing the limit for Categories 342/642 to account for the increase.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 60 FR 65299, published on December 19, 1995). Also see 61 FR 3002, published on January 30, 1996.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing, but are designed to assist only in the implementation of certain of their provisions.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 24, 1996.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on January 24, 1996, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textile products, produced or manufactured in Costa Rica and exported during the twelve-month period which began on January 1, 1996 and extends through December 31, 1996.

Effective on December 30, 1996, you are directed to adjust the limits for the following categories, as provided for under the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing:

Category	Adjusted twelve-month limit [1]
342/642	360,678 dozen.
443	231,447 numbers.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1995.

The guaranteed access levels for the foregoing categories remain unchanged.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Uruguay Round Agreements Act.

The import restraint limits and Guaranteed Access Levels (GALs) for textile products, produced or manufactured in Costa Rica and exported during the period January 1, 1997 through December 31, 1997 are based on limits notified to the Textiles Monitoring Body pursuant to the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing (ATC).

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to establish limits and guaranteed access levels for 1997.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 61 FR 66263, published on December 17, 1996).

Requirements for participation in the Special Access Program are available in **Federal Register** notices 51 FR 21208, published on June 11, 1986; 52 FR 26057, published on July 10, 1987; 54 FR 50425, published on December 6, 1989; 55 FR 21047, published on May 22, 1990, and 61 FR 49439, published on September 20, 1996.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the Uruguay Round Agreements Act and the ATC, but are designed to assist only in the implementation of certain of their provisions.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 24, 1996.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing (ATC); and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1997, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories, produced or manufactured in Costa Rica and exported during the twelve-month period beginning on January 1, 1997 and extending through December 31, 1997, in excess of the following restraint limits:

Category	Twelve-month limit
340/640	955,921 dozen.
342/642	352,884 dozen.
347/348	1,610,938 dozen.
443	211,766 numbers.
447	11,418 dozen.

Imports charged to these category limits for the period January 1, 1996 through December 31, 1996 shall be charged against those levels of restraint to the extent of any unfilled balances. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment in the future according to the provisions of the Uruguay Round Agreements Act, the ATC, and any administrative arrangements notified to the Textiles Monitoring Body.

Also pursuant to the Uruguay Round Agreements Act and the ATC; and under the terms of the Special Access Program, as set forth in 51 FR 21208 (June 11, 1986), 52 FR 26057 (July 10, 1987) and 54 FR 50425 (December 6, 1989), you are directed to establish guaranteed access levels for properly certified cotton, wool and man-made fiber textile products in the following categories which are assembled in Costa Rica from fabric formed and cut in the United States and re-exported to the United States from Costa Rica during the period beginning on January 1, 1997 and extending through December 31, 1997:

Category	Guaranteed access level
340/640	650,000 dozen.
342/642	250,000 dozen.
347/348	1,500,000 dozen.
443	200,000 numbers.
447	4,000 dozen.

Any shipment for entry under the Special Access Program which is not accompanied by a valid and correct certification and Export Declaration in accordance with the provisions of the certification requirements established in the directive of May 15, 1990 shall be denied entry unless the Government of Costa Rica authorizes the entry and any charges to the appropriate specific limit. Any shipment which is declared for entry under the Special Access Program but found not to qualify shall be denied entry into the United States.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception of the rulemaking provisions of U.S.C.553(a)(1).

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc.96–33204 Filed 12–30–96; 8:45 am]

BILLING CODE 3510–DR–F

Consolidation and Amendment of Export Visa Requirements to Include the Electronic Visa Information System for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Korea

December 24, 1996.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs consolidating and amending visa requirements.

EFFECTIVE DATE: January 1, 1997.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Uruguay Round Agreements Act.

In exchange of notes dated November 12, 1996 and December 11, 1996, the Governments of the United States and the Republic of Korea agreed to amend the existing visa arrangement for textile products, produced or manufactured in Korea and exported on and after January

1, 1997. The amended arrangement consolidates existing and new provisions of the export visa arrangement, including provisions for the Electronic Visa Information System (ELVIS). In addition to the ELVIS requirements, shipments will continue to be accompanied by an original visa stamped on the front of the original commercial invoice issued by the Government of the Republic of Korea. Goods which currently require an exempt certificate shall not require an ELVIS transmission, but will continue to require the exempt certificate.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to amend the existing visa requirements for textile products produced or manufactured in Korea and exported on and after January 1, 1997.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 60 FR 65299, published on December 19, 1995). Also see 56 FR 18574, published on April 23, 1991. Information regarding the 1997 CORRELATION will be published in the **Federal Register** at a later date.

Interested persons are advised to take all necessary steps to ensure that textile products that are entered into the United States for consumption, or withdrawn from warehouse for consumption, will meet the visa requirements set forth in the letter published below to the Commissioner of Customs.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 24, 1996.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on April 17, 1991, as amended, by the Chairman, Committee for the Implementation of Textile Agreements, that directed you to prohibit entry of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Korea for which the Government of the Republic of Korea has not issued an appropriate export visa or exempt certification.

Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Export Visa Arrangement, effected by exchange of notes dated November 12, 1996 and December 11, 1996, between the Governments of the United States and the Republic of Korea; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1997, entry into the Customs territory of the United States (i.e., the 50 states, the District of Columbia and the Commonwealth of Puerto Rico) for consumption and withdrawal from warehouse for consumption of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products in Categories 200–239, 300–369, 400–469, 600–670 and 800–899, including part categories and merged categories (see Annex A), produced or manufactured in Korea and exported on and after January 1, 1997 for which the Government of the Republic of Korea has not issued an appropriate export visa or Electronic Visa Information System (ELVIS) transmission fully described below. Should additional categories, part categories or merged categories become subject to import quota the entire category(s), part category(s) or merged category(s) shall be included in the coverage of this arrangement.

A visa must accompany each commercial shipment of the aforementioned textile products. A circular stamped marking in blue ink will appear on the front of the original commercial invoice. The original visa shall not be stamped on duplicate copies of the invoice. The original invoice with the original visa stamp will be required to enter the shipment into the United States. Duplicates of the invoice and/or visa may not be used for this purpose.

Each visa stamp shall include the following information:

1. The visa number. The visa number shall be in the standard nine digit letter format, beginning with one numeric digit for the last digit of the year of export, followed by the two character alpha country code specified by the International Organization for Standardization (ISO) (the code for Korea is "KR"), and a six digit numerical serial number identifying the shipment; e.g., 7KR123456.

2. The date of issuance. The date of issuance shall be the day, month and year on which the visa was issued.

3. The original signature of the issuing official of the Government of the Republic of Korea.

4. The correct category(s), merged category(s), part category(s), quantity(s) and unit(s) of quantity in the shipment as set forth in the U.S. Department of Commerce Correlation and in the Harmonized Tariff Schedule of the United States, annotated or successor documents, shall be reported in the spaces provided within the visa stamp (e.g., "Cat. 340–510 DOZ").

Quantities must be stated in whole numbers. Decimals or fractions will not be accepted. Merged category quota merchandise may be accompanied by either the appropriate merged category visa or the correct category visa corresponding to the actual shipment (e.g., Categories 347/348 may be visaed as 347/348 or if the shipment consists solely of Category 347 merchandise, the shipment may be visaed as "Category 347," but not as "Category 348").

U.S. Customs shall not permit entry if the shipment does not have a visa, or if the visa number, date of issuance, signature, category, quantity or units of quantity are missing, incorrect or illegible, or have been crossed out or altered in any way. If the quantity indicated on the visa is less than that of the shipment, entry shall not be permitted. If the quantity indicated on the visa is more than that of the shipment, entry shall be permitted and only the amount entered shall be charged to any applicable quota.

If the visa is not acceptable then a new visa must be obtained from the appropriate export association through their Korean suppliers, or a visa waiver may be issued by the U.S. Department of Commerce at the request of the Government of the Republic of Korea in Washington, DC, and presented to the U.S. Customs Service before any portion of the shipment will be released. The waiver, if used, only waives the requirement to present a visa with the shipment. It does not waive the quota requirement.

If the visaed invoice is deficient, the U.S. Customs Service will not return the original document after entry, but will provide a certified copy of that visaed invoice for use in obtaining a new correct original visaed invoice, or a visa waiver.

If a shipment from Korea has been allowed entry into the commerce of the United States with either an incorrect visa or no visa, and redelivery is requested but cannot be made, the shipment will be charged to the correct category limit whether or not a replacement visa or waiver is provided.

ELVIS Requirements:

A. Each ELVIS message will include the following information:

I. The visa number. The visa number shall be in the standard nine digit letter format, beginning with one numeric digit for the last digit of the year of export, followed by the two character alpha country code specified by the International Organization for Standardization (ISO) (the code for Korea is "KR"), and a six digit numerical serial number identifying the shipment; e.g., 7KR123456.

II. The date of issuance. The date of issuance shall be the day, month and year on which the visa was issued.

III. The correct category(s), merged category(s), part category(s), quantity(s) and unit(s) of quantity in the shipment as set forth in the U.S. Department of Commerce Correlation and in the Harmonized Tariff Schedule of the United States, annotated or successor documents.

IV. The quantity of the shipment in the correct units of quantity.

V. The manufacturer ID code.

B. Entry of a shipment shall not be permitted:

I. if an ELVIS transmission has not been received for the shipment from the country of origin;

II. if the ELVIS transmission for that shipment is missing any of the following:

a. visa number
b. category or part category
c. quantity
d. unit of measure
e. date of issuance
f. manufacturer ID number

VOL 61 ISS 252 DEC 31 1996 UMI

III. if the ELVIS transmission for the shipment does not match the information supplied by the importer or the Customs Broker acting as an agent on behalf of the importer, with regard to any of the following:

a. visa number

b. category or part category

c. unit of measure

IV. if the quantity being entered is greater than the quantity transmitted.

V. if the visa number has previously been used, except in the case of a split shipment, or cancelled, except when an entry has been made using the visa number.

C. A new, correct ELVIS transmission from the country of origin is required before a shipment that has been denied entry for one of the circumstances mentioned in paragraph 3.B.I–V will be released.

D. A new, correct ELVIS transmission from the country of origin is required for entries made using a visa waiver under the procedures as previously described. Visa waivers will only be considered for paragraph 3.B.I., if the shipment qualifies as a one-time special purpose shipment that is not part of an ongoing commercial enterprise, or legitimate classification disputes.

E. Shipments will not be released for forty-eight hours in the event of a system failure. If system failure exceeds forty-eight hours, for the remaining period of the system failure the U.S. Customs Service will release shipments on the basis of the paper visaed document.

If import quotas are in force, U.S. Customs Service shall charge only the actual quantity in the shipment to the correct category limit. If a shipment from Korea has been allowed entry into the commerce of the United States with either an incorrect ELVIS transmission, or no ELVIS transmission, and redelivery is requested but cannot be made, the shipment will be charged to the correct category limit whether or not a replacement visa or waiver is provided or a new ELVIS message is transmitted.

Annex B lists all products exempt from quantitative levels of the agreement with the Government of the Republic of Korea.

Other Provisions.

Merchandise imported for the personal use of the importer and not for resale, regardless of value, and properly marked commercial sample shipments valued at U.S.$250 or less, do not require a visa, exempt certification, or ELVIS transmission for entry and shall not be charged to agreement levels, if applicable. All other commercial shipments of the above mentioned require a visa or exempt certification for entry.

The visa and certification stamps remain unchanged.

The actions taken concerning the Government of the Republic of Korea with respect to imports of textiles and textile products in the foregoing categories have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1). This letter will be published in the **Federal Register**.

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Sri Lanka

December 23, 1996.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 31, 1996.

FOR FURTHER INFORMATION CONTACT: Helen L. LeGrande, International Trade Specialist, Office of Textiles and

Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); Uruguay Round Agreements Act.

The current limit for Categories 351/651 is being adjusted for special carryforward and to undo special shift previously applied. Therefore, the special shift subtracted from the limit for Categories 352/652 is being cancelled.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to increase the limit for Categories 352/652. The limit for Categories 351/651 remains unchanged.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 60 FR 65299, published on December 19, 1995). Also see 60 FR 66265, published on December 21, 1995; and 61 FR 29357, published on June 10, 1996.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing, but are designed to assist only in the implementation of certain of their provisions.

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 23, 1996.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on December 15, 1995, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Sri Lanka and exported during the period which began on January 1, 1996 and extends through December 31, 1996.

Effective on December 31, 1996, you are directed to increase the limit for Categories 352/652 to 1,497,620 dozen [1].

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C.553(a)(1).

Sincerely,

D. Michael Hutchinson,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc.96–33203 Filed 12-30–96; 8:45 am]

BILLING CODE 3510–DR–F

[1] The limit has not been adjusted to account for any imports exported after December 31, 1995.

DEPARTMENT OF ENERGY

Notice of Intent

AGENCY: Department of Energy.

ACTION: Notice of Intent.

SUMMARY: The Department of Energy (DOE) announces its intent to prepare an Environmental Impact Statement (EIS) on the management of a portion of the aluminum-clad spent nuclear fuel [1] at the Savannah River Site. The Department's objective is to identify and implement appropriate actions to safely and efficiently manage all aluminum-clad spent nuclear fuel and targets assigned to the Savannah River Site, including placing these materials in forms suitable for disposition. To this end, this EIS will cover that portion of the aluminum-clad spent nuclear fuel inventory currently in storage at the Savannah River Site, as well as aluminum-clad foreign, domestic and government research reactor aluminum-clad spent nuclear fuel that has been assigned to, but has not yet been received at the Savannah River Site. Approximately 188 metric tons of spent nuclear fuel and targets currently stored at the SRS are not considered within the scope of this EIS because the Department has already decided on the management strategy for these materials. The spent nuclear fuel included in this EIS consists of approximately 62 metric tons heavy metal of spent nuclear fuel: 34 metric tons currently at the Savannah River Site and 28 metric tons, foreign and domestic, to be shipped to the Savannah River Site. This Notice of Intent briefly describes the proposed DOE action and alternatives, announces the schedule for the public scoping meeting, and solicits public involvement.

DATES: DOE invites comments on the proposed scope of the SRS Spent Nuclear Fuel Management EIS from the public. Comments must be postmarked or submitted by fax or electronic mail by March 3, 1997 to ensure consideration in the preparation of the draft EIS. DOE will consider late comments to the extent practicable. DOE will conduct an informational workshop and public scoping meeting on January 30, 1997, from 1:00 p.m. to 4:00 p.m. and 6:00 p.m. to 9:00 p.m., at the North Augusta Community Center, 101 Brookside Drive, North Augusta, South Carolina. The purpose of the workshop and scoping meeting is to discuss spent nuclear fuel management issues at the SRS and provide an opportunity for the public to assist the Department in determining the appropriate scope of the EIS. The date, time and location of the workshop and scoping meeting that appear in this Notice will be announced in the SRS Environmental Bulletin and local newspapers well in advance of the meeting.

ADDRESSES: Questions and comments concerning the SRS Spent Nuclear Fuel Management EIS and comments on the scope of the EIS can be submitted in writing to Andrew R. Grainger, NEPA Compliance Officer, Savannah River Operations Office, P.O. Box 5031, Aiken, South Carolina 29804–5031. Internet addresses are drew.grainger@srs.gov or nepa@barms036.b-r.com. Questions and comments may also be submitted by telephone or fax to the toll-free telephone number 1–800–242–8269.

For general information on the DOE NEPA process, contact: Ms. Carol M. Borgstrom, Director, Office of NEPA Policy and Assistance, U.S. Department of Energy, 1000 Independence Avenue, S.W., Washington, D.C. 20585; telephone (202) 586–4600 or leave a message at (800) 472–2756.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

DOE needs to safely and efficiently manage all aluminum-clad spent nuclear fuel and targets assigned to the SRS until ultimate disposition. The management alternatives could involve the use of existing, modified, or new facilities or processes, consistent with DOE policies regarding the protection of the environment, public and worker safety and health, nonproliferation, and recent DOE decisions regarding the

[1] Aluminum-clad spent nuclear fuel is nuclear reactor fuel that has been withdrawn from a reactor following irradiation, the constituent elements of which have not been separated. The "spent nuclear fuel" consists primarily of the fuel (usually enriched uranium), fission products, and the aluminum structural material that serves as cladding. For the purposes of the SRS Spent Nuclear Fuel Management EIS, spent nuclear fuel also includes uranium/neptunium target materials, blanket subassemblies, pieces of fuel, and debris.

programmatic management of spent nuclear fuel and the decision to accept and manage in the United States foreign research reactor spent nuclear fuel containing uranium enriched in the United States.

Spent Nuclear Fuel Currently Stored at the SRS

The current SRS inventory of spent nuclear fuel consists of approximately 222 metric tons[2] heavy metal (MTHM, which is the uranium mass, excluding cladding, alloy materials and structural materials). The inventory includes various forms, as follows: (a) SRS spent production reactor fuels consisting of aluminum-clad highly enriched uranium; (b) aluminum-clad targets or slugs containing plutonium or other isotopes; (c) aluminum-clad spent nuclear fuels from offsite domestic and foreign research reactors; and (d) offsite research and test reactor spent nuclear fuels clad in zirconium, stainless steel, or other materials. The SRS spent production reactor fuels, targets and slugs are currently stored under water in the K-, and L-Reactor disassembly basins, while the offsite domestic and foreign research reactor spent nuclear fuel is stored under water in the Receiving Basin for Offsite Fuels. Foreign research reactor spent nuclear fuel is also scheduled to be stored in the L-Reactor disassembly basin.

The spent nuclear fuel and targets that are the subject of the SRS Spent Nuclear Fuel Management EIS will be: that portion of the spent nuclear fuel and targets (34 metric tons) currently stored at the SRS that has been determined to be stable, but whose management pending ultimate disposition has not yet been determined under an environmental impact statement prepared under the National Environmental Policy Act; and approximately 28 metric tons heavy metal of spent nuclear fuel consisting of the foreign research reactor spent nuclear fuel that will be shipped to SRS over the next 13 years, and the DOE and domestic research reactor spent nuclear fuel that will be shipped to SRS for the foreseeable future (i.e., until at least the year 2035).

The proposed action and alternatives considered in this EIS would be consistent with recent Departmental decisions regarding the programmatic management of spent nuclear fuel (Record of Decision, Spent Nuclear Fuel and Idaho National Engineering Laboratory Environmental Restoration and Waste Management Programmatic Environmental Impact Statement, 60 FR 28680 (June 1, 1995), and Amendment of Record of Decision, 61 FR 9441 (March 8, 1996), and Departmental decisions to accept and manage foreign research reactor spent nuclear fuel in the United States (Record of Decision, Environmental Impact Statement on a Proposed Nuclear Weapons Nonproliferation Policy Concerning Foreign Research Reactor Spent Nuclear Fuel, 61 FR 25092, May 17, 1996).

Approximately 188 metric tons of spent nuclear fuel and targets currently stored at the SRS are not considered within the scope of this EIS because the Department has already decided on the management strategy for these materials. These materials were evaluated in the Interim Management of Nuclear Materials (IMNM) EIS (DOE/EIS–0220, October 1995). In that EIS, DOE considered alternatives for stabilizing spent nuclear fuel and other radioactive materials stored at the SRS that DOE determined could not be safely stored over the next decade in their present condition. Following completion of the IMNM EIS, DOE decided (60 FR 65300, December 19, 1995) to stabilize the Mark-31 targets, 81 failed Taiwan Research Reactor elements, and a failed Experimental Breeder Reactor II element (totaling about 159 MTHM) by dissolving them in the F-Canyon facility and by reducing the plutonium component to metal in the FB-Line facility, after which the resulting materials would be stored. Subsequently, DOE announced its decision (61 FR 6633, February 21, 1996) to stabilize Mark-16 and Mark-22 production reactor spent fuels by processing them and blending down the highly enriched uranium component to low enriched uranium in SRS facilities. Other aluminum-clad targets stored in the reactor basins would be stabilized by dissolving them in the canyon facilities and storing the solutions in the SRS high-level waste tanks for eventual conversion to a glass form in the Defense Waste Processing Facility. The glass logs would then be stored at the SRS until ultimate disposition. While these materials are considered spent fuel, their management is not considered within the scope of the SRS Spent Nuclear Fuel Management EIS because, once stabilized, they will be suitable for disposition under existing DOE programs. Accordingly, no other management alternatives need be considered.

The management and disposition of the 62 MTHM[3] are the subject of this EIS. Table 1 provides information on the spent nuclear fuel inventory currently located at the SRS that the Department plans to evaluate in this EIS.

[2] A metric ton is 1,000 kilograms, equal to about 2,200 pounds.

[3] The 34 MTHM currently stored at SRS do not include about 22 MTHM spent fuel clad in stainless steel or zirconium and stored in the Receiving Basin for Offsite Fuels. This material will be shipped to the Idaho National Engineering Laboratory for management there (60 FR 28680, June 1, 1995).

TABLE 1.— EXISTING SRS INVENTORY OF ALUMINUM-CLAD SNF (AS OF SEPTEMBER 30, 1996) TO BE EVALUATED IN EIS

Fuel type	Location	Number of items	Units	Metric tons heavy metal
Fuels:				
Mark-14	RBOF [1]	1	Can [2]	<0.001
Taiwan Research Reactor	RBOF	62	Cans	8.7
Experimental Breeder Reactor	RBOF	59	Cans	16.7
Sodium Experimental Reactor	RBOF	36	Cans	2.1
Argonne National Laboratory Janus Reactor	RBOF	19	Assemblies [3]	0.003
Advanced Thermal Source Reactor	RBOF	21	Assemblies	0.003
Massachusetts Institute of Technology Reactor	RBOF	56	Assemblies	0.016
University of Missouri Research Reactor	RBOF	112	Assemblies	0.049
Rhode Island Nuclear Center Reactor	RBOF	70	Assemblies	0.004
University of Michigan Reactor	RBOF	48	Assemblies	0.034
University of Virginia Reactor	RBOF	44	Assemblies	6.062

Urgent Relief Receipts	RBOF	252	Assemblies	0.05
Targets:				
Mark-42 targets	RBOF	7	Assemblies	<0.1
Mark-18 americium-241 targets	RBOF	65	targets [4]	<0.1
Special curium and other targets	RBOF	114	slugs [5]	<0.1
Total				About 34 MTHM

[1] The Receiving Basin for Offsite Fuels facility at the SRS.
[2] The term "can" indicates that the spent nuclear fuel was placed in an aluminum can, which was then sealed to provide a suitable storage container for the fuel element(s).
[3] The term "assembly" refers to the nuclear fuel in its assembled form (i.e., fuel, cladding and handling features are all present). In this case, the term "assembly" is synonymous with "fuel element."
[4] The term "target" refers to uranium or transuranic material, clad in aluminum, that was irradiated in a reactor for the purpose of producing special isotopes, e.g., plutonium-238.
[5] The term "slug" normally refers to a disassembled target.

Foreign Research Reactor Fuel Assigned to the SRS. Following completion of the *EIS on a Proposed Nuclear Weapons Nonproliferation Policy Concerning Foreign Research Reactor Spent Nuclear Fuel*, DOE and the Department of State decided to implement a new foreign research reactor spent nuclear fuel policy by accepting from foreign reactors spent nuclear fuel containing uranium enriched in the United States (Record of Decision, 61 FR 25092. May 17, 1996). Implementation of this policy will result in the acceptance of up to 22,700 foreign research reactor spent fuel elements (about 19.2 MTHM) by the United States. Of this number, about 17,800 are aluminum-clad fuel elements (about 18.2 MTHM) which have been assigned to the Savannah River Site for management. The remaining foreign research reactor spent fuel elements (about 1 MTHM) have been assigned to the Idaho National Engineering Laboratory for management.

In the Record of Decision (61 FR 25092, May 17, 1996) for the EIS on a Proposed Nuclear Weapons Nonproliferation Policy Concerning Foreign Research Reactor Spent Nuclear Fuel, DOE decided to implement a three-point strategy for managing these fuel elements. First, DOE has started an accelerated program to identify, develop, and demonstrate one or more non-processing, cost-effective treatment or packaging technologies to prepare the foreign research reactor spent nuclear fuel for disposition. The purpose of any new facilities that might be constructed to implement these technologies would be to change the foreign research reactor spent nuclear fuel into a form that is suitable for geologic disposal without necessarily separating the fissile materials. Examples of such treatment technologies could include: press and dilute/poison, melt and dilute/poison, plasma arc treatment, electrometallurgical treatment, glass materials oxidation and dissolution, dissolve and vitrify, direct disposal in small packages, and direct co-disposal with high-level waste.

In conjunction with the examination of new technologies, variations of conventional direct disposal methods would also be explored. After treatment or packaging, the foreign research reactor spent nuclear fuel would be managed on site in dry storage. (After such treatment or packaging, the spent nuclear fuel would then be in a condition often referred to as "road ready," meaning that no further packaging or treatment would be required before being transported off-site for continued storage or disposal.) DOE would select, develop, and implement, if appropriate, one or more of these treatment or packaging technologies by the year 2000. DOE is committed to avoiding indefinite storage of this spent nuclear fuel in a form that is unsuitable for disposal.

Should a new treatment or packaging technology not be ready for implementation by the year 2000, the second part of the strategy would involve use of F-Canyon to chemically separate some foreign research reactor spent nuclear fuel elements while the F-Canyon facility is operating in order to stabilize "at-risk" materials (i.e., materials that pose a health or safety concern) in accordance with the Implementation Plan for Defense Nuclear Facilities Safety Board Recommendation 94–1. DOE would use the F-Canyon to process only that quantity of foreign research reactor fuel that could be accommodated by the available canyon capacity. Current schedules show that this activity could take place after the year 2000. As part

of the assessment and analysis of this contingency, DOE committed to commission or conduct an independent study of the nonproliferation and other implications of processing spent nuclear fuel from foreign research reactors. The results of this study will be applicable to all the spent nuclear fuel within the scope of the SRS Spent Nuclear Fuel Management EIS and will be incorporated into a final decision on spent nuclear fuel management at SRS.

The third part of the strategy for managing foreign research reactor spent nuclear fuel is embodied in a program of closely monitoring such fuel placed in wet storage at the SRS. DOE is presently unaware of any technical basis for believing that the foreign research reactor spent nuclear fuel cannot be safely stored until one or more of the new packaging or treatment technologies becomes available. Nevertheless, if health and safety concerns involving any of the foreign research reactor spent fuel materials are identified prior to development of an appropriate treatment or packaging technology, DOE would use the F-Canyon to process the affected spent nuclear fuel materials, while F-Canyon is operating to stabilize the at-risk materials.

DOE and Domestic Research Reactor Fuel to be Shipped to SRS. Following completion of the Programmatic Spent Nuclear Fuel and Idaho National Engineering Laboratory Environmental Restoration and Waste Management EIS, DOE decided that the SRS will be the management site of aluminum-clad fuel that is currently in or may become a part of DOE's inventory (DOE reactor fuel, excluding spent fuel at the Hanford site, university and other domestic research test reactor fuel, and fuel from foreign research reactors) (Record of Decision, 60 FR 28680, June 1, 1996) and Amendment to the Record of Decision, 61 FR 9441, March 8, 1996). This decision will result in the shipment of about 4,500 aluminum-clad spent fuel elements to the SRS from the Idaho National Engineering Laboratory and up to 9,600 aluminum-clad spent fuel elements from domestic DOE and research reactors (for a total of about 10 MTHM). Table 2 provides information on the expected future receipts of spent nuclear fuel at the SRS that the Department plans to evaluate in this EIS.

TABLE 2.—EXPECTED FUTURE RECEIPTS OF SPENT NUCLEAR FUEL AT THE SAVANNAH RIVER SITE

Source	Number of elements	MTHM
Domestic Research Reactors	9,600	6.2
Foreign Research Reactors	17,800	18.2
Idaho National Engineering Laboratory	4,500	3.8
Total	About 31,900 elements	About 28.2 MTHM

Alternatives:

DOE will evaluate several alternatives for the management of both the aluminum-clad spent nuclear fuel currently stored at the Savannah River Site and the foreign and domestic research reactor spent nuclear fuel that is expected to be shipped to the Savannah River Site in the future. Each of the following alternatives will be considered for the spent nuclear fuel currently in storage and that is expected to be shipped to the SRS.

Continued Wet Storage (No Action)

The no action alternative would continue storage of spent fuel in the Receiving Basin for Offsite Fuel and the L-Reactor disassembly basin. Future receipts of domestic and foreign fuel would be stored at these locations. This alternative also involves continuation of the enhanced monitoring program and water chemistry management activities at the basins to ensure the safe storage of spent fuel. Under this alternative, DOE would also use the F-Canyon (or H-Canyon) facility to process those fuel elements that are determined to present health and safety vulnerabilities during wet storage, in accordance with the Records of Decision for the Proposed Nuclear Weapons Nonproliferation Policy Concerning Foreign Research Reactor Spent Nuclear Fuel EIS (61 FR 25092, May 17, 1996) and the Interim Management of Nuclear Material EIS (60 FR 65300 and 61 FR 6633, December 19, 1995 and February 21, 1996 respectively). Because each alternative evaluated in this EIS involves some period of wet storage prior to implementation, the potential for processing fuels which are determined to present health and safety vulnerabilities is applicable to all the alternatives. DOE notes that processing for health and safety reasons is already authorized under existing analyses.

New Processing/Packaging Technologies

This alternative would include evaluating one or more cost-effective treatment or packaging technologies as described in the Record of Decision (61 FR 25092, May 17, 1996) for the Proposed Nuclear Weapons Nonproliferation Policy Concerning Foreign Research Reactor Spent Nuclear Fuel EIS. Most of these technologies would employ packaging or processing activities that would not separate fissile material from fission products. In the SRS Spent Nuclear Fuel Management EIS, DOE will evaluate the potential impacts of the application of these technologies to the spent nuclear fuel that is the subject of this EIS for the purpose of placing these materials in forms suitable for geologic disposal.

Dry Storage

This alternative assesses the potential impacts associated with the construction and operation of a facility (Transfer and Storage Facility) to receive, characterize, condition, package, and dry store SNF prior to shipment to a geologic repository for disposal. DOE would evaluate dry storage for managing existing stable spent nuclear fuel inventories as well as future receipts.

Conventional Processing

This alternative would involve processing spent nuclear fuel in the existing chemical separation facilities. For foreign research reactor spent fuel, this alternative would be applicable only to address health and safety concerns, as described above. For stable non-foreign research reactor SNF, DOE would evaluate the potential environmental impacts associated with processing, even where not required for health or safety concerns. This alternative could result in the separation of some fissile materials (generally, highly enriched uranium) from the spent nuclear fuel, which would be blended down to low-enriched uranium prior to removing the material from the processing facility complex. Low-enriched uranium is not weapons-grade nuclear material. Some amount of plutonium-239 would also be separated.

However, there would be no plutonium-239 separated from the vast majority of the fuel, even in instances where plutonium-239 may be present. Plutonium-239 separation would only occur in cases where it was required in order to ensure criticality safety in high-level waste tanks and the subsequent high-level waste vitrification process. In any case, no effort would be made to maintain the purity of the plutonium-239. DOE would process the plutonium to metal for storage in accordance with the DOE standard for storage of plutonium prior to the application of International Atomic Energy Agency (IAEA) safeguards. Any separated plutonium-239 would be placed under IAEA control when such controls are instituted.

Identification of Environmental and Other Issues

DOE has identified the following issues for analysis in the EIS. Additional issues may be identified during the scoping process, and DOE specifically solicits comments on the appropriateness of these issues for consideration in the EIS.

1. Public and worker safety: radiological and nonradiological impacts of the alternatives, including potential effects on workers and the public from the normal operation and accident conditions.

2. Impacts to plants, animals, and habitat, including impacts to wetlands, and threatened and endangered species and their habitat.

3. The consumption of natural resources and energy including water, natural gas, and electricity.

4. Socioeconomic impacts to affected communities from the operations labor force and any required construction labor force, and support services, in the SRS region of influence.

5. Potential disproportionately high or adverse human health or environmental impacts on minority and low-income populations.

6. Transportation of spent nuclear fuel to the Savannah River Site. DOE believes that these impacts are adequately addressed in other environmental impact statements and intends to incorporate the analysis by reference into this EIS.

7. Impacts on cultural resources, historic, archaeological, scientific, or culturally important sites.

8. Status of compliance with all applicable Federal, state, and local statutes and regulation; required Federal and state environmental consultations and notifications; and DOE orders on waste management, waste minimization initiatives, and environmental protection.

9. Potential impact on U.S. nonproliferation policy, especially as the actions considered may produce weapons usable fissile materials that may need to be safeguarded.

10. Cumulative impacts from the proposed action and other past, present, and reasonably foreseeable actions at the Savannah River Site.

11. Potential irreversible and irretrievable commitments of resources.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5672–7]

Agency Information Collection Activities: Proposed Collection; Comment Request: Safe Drinking Water Act State Revolving Fund Program Guidance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following proposed Information Collection Request (ICR) to the Office of Management and Budget (OMB): Safe Drinking Water Act State Revolving Fund Program Guidance, insert OMB Control Number. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects for the proposed information collection as described below.

DATES: Comments must be submitted on or before March 3, 1997.

ADDRESSES: Comments may be mailed to Clifford Yee, Office of Wastewater Management (4204), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC. 20460.

FOR FURTHER INFORMATION CONTACT: Clifford Yee (202) 260–5822; FAX: (202) 260–0116; E-mail: yee.clifford@epamail.epa.gov.

SUPPLEMENTAL INFORMATION:

Affected Entities: Entities potentially affected by this action are the fifty states, Puerto Rico, and the recipients of assistance in each of these jurisdictions.

Title: Safe Drinking Water Act State Revolving Fund Program Guidance.

Abstract: The Safe Drinking Water Act (SDWA) Amendments of 1996 (Pub. L. 104–182) authorize the creation of Drinking Water State Revolving Fund (DWSRF) programs in each state and Puerto Rico to assist public water systems to finance the costs of infrastructure needed to achieve or maintain compliance with SDWA requirements and to protect public health. Section 1452 authorizes the Administrator of the U. S. Environmental Protection Agency (EPA) to award capitalization grants to the states and Puerto Rico which, in turn, provide low-cost loans and other types of assistance to eligible drinking water systems.

The information collection activities will occur primarily at the program level through the: (1) Capitalization

VOL 61 ISS 252 DEC 31 1996 UMI

Grant Application and Agreement/State Intended Use Plan, (2) Biennial Report, (3) Annual Audit, and (4) Assistance Application Review.

(1) Capitalization Grant Application and Agreement/State Intended Use Plan: The State must prepare a capitalization grant application that includes an Intended Use Plan (IUP) outlining in detail how it will use all the funds covered by the capitalization grant. States may, as an alternative, develop the IUP in two parts. One part that identifies the distribution and uses of funds among the various set-asides and the DW–SRF. The second part addresses project funding to be provided by the DW–SRF itself.

(2) Biennial Report: The state must agree to complete and submit a biennial report on the uses of the capitalization grant. The scope of the report must cover the DW–SRF and all other non-SRF activities included under the capitalization grant agreement. States which jointly administer DW–SRF and CW–SRF programs, in accordance with Section 1452(g)(1), may submit reports (according to the schedule specified for each program) which cover both programs.

(3) Annual Audit: The state must agree to conduct or have conducted a separate audit of its capitalization grant. The scope of the audit will cover the DW–SRF and all other activities included in the capitalization grant agreement. States which jointly administer DW–SRF and CW–SRF programs, in accordance with Section 1452(g)(1), may submit audits which cover both programs but which report financial information for each program separately.

(4) Assistance Application Review: States assist local applicants seeking financial assistance in preparing DW–SRF loan applications. States then review completed loan applications and verify that proposed projects will comply with applicable federal and state requirements.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15.

EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical or other technological collection techniques or other forms of information technology, e.g. permitting electronic submission of responses.

Burden Statement:

(1) Capitalization Grant Application and Agreement/State Intended Use Plan.

1997: 51 States × 360 Hours = 18,360 Burden Hours
1998: 51 States × 300 Hours = 15,300 Burden Hours
1999: 51 States × 300 Hours = 15,300 Burden Hours

(2) Biennial Report.

1997: 51 States × 200 Hours = 10,200 Burden Hours
1999: 51 States × 250 Hours = 12,750 Burden Hours

(3) Annual Audit.

1997: 51 States × 80 Hours = 4,080 Burden Hours
1998: 51 States × 80 Hours = 4,080 Burden Hours
1999: 51 States × 80 Hours = 4,080 Burden Hours

(4) Loan Application Review.

1997: 51 States × 60 Applications × 40 Hours = 122,400 Burden Hours
1998: 51 States × 75 Applications × 40 Hours = 153,000 Burden Hours
1999: 51 States × 90 Applications × 40 Hours = 183,600 Burden Hours

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; and transmit or otherwise disclose the information.

Dated: December 20, 1996.

Alfred W. Lindsey,

Acting Director, Office of Wastewater Management.

Agency Information Collection Activities for Prevention of Significant Deterioration (PSD) and Nonattainment New Source Review (NSR)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability of Information Collection Request (ICR) and Supporting Statement.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following continuing ICR to the Office of Management and Budget (OMB): *Information Collection Request for 40 CFR part 51 and 52 Prevention of Significant Deterioration and Nonattainment New Source Review:* OMB No. 2060–003, Exp. March 31, 1997. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted to the EPA on or before March 3, 1997.

ADDRESSES: Comments should be addressed to Dennis Crumpler, NSR ICR Project Manager, Integrated Implementation Group, Information Transfer and Program Integration Division (MD–12), Office of Air Quality Planning and Standards, U.S. EPA, Research Triangle Park, North Carolina 27711. Copies of the ICR Renewal draft Supporting Statement and other background information may be obtained from the ICR Project Manager at the address above, or it may be retrieved electronically from the NSR Bulletin Board ("News/Bulletins" Menu) located on the Office of Air Quality Planning And Standards Technology Transfer Network (TTN). Access to the TTN is via a computer and communications software at (919) 541–5742. The TTN may be accessed via Internet at the following addresses. TELNET:<ttnbbs.rtpnc.epa.gov>; FTP:<ttnftp.rtpnc.epa.gov>; and WWW:<ttnwww.rtpnc.epa.gov>. For assistance in accessing the TTN, contact the TTN Help Desk at (919) 541–5384 in Research Triangle Park, North Carolina, 1:00 p.m. to 5:00 p.m. eastern standard time.

FOR FURTHER INFORMATION CONTACT: Dennis Crumpler, the current NSR ICR project manager at (919) 541–0871.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those which must submit an application for a permit

to construct a new or modify an existing source of air pollution, permitting agencies which review the permit applications, and members of the public who are due the opportunity to comment on permitting actions.

Title: *Information Collection Request for 40 CFR part 51 and 52 Prevention of Significant Deterioration and Nonattainment New Source Review:* OMB No. 2060–007, Exp. March 31, 1997. Abstract: Part C of the Clean Air Act (Act)—"Prevention of Significant Deterioration," and part D—"Plan Requirements for Nonattainment Areas" requires all States to adopt preconstruction review programs for new or modified stationary sources of air pollution. Implementing regulations for State adoption of these two NSR programs into their State Implementation Plan (SIP) are promulgated at 40 CFR 51.160 through 51.166 and appendix S. Federal permitting regulations are promulgated at 40 CFR 52.21 for PSD areas that are not covered by a SIP program.

In order to receive a construction permit for a major new source or major modification, the applicant must conduct the necessary research, perform the appropriate analyses and prepare the permit application with documentation to demonstrate that their project meets all applicable statutory and regulatory NSR requirements. Specific activities and requirements are listed and described in the draft Supporting Statement for the ICR.

Permitting agencies, either State, local or Federal, review the permit application to affirm the proposed source or modification will comply with the Act and applicable regulations. The permitting Agency then provides for public review of the proposed project and issues the permit based on its consideration of all technical factors and public input. The EPA, more broadly, reviews a fraction of the total applications and audits the State and local programs for their effectiveness. Consequently, information prepared and submitted by the source is essential for the source to receive a permit, and for Federal, State and local environmental agencies to adequately review the permit application and thereby properly administer and manage the NSR programs.

To facilitate adequate public participation, information that is submitted by sources as a part of their permit application, should generally be a matter of public record. See sections 165(a)(2) and 110(a)(2) (C), (D) and (F) of the Act. Notwithstanding, to the extent that the information required for the completeness of a permit is proprietary, confidential, or of a nature that it could impair the ability of the source to compete in the market place, that information is collected and handled according to EPA's policies set forth in title 40, chapter 1, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2). See also section 114(c) of the Act.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Since the last ICR renewal in September 1995, there have been no regulatory changes to affect the previous estimates of the number of respondents or the hourly burdens relative to the activities associated with NSR requirements.[1] Consequently the estimated average annual burden to industry respondents for this collection of information is approximately 649 hours for each of 320 part C PSD permits (responses); 445 hours for each of 590 part D nonattaiment permits, and about 8 hours for each of 19,500 minor source permits. The projected industry costs are approximately $31 thousand for each part C source, $21 thousand for part D sources, and $380 for each minor NSR source. These costs are determined by multiplying the estimated number of hours for each burden category by $47.00 per hour. This hourly rate represents a mixture of 75 percent technical staff and 25 percent management effort. Hourly rates for in-house and contractor effort are believed to be the same; although an average 30 percent of the burden is believed to be contracted. The estimated total annual burden to industry respondents is about 626 thousand hours and a commensurate cost of $30.6 million which includes direct costs of about $1.2 million for preconstruction monitoring. The estimated burden to State and local permitting Agencies is 272 hours per part C permit, 109 hours for a part D permit and 10 hours for a minor NSR permit. The cumulative burden and cost is 346 thousand hours and $12.8 million. The annual estimated burden for the EPA is 16 thousand hours and $594 thousand.

The NSR permit application burden and cost is up-front, so it does not require amortization over the life of the source. There are no operating and maintenance costs. All reporting and compliance monitoring costs associated with the implementation of a source's permitting requirements should be reflected in the burden associated with compliance assurance monitoring regulations, and the appropriate SIP or operating permit program. Therefore, the second and third year ICR burden and costs of the NSR program are zero for each respondent, and the net present value of the costs of the NSR rules are equal to the cost of the first year outlay. Because the average number of permits issued each year is expected to remain relatively constant, the program is expected to result in the same average burden and cost each year.

Based on limited information, EPA has estimated that few small businesses will experience a significant adverse

[1] On July 23, 1996 the EPA proposed regulatory revisions that if adopted would substantially reduce overall burden of the NSR programs, primarily by reducing the number of sources that would require a major source permit. See 61 FR 38249. The ICR will be revised coincident with the promulgation of the final rulemaking expected in early 1998.

VOL 61 ISS 252 DEC 31 1996 UMI

impact due to administrative burden of the NSR Program. The projected burden also reflects consideration of environmental justice factors, which may influence certain major source permitting actions.

The EPA will consider all comments submitted in response to this notice when preparing the ICR renewal and supporting statement for submittal to OMB.

Dated: December 20, 1996.

Robert G. Kellam,

Director, Information Transfer and Program Integration Division.

Agency Information Collection Activities: Proposed Collection; Comment Request; Request for Information for the Bioremediation Field Initiative Database Systems

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): Request for Information for the Bioremediation Field Initiative Database Systems, EPA ICR No. 1672.01, OMB Control No. 2080048, expires 04/30/97. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before March 3, 1997.

ADDRESSES: Office of Research and Development. A copy of the ICR without charge, can be obtained at: http://www.epa.gov/ORD/WebPubs/biorem

FOR FURTHER INFORMATION CONTACT: Fran Kremer, 513–569–7346, KREMER.FRAN@EPAMAIL.EPA.GOV

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those that are involved in the use of innovative technologies at Superfund sites, such as state and local governments, businesses, and nonprofit institutions.

Title: Request for Information for the Bioremediation Field Initiative Database Systems, OMB Control No. 20800048, expires 04/30/97.

Abstract: This is an ICR renewal for gathering information on the design, operation, and performance of biological treatment technologies from remediation experts and managers working at sites where biological treatment technologies are being tested or implemented. The authority for collecting information on innovative treatment technologies is described at Section 311 of the Superfund Amendments and Reauthorization Act, Section 8003 of the Resource Conservation and Recovery Act, Section 7001 of the Oil Pollution Act, and Section 10 of the Toxic Substance Control Act. The information will help the EPA to deploy innovative technologies more quickly at Superfund and other sites.

Selected respondents are asked to complete and return, via mail, a two-part questionnaire. The first part requests general site information, such as location, contacts, contaminants, and legislative authority under which the site is being remediated. The second part requests site-specific biotechnology information, such as the stage of the operation, wastes and media being treated, cleanup level goals, and the performance and cost of the treatment. All responses are strictly voluntary. Following the initial questionnaire, respondents receive followup questionnaires on a semi-annual basis to update the information already provided. EPA has developed an easy-to-use PC-based version of the questionnaire that is currently in use. To run the electronic questionnaire, the user must have access to a Windows-capable IBM-compatible PC, preferably 486-class or better. The PC questionnaire has several benefits:

- Questions that apply only under particular circumstances (i.e., are dependent on previous responses) are only presented to the user as necessary.
- Data validations are performed optionally as the user is filling out the questionnaire and are required when a respondent is ready to submit the data to EPA. Data validation conditions are reported with an explanation of the problem/situation and recommended corrective action(s).
- Pick lists are provided for several questions, so that user may choose an item from a list rather than enter the full text using the keyboard.

Repsondents may utilize either the paper- or the PC-based questionnaire, whichever they prefer. In each case, when respondents are updating the site records for sites that are already in the Bioremediation Field Intitative database, the questionnaire shows the site's complete responses from past questionnaires, so that information that has not changed need not be reentered. Respondents with access to the Internet may express comments or request assistance using an e-mail account that is identified in each questionnaire mailing. Each form of the questionnaire is updated occasionally between data collection cycles to include prominent new technologies and contaminants as they are identified in prior collection efforts.

EPA compiles information from completed questionnaires into the Bioremediation Field Initiative computer database. EPA developed a software program called the Bioremediation in the Field Search System (BFSS) to search, view, and report information in the database. BFSS is available to the public via computerized bulletin boards, or interested parties may obtain a copy of BFSS by mail by calling the Bioremediation Field Initiative hotline (513 569–7562) and requesting a copy. The next update to BFSS (scheduled for the Spring of 1997) is also anticipated to be available on the Internet. The Bioremediation Field Initiative database currently contains information on over 465 sites, and approximately 100 new sites are expected to be included in the next update of BFSS. Anyone with access to an IBM-compatible 286–AT class computer equipped with DOS 3.3 or better may run BFSS. The Bioremediation Field Initiative database also has appeared in the Bioremediation in the Field bulletin, published quarterly and distributed to approximately 3,500 addressees who have registered for Bioremediation Field Initiative mailings. Each site contains contact information for one or more individuals associated with the regulatory authority or application of bioremediation technology at the site. Remediation professionals may contact individuals with common site conditions to share information. Summary statistics may be drawn from the database to elucidate trends in bioremediation.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the

functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The following burden figures are taken from the currently approved ICR (Attachment A):

Respondent type	Burden hours
First-time respondents	5.0
Update respondents	1.0
No-change respondents	0.5
Nonrespondents	0.25
Total	6.75

Respondents type	Respondents			
	Period one	Period two	Yearly	Total burden hours
First-time respondents	50	50	100	500.0
Update respondents	499	482	931	931.0
No-change respondents	129	139	268	134.0
Nonrespondents	102	110	212	53.0
Total	730	781	1511	161[illegible].0

(First-time respondents fill out a questionnaire for the first time, entering data for a site not previously included in the Bioremediation Field Initiative database. Update respondents receive a questionnaire containing the current record of site data in the Bioremediation Field Initiative database and enter information to make the information current. No-change respondents receive a questionnaire containing the current record of site data in the Bioremediation Field Initiative database, review the information and find that it is current; therefore, they need not modify information to make the site current. Nonrespondents receive the questionnaire, review it, and elect not to respond.)

Each year, the burden figures increase somewhat, as first-time respondents are added to the database. In subsequent years, first-time respondents will be divided among the other respondent types. This growth is offset slightly as sites are removed from the data collection cycle—most typically if the site activity is completed, but for other reasons as well.

For the purposes of this burden estimate, burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information, search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: December 20, 1996.

Robert A. Olexsey,

Director, LRPCD.

BILLING CODE 6560–50–M

[FRL–5673–1]

California State Nonroad Engine and Vehicle Pollution Control Standards; Authorization of State Standards; Notice of Decision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice regarding authorization of state standards.

SUMMARY: EPA is authorizing California to enforce regulations for exhaust emission standards and test procedures for nonroad recreational vehicles and engines including: off-road motorcycles, all-terrain vehicles (ATVs), golf carts, go-karts 25 horsepower and above, and specialty vehicles less than 25 horsepower; pursuant to section 209(e) of the Clean Air Act.

ADDRESSES: The Agency's decision document containing an explanation of the Administrator's decision, as well as all documents relied upon in reaching that decision, including those submitted by the California Air Resources Board (CARB), are available for public inspection in the Air and Radiation Docket and Information Center in Docket A–95–17 during the working hours of 8:00 a.m. to 5:30 p.m., at the Environmental Protection Agency, Air Docket (6102), Room M–1500, Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460. Copies of the decision can be obtained from EPA's Vehicle Program and Compliance Division by contacting David Dickinson, as noted below.

FOR FURTHER INFORMATION CONTACT: David Dickinson, Attorney/Advisor, Vehicle Program and Compliance Division (6405J), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460. Telephone: (202)233–9256. Electronic mail: dickinson.david@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: I have decided to authorize California to enforce regulations for standards and test procedures for nonroad engines and vehicles pursuant to section 209(e) of the Clean Air Act, as amended (Act), 42 U.S.C. 7543. These regulations establish exhaust emission standards and test procedures for off-road motorcycles and

ATVs produced on or after January 1, 1997, establish a zero-emission standard for golf carts produced on or after January 1, 1997, establish exhaust emission standards and test procedures for go-karts 25 horsepower and above produced on or after January 1,1997, and established that specialty vehicles less than 25 horsepower and under, produced on or after January 1, 1995 (please see the discussion below for when enforcement of standards for such vehicles may take place), comply with the current exhaust emission standards applicable to utility equipment engines in California and further comply with a second tier of standards commencing January 1, 1999. A comprehensive description of these California regulations can be found in the decision document for this authorization and in materials submitted by CARB.

On the basis of the record before me, I cannot make the findings required to deny authorization under section 209(e)(2) of the Act. Therefore, I am authorizing California to enforce these regulations.

On June 21, 1995, EPA published a notice of opportunity for a public hearing and a request for written comments concerning an authorization request received from the California Air Resources Board (CARB).[1] EPA received no request for a hearing and therefore no hearing was held. EPA received written comments from the New York State Department of Environmental Conservation, Toro Company, Ransomes Cushman Ryan, and CARB. Consequently, this determination is based on the written submissions from CARB, the written comments submitted in response to the above-mentioned notice, and all other relevant information.[2]

Section 209(e) of the Act as amended, 42 U.S.C. 7543(e), addresses state regulation of nonroad engines and vehicles. EPA issued on July 20, 1994 a final regulation to implement section 209(e).[3] Section 209(e)(1) preempts states from regulating new engines which are used in construction equipment or vehicles or used in farm equipment or vehicles and which are smaller than 175 horsepower and new locomotives or new engines used in locomotives. The section 209(e) regulation sets forth definitions for these preempted categories of engines.

For those pieces of equipment or vehicles other than those a State is permanently preempted from regulating under section 209(e)(1), the State of California may promulgate standards regulating such equipment or vehicles provided California complies with section 209(e)(2). The section 209(e) rule provides that if certain criteria are met, the Administrator shall authorize California to adopt and enforce standards and other requirements relating to the control of emissions from such vehicles or equipment. The criteria include consideration of whether California arbitrarily and capriciously determined that its standards are, in the aggregate, at least as protective of public health and welfare as applicable Federal standards; whether California needs state standards to meet compelling and extraordinary conditions; and whether California's standards and accompanying enforcement procedures are consistent with section 209.

California determined that its standards and test procedures would not cause California emission standards, in the aggregate, to be less protective of public health and welfare as the applicable Federal standards. Information presented to me by parties opposing California's authorization request did not demonstrate that California arbitrarily or capriciously reached this protectiveness determination. Therefore, I cannot find California's determination to be arbitrary or capricious.

CARB has continually demonstrated the existence of compelling and extraordinary conditions justifying the need for its own motor vehicle pollution control program. In addition, CARB provided information regarding actions taken by the California Legislature in an effort to address the current air quality conditions in California, directing CARB to consider adopting regulations for off-road engines. No information has been submitted to demonstrate that California no longer has a compelling and extraordinary need for its own program. Based on previous showings in the context of nonroad authorizations and CARB's submissions to the record regarding the status of air quality in the state, I agree that compelling and extraordinary conditions warrant the need for California's own emissions program. Thus, I cannot deny the waiver on the basis of the lack of compelling and extraordinary conditions.

CARB has submitted information that the requirements of its emission standards and test procedures do not violate the permanent preemption provisions of section 209(e)(1), do not violate the motor vehicle preemption provisions of section 209(a), and are technologically feasible and present no inconsistency with Federal requirements and are, therefore, consistent with section 209 of the Act.

No information has been submitted to demonstrate that California did not satisfy its burden of demonstrating that its emission standards and test procedures do not violate section 209(e)(1). No information has been submitted to demonstrate that California's emission standards and test procedures violate section 209(a). Information submitted to me by parties opposing California's authorization request did not satisfy the burden of persuading EPA that the standards are not technologically feasible within the available lead time, considering costs. In addition, no information has been submitted to demonstrate that California's certification test procedures are inconsistent with Federal certification test procedures. Accordingly, I cannot make the determinations required for a denial of this authorization request under section 209(e) of the Act, and therefore, I authorize the State of California to enforce these regulations.

As explained in the decision document noted above and by the section 209(e) regulation, California can not enforce its standards and test procedures for recreational vehicles until it receives authorization from EPA. Therefore, California is now authorized to enforce its standards and test procedures for specialty vehicles below 25 horsepower and to enforce its standards and test procedures for other recreational vehicles according to the enforcement dates set forth within the recreational vehicle regulation.

My decision will affect not only persons in California but also the manufacturers outside the State who must comply with California's requirements in order to produce nonroad vehicle engines for sale in California. For this reason, I hereby determine and find that this is a final action of national applicability.

Under section 307(b)(1) of the Act, judicial review of this final action may be sought only in the United States Court of Appeals for the District of Columbia Circuit. Petitions for review must be filed by March 3, 1997. Under section 307(b)(2) of the Act, judicial review of this final action may not be obtained in subsequent enforcement proceedings.

As with past waiver decisions, this action is not a rule as defined by Executive Order 12866. Therefore, it is exempt from review by the Office of Management and Budget as required for rules and regulations by Executive Order 12866.

[1] 60 FR 32314 (June 21, 1995).

[2] This information is contained in Docket A–95–17.

[3] See 59 FR 36969 (July 20, 1994) codified at 40 C.F.R. Part 85, Subpart Q, §§ 85.160–85.1606.

VOL 61 ISS 252 DEC 31 1996 UMI

In addition, this action is not a rule as defined in the Regulatory Flexibility Act, 5 U.S.C. 6601(2). Therefore, EPA has not prepared a supporting regulatory flexibility analysis addressing the impact of this action on small business entities.

Finally, the Administrator has delegated the authority to make determinations regarding authorizations under section 209(e) of the Act to the Assistant Administrator for Air and Radiation.

Dated: December 23, 1996.

Richard D. Wilson,

Acting Assistant Administrator for Air and Radiation.

Proposed Settlement Agreement; Ozone Nonattainment Areas; 15% VOC FIPs for Washington, D.C., Baltimore MD, and Philadelphia PA

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed settlement agreement.

SUMMARY: In accordance with Section 113(g) of the Clean Air Act ("Act"), as amended, 42 U.S.C. 7413(g), notice is hereby given of a proposed settlement agreement concerning litigation instituted against the Environmental Protection Agency ("EPA") by the Sierra Club Legal Defense Fund, et. al. The lawsuit concerns EPA's alleged failure to perform a nondiscretionary duty with respect to promulgating a federal implementation plan ("FIP") to reduce volatile organic compound ("VOC") emissions by fifteen percent [15%] from 1990 levels, under Act section 182(b)(1), in the Washington, D.C., Baltimore MD, and Philadelphia ozone nonattainment areas.

For a period of thirty [30] days following the date of publication of this notice, the Agency will receive written comments relating to the settlement agreement. EPA or the Department of Justice may withhold or withdraw consent to the proposed settlement agreement if the comments disclose facts or circumstances that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

Copies of the settlement agreement are available from Phyllis Cochran, Air and Radiation Division (2344), Office of General Counsel, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460, (202) 260–7606. Written comments should be sent to Howard J. Hoffman at the above address and must be submitted on or before January 30, 1997.

Dated: December 24, 1996.

Scott C. Fulton,

Acting General Counsel.

ENVIRONMENTAL PROTECTION AGENCY (EPA)

[FRL–5672–4]

Gulf of Mexico Program's Joint Policy Review Board and Management Committee Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting of the Joint Policy Review Board and Management Committee of the Gulf of Mexico Program.

SUMMARY: The Gulf of Mexico Program's Joint Policy Review Board and Management Committee will hold a meeting at the Doubletree Hotel, New Orleans, Louisiana.

FOR FURTHER INFORMATION CONTACT: James D. Giattina, Director, Gulf of Mexico Program Office, Building 1103, Room 202, John C. Stennis Space Center, Stennis Space Center, MS 39529–6000, at (601) 688–3726.

SUPPLEMENTARY INFORMATION: A meeting of the Joint Policy Review Board and Management Committee of the Gulf of Mexico Program will be held at the Doubletree Hotel, 300 Canal Street, New Orleans, LA. The committee will meet from 10:00 a.m. to 3:00 p.m. on January 29. Agenda items will include: Overview of the GMP Process Model; Management Committee Organizational Recommendations; Hypoxia; Shellfish; and Education and Outreach. The meeting is open to the public.

James D. Giattina,

Director, Gulf of Mexico Program.

POLICY REVIEW BOARD & MANAGEMENT COMMITTEE MEETING—AGENDA JANUARY 29, 1997

	Topic	Lead	Desired outcome
Tuesday, January 29:			
10:00–10:15 am	Welcome—Review of the Meeting Objectives and Agenda	Jan Saginaw Jimmy Palmer	Official opening of the meeting and identification of any final adjustments to the meeting agenda.
10:15–10:30 am	Overview of the GMP Process Model	Jim Giattina	Consensus agreement between the partners on a formal workflow process model for the GMP.
10:30–11:00 am	Presentation of the MC Organizational Recommendations	Roxane Dow Stan Meiberg	Comprehensive understanding of the recommendations.
11:00–11:45 am	Discussion—Organziational Recommendations	Roxane Dow Stan Meiberg	Consensus agreement between the partners on a final organizational structure for the GMP.
11:45–12:00 noon	Break (Set-up Time for Working Lunch)		
12:00–12:45 pm	"Hypoxia" —Discusison of Current Plans and Activities for FY 97	Hiram Boone—IMT (Natural Resources Conservation Service)	Consensus agreement between the partners to move ahead on plans and activities presented.
12:45–1:15 pm	"Shellfish" —Discussion of Current Plans and Activities for FY 97	Tom Herrington—IMT (Food & Drug Administration)	Consensus agreement between the partners to move ahead on plans and activities presented.
1:15–1:30 pm	Break		

POLICY REVIEW BOARD & MANAGEMENT COMMITTEE MEETING—AGENDA JANUARY 29, 1997—Continued

	Topic	Lead	Desired outcome
1:30–1:45 pm	"Education & Outreach" —Discussion of Current Plans and Activities for FY 97	Bob Baker—IMT (National Park Service)	Consensus agreement between the partners to move ahead on plans and activities presented.
1:45–2:30 pm	Partners Roundtable —Discussion of Current and Emerging Opportunities to Enhance Program Success and Effectiveness	Jim Giattina	To promote an open exchange of ideas as to ways of seizing the maximum return on the partners investment in the GMP.
2:30–3:00 pm	Summary of Meeting Agreements	Jim Giattina	Summary consensus on agreements and directions established.
3:00 pm	Workshop Adjourned

BILLING CODE 6560–50–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

Crisis Counseling Assistance and Training

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: FEMA gives notice that the extension period for the Oklahoma regular crisis counseling program for disaster survivors of the Oklahoma City bombing is extended from 180 days to 11 months. The severity of the emotional trauma resulting from the bombing warrants an extension of an additional 11 months.

EFFECTIVE DATE: February 1, 1997.

FOR FURTHER INFORMATION CONTACT: Ron Goins, Human Services Division, Response and Recovery Directorate, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–4677.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) is charged with coordinating Federal disaster assistance under the provisions of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (the Act) when the President has declared a major disaster. FEMA provided funding for a regular crisis counseling program to help those suffering the trauma resulting from the April 19, 1995, bombing of the Alfred P. Murrah Federal Building.

FEMA received a request from the State of Oklahoma to extend the otherwise applicable time limitations authorized by section 416 of the Act, so that the State can provide additional mental health services that are critically needed for citizens during the recovery operation. The extent of the emotional impact on all citizens of Oklahoma is of such magnitude that continuation of disaster mental health counseling beyond the normal crisis counseling time period is necessary.

The Director, Center for Mental Health Services (CMHS), as the delegate to FEMA for the Secretary, Department of Health and Human Services, helps FEMA implement crisis counseling training and assistance. FEMA believes there was a well-established need for continuation of the regular crisis counseling program beyond a 90-day extension. Based upon the sound CMHS recommendation, FEMA has approved an 11-month extension to the time period for the Oklahoma regular crisis counseling program.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Dated: December 16, 1996.

Lacy Suiter,

Associate Director.

BILLING CODE 6718–02–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act, including whether the acquisition of the nonbanking company can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 27, 1997.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Pontotoc BancShares Corp., Pontotoc, Mississippi; to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank of Pontotoc, Pontotoc, Mississippi.

B. Federal Reserve Bank of Dallas (Genie D. Short, Vice President) 2200 North Pearl Street, Dallas, Texas 75201-2272:

1. Laguna Bancshares, Inc., Big Lake, Texas, and Laguana Bancshares of Delaware, Inc., Dover, Delaware; to

become bank holding companies by acquiring 100 percent of the voting shares of Big Lake Bank, N.A., Big Lake, Texas.

2. Waggoner National Bancshares, Inc., Vernon, Texas, and Vernon Bancshares, Inc., Dover, Delaware; to become bank holding companies by acquiring 100 percent of the voting shares of The Waggoner National Bank of Vernon, Vernon, Texas.

C. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. BSM Bancorp, Santa Maria, California; to become a bank holding company by acquiring 100 percent of the voting shares of Bank of Santa Maria, Santa Maria, California.

2. Bank SinoPac, Taipei, Taiwan, Republic of China, and SinoPac Bancorp, Los Angeles, California; to become bank holding companies by acquiring 100 percent of the voting shares of Far East National Bank, Los Angeles, California.

Board of Governors of the Federal Reserve System, December 26, 1996.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-F

Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR Part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.25 of Regulation Y (12 CFR 225.25) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act, including whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 16, 1997.

A. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Bank of Montreal, Toronto, Canada; to engage *de novo* through its subsidiary, Cebra, Inc., Toronto, Canada, in providing mortgage lending software to potential borrowers and in data processing activities, pursuant to § 225.25(b)(7)) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 26, 1996.

William W. Wiles,

Secretary of the Board.

Sunshine Act Meeting

AGENCY HOLDING THE MEETING: Board of Governors of the Federal Reserve System.

TIME AND DATE: 11:00 a.m., Monday, January 6, 1997.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: December 27, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

FEDERAL TRADE COMMISSION

[Dkt. C–3679]

Ford Motor Company; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair or deceptive acts or practices and unfair methods of competition, this consent order prohibits, among other things, a Michigan-based automobile manufacturer from making any representation about the efficacy of any automotive cabin air filter in the reduction or removal of pollutants, unless such representations are true and the respondent possesses reliable and competent scientific evidence to substantiate such representations.

DATES: Complaint and Order issued August 22, 1996.[1]

FOR FURTHER INFORMATION CONTACT: Linda Badger, Federal Trade Commission, San Francisco Regional Office, 901 Market Street, Suite 570, San Francisco, CA 94103, (415) 356–5270.

SUPPLEMENTARY INFORMATION: On Thursday, April 18, 1996, there was published in the **Federal Register**, 61 FR 16920, a proposed consent agreement with analysis In the Matter of Ford Motor Company, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

A comment was filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

SUPPLEMENTARY INFORMATION: On Thursday, June 20, 1996, there was published in the **Federal Register**, 61 FR 31526, a proposed consent agreement with analysis In the Matter of Raytheon Company, for the purpose of soliciting publish comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46, Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

BILLING CODE 6750–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Committee on Vital and Health Statistics: Meetings

Pursuant to the Federal Advisory Committee Act, the Department of Health and Human Services announces the following advisory committee meetings.

Name: National Committee on Vital and Health Statistics (NCVHS), Subcommittee on Privacy and Confidentiality.

Times and Dates: 9 a.m.–5 p.m.—January 13–14, 1997.

Place: Third Floor Meeting Room, Best Western-Key Bridge, 1850 North Fort Myer Drive, Arlington, VA 22209.

(The hotel is located one half block from the Rosslyn Metrorail station.)

Times and Dates: 9 a.m.–5 p.m.—February 3–4, 1997; 9 a.m.–5 p.m.—February 18–19, 1997.

Place: Hubert H. Humphrey Building, 200 Independence Avenue, SW, Room 503A, Washington, D.C. 20201.

(The Humphrey Building is located one block from Federal Center SW Metrorail station.)

Status: Open.

Purpose

Under the administrative simplification subtitle of the Health Insurance Portability and Accountability Act of 1996 (Pub. L. 104–191, section 264) the Secretary of Health and Human Services is required to submit a report to the Congress containing detailed recommendations on standards with respect to the privacy of individually identifiable health information. The report is due in August 1997.

The Secretary is required to consult the National Committee on Vital and Health Statistics in preparing these recommendations. As part of the consultation process the Committee will submit recommendations to the Secretary in the Spring of 1997. The Committee is holding hearings in the course of developing its recommendations.

The purpose of the hearings is to explore in detail the options, choices, and trade-offs that must be a part of any health privacy legislation. To the greatest extent possible, the discussion will focus on specific alternatives that have been identified in legislative proposals, on the consequences for patients and institutions of new rules for use and disclosure of health data, and on how legislation will operate in the real world. Issues will cover the full range of fair information practices, patient rights, limitations on use and disclosure of identifiable information, health identification number, preemption of state laws, and privacy-enhancing technology.

Specifically, comment will be sought on policies for the use and disclosure of individually-identifiable health information from the following types of entities and with respect to the following subject areas:

A. Public Health Agencies and Health Researchers.

B. Health System Oversight Activities (Public and Private) and Law Enforcement.

C. Health Care Providers; Claims Processors and other Intermediaries.

D. Insurers and Employers; Pharmaceutical Industry.

E. Federal Agencies; Social Welfare Agencies; Technology.

F. Privacy and Patient Interest Groups.

The Committee is inviting specific witnesses to address these issues.

Members of the public who wish to provide comments may do so in the form of written statements, to be received by the completion of the last meeting, addressed as follows: NCVHS Subcommittee on Privacy and Confidentiality, c/o Division of Data Policy, Office of the Assistant Secretary for Planning and Evaluation, U.S. Department of Health and Human Services, 440D Humphrey Building, 200 Independence Avenue, S.W., Washington, DC 20201, (for delivery services, address is 200 Independence Ave., SW)

The meetings are open to the public, with attendance limited to space available. There will be a period of time at the end of each day of hearings for members of the public to make oral statements, not exceeding 3 minutes in length, on the subjects being considered by the committee. Members of the pubic who wish to speak are asked to place their names on a list in the hearing room on the day of the meeting. The number of speakers will be limited by the time available, and speakers will be heard in the order in which they place their names on the list. Written comments are encourage; please provide 20 copies.

NOTICE: For meetings in the Humphrey Building please observe the following: In the interest of security, the Department has instituted stringent procedures for entrance to the Hubert H. Humphrey building by non-government employees. Thus, persons without a government identification card should plan to arrive at the building each day either between 8:30 and 9:00 a.m. or 12:20 and 1:00 p.m. so they can be escorted to the meeting. Entrance to the meeting at other times during the day cannot be assured.

CONTACT PERSON FOR MORE INFORMATION: Substantive program information as well as roster of committee members may be obtained from John P. Fanning, Office of the Assistant Secretary for Planning and Evaluation, DHHS, Room 440D Humphrey Building, 200 Independence Avenue S.W., Washington, D.C. 20201, telephone (202) 690–7100, e-mail jfanning@osaspe.dhhs.gov; or Marjorie S. Greenberg, Acting Executive Secretary, NCVHS, NCHS, CDC, Room 1100, Presidential Building, 6525 Belcrest Road, Hyattsville, Maryland 20782, telephone (301) 436–7050.

Dated: December 23, 1996.

James Scanlon,

Director, Division of Data Policy, Office of the Assistant Secretary for Planning and Evaluation.

[FR Doc. 96–33256 Filed 12–30–96; 8:45 am]

BILLING CODE 4151–04–M

VOL 61 ISS 252 DEC 31 1996 UMI

Health Resources and Services Administration

Emergency Medical Services for Children Demonstration Grants

AGENCY: Health Resources and Services Administration (HRSA), DWHHS.

ACTION: Notice of availability of funds.

SUMMARY: The HRSA in collaboration with the National Highway Traffic Safety Administration (NHTSA) announces that approximately $4.1 million in fiscal year (FY) 1997 funds will be available for grants authorized under section 1910 of the PHS Act. These discretionary grants will be made to States or accredited schools of medicine to support projects for the expansion and improvement of emergency medical services for children (EMSC). Within the HRSA, EMSC grants are administered by the Maternal and Child Health Bureau (MCHB).

The NHTSA participated with the MCHB in developing program priorities for the EMSC program for FY 1997. The NHTSA will share the Federal monitoring responsibilities for EMSC awards made during FY 1997 and will continue to provide ongoing technical assistance and consultation in regard to the required collaboration/linkages between applicants and their Highway Safety Offices and Emergency Medical Services Agencies for the State(s). Grantees funded under this program are expected to work collaboratively with the State agency or agencies administering the Maternal and Child Health (MCH) and the Children with Special Health Needs (CSHN) programs under the MCH Services Block Grant, Title V of the Social Security Act (42 U.S.C. 701).

The PHS is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS led national activity for setting priority areas. The EMSC grant program will directly address the Healthy People 2000 objectives related to emergency medical services and trauma systems linking prehospital, hospital, and rehabilitation services in order to prevent trauma deaths and long-term disability. Potential applicants may obtain a copy of Healthy People 2000 (Full Report: Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report: Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402–9325 (telephone 202–783–3238).

The PHS strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. In addition, Public Law 103–227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of a facility) in which regular or routine education, library, day care, health care or early childhood development services are provided to children.

ADDRESSES: Federal Register notices and application guidance for MCHB programs are available on the World Wide Web via the Internet at address: http://www.os.dhhs.gov/hrsa/mchb. Click on the file name you want to download to your computer. It will be saved as a self-extracting (Macintosh or) WordPerfect 5.1 file. To decompress the file once it is downloaded, type in the file name followed by a <return>. The file will expand to a WordPerfect 5.1 file.

For applicants for Emergency Medical Services for Children Demonstration Grants who are unable to access application materials electronically, a hard copy (Revised PHS form 5161–1, approved under OMB clearance number 0937–0189) must be obtained from the HRSA Grants Application Center. The Center may be contacted by: Telephone Number: 1–888–300–HRSA, FAX Number: 301–309–0579, E-mail Address: HRSA.GAC@ix.netcom.com. Completed applications should be returned to: Grants Management Officer (CFDA #93.127), HRSA Grants Application Center, 40 West Gude Drive, Suite 100, Rockville, Maryland 20850.

DATES: The application deadline date is April 11, 1997. Competing applications will be considered to be on time if they are either: (1) Received on or before the deadline date, or (2) postmarked on or before the deadline date and received in time for orderly processing. Applicants should request a legibly dated receipt from a commercial carrier or the U.S. Postal Service, or obtain a legibly dated U.S. Postal Service postmark. Private metered postmarks will not be accepted as proof of timely mailing.

Late competing applications or those sent to an address other than specified in the **ADDRESS** section will be returned to the applicant.

FOR FURTHER INFORMATION: Requests for technical or programmatic information from MCHB should be directed to Jean Athey, Ph.D., or Mark E. Nehring, D.M.D., M.P.H., Division of Maternal, Infant, Child and Adolescent Health, Maternal and Child Health Bureau, Health Resources and Services Administration, Room 18A–39, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, telephone 301–443–2250. Requests for technical or programmatic information from NHTSA should be directed to Garry Criddle, R.N., CDR, USCG/USPHS, Department of Transportation, NHTSA EMS Division, NTS–42, 400 Seventh Street SW, Washington, DC 20590, telephone 202–366–5440. Requests for information concerning fiscal, business or administrative management issues should be directed to: Maria Carter, Grants Management Specialist, Grants Management Branch, Maternal and Child Health Bureau, 5600 Fishers Lane, Room 18–12, Rockville, Maryland 20857, telephone 301–443–1440.

The EMSC program funds three national EMSC resource centers that are available to provide technical assistance and support to applicants, particularly in the areas of: (1) Understanding EMSC terminology; (2) developing a manageable approach to EMSC implementation; (3) obtaining local support for the grant application process; (4) facilitating development of community linkages for a collaborative effort; (5) identifying products of previously-funded EMSC projects of interest to potential applicants; (6) offering advice on grant writing; and (7) data collection and analysis. Applicants may contact: James Seidel, M.D., Ph.D., or Deborah Henderson, R.N., M.A., National EMSC Resource Alliance, Research and Education Institute, Harbor/UCLA Medical Center, 1001 West Carson Street, Suite S, Torrance, CA 90502, telephone 310–328–0720; or Jane Ball, R.N., Dr. P.H., EMSC National Resource Center, Children's National Medical Center, Emergency Trauma Services, 111 Michigan Ave., N.W., Washington, DC 20010, telephone 202–745–5188; or J. Michael Dean, M.D., National EMSC Data Analysis Resource Center, University of Utah School of Medicine, 309 Park Building, Salt Lake City, UT 84112, telephone 801–588–3280.

SUPPLEMENTARY INFORMATION:

Program Background and Objectives

The Emergency Medical Services for Children statute (Section 1910 of the PHS Act, as amended) establishes a program of two-year grants to States, through a State-designated agency, or to accredited medical schools within States, for projects for the expansion and improvement of emergency medical services for children who need treatment for trauma or critical illness. For purposes of this grant program, the term "State" includes the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, the Northern Mariana

Islands, Guam, American Samoa, the Republic of Palau, the Republic of the Marshall Islands, and the Federated States of Micronesia. The term "school of medicine" is defined as having the same meaning as set forth in Section 799(1)(A) of the PHS Act (42 U.S.C. 295p(1)(A)). "Accredited" in this context has the same meaning as set forth in section 799(1)(E) of the PHS Act (42 U.S.C. 295p(1)(E)). It is the intent of this grant program to stimulate further development or expansion of ongoing efforts in the States to reduce the problems of life-threatening pediatric trauma and critical illness. The Department does not intend to award grants which would duplicate grants previously funded under the Emergency Medical Services Systems Act of 1972 or which would be used simply to increase the availability of emergency medical services funds allotted to the State under the Preventive Health Services Block Grant.

Eligible Applicants

State governments and accredited schools of medicine are the only eligible applicants for funding under the EMSC program. It is anticipated that the application for planning and implementation funds will come, in most States, from the organization responsible for EMS for children, which will most likely be the Emergency Medical Services agency in the State. Because the purpose of the partnership grants is to solidify the integration of a pediatric perspective within the basic EMS system, the only eligible applicant for that category is the State EMS agency, unless the State specifically requests and designates another State entity or a school of medicine and provides a convincing justification for doing so. Because of the importance of linking EMS activities with the system of care for children, the involvement of the State MCH program in all grant categories is strongly encouraged. Such involvement could be demonstrated either by a co-signed application or by a letter of support.

If the applicant is a school of medicine, the application must be endorsed by the State EMS office. The State's endorsement constitutes an acknowledgement that the applicant has consulted with the State and that the State has been assured that the applicant will work with the State on the proposed project. No application from a school of medicine will be considered for funding without the endorsement. Further information on application endorsements can be found in the program guidance. Any State (or medical school within that State) may apply for any category of grant, subject to the following considerations:

- For Category (1) Planning Grants, States (or medical schools within those States) that have received prior EMSC State systems grants may not apply for a planning grant.
- For Category (2) Implementation Grants, applications from States (and medical schools within those States) that have not previously received EMSC program funds, or that have received only partial support under this program as part of a regional alliance, will receive preference for funding in this category. This means that approved applications from States (and medical schools within those States) with no or very limited prior EMSC program support will be funded ahead of approved applications from outside this group.
- For Category (3) State Partnership Grants, States that have previously received EMSC funds may apply for a State partnership grant, as long as they will not also be receiving implementation or "enhancement" funds during the project period of the partnership grant. States that have not previously received EMSC funds are advised to apply first for planning category funds.
- For Category (4) Targeted Issues Grants, eligibility is not affected by previous receipt of other EMSC funding.

Funding of an application for a planning grant or for an implementation grant bars a State from future competitions for that category.

Funding Categories

There will be four categories of competition for funding this year: State planning grants, State implementation grants, State partnership grants, and targeted issue grants.

Category (1): State Planning Grants

Planning grants are intended for States that have never received an EMSC grant and that are not at a stage of readiness to initiate a full-scale implementation project. States (or medical schools within those States) that have not received prior EMSC implementation grants are the only applicants eligible for this category. Planning grants are designed to enable a State to assess needs and develop a strategy to begin to address those needs. Funds may be used to hire staff to assist in the assessment of EMSC needs of the State; obtain technical assistance from national, State, regional or local resources; help formulate a State plan for the integration of EMSC services into the existing State EMS plan; and conduct a needs assessment. A comprehensive approach, addressing physical, psychological, and social aspects of EMSC along the continuum of care, should be reflected. An ongoing working relationship with Federal EMSC program staff and resource center staff, beginning with the initiation of a planning grant application, is desirable. The project period is one year.

Category (2): State Implementation Grants

Implementation grants will improve the capacity of a State's EMS program to address the particular needs of children. Implementation grants are used to assist States in integrating research-based knowledge and state-of-the-art systems development approaches into the existing State EMS, MCH and CSHN systems, using the experience and products of previous EMSC grantees. The program components of these grants should reflect the goals of the MCHB/NHTSA Five Year Plan for EMSC. This plan outlines the direction of the EMSC program and identifies specific objectives for the program. It builds on the 1993 report for EMSC conducted by a blue ribbon Institute of Medicine panel. The plan will be included with the application kit. Depending upon the appropriation of funds, project periods are up to two years.

Proposals are sought which include strategies and/or models to ensure that pediatric emergency care is family centered. "Family centered" includes the following key elements: maximum possible involvement of families in all phases of the EMSC continuum of care; clear and continuous communication between family members and the emergency care team; attention to the psychological needs of all family members; cultural competence of providers; consumer (parental) involvement in planning and needs assessment; organizational support for the formation of parent involvement groups; and ongoing partnerships with such groups. For this competition, we intend to fund applications from States (and medical schools within those States) that have not as yet received support, or that have received only partial support under this program as part of a regional alliance. This means that approved applications from States (and medical schools within those States) with no or very limited prior EMSC program support will be funded before approved applications from outside this group.

Applications will not be accepted for both planning grants and state implementation grants simultaneously from the same State.

VOL 61 ISS 252 DEC 31 1996 UMI

Category (3): State Partnership Grants

State partnership grants will fund activities that represent the next logical step or steps to take to institutionalize EMSC within EMS and to continue to improve and refine EMSC. The program components of these grants should reflect the goals and objectives of the MCHB/NHTSA Five Year Plan for EMSC. For example, funding might be used to improve linkages between local and regional or State agencies, to develop pediatric standards for a region, or to assure effective field triage of the child in physical or emotional crisis to appropriate facilities and/or other resources. States that have previously received EMSC funds may apply for a State partnership grant, as long as they will not also be receiving continuation funding for a State implementation grant or a previously awarded "System Enhancement Grant" during the project period of the State partnership grant. The project period is up to two years, depending upon the availability of funds.

Category (4): Targeted Issue Grants

The fourth funding category is that of targeted issue grants on topics of importance to EMSC. Targeted issue grants are intended to address specific, focused issues related to the development of EMSC capacity. Proposals under this category must have a well-conceived methodology for evaluation of the impact of the activity. The EMSC Five Year Plan identifies several activities judged to be appropriate for support through targeted issue grants for FY 1997. They include the following:

1. Cost-Benefit Analyses Related to EMSC

Very little information is available on the costs related to different aspects of EMSC, and yet such information is critical to decision making. Projects in this category may include topics such as the following:

- Evaluation of the cost effectiveness of different EMSC program configurations (such as different approaches to medical control, categorization, and regionalization).
- Assessment of the marginal incremental cost of different approaches to improving EMSC.
- Evaluation of the benefits vs. costs of different treatment modalities.

2. Implications of Managed Care for EMSC

The changes in reimbursement mechanisms due to managed care are having profound effects on the provision of medical care. It is unclear how these changes may affect pediatric emergency care. Projects in this category may include topics such as:

- Analyses of the impact of managed care and other financing mechanisms on pediatric emergency medical services.
- Analyses of the impact of differing reimbursement policies in contiguous jurisdictions on pediatric patients.
- Demonstrations and analyses of collaborative activities with managed care plans designed to improve access and/or quality of pediatric emergency care.

3. Evaluations of EMSC Components

If EMSC is to improve and provide quality services, evaluation is critical. Projects in this category may include topics such as:

- Development of quality standards for the care of children within the EMS system and analyses of how well the system performs.
- Pilot testing and evaluation of model quality improvement programs in EMS/EMSC.
- Models to determine if the right patients are getting to the right levels of care.
- Analyses of outcomes for children using EMS systems.
- National study to identify and document the extent to which EMSC components have been implemented in each State.

4. Risk-Taking Behaviors of Children and Adolescents

EMS and emergency department health professionals are uniquely positioned to provide interventions to reduce the incidence of injuries or medical conditions (e.g., noncompliant child or adolescent with a chronic condition, such as diabetes) resulting from risk-taking behavior. Projects in this category can be directed to development and evaluation of materials and strategies in one of the following areas:

- Unintentional injury prevention
- Violence or suicide prevention
- Illegal drug usage
- Integration of mental health services with preventive interventions (injury or medical)

Projects are especially sought to develop, implement, and evaluate model guidelines for emergency departments to use following injury to reduce risk-taking behaviors. Projects are also sought that link prevention with managed care quality indicators.

5. Models for Improving the Care of Culturally Distinct Populations

Health care providers are often required to meet the needs of culturally and ethnically distinct children and families, but little training is provided in this area. Projects in this category can be directed to one or more of the following:

- Development, implementation and evaluation of education and training programs in cultural sensitivity for prehospital providers, nurses, and physicians.
- Development (or translation), implementation, and evaluation of discharge, injury prevention and health care materials for low literacy populations and for culturally and/or ethnically distinct populations.

6. Children's Emergencies in Disasters

Local, regional, and State disaster plans typically do not address the training and equipment necessary to meet the special needs of children in disasters. Projects in this category should seek to overcome these deficiencies and assess the outcome. Curricula are not being solicited in this category. Examples of projects appropriate for this category include the following:

- Development and evaluation of a strategy to integrate pediatrics into existing disaster plans, in particular focusing on the following components: Training, equipment, psychosocial support, system access and cost reimbursement, shelter services, and mitigation.
- Identification of key data to be collected and analysis of data on children's health and mental health needs in disasters.

7. Coordination Between Primary Care Providers and EMSC

Primary care providers are important partners on the EMSC team; however, their role is often overlooked, particularly with respect to injury prevention, emergency care, and discharge planning. Projects in this category may include topics that promote collaboration between primary care providers and EMS, including topics such as the following:

- Implementation and evaluation of model programs designed to improve a primary care provider's office-preparedness to handle increased patient acuity and emergencies.
- Development and evaluation of an information system to provide access to patient information and to enhance communication and coordination between emergency care providers and primary care providers.

Proposals may be submitted on emerging issues that are not included in the above list. However, any such proposal must demonstrate relevance to

the EMSC Five Year Plan and must make a persuasive argument that the issue is particularly critical. The justification provided should clearly link the activities in the application with the Plan's objectives. The project period is up to two years, depending upon the availability of funds.

Availability of Funds

Approximately $4.1 million will be available for competitive grants. It is anticipated that a total of 47 grants will be awarded for the project periods shown in the four identified funding categories:

Category	Grants	Amount	Project Period (year(s))
State Planning Grants	2	$ 50,000	1
State Implementation Grants	4	250,000	2
State Partnership Grants	32	60,000	2
Targeted Issue Grants	7	50–150,000	2

Special Concerns

HRSA's Maternal and Child Health Bureau places special emphasis on improving service delivery to women, children and youth from communities with limited access to comprehensive care. In order to assure access and cultural competence, it is expected that projects will involve individuals from the populations to be served in the planning and implementation of the project. The Bureau's intent is to ensure that project interventions are responsive to the cultural and linguistic needs of special populations, that services are accessible to consumers, and that the broadest possible representation of culturally distinct and historically underrepresented groups is supported through programs and projects sponsored by the MCHB. This same special emphasis applies to improving service delivery to children with special health care needs.

In keeping with the goals of advancing the development of human potential, strengthening the Nation's capacity to provide high quality education by broadening participation in MCHB programs of institutions that may have perspectives uniquely reflecting the Nation's cultural and linguistic diversity, and increasing opportunities for all Americans to participate in and benefit from Federal public health programs, HRSA will place a funding priority on projects from Historically Black Colleges and Universities (HBCU) or Hispanic Serving Institutions (HSI) in all categories in this notice for which applications from academic institutions are encouraged. This is in conformity with the Federal Government's policies in support of White House Initiatives on Historically Black Colleges and Universities (Executive Order 12876) and Educational Excellence for Hispanic Americans (Executive Order 12900). An approved proposal from a HBCU or HSI will receive a 0.5 point favorable adjustment of the priority score in a 4 point range before funding decisions are made.

Evaluation Protocol

A maternal and child health discretionary grant project, including any project awarded as part of the Emergency Medical Services for Children Demonstration Grants program, is expected to incorporate a carefully designed and well planned evaluation protocol capable of demonstrating and documenting measurable progress toward achieving the project's stated goals. The protocol should be based on a clear rationale relating the grant activities, the project goals, and the evaluation measures. Wherever possible, the measurements of progress toward goals should focus on health outcome indicators, rather than on intermediate measures such as process or outputs. A project lacking a complete and well-conceived evaluation protocol as part of the planned activities will not be funded.

Project Review and Funding

The Department will review applications in the preceding funding categories as competing applications and will fund those which, in the Department's view, are consistent with the statutory purpose of the program, with particular attention to children from culturally distinct populations and children with special health care needs; and that best meet the purposes of the EMSC program and address achievement of applicable Healthy People 2000 objectives related to emergency medical services and trauma systems.

Review Criteria

The review of applications will take into consideration the following criteria:

- For Category (1) State Planning Grants:

—Evidence of the State's commitment to improve pediatric emergency care services and to continue with EMSC program implementation.

—The adequacy of the applicant's proposed method to identify problems and conduct a needs assessment.

—Evidence of the applicant's understanding of obstacles to EMSC activity in the past, and the completeness of proposed strategies to overcome these obstacles.

—The adequacy of the applicant's proposed planning process for improving EMSC.

—The soundness of the methods the applicant will use to: (1) recruit, select and assemble appropriate participants, including members of culturally distinct populations, with demonstrated expertise and experience in EMS; trauma systems; child health issues; and emergency care for children; and (2) obtain input from potential consumers (i.e., families) of a State EMSC plan.

—Reasonableness of the proposed budget, soundness of the arrangements for fiscal management, effectiveness of use of personnel, and likelihood of project completion within the proposed grant period.

- For Category (2) State Implementation Grants:

—The adequacy of the applicant's understanding of the problem of pediatric trauma and critical illness in the State and/or project area, including the special problems of (a) children with special health care needs and their families; and (b) minority children and families (including American Indian/Alaska Natives, and Native Hawaiians).

—The appropriateness of project objectives and outcomes in relation to the specific nature of the problems identified by the applicant.

—The adequacy of the proposed methodology for achieving project goals and objectives.

—The soundness of the plan for evaluating progress in achieving project objectives and outcomes.

—The adequacy of the plan for organizing and carrying out the project.

—The reasonableness of the proposed budget and soundness of the applicant's plans for fiscal management.

—The qualifications and experience of the Project Director and proposed staff.

—The extent to which the applicant will employ products and expertise of EMSC programs in other States, especially of current and former grantees of the Federal EMSC program. Such resources include, but are not limited to, technical assistance and consultation.

—The extent to which the applicant demonstrates the involvement and participation of consumers (i.e., families) and parent involvement groups in planning, needs assessment, and project implementation.

—The extent to which the project gives special emphasis to the concerns identified in the Special Concerns section (see page 19–20).

—The evidence that the applicant will collaborate and coordinate with other participants in the EMSC continuum including, but not limited to, the State EMS agency (if not the applicant) the State MCH/CSHN agency, the State Highway Safety Office, other relevant State agencies, tribal nations, State and local professional organizations, private sector voluntary organizations, business organizations, parent advocacy groups, consumer or community representatives, hospital organizations, and any other ongoing Federally-funded projects in EMS, injury prevention, and rural health.

—The extent to which the applicant demonstrates a multi-disciplinary approach to EMSC system development, including providers at all levels (e.g., physicians, nurses, EMTs, social workers, and others appropriate to project activities).

—The adequacy of the applicant's plan to integrate pediatric emergency care into the primary care delivery system.

—The adequacy with which the applicant addresses institutionalization of the proposed project.

• For Category (3) State Partnership Grants:

—The adequacy of the applicant's plan to institutionalize EMSC into EMS.

—The evidence that the applicant will collaborate and coordinate with other participants in the EMSC continuum including, but not limited to, the State MCH/CHSN agency, the State Highway Office, tribal nations, State and local professional organizations, private sector voluntary organizations, parent advocacy groups, consumer or community representatives, hospital organizations, and any other ongoing Federally-funded projects in EMS, injury prevention, and rural health.

—The reasonableness of the proposed budget and soundness of the applicant's plans for fiscal management.

• For Category (4),Targeted Issue Grants:

—The appropriateness of project objectives and outcomes in relation to the specific nature of the problems identified by the applicant.

—The adequacy of the proposed methodology for achieving project goals and outcome objectives.

—The soundness of the plan for evaluating progress in achieving project objectives and outcomes.

—The reasonableness of the proposed budget and soundness of the arrangements for fiscal management.

—The adequacy of the plan for organizing and carrying out the project.

—The qualifications and experiences of the Project Director and proposed staff.

—The extent to which the project addresses the issues raised in the section on Special Concerns.

—The relevance of the proposed project to the MCHB/NHTSA Five Year Plan for EMSC.

Allowable Costs

The HRSA may support reasonable and necessary costs of EMSC Demonstration Grant projects within the scope of approved projects. Allowable costs may include salaries, equipment and supplies, travel, contracts, consultants, and others, as well as indirect costs as negotiated. The HRSA adheres to administrative standards reflected in the Code of Federal Regulations, 45 CFR Part 92 and 45 CFR Part 74.

Public Health System Reporting Requirements

This program is subject to the Public Health System Reporting Requirements (approved under OMB No. 0937–0195). Under these requirements, community-based nongovernmental applicants must prepare and submit a Public Health System Impact Statement (PHSIS). The PHSIS is intended to provide information to State and local health officials to keep them apprised of proposed health services grant applications submitted by community-based nongovernmental organizations within their jurisdictions. Community-based non-governmental applicants are required to submit the following information to the head of the appropriate State and local health agencies in the area(s) to be impacted no later than the Federal application receipt due date:

(a) A copy of the face page of the application (SF 424).

(b) A summary of the project (PHSIS), not to exceed one page, which provides:

(1) A description of the population to be served.

(2) A summary of the services to be provided.

(3) A description of the coordination planned with the appropriate State or local health agencies.

The project abstract may be used in lieu of the one-page PHSIS, if the applicant is required to submit a PHSIS.

Executive Order 12372

This program has been determined to be a program which is subject to the provisions of Executive Order 12372 concerning intergovernmental review of Federal programs by appropriate health planning agencies, as implemented by 45 CFR Part 100. Executive Order 12372 allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application packages to be made available under this notice will contain a listing of States which have chosen to set up such a review system and will provide a single point of contact (SPOC) in the States for review. Applicants (other than federally-recognized Indian tribal governments) should contact their State SPOCs as early as possible to alert them to the prospective applications and receive any necessary instructions on the State process. For proposed projects serving more than one State, the applicant is advised to contact the SPOC of each affected State. The due date for State process recommendations is 60 days after the application deadline for new and competing awards. The granting agency does not guarantee to "accommodate or explain" for State process recommendations it receives after that date. (See Part 148, Intergovernmental Review of PHS Programs under Executive Order 12372 and 45 CFR Part 100 for a description of the review process and requirements).

The OMB Catalog of Federal Domestic Assistance number is 93.127.

Dated: December 23, 1996.

Ciro V. Sumaya,

Administrator.

BILLING CODE 4160–15–P

Advisory Council; Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body are scheduled to meet during the month of February 1997:

Name: HRSA AIDS Advisory Committee.

Time: February 25–26, 1997 8:00 a.m.
Place: JW Marriott Hotel, Capitol Ballroom D, 1331 Pennsylvania Avenue, N.W., Washington, D.C. 20004.

The meeting is open to the public.

Agenda: The topics to be discussed include the Ryan White CARE Act Title IV program; pending HRSA reorganization; and access to treatment advances for HIV/AIDS.

Anyone requiring information regarding the subject Committee should contact Gloria Weissman, AIDS Program Office, Health Resources and Services Administration, Room 18A19, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–3478.

Agenda Items are subject to change as priorities dictate.

Dated: December 23, 1996.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160–15–P

Substance Abuse and Mental Health Services Administration (SAMHSA)

Notice of Meetings

Pursuant to Public Law 92–463, notice is hereby given of meetings of five Substance Abuse and Mental Health Services Administration committees (SAMHSA National Advisory Council, Center for Substance Abuse Prevention National Advisory Council, Center for Substance Abuse Treatment National Advisory Council, Center for Mental Health Services National Advisory Council, and the Advisory Committee for Women's Services) in January 1997.

The first meeting will be a combined session of the committees and will be open and include discussions on parity for alcohol, drug abuse and mental health services; implications of welfare reform for populations that SAMHSA serves; and future directions for the Agency's Knowledge Development and Application program. Attendance by the public will be limited to space available. Interested persons may present information or views, orally or in writing, on issues pending before the committees. Those desiring to make formal presentations should contact Dr. Mary C. Knipmeyer, Acting Associate Administrator for Program and Policy Coordination, SAMHSA, 5600 Fishers Lane, Room 12C–06, Rockville, Maryland, 20857, before January 10, and submit a brief statement of: the general nature of the information or arguments they wish to present, the names, addresses, and telephone number of proposed participants, identification of organizational affiliation, and an indication of the approximate time required to make their comments. Time for presentations may be limited by the number of requests. Photocopies, up to five pages of material, may be distributed at the meeting through the Executive Secretary, if provided by January 10.

Substantive program information may be obtained from the contact whose name and telephone number is listed below.

Committee Names:
Substance Abuse and Mental Health Services Administration National Advisory Council
Center for Substance Abuse Prevention National Advisory Council
Center for Substance Abuse Treatment National Advisory Council
Center for Mental Health Services National Advisory Council
Advisory Committee for Women's Services
Meeting Date: January 27, 1997
Place: Hyatt Regency Hotel, 1800 Presidents Street, Reston, Virginia
Open: January 27, 1997, 8:30 a.m. to 6:00 p.m.

The SAMHSA National Advisory Council will hold an individual meeting and a portion of the meeting will be open and will provide orientation sessions about the mission of the Agency for new members. Attendance by the public will be limited to space available. Interested persons may present information or views, orally or in writing, on issues pending before the SAMHSA Council. Those desiring to make formal presentations should notify the contact person before January 10, and submit a brief statement of: the general nature of the information or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments. Time for presentations may be limited by the number of requests, so photocopies may be distributed at the meeting through the Executive Secretary, if provided by January 10.

The meeting of the SAMHSA Council will also include a presentation and discussion of information about the Agency's procurement plans. Therefore, a portion of the meeting will be closed to the public as determined by the Administrator, SAMHSA in accordance with Title 5 U.S.C. 552b(c)(3) and 5 U.S.C. App. 2, Section 10(d).

A summary of the meeting and a roster of Council members may be obtained from: Ms. Susan E. Day, Program Assistant, SAMHSA National Advisory Council, 5600 Fishers Lane, Room 12C–15, Rockville, Maryland 20857. Telephone: (301) 443–4640.

Substantive program information may be obtained from the contact whose name and telephone number is listed below.

Committee Name:
Substance Abuse and Mental Health Services Administration National Advisory Council
Meeting
Dates: January 28, 1997
Place: Hyatt Regency Hotel, 1800 Presidents Street, Reston, Virginia
Closed: January 28, 1997, 9:00 a.m. to 9:30 a.m.
Open: January 28, 1997, 10:00 a.m. to 12:00 p.m.
Contact: Toian Vaughn, Executive Secretary, Parklawn Building, Room 12C–15, Telephone: (301) 443–4640, Fax: (301) 443–1450

The Center for Substance Abuse Prevention (CSAP) National Advisory Council will also hold an individual meeting and a portion of the meeting will include the presentation and discussion of the Center's procurement plans. Therefore, a portion of this meeting will be closed to the public as determined by the Administrator, SAMHSA, in accordance with Title 5 U.S.C. 552(b)(3) and 5 U.S.C. App. 2, section 10(d).

The agenda will also include a presentation from the Department of Education, discussions of administrative matters and announcements, and reports of workgroups of the SAMHSA National Advisory Council and the CSAP National Advisory Council.

A summary of this meeting and roster of Council members may be obtained from: Yuth Nimit, Ph.D., Executive Secretary, CSAP National Advisory Council, Rockwall II Building Suite 901, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone: (301) 443–8455.

Substantive program information may be obtained from the contact whose name and telephone number is listed below.

Committee Name: Center for Substance Abuse Prevention National Advisory Council
Meeting Date: January 28, 1997
Place: Hyatt Regency Hotel, 1800 Presidents Street, Reston, Virginia
Closed: January 28, 1997, 8:30 a.m. to 9:30 a.m.
Open: January 28, 1997, 9:30 a.m. to 4:30 p.m.
Contact: Yuth Nimit, Ph.D., Executive Secretary, Rockwall II Building, Suite 901, Telephone: (301) 443–8455

The Center for Substance Abuse Treatment (CSAT) National Advisory Council will also hold an individual meeting. The meeting will include the

review and discussion of information about the Center's procurement plans. Therefore, a portion of the meeting will be closed to the public as determined by the Administrator, SAMHSA, in accordance with Title 5 U.S.C. 552(b)(3) and 5 U.S.C. App. 2, sec. 10(d).

The agenda will also include discussions of the Center's policy issues and current administrative, legislative, and program developments.

A summary of the meeting and roster of Council members may be obtained from: Ms. Joann M. Exline, CSAT, Rockwall II Building, Suite 619, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone: (301) 443–8923.

Substantive program information may be obtained from the contact whose name and telephone number is listed below.

Committee Name: Center for Substance Abuse Treatment National Advisory Council
Meeting Date: January 28, 1997
Place: Hyatt Regency Hotel, 1800 Presidents Street, Reston, Virginia
Closed: January 28, 1997, 8:45 a.m. to 9:00 a.m.
Open: January 28, 1997, 9:00 a.m. to 5:30 p.m.
Contact: Marjorie M. Cashion, Executive Secretary, Rockwall II Building, Suite 619, Telephone: (301) 443–6077

Dated: December 23, 1996.

Jeri Lipov,

Committee Management Officer, Substance Abuse and Mental Health Services Administration.

BILLING CODE 4162–20–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK–962–1410–00–P; AA–9285]

Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14(h)(1) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(h)(1), will be issued to Calista Corporation for approximately 56.45 acres. The lands involved are in the vicinity of Nunivak Island, Alaska.

Seward Meridian, Alaska

T. 3 S., R. 102 W.,
Sec. 10.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the Anchorage Daily News. Copies of the decision may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7599 ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until January 30, 1997 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Patricia A. Baker,

Land Law Examiner, ANCSA Team, Branch of 962 Adjudication.

Sierra Front/Northwest Great Basin Resource Advisory Council—Notice of Meeting Locations and Times

AGENCY: Bureau of Land Management, Interior.

ACTION: Resource Advisory Council meeting locations and times.

SUMMARY: In accordance with the Federal Land Policy and Management Act and the Federal Advisory Committee Act of 1972 (FACA), the Department of the Interior, Bureau of Land Management (BLM) Council meetings will be held as indicated below. The agenda includes nature of issues to be addressed by RAC, how issues will be raised and how recommendations will be treated, how to deal with statewide issues; issues regarding the Black Rock Desert; BLM's "Vision for the Future" and RAC members predictions for the future; public comment period and determination of the subject matter for future meetings.

All meetings are open to the public. The public may present written comments to the council. Each formal council meeting will have a time allocated for public comments. The public comment period for the council meeting is listed below. Individuals who plan to attend and need further information about the meeting or need special assistance such as sign language interpretation or other reasonable accommodations, should contact Joan Sweetland at the Carson City Field Office, 1535 Hot Springs Road, Carson City, NV 89706, telephone (702) 885–6000.

DATES, TIMES: The council will meet on Friday, January 24th, 1997, at the Bureau of Land Management, Nevada State Office, 850 Harvard Way, Reno, NV 89520–0006 from 8:30 a.m. to 5:00 p.m. Public comment period will be at 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Joan Sweetland, Public Affairs Specialist, Carson City Field Office, telephone (702) 885–6000.

Dated: December 16, 1996.

Karl L. Kipping,

Associate District Manager.

BILLING CODE 4310–HC–M

[CO–932–1430–01; COC–58828]

Public Land Order No. 7232; Withdrawal of National Forest System Land for the Protection of Loveland Ski Area; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order withdraws 850 acres of National Forest System land from mining for 50 years to protect recreational resources and facilities at the Loveland Ski Area. The land has been and remains open to such forms of disposition as may by law be made of National Forest System land and to mineral leasing.

EFFECTIVE DATE: December 31, 1996.

FOR FURTHER INFORMATION CONTACT: Doris E. Chelius, BLM Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215-7076, 303-239-3706.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1988), it is ordered as follows:

1. Subject to valid existing rights, the following described National Forest System land is hereby withdrawn from location and entry under the United States mining laws (30 U.S.C. Ch. 2 (1988)), for the protection of planned and existing facilities at the Loveland Ski Area:

Sixth Principal Meridian

Arapaho National Forest

T. 4 S., R. 76 W.,

sec. 15, SE¼SW¼NW¼, SW¼SE¼NW¼, SW¼, W½NW¼SE¼, SE¼NW¼SE¼, SW¼SE¼, and W½SE¼SE¼;
sec. 16, SE¼NE¼SE¼, SW¼SW¼SE¼, E½SW¼SE¼, and SE¼SE¼;
sec. 22, W½NE¼NE¼, W½NE¼, S½SE¼NE¼, NW¼, NE¼SW¼, and N½SE¼;
sec. 23, SW¼SW¼NW¼, S½NE¼SW¼, NW¼SW¼, NE¼SE¼SW¼, and W½SE¼SW¼.

The area described contains 850 acres of National Forest System Land in Clear Creek County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of National Forest System land under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

3. This withdrawal will expire 50 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to Section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f) (1988), the Secretary determines that the withdrawal shall be extended.

Dated: December 6, 1996.

Bob Armstrong,

Assistant Secretary of the Interior.

BILLING CODE 4310–JB–P

AGENCY FOR INTERNATIONAL DEVELOPMENT

Housing Guaranty Program; Notice of Investment Opportunity

The U.S. Agency for International Development ("USAID") has authorized the guaranty of a loan as evidenced by the guaranteed promissory notes to be issued by Infrastructure Leasing & Financial Services Limited (the "Borrower") as part of USAID's development assistance program. USAID has approved the Tiruppur Area Development Programme for funding under the Financial Institution Reform and Expansion Program ("FIRE") of up to twenty five million dollars ($25,000,000). The proceeds of the loan will be used to finance a portion of the architectural, engineering and construction cost of a water and wastewater delivery, treatment and disposal systems for the City of Tiruppur, India and surrounding areas. At this time, the Borrower has authorized Siebert Brandford Shank & Co. ("Financial Advisor") to request sealed bids from eligible investors to purchase the notes under this program in the amount of twenty-five million U.S. Dollars (US $25,000,000) (the "Notes").

The full repayment of the Notes will be guaranteed by USAID. The USAID guaranty will be backed by the full faith and credit of the United States of America and will be issued pursuant to authority in Section 222 of the Foreign Assistance Act of 1961, as amended (the "Act").

The name and address of the Borrower's representatives to be contacted by interested U.S. lenders or investors, and the amount of the loan and project number are indicated below:

$25,000,000

USAID Project No: 386–HG–IV

Housing Guaranty Loan No.: 386–HG–015–AO1, 386–HG–016–AO1

Mr. Shahzaad Dalal, Infrastructure Leasing & Financial Services Ltd., Mahindra Towers, 4th Floor Dr. G.M. Bhosale Marg, Worli, Mumbai, INDIA 011–91–22–493–5148,011–91–22–493–0080 (fax)

Mr. Peter C. Wong, Siebert Brandford Shank & Co., 220 Sansome Street, 15th Floor, San Francisco, CA 94104, 415–439–4450, 415–439–4480 (fax).

Interested lenders and investors should contact the Borrower or its Financial Advisor to obtain a copy of the complete bid package which includes a Preliminary Offering Circular, an Official Bid Form, a Note Purchase Agreement and a Paying and Transfer Agency Agreement (together, the Bid Package) which contain the terms and conditions for the submission of sealed bids on the proposed guaranteed Notes under the Housing Guaranty Program. Interested lenders and investors should submit their bids to the Borrower's representatives, with a copy to USAID, by Wednesday, January 15, 1997, 11:00 a.m. (New York Time). Any bid submitted after the deadline will not be accepted.

The Borrower is currently considering the following structure on the proposed Notes:

Par Amount: U.S. $25,000,000.

Term: 30 years (final maturity).

Interest Rate: Floating rate based on a three-month LIBOR with quarterly reset.

Mandatory Redemption: The amortization of principal on the Notes will begin on May 1, 2007 with equal quarterly mandatory redemption of principal through final maturity on February 1, 2007.

Optional Redemption: The Notes are subject to redemption at the option of the Borrower as more fully described in the Bid Package.

Redemption in Connection with Project Agreement: USAID reserves the right to accelerate the loan in connection with a breach by the Borrower of the Project Agreement, dated March 8, 1994, between USAID and the Borrower; any such redemption would be at par plus accrued interest.

Closing Date: Closing will be within four (4) weeks after the acceptance of bids and award of the Notes to the bidder submitting the lowest effective interest cost to the Borrower. The award of the Notes to the winning bidder and the delivery of the Notes are subject to certain conditions required of the Borrower by USAID as set forth in agreements between USAID and the Borrower.

Lenders and investors eligible to receive the USAID guaranty are those specified in Section 238(c) of the Act. They are: (1) U.S. citizens; (2) domestic U.S. corporations, partnerships, or associations substantially beneficially owned by U.S. citizens; (3) foreign corporations whose share capital is at least 95 percent owned by U.S. citizens; and (4) foreign partnerships or associations wholly owned by U.S. citizens.

Information as to the eligibility of investors and other aspects of the USAID housing guaranty program can be obtained from: Ms. Viviann Gary, Director, Office of Environment and Urban Programs, U.S. Agency for International Development, 1601 Kent Street, Rosslyn, VA 22209, Telephone: (703) 875–4510, Facsimile: (703) 875–4639.

Dated: December 20, 1996.

Michael G. Kitay,

Assistant General Counsel, Bureau for Global Programs, Field Support and Research, U.S. Agency for International Development.

BILLING CODE 6116–01–M

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of December, 1996.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be

issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–32,881; National Food Products, Limited, Reading, PA

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

TA–W–32,836; Father & Sons Stores, Scranton, PA
TA–W–32,785; Midas International, Inc., North Brunswick, NJ
TA–W–32,842; Sara Lee Bodywear, Mcadoo, PA
TA–W–32,937; Cogema Resources, Inc., Pathfinder Mines Corp., Shirley Basin Mine, Mills, WY

The workers firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–32,894A; AMP, Inc., Gastonia, NC

The investigation revealed that criteria (1) and criteria (3) have not been met. A significant number or proportion of the workers did not become totally or partially separated as required for certification. Increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have not contributed importantly to the separations or threat thereof, and the absolute decline in sales or production.

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued; the date following the company name & location for each determination references the impact date for all workers for such determination.

TA–W–32,782; Hydro-Fit, Inc., Eugene, OR: September 30, 1995.
TA–W–32,904; James River Corp., Old Town, ME: July 22, 1996.
TA–W–32,897; Kibak Tile, Redmond, OR: October 15, 1995.
TA–W–32,009; Alde, Inc., San Frncisco, CA: November 18, 1995.
TA–W–32,848; Anchor Glass Container Corp., Zanesville Mould Div., Zanesville, OH: October 3, 1995.
TA–W–32,861; Keystone Fireworks & Speciality Co., Dunbar, PA: October 14, 1995.
TA–W–32,890; Lambda Electronics, Inc., McAllen, TX: October 18, 1995.
TA–W–32,894; AMP, Inc., Lowell, NC: October 28, 1995.
TA–W–32,690; Bruckner Manufacturing Corp., (Formerly Faberware, Inc), Bronx, NY: July 29, 1995.

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (P.L. 103–182) concerning transitional adjustment assistance hereinafter called (NAFTA–TAA) and in accordance with Section 250(a) Subchapter D, Chapter 2, Title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA–TAA issued during the month of November and December, 1996.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA–TAA the following group eligibility requirements of Section 250 of the Trade Act must be met:

(1) That a significant number of proportion of the workers in the workers' firm, or an appropriate subdivision thereof, (including workers in any agricultural firm or appropriate subdivision thereof) have become totally or partially separated from employment and either—

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) That imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased, and that the increases in imports contributed importantly to such workers' separations or threat of separation and to the decline in sales or production of such firm or subdivision; or

(4) That there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFTA–TAA

In each of the following cases the investigation revealed that criteria (3) and (4) were not met. Imports from Canada or Mexico did not contribute importantly to workers' separations. There was no shift in production from the subject firm to Canada or Mexico during the relevant period.

NAFTA–TAA–01289; Magnatek, Huntington, IN
NAFTA–TAA–01330; Jensports, Div. of Charland Sportswear, New Kensington, PA
NAFTA–TAA–01337; Rayonier, Inc., Port Angeles Mill, Port Angles,
WANAFTA–TAA–01347; AMP, Inc., Erie, PA
NAFTA–TAA–01368; Armour Swift Eckrich, El Paso, TX
NAFTA–TAA–01278; Fabry Glove & Mitten Co., Div., of Saranac Glove Co., Marinette, WI

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

NAFTA–TAA–01290; Sara Lee Bodywear, Mcadoo, PA

The investigation revealed that the workers of the subject firm did not produce an article within the meaning of Section 250(a) of the Trade Act, as amended.

Affirmative Determinations NAFTA–TAA

The following certifications have been issued; the date following the company name & location for each determination references the impact date for all workers for such determination.

NAFTA–TAA–01314; Kibak Tile, Redmond, OR: October 14, 1995.
NAFTA–TAA–01315; Hecht Manufacturing Co., Inc., Milwaukee, WI: October 30, 1995.
NAFTA–TAA–01346; Hamilton Beach—Proctor Silex, Inc., Southern Pines, NC: November 19, 1995.
NAFTA–TAA–01319; AMP, Inc., Lowell, NC: October 28, 1995.
NAFTA–TAA–01317; Timberline Forest Products, Burlington, WA: October 25, 1995.
NAFTA–TAA–01334; Wright-Bernet, Inc., Div. of Elkco Group, Inc., Hamilton, OH: November 5, 1995.
NAFTA–TAA–01342; Springs Industries, Springs Window Fashions, City of Industry, CA: October 24, 1995.
NAFTA–TAA–01335; Plaid Clothing Group, Inc., J. Schoeneman, Chambersburg, PA: November 5, 1995.
NAFTA–TAA–01324; Alde, Inc., San Francisco, CA: October 1, 1995.

NAFTA–TAA–01316; Lambda Electronics, Inc., McAllen, TX: October 18, 1995.

NAFTA–TAA–01338; Miller International, Inc., Rocky Mountain Clothing Co., Baxley, GA: October 31, 1995.

I hereby certify that the aforementioned determinations were issued during the month of December, 1996. Copies of these determinations are available for inspection in Room C–4318, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210 during normal business hours or will be mailed to persons who write to the above address.

Dated: December 20, 1996.

Linda G. Poole,

Acting Program Manager, Policy & Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Investigations Regarding Certifications of Eligibility to Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Program Manager of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Program Manager, Office of Trade Adjustment Assistance, at the address show below, not later than January 10, 1997.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Program Manager, Office of Trade Adjustment Assistance, at the address shown below, not later than January 10, 1997.

The petitions filed in this case are available for inspection at the Office of the Program Manager, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Ave, NW, Washington, DC 20210.

Signed at Washington, D.C. this 16th day of December, 1996.

Linda G. Poole,

Acting Program Manager, Policy & Reemployment Services, Office of Trade Adjustment Assistance.

Texaco Trading & Transportation, Incorporated; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Notice of Certification Regarding Eligibility to Apply for Worker Adjustment Assistance on August 8, 1996, applicable to all workers of Texaco Trading & Transportation, Incorporated located in Glendive, Montana. The notice was published in the **Federal Register** on August 26, 1996 (61 FR 43791).

At the request of the company, the Department reviewed the certification for workers of the subject firm. New findings show that worker separations have occurred at Texaco Trading & Transportation, Incorporated in Dickinson, North Dakota. The workers are engaged in activities related to the production of crude oil. Accordingly, the Department is amending the certification to include workers of the subject firm in Dickinson, North Dakota.

The amended notice applicable to TA–W–32,450 is hereby issued as follows:

"All workers of Texaco Trading & Transportation, Incorporated, Glendive, Montana (TA–W–32,450) and Dickinson, North Dakota (TA–W–32,450) who became totally or partially separated from employment on or after May 28, 1995 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed at Washington, D.C. this 9th day of December 1996.

Russell T. Kile,

Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Program Manager of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221 (a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Program Manager, Office of Trade Adjustment Assistance, at the address show below, not later than January 10, 1997.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Program Manager, Office of Trade Adjustment Assistance, at the address show below, not later than January 10, 1997.

The petitions filed in this case are available for inspection at the Office of the Program Manager, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 9th day of December, 1996.

Russell T. Kile,

Program Manager, Policy & Reemployment Services, Office of Trade Adjustment Assistance.

Mine Safety and Health Administration

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Underground Retorts

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA5) (44 U.S.C. 3506(c)(2)(A). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to the Underground Retorts. MSHA is particularly interested in comments which:

* Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

* Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

* Enhance the quality, utility, and clarity of the information to be collected; and

* Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed below in the Contact section of this notice.

DATES: Submit comments on or before March 3, 1997.

ADDRESSES: Written comments shall be mailed to Patricia W. Silvey, Director, Office of Standards, Regulations, and Variances, 4015 Wilson Boulevard, Room 627, Arlington, VA 22203–1984. Commenters are encouraged to send their comments on a computer disk, or via E-mail to psilvey@msha.gov, along with an original printed copy.

Ms. Sivley can be reached at (703) 235-1910 (voice) or (703) 235-5551 (facsimile).

FOR FURTHER INFORMATION CONTACT: George M. Fesak, Director, Office of Program Evaluation and Information Resources, U.S. Department of Labor, Mine Safety and Health Administration, Room 715, 4015 Wilson Boulevard, Arlington, VA 22203–1984. Mr. Fesak can be reached at gfesak@msha.gov (Internet E-mail), (703) 235–8378 (voice), or (703) 235–1563 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

This regulation pertains to the safety requirements to be followed by the mine operators in the use of underground retorts to extract oil from shale by heat or fire. Prior to ignition of retorts the mine operator must submit a written plan indicating the acceptable levels of combustible gases and oxygen; specifications and location of off-gas monitoring procedures and equipment; procedures for ignition of retorts and details of area monitoring and alarm systems for hazardous gases and actions to be taken to assure safety of miners.

II. Current Actions

This request for information contains provisions whereby mine operators can maintain compliance with the regulations and assure the safety of mining personnel where underground retorts are used.

Type of Review: Reinstatement.

Agency: Mine Safety and Health Administration.

Title: Underground Retorts.

OMB Number: 1219–0096.

Affected Public: Business or other for-profit.

Cite/Reference/Form/etc: 30 CFR 57.22401.

Total Respondents: 1.

Frequency: On occasion.

Total Responses: 1.

Average Time per Response: 160 hours.

Estimated Total Burden Hours: 160 hours.

Estimated Total Burden Cost: none.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: December 23, 1996.

BILLING CODE 7510–01–M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice.

SUMMARY: NARA is giving public notice that the agency has submitted to OMB

VOL 61 ISS 252 DE 31 1996 UMI

for approval the information collection described in this notice, which is used to request copies of land entry records in the National Archives of the United States. The public is invited to comment on the proposed information collection pursuant to the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted to OMB at the address below on or before January 30, 1997 to be assured of consideration.

ADDRESSES: Comments should be sent to: Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: Ms. Maya Bernstein, Desk Officer for NARA, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the proposed information collections and supporting statements should be directed to Mary Ann Hadyka or Nancy Allard at telephone number 301–713–6730, or fax number 301–713–7270.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13), NARA invites the general public and other Federal agencies to comment on proposed information collections. NARA published a notice of proposed collection for this information collection on August 22, 1996 (61 FR 43388). No comments were received. The previous notice referred in the title of the information collection and description to "land claim records." The actual title of the form is "National Archives Order for Land Entry Files" and this notice correctly carries that title. NARA has submitted the described information collection to OMB for approval.

In response to this notice, comments and suggestions should address one or more of the following points: (a) Whether the proposed collection information is necessary for the proper performance of the functions of NARA; (b) the accuracy of NARA's estimate of the burden of the proposed information collections; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of information technology. In this notice, NARA is soliciting comments concerning the following information collection

Title: National Archives Order for Land Entry Files

OMB number: New collection; number to be assigned.

Agency form number: NATF 84

Type of review: Regular.

Affected public: Individuals who wish to order copies of land entry records in the National Archives of the United States.

Estimated number of respondents: 14,000.

Estimated time per response: 10 minutes.

Frequency of response: On occasion (when respondent wishes to search for or order copies of land entry records in the custody of the National Archives of the United States).

Estimated total annual burden hours: 2,334 (rounded off number).

Abstract: The NATF form 84 will be used by researchers to request that NARA search for and make copies of pages from Federal land entry case files in the custody of the National Archives. These records generally date from 1800 to approximately 1965. Submission of requests on a form is necessary to handle in a timely fashion the volume of requests received for these records (approximately 14,00 per year) and the need to obtain specific information from the researcher to search for the records sought. The form will be printed on carbonless paper as a multi-part form to allow the researcher to retain a copy of his request and NARA to respond to the researcher on the results of the search or to bill for copies if the researcher wishes to order the copies. As a convenience, the form will allow researchers to provide credit card information to authorize billing and expedited mailing of the copies. NARA is not able at present to accept electronic submission of requests; however, we intend to address security of financial information and other issues as we continue our efforts to increase electronic access to NARA and its holdings.

Dated: December 20, 1996.

L. Reynolds Cahoon,

Assistant Archivist for Policy and IRM Services.

[FR Doc. 96–33110 Filed 12–30–96; 8:45 am]

BILLING CODE 7515–01–M

Office of Records Administration; Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration, Office of Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that (1) Propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before February 14, 1997. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

ADDRESSES: Address requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, College Park, MD 20740. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in the parentheses immediately after the name of the requesting agency.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority,

includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. Department of the Air Force (N1–AFU–96–7). Medical waste management records at medical treatment facilities and base civil engineer offices.

2. Department of the Air Force (N1–AFU–97–4). Implant device and/or medical equipment log/database proposed for long-term retention.

3. Department of Commerce, Patent and Trademark Office (N1–241–96–5). Updated Chapter of a comprehensive schedule, covering records of the Trademark Trial and Appeals Board, the Board of Patent Appeals and Interferences, the Office of the Chief Information Officer, and related program offices.

4. Department of Health and Human Services (N1–468–97–1). Pre-grant clearance files of the Office for Civil Rights.

5. Department of State, Bureau of Consular Affairs (N1–59–97–10). Immigrant Control and Reporting System (ICARS) maintained by Visa Services.

6. Department of State, All Foreign Service Posts (N1–84–97–4). Diversity Visa Applicant System (DVACS).

7. U.S. Agency for International Development, Europe and New Independent States (N1–286–96–3). Routine, facilitative, and duplicative records.

8. Bonneville Power Administration (N1–305–96–2). Records covering billing source data.

9. General Services Administration, Federal Supply Service (N1–137–97–1 through 6). Electronic records relating to sales, transportation, and supplies.

10. Panama Canal Commission (N1–185–96–2). Marine Traffic Control and Ship Data Bank electronic systems.

11. Panama Canal Commission (N1–185–97–1). Communications and mail management records.

12. Susquehanna River Basin Commission (N1–220–96–11). Budget justifications, working papers to reports and comprehensive plans, and subject and intergovernmental affairs files.

13. United States Information Agency, Office of Research N1–306–96–3). Routine, facilitative, and duplicative records of the Office of Research and predecessor units. Policy records scheduled as permanent.

Dated: December 30, 1996.

James W. Moore,

Assistant Archivist for Records Administration.

BILLING CODE 7515–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–331]

IES Utilities, Inc.; Notice of Withdrawal of Application For Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of IES Utilities Inc. (the licensee) to withdraw its January 30, 1996, application for proposed amendment to Facility Operating License No. 50–331 for the Duane Arnold Energy Center, located in Palo, Iowa.

The proposed amendment would have revised the control rod scram insertion time testing requirements in the plant Technical Specifications.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on February 14, 1996 (61 FR 5814). However, by letter dated February 26, 1996, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated January 30, 1996, and the licensee's letter dated February 26, 1996, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Cedar Rapids Public Library, 500 First Street, S.E., Cedar Rapids, Iowa 52401.

Dated at Rockville, Maryland, this 24th day of December 1996.

For the Nuclear Regulatory Commissions.

Glenn B. Kelly, Sr.,

Project Manager, Project Directorate III–3, Division of Reactor Projects III/IV, Office of Nuclear Reactor Regulation.

[FR Doc. 96–33251 Filed 12–30–96; 8:45 am]

BILLING CODE 7590–01–P

[Docket No. 50–133]

Pacific Gas and Electric Company Humboldt Bay Power Plant, Unit No. 3; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Pacific Gas and Electric Company (the licensee) to withdraw its November 23, 1994, application for proposed amendment to Facility Operating License No. DPR–7 for the Humboldt Bay Power Plant, Unit No. 3, located in Humboldt County, California.

The proposed amendment would have revised the facility technical specifications pertaining to liquid radioactive effluent limitations.

The Commission has previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on March 1, 1995 (60 FR 11139). However, by letter dated December 9, 1996, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated November 23, 1994, and the licensee's letter dated December 9, 1996, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Humboldt County Library, 1313 3rd Street, Eureka, California 95501.

Dated at Rockville, Maryland, this 24th day of December 1996.

For the Nuclear Regulatory Commission.

Richard F. Dudley, Jr.,

Senior Project Manager, Non-Power Reactors and Decommissioning Project Directorate, Division of Reactor Project Management, Office of Nuclear Reactor Regulation.

[FR Doc. 96–33247 Filed 12–30–96; 8:45 am]

BILLING CODE 7590–01–P

[Docket No. 50–354]

Public Service Electric & Gas Company and Atlantic City Electric Company (Hope Creek Generating Station); Notice of Denial of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) has denied a request by Public Service Electric & Gas and Atlantic City Electric Company, (the licensees) for an amendment to Facility Operating

VOL 61 ISS 252 DEC 31 1996 UMI

License No. NPF–57, issued to the licensee for operation of the Hope Creek Generating Station located in Lower Alloways Creek Township, Salem County, New Jersey. Notice of Consideration of Issuance of this amendment was not published in the **Federal Register**.

The purpose of the licensee's amendment request was to revise the Hope Creek Generating Station (HCGS) Updated Final Safety Analysis Report, Section 9.2.5, regarding the Station Service Water System and Ultimate Heat Sink.

The NRC staff has concluded that the licensee's request cannot be granted. The licensee was notified of the Commission's denial of the proposed change by a letter dated December 24, 1996.

By January 30, 1997, the licensee may demand a hearing with respect to the denial described above. Any person whose interest may be affected by this proceeding may file a written petition for leave to intervene.

A request for hearing or petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date.

A copy of any petitions should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to M. J. Wetterhahn, Esquire, Winston & Strawn, 1400 L Street, NW., Washington, DC 20005–3502, attorney for the licensee.

For further details with respect to this action, see (1) the application for amendment dated August 30, 1996, and (2) the Commission's letter to the licensee dated December 24, 1996.

These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Pennsville Public Library, 190 S. Broadway, Pennsville, New Jersey 08070.

Dated at Rockville, Maryland, this 24th day of December 1996.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 96–33253 Filed 12–30–96; 8:45 am]

BILLING CODE 7590–01–P

Advisory Committee on Nuclear Waste Seeking Qualified Candidates

AGENCY: Nuclear Regulatory Commission.

ACTION: Request for résumés.

SUMMARY: The Nuclear Regulatory Commission (NRC) is seeking qualified candidates for possible appointment to its Advisory Committee on Nuclear Waste (ACNW). One opening is expected on the committee in mid-1997.

ADDRESSES: Submit résumés to: Ms. Jude Himmelberg, Office of Personnel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

FOR FURTHER INFORMATION, CALL: 1–800–952–9678. Please refer to Announcement Number 97–1002.

SUPPLEMENTARY INFORMATION: The ACNW is a part-time advisory group established by the NRC in 1988 to provide independent technical review and advice on the disposal of nuclear waste, including all aspects of nuclear waste disposal facilities, as directed by the Commission. This advice covers activities related to licensing, operation, and closure of high-level and low-level radioactive waste disposal facilities and associated rulemakings, regulatory guides and NRC staff technical positions. The ACNW also reviews performance assessment evaluations of waste disposal facilities.

The committee interacts with representatives of the NRC, the Advisory Committee on Reactor Safeguards, the Department of Energy, other Federal, State, and local agencies, Indian Nations, and private organizations as appropriate.

A wide variety of engineering and scientific skills are needed to conduct the broad-based reviews required in the committee's work. Engineers and scientists are needed with work experience in the high-level and low-level radioactive waste disposal programs coupled with broad experience in a pertinent technical field, such as nuclear engineering and technology, nuclear fuel cycle analysis, geoscience, chemistry, and materials science.

Applicants should have a minimum of 20 years' work experience in related fields, or fields that can be applied directly to the work of the committee, including graduate level education. In addition to the length of the work experience, applicants should have achieved a level of distinction in their discipline and must be able to devote approximately 50-100 days per year to committee business. Most meetings are held in Rockville, Maryland. Some additional travel is required to other sites.

NRC regulations and policies restrict the participation of members in areas where these members have conflicts of interest. The degree to which an individual's participation in ACNW activities will be restricted is considered in the selection progress. Each qualified candidate's financial interests must be reconciled with applicable Federal and NRC rules and regulations prior to final appointment. This might require divestiture of securities issued by nuclear industry entities, or discontinuance of industry-funded research contracts or grants.

A résumé describing the educational and professional background of the candidate, including special accomplishments, professional references, and current address and telephone number should be provided. All qualified candidates will receive careful consideration. Appointment will be made without regard to race, color, religion, national origin, sex, age, or disabilities. Candidates must be citizens of the United States. Applications will be accepted until February 20, 1997.

Dated: December 24, 1996.

Andrew L. Bates,

Advisory Committee Management Officer.

[FR Doc. 96–33246 Filed 12–30–96; 8:45 am]

BILLING CODE 7590–01–P

Proposed Generic Communication; Degradation of Steam Generator Internals

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of opportunity for public comment.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to issue a generic letter concerning the degradation of steam generator internals at foreign pressurized-water reactor facilities. The purpose of the proposed generic letter is to (1) re-alert addressees to the previously communicated findings of damage to steam generator internals, namely, tube support plates and tube bundle wrappers, at foreign PWR facilities; (2) emphasize to addressees the importance of performing comprehensive examinations of steam generator internals to ensure steam generator tube structural integrity is maintained in accordance with the requirements of Appendix B to 10 CFR Part 50; and (3) request all addressees to submit information that will enable the NRC staff to verify whether or not the condition of addressees' steam generator

internals comply and conform with the current licensing basis for their respective facilities. The NRC is seeking comment from interested parties regarding both the technical and regulatory aspects of the proposed generic letter presented under the **SUPPLEMENTARY INFORMATION** heading.

The proposed generic letter was endorsed by the Committee to Review Generic Requirements (CRGR) on December 17, 1996. The relevant information that was sent to the CRGR will be placed in the NRC Public Document Room. The NRC will consider comments received from interested parties in the final evaluation of the proposed generic letter. The NRC's final evaluation will include a review of the technical position and, as appropriate, an analysis of the value/impact on licensees. Should this generic letter be issued by the NRC, it will become available for public inspection in the NRC Public Document Room.

DATES: Comment period expires January 30, 1997. Comments submitted after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except for comments received on or before this date.

ADDRESSES: Submit written comments to Chief, Rules Review and Directives Branch, U.S. Nuclear Regulatory Commission, Mail Stop T–6D–69, Washington, DC 20555–0001. Written comments may also be delivered to 11545 Rockville Pike, Rockville, Maryland, from 7:30 am to 4:15 pm, Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, 2120 L Street, N.W. (Lower Level), Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Stephanie M. Coffin, (301) 415–2778.

SUPPLEMENTARY INFORMATION:

NRC Generic Letter 96–XX: Degradation of Steam Generator Internals

Addressees

All holders of operating licenses for pressurized water reactors (PWRs), except those licenses that have been amended to possession-only status.

Purpose

The U.S. Nuclear Regulatory Commission (NRC) is issuing this generic letter to (1) re-alert addressees to the previously communicated findings of damage to steam generator internals, namely, tube support plates and tube bundle wrappers, at foreign PWR facilities; (2) emphasize to addressees the importance of performing comprehensive examinations of steam generator internals to ensure steam generator tube structural integrity is maintained in accordance with the requirements of Appendix B to 10 CFR Part 50; and (3) request all addressees to submit information that will enable the NRC staff to verify whether or not the condition of addressees' steam generator internals comply and conform with the current licensing basis for their respective facilities.

Background

The NRC issued Information Notice (IN) 96–09 and IN 96–09, Supplement 1 to alert addressees to findings of damage to steam generator internals at foreign PWR facilities.

Description of Circumstances

Foreign authorities have reported various steam generator tube support plate damage mechanisms. The affected steam generators are similar, but not identical, to Westinghouse Model 51 steam generators. As previously documented in IN 96–09 and IN 96–09, Supplement 1, one damage mechanism involved the wastage of the uppermost support plate caused by the misapplication of a chemical cleaning process. A second damage mechanism involved broken tube support plate ligaments at the uppermost, and sometimes at the next lower, tube support plates. The support plate ligaments broke near a radial seismic restraint and near an antirotation key; the damage apparently dates back to initial startup of the affected plants. According to foreign authorities, the ligaments may have broken because of excessive stress during the final thermal treatment of the monobloc steam generators, which in turn was caused by inadequate clearance for differential thermal expansion between the support plates, wrapper, and seismic restraints.

As previously documented in IN 96–09, Supplement 1, a third damage mechanism involved wastage not associated with chemical cleaning and affected tube support plates at various elevations. This damage mechanism is active (progressive) and apparently involves a corrosion or erosion-corrosion mechanism of undetermined origin.

The staffs of potentially affected foreign reactors are currently inspecting steam generators for evidence of the various damage mechanisms, both visually and with eddy current testing. Tubes without adequate lateral support are being plugged.

In 96–09, Supplement 1, also documented that cooling transients involving the injection of large quantities of auxiliary feedwater may have been a key factor in the steam generator wrapper drop phenomenon observed at a foreign PWR facility. These cooling transients are believed to have been particularly severe for two units as a result of the use of a special operating procedure to accelerate the transition from hot to cold shutdown. The weight of the wrapper assembly and support plates is borne by six tenons mounted on the steam generator shell. The wrapper is nominally free to expand axially relative to the shell. However, it is postulated that an interference fit developed between the wrapper and the seismic restraints (mounted to the shell) as a result of differential thermal expansion associated with the cooling transients at the seventh support plate elevation. This interference fit prevented axial expansion of the wrapper, which led to excessive vertical bearing loads at the tenon supports, thus causing localized wrapper failure at this location and downward displacement of the wrapper (20 millimeters, maximum). Poor quality wrapper support welds may also have contributed to this failure. Repairs have been implemented at the affected foreign PWR facility. Wrapper dropping is being monitored in all steam generators of similar design. The monitoring is through online instrumentation and through visual inspections during outages. In addition to the wrapper dropping problem, cracking of the wrapper above the original upper support was discovered at the same foreign unit. The cause of the cracking is not yet known.

Discussion

The reported foreign experience highlights the potential for degradation mechanisms that may lead to tube support plate and tube bundle wrapper damage. The steam generator tube support plates support the tubes against lateral displacement and vibration and minimize bending moments in the tubes in the event of an accident. Support plate damage can impair their ability to perform this function and, thus, could potentially lead to the impairment of tube integrity. Vibration-induced fatigue could present a potential problem if tube support plates lose integrity, particularly in areas of high secondary side crossflows. As previously noted in IN 96–09, tube support plate signal anomalies found during eddy current testing of the steam generator tubes may be indicative of support plate damage or ligament cracking. Certain visual and video camera inspections on the secondary side of a steam generator may also provide useful information concerning the degradation of steam

VOL 61 ISS 252 DE 31 1996 UMI

generator internals. The NRC staff will continue to monitor information on tube support plate and tube bundle wrapper damage as it becomes available from foreign authorities.

This letter also alerts addressees to the importance of performing comprehensive examinations of steam generator internals to ensure steam generator tube structural integrity is maintained in accordance with the requirements of Appendix B to 10 CFR Part 50. Criterion XI of Appendix B, "Test Control," requires, in part, that a test program be established to assure that all testing required to demonstrate that structures, systems, and components will perform satisfactorily in service is identified and performed in accordance with written test procedures which incorporate the requirements and acceptance limits contained in the applicable design documents. The applicable steam generator tube design documents include General Design Criteria (GDCs) 14, 15, 30, 31, and 32 of 10 CFR Part 50, Appendix A and Section III of the ASME Boiler and Pressure Vessel code. Criterion XVI of Appendix B, "Corrective Action," requires in part that measures be established to assure that conditions adverse to quality are promptly identified and corrected.

Requested Information

Within 60 days of the date of this generic letter, each addressee is requested to provide a written report that includes the following information for its facility:

(1) Discussion of the program in place, if any, to detect degradation of steam generator internals and a description of the inspection plans, including the inspection scope, frequency, methods, equipment and criteria, and plans for corrective action in the event degradation is found.

The discussion should include the following information:

(a) Whether past inspection records at the facility have been reviewed for indications of tube support plate signal anomalies from eddy current testing of the steam generator tubes that may be indicative of support plate damage or ligament cracking. If the addressee has performed such a review, include a discussion of the findings.

(b) Whether visual or video camera inspections on the secondary side of the steam generators have been performed at the facility to provide information on the condition of steam generator internals (e.g., support plates, tube bundle wrappers, or other components). If the addressee has performed such inspections, include a discussion of the findings.

(c) Whether degradation of steam generator internals has been detected at the facility, and how the degradation was assessed and dispositioned.

(2) If the addressee currently has no program in place to detect degradation of steam generator internals, the written response should include a discussion of the plans for establishing such a program, or a justification as to why no such program is needed.

Addressees are encouraged to work closely with industry groups on the coordination of inspections, evaluations, and repair options for all types of steam generator degradation that may be found.

The NRC is aware that the industry has developed generic industry guidance on performing steam generator inspections, and that this guidance is continually being updated. If an addressee intends to follow the guidance developed by the industry for this issue, reference to the relevant generic guidance documents is acceptable, and encouraged, as part of the response, as long as the referenced documents have been officially submitted to the NRC. However, additional plant-specific information will be needed.

Required Response

Within 30 days of the date of this generic letter, each addressee is required to submit a written response indicating: (1) Whether or not the requested information will be submitted and (2) whether or not the requested information will be submitted within the requested time period. Addressees who choose not to submit the requested information, or are unable to satisfy the requested completion date, must describe in their response any alternative course of action that is proposed to be taken, including the basis for the acceptability of the proposed alternative course of action.

NRC staff will review the responses to this generic letter and if concerns are identified, affected addressees will be notified.

Address the required written responses to the U.S. Nuclear Regulatory Commission, Attn: Document Control Desk, Washington, D.C. 20555-0001, under oath or affirmation under the provisions of Section 182a, Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f).

Backfit Discussion

Under the provisions of Section 182a of the Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f), this generic letter transmits an information request for the purpose of verifying compliance with applicable existing regulatory requirements. Specifically, the requested information will enable the NRC staff to determine whether or not the condition of the addressees' steam generator internals comply and conform with the current licensing basis for their respective facilities. In particular, it would help ascertain whether or not the regulatory requirements pursuant to Appendix B to 10 CFR Part 50 are met, namely, (1) Criterion XI, "Test Control," concerning the establishment of effective test programs for systems, structures and components, and (2) Criterion XVI, "Corrective Action," which requires that measures shall be established to assure that conditions adverse to quality, such as failures, malfunctions, deficiencies, deviations, defective material and equipment, and nonconformances are promptly identified and corrected. Additionally, no backfit is either intended or approved in the context of issuance of this generic letter. Therefore, the staff has not performed a backfit analysis.

Dated at Rockville, Maryland, this 23rd day of December 1996.

For the Nuclear Regulatory Commission.

David B. Matthews,

Acting Director, Division of Reactor Program Management, Office of Nuclear Reactor Regulation.

[FR Doc. 96–33250 Filed 12–30–96; 8:45 am]

BILLING CODE 7590–01–P

Proposed Generic Communication; Steam Generator Tube Inspection Techniques (M96401)

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of opportunity for public comment.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to issue a generic letter concerning steam generator tube inspection practices at pressurized-water reactor facilities. The purpose of the proposed generic letter is to (1) emphasize to addressees the importance of performing steam generator tube inservice inspections using qualified techniques in accordance with the requirements of Appendix B to 10 CFR Part 50, and (2) request certain information from addressees to verify whether or not steam generator tube inservice inspection practices comply and conform with the current licensing basis for their respective facilities. The NRC is seeking comment from interested

parties regarding both the technical and regulatory aspects of the proposed generic letter presented under the Supplementary Information heading.

The proposed generic letter was endorsed by the Committee to Review Generic Requirements (CRGR) on December 17, 1996. The relevant information that was sent to the CRGR will be placed in the NRC Public Document Room. The NRC will consider comments received from interested parties in the final evaluation of the proposed generic letter. The NRC's final evaluation will include a review of the technical position and, as appropriate, an analysis of the value/impact on licensees. Should this generic letter be issued by the NRC, it will become available for public inspection in the NRC Public Document Room.

DATES: Comment period expires January 30, 1997. Comments submitted after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except for comments received on or before this date.

ADDRESSES: Submit written comments to Chief, Rules Review and Directives Branch, U.S. Nuclear Regulatory Commission, Mail Stop T–6D–69, Washington, DC 20555–0001. Written comments may also be delivered to 11545 Rockville Pike, Rockville, Maryland, from 7:30 am to 4:15 pm, Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, 2120 L Street, N.W. (Lower Level), Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Phillip J. Rush, (301) 415–2700.

SUPPLEMENTARY INFORMATION:

NRC Generic Letter 96–XX: Steam Generator Tube Inspection Techniques

Addressees

All holders of operating licenses for pressurized water reactors (PWRs), except those licenses that have been amended to possession-only status.

Purpose

The U.S. Nuclear Regulatory Commission (NRC) is issuing this generic letter to (1) emphasize to the addressees the importance of performing steam generator tube inservice inspections using qualified techniques in accordance with the requirements of Appendix B to 10 CFR Part 50, and (2) request certain information from addressees to verify whether or not steam generator tube inservice inspection practices comply and conform with the current licensing basis for their respective facilities.

Background

Steam generator tubing constitutes a significant portion of the reactor coolant pressure boundary (RCPB). The design of the RCPB for structural and leakage integrity is a requirement under Title 10 of the Code of Federal Regulations, Part 50 (10 CFR Part 50), Appendix A. Specifically, the General Design Criteria (GDC) of Appendix A state that the RCPB shall "have an extremely low probability of abnormal leakage" (GDC 14), "shall be designed with sufficient margin to assure that the design conditions of the reactor coolant pressure boundary are not exceeded during any condition of normal operation" (GDC 15), and "shall be designed to permit periodic inspection and testing of important areas and features to assess their structural and leaktight integrity" (GDC 32).

Once a plant is in operation, licensees are required by their technical specifications to perform periodic inservice inspections of the steam generator tubing and to repair or remove from service all tubes with degradation exceeding the tube repair limits. Eddy-current inspection techniques are the primary means by which licensees assess the condition of the steam generator tubes. Such inspections are an important component of the defense-in-depth measures to ensure the structural and leaktight integrity of the steam generator tubes.

The NRC issued Generic Letter (GL) 95–03, "Circumferential Cracking of Steam Generator Tubes," on April 28, 1995. One of the purposes of GL 95–03 was to emphasize the importance of utilizing qualified inspection techniques and equipment capable of reliably detecting steam generator tube degradation.

Criterion IX, "Control of Special Processes," contained in Appendix B to 10 CFR Part 50 states, in part, that "measures shall be established to assure that special processes, including * * * nondestructive testing, are controlled and accomplished by qualified personnel using qualified procedures." Although the main focus of GL 95–03 was to address circumferential steam generator tube cracking, the requirement of using qualified inspection techniques applies to all inspections for all forms of tube degradation.

Criterion XI, "Test Control," requires, in part, that a test program be established to assure that all testing required to demonstrate that structures, systems, and components will perform satisfactorily in service is identified and performed in accordance with written test procedures which incorporate the requirements and acceptance limits contained in applicable design documents.

Licensees have traditionally relied upon eddy-current inspection techniques to assess the condition of their steam generator tubes. Although eddy-current methods are a proven technique for detecting tube degradation, there has been only limited success in demonstrating the capability to accurately depth size indications from the eddy-current signals. Specifically, tube degradation from intergranular attack (IGA) and stress corrosion cracking (SCC), major modes of steam generator tube degradation, are difficult to size with eddy-current inspection techniques because of a number of complicating variables. Through recent inspections and discussions of eddy-current practice with various licensees, the NRC has become aware that several utilities are allowing degraded steam generator tubes to remain in service on the basis of estimates of IGA and SCC degradation depths using eddy-current methods.

Discussion

(1) Evaluation of recent inspection experience. In general, plant technical specifications require the removal from service or the repair of those steam generator tubes with degradation exceeding 40 percent of the nominal tube-wall thickness. Criterion IX in Appendix B to 10 CFR Part 50 requires that nondestructive testing be completed using qualified procedures. Therefore, licensees must be able to demonstrate through the qualification process that an inspection technique used for sizing steam generator tube indications can measure the through-wall penetration of cracks and other forms of degradation with an accuracy commensurate with the "bases" of the tube repair limits in the technical specifications.

Theoretically, there is a relationship between the depth of penetration of a defect and the eddy-current signal response; in practice, however, the relationship between signal voltage or phase angle and the degradation depth is influenced by many other variables. Oxide deposits, variability of tube material properties and geometry, degradation morphology, human factors, and eddy-current data analysis and acquisition practices are some of the factors that can significantly alter a depth estimation of steam generator tube degradation. The NRC is aware that the depth of several specific forms of volumetric steam generator tube degradation can be sized with a reasonable degree of accuracy; however,

VOL 61 ISS 252 DE 31 1996 UMI

qualifying techniques for sizing of some forms of degradation, e.g., IGA and SCC, has been problematic.

In order to successfully disposition steam generator tube degradation in accordance with the repair limits in the technical specifications and Appendix B to 10 CFR Part 50, the inspection process must be capable of (1) detecting indications of tube degradation, (2) characterizing the mode of degradation, e.g., cracklike, IGA, corrosion induced thinning, or wear and the orientation for cracklike degradation, and (3) accurately sizing the depth of the indication. The term "inspection process" refers to the use of one or a combination of nondestructive inspection techniques to evaluate a specific mode of steam generator tube degradation. This evaluation could potentially include three inspection methods (e.g., eddy current probes)-one for detection, one for characterization, and a third to size the indication. However, the successful qualification of the inspection process requires a qualification of each method (i.e., probe) for the mode of degradation being evaluated in the steam generator tube examinations. Experience has demonstrated that for effective qualification the data set demonstrating the capability of the inspection process should consist, to the extent practical, of service-degraded tube specimens (i.e., specimens removed from operating steam generators), supplemented, as necessary, by tube specimens containing flaws fabricated using alternative methods provided that the nondestructive examination parameter responses from these flaws are fully consistent with actual inservice degradation of the same flaw geometry.

(2) Safety assessment. Steam generator tube degradation is managed through a combination of several defense-in-depth measures including inservice inspection, tube repair criteria, primary-to-secondary leak rate monitoring, water chemistry, operator training, and analyses to ensure safety objectives are met. In addition, on the basis of NRC conclusions regarding the potential consequences of steam generator tube failure events in NUREG–0844, "NRC Integrated Program for the Resolution of Unresolved Safety Issues A–3, A–4, and A–5 Regarding Steam Generator Tube Integrity," the risk from the potential rupture of one or more tubes is small. However, since tube ruptures represent a failure of one of the principal fission product boundaries and present a pathway for a release to the environment bypassing the containment, all reasonable precautions should be taken to prevent such an occurrence.

To verify compliance with Appendix B to 10 CFR Part 50 and the technical specifications, and to maintain a reasonable level of assurance that the structural and leakage integrity margins for steam generator tubes provided in the General Design Criteria (Appendix A to 10 CFR Part 50) are satisfied, the NRC has concluded that it is appropriate for the addressees to review the types of steam generator tube degradation that are being left in service based on sizing, the inspection method being used to perform the sizing for each type of degradation, and the technical basis for the acceptability of each inspection method.

Requested Information

Within 60 days of the date of this generic letter, all addressees are requested to provide the following information: (1) Whether it is their practice to leave steam generator tubes with defects in service, based on sizing, and (2) if the response to item (1) is affirmative, those licensees are requested to submit a written report that includes, for each type of steam generator degradation mechanism, a description of the associated nondestructive examination method being used and the technical basis for the acceptability of the technique used.

Required Response

Within 30 days of the date of this generic letter, addressees are required to submit a written response indicating: (a) Whether or not the requested information will be submitted, and (b) whether or not the requested information will be submitted within the requested time period. Addressees who respond in the affirmative to item (1) under Requested Information and choose not to submit the requested information, or are unable to satisfy the requested completion date, must describe in their response any alternative course of action that is proposed to be taken, including the basis for the acceptability of the proposed alternative course of action.

NRC staff will review the responses to this generic letter and if concerns are identified, affected addressees will be notified.

Address written material to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555–0001, under oath or affirmation under the provisions of Section 182a, Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f).

Backfit Discussion

This generic letter only requests information from the addressees under the provisions of Section 182a of the Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f). The information requested will enable the NRC staff to determine whether addressees' steam generator tube inspection practices comply and conform with the current licensing basis for their respective facilities. In particular, it would help ascertain whether or not the regulatory requirements pursuant to Appendix B to 10 CFR Part 50, namely, Criterion IX, "Control of Special Processes," and Criterion XI, "Test Control," are met. Additionally, no backfit is either intended or approved in the context of issuance of this generic letter. Therefore, the staff has not performed a backfit analysis.

Dated at Rockville, Maryland, this 23rd day of December, 1996.

For the Nuclear Regulatory Commission.

David B. Matthews,

Acting Director, Division of Reactor Program Management, Office of Nuclear Reactor Regulation.

[FR Doc. 96–33248 Filed 12–30–96; 8:45 am]

BILLING CODE 7590–01–P

Proposed Generic Communication; Effectiveness of Ultrasonic Testing Systems in Inservice Inspection Programs

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of opportunity for public comment.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to issue a generic letter to determine if addressees are taking appropriate action to qualify future ultrasonic testing (UT) examinations. The purpose of the proposed generic letter is to (1) alert addressees to the importance of using equipment, procedures, and examiners (UT systems) capable of reliably detecting and sizing flaws in the performance of comprehensive examinations of reactor vessels and piping, (2) notify addressees about enhancements in UT systems and the significance of these enhancements in plant-specific inservice inspection (ISI) programs, (3) request that all addressees describe the extent to which their piping and reactor pressure vessel ISI activities are being qualified consistent with the objectives of Appendix VIII to Section XI of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code), and (4) require that all addressees send to the NRC a written response to this generic letter relating to the actions and information requested in this letter. The

NRC is seeking comment from interested parties regarding both the technical and regulatory aspects of the proposed generic letter presented under the **SUPPLEMENTARY INFORMATION** heading.

The proposed generic letter was endorsed by the Committee to Review Generic Requirements (CRGR) on December 19, 1996. The relevant information that was sent to the CRGR will be placed in the NRC Public Document Room. The NRC will consider comments received from interested parties in the final evaluation of the proposed generic letter. The NRC's final evaluation will include a review of the technical position and, as appropriate, an analysis of the value/impact on licensees. Should this generic letter be issued by the NRC, it will become available for public inspection in the NRC Public Document Room.

DATES: Comment period expires January 30, 1997. Comments submitted after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except for comments received on or before this date.

ADDRESSES: Submit written comments to Chief, Rules Review and Directives Branch, U.S. Nuclear Regulatory Commission, Mail Stop T–6D–69, Washington, DC 20555–0001. Written comments may also be delivered to 11545 Rockville Pike, Rockville, Maryland, from 7:30 am to 4:15 pm, Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, 2120 L Street, N.W. (Lower Level), Washington, DC.

FOR FURTHER INFORMATION CONTACT: Donald G. Naujock (301) 415–2767.

SUPPLEMENTARY INFORMATION:

Generic Letter 96–XX: Effectiveness of Ultrasonic Testing Systems In Inservice Inspection Programs

Addressees

All holders of operating licenses or construction permits for nuclear power reactors, except those licenses that have been amended to possession-only status.

Purpose

The U.S. Nuclear Regulatory Commission (NRC) is issuing this generic letter to (1) Alert addressees to the importance of using equipment, procedures, and examiners capable of reliably detecting and sizing flaws in the performance of comprehensive examinations of reactor vessels and piping, (2) notify addressees about enhancements in ultrasonic testing (UT) systems (Note: As used in this document, "UT systems" refers to the equipment, procedures, or examiners involved in the ultrasonic examination) and the significance of these enhancements in plant-specific inservice inspection (ISI) programs, (3) request that all addressees describe the extent to which their piping and reactor pressure vessel ISI activities are being qualified consistent with the objectives of Appendix VIII (Note: "Consistent with the objectives of Appendix VIII" means in close conformance with Appendix VIII criteria, even though the Appendix has not been formally incorporated into the regulations as a requirement.) To Section XI of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (ASME Code), and (4) require that all addressees send to the NRC a written response to this generic letter relating to the actions and information requested in this letter.

Background

In the 1970s, operating experience and industry tests indicated a need for improving UT procedures to consistently and reliably detect and characterize flaws during ISI of reactor vessel welds. Also noted was the need for more definitive reporting of results and for more descriptive requirements for essential variables associated with ultrasonic examinations. That need was satisfied with the issuance of Regulatory Guide (RG) 1.150, Revision 1, "Ultrasonic Testing of Reactor Vessel Welds During Preservice and Inservice Examinations," in February 1983. RG 1.150 was incorporated into the technical specifications of many plants.

As the nuclear industry gained more operating experience, the need for improving ISI capabilities became apparent. For example, in the late 1970s, thermal fatigue cracks were found on the inner-blend radius of nozzle-to-vessel surfaces in boiling-water reactor (BWR) feedwater and control rod drive return line nozzles. The NRC staff recommended, in NUREG–0619, "BWR Feedwater Nozzle and Control Rod Drive Return Line Nozzle Cracking," dated November 1980, that licensees develop ISI programs to search for cracks in the inner-blend radii using dye-penetrant, visual, and ultrasonic examinations. The NRC staff recognized the potential for improvements to UT systems, and stated in NUREG–0619 that demonstrated improvements could be used as the basis for modifying the inspection criteria.

Also in the late 1970s, intergranular stress corrosion cracking (IGSCC) was identified in austenitic stainless steel piping. The NRC staff recommended in NUREG–0313, "Technical Report on Material Selection and Processing Guidelines for BWR Coolant Pressure Boundary Piping," dated July 1977, and in subsequent revisions published in July 1980 and January 1988, that a program be established to conduct formal IGSCC performance demonstration testing for UT examiners.

The regulatory guide and NUREG reports were issued as guidance in detecting flaws and in preventing the conditions that could lead to unacceptable flaws.

The need for additional guidance related to performing UT in ISI programs, that were based on requirements in Section XI of the ASME Code, prompted a reexamination of the effectiveness of UT as it was being applied through the ASME Code. The conventional (amplitude-based) UT requirements in the ASME Code establish minimum acceptable inspection standards. In the 1970s and 1980s, the nuclear industry tested UT systems extensively to identify the critical aspects of an effective UT inspection program that would provide a high reliability for detection and characterization of flaws. In the mid-1980s, the NRC and the nuclear industry recognized that the reliability of UT in ISI programs could be significantly improved through performance-demonstration qualification of nondestructive examination equipment, procedures, and examiners.

In 1984, the NRC entered into an agreement, known as the IGSCC Coordination Plan, with the Boiling Water Reactor Owners' Group (BWROG) and the Electric Power Research Institute (EPRI) to coordinate selected activities in regard to training and qualification of personnel using UT to examine piping weldments. As part of the IGSCC Coordination Plan, EPRI administered IGSCC performance demonstration tests to personnel seeking UT qualifications in IGSCC detection and characterization in piping systems.

The nuclear industry set about changing ASME Code requirements for UT from the current minimum inspection standards to inspection standards with performance-based qualifications. The performance-based qualifications would also produce uniform acceptance criteria for evaluating new technology and addressing new forms of degradation. The efforts of the industry to develop performance-based qualification criteria culminated with the publication of Appendix VIII to Section XI of the ASME Code, which was published in

the 1989 Addenda. Appendix VIII, "Performance Demonstration for Ultrasonic Examination Systems," contains detailed requirements for UT performance demonstrations that include statistically based acceptance criteria to detect and size flaws.

The NRC has initiated rulemaking to amend 10 CFR 50.55a to reference Section XI of the ASME Code up to and including the 1995 Edition. After completion of rulemaking, Appendix VIII to Section XI will become a requirement for all licensees. The final rule incorporating Appendix VIII is expected to be issued around July 1998.

Description of Circumstances

Appendix VIII is based on the qualification of equipment, procedures, and examiners using performance demonstrations; whereas, existing requirements in the 1989 (and earlier) Edition of Section XI of the ASME Code are prescriptive, minimum inspection standards. A performance-based qualification program encourages development of improved methods for detecting and characterizing flaws, and facilitates implementing the methods with a defined testing curriculum. The performance demonstrations require that equipment, procedures, and examiners be tested on flawed and notched materials and configurations similar to those found in actual conditions. The nuclear industry created the Performance Demonstration Initiative (PDI) in 1991 to manage implementation of the performance demonstration criteria of Appendix VIII (Note: The PDI activities have been assessed by the NRC staff, as described in the letter from J. Strosnider (NRC) to B. Sheffel (PDI) dated March 6, 1996, and have been found to provide a significantly improved method for qualification of equipment, procedures, and examiners. Overall, the NRC staff found that PDI has established and is in the process of executing a well-planned and effective program to test UT technicians on selected portions of Appendix VIII. Accordingly, the NRC staff finds that UT procedures qualified under the PDI program using performance demonstration methods provide an acceptable level of quality and safety.)

Because performance demonstrations test the ability of equipment, procedures, and examiners to detect and size flaws, the demonstrations raise the performance threshold for examiners conducting ultrasonic inspections. For example, a sampling of individuals tested in the different piping examinations under the PDI program revealed that 22% of them did not satisfy the screening criteria for detection of flaws; 41% did not satisfy the screening criteria for length-sizing; 67% did not satisfy the screening criteria for depth measurement; and 49% did not satisfy the screening criteria for IGSCC. These percentages are based on a sampling that included retests. The PDI tests ensure that the equipment must have adequate sensitivity, the procedures must have sufficient detail, and the individuals must be sufficiently skilled in order to successfully qualify under the PDI program.

The improvements in UT techniques performed using Appendix VIII criteria became apparent in 1993 during the reactor pressure vessel shell weld augmented examination at the Browns Ferry Nuclear Power Plant, Unit 3, and in 1995 during the inspection of piping systems for IGSCC at the Millstone Nuclear Power Station, Unit 1. At Browns Ferry, the equipment, procedures, and examiners were qualified consistent with the objectives of Appendix VIII. The examination revealed 15 flaws that did not meet the ASME Code, Section XI,

Subarticle IWB–3500 acceptance criteria and that required further evaluation. Of the 15 flaws, only 3 would have been recordable using conventional Section XI minimum inspection standards and RG 1.150 criteria, and only 2 of the 3 flaws would have required an analytical evaluation in accordance with Section XI, Subarticle IWB–3600. This experience indicates that flaws large enough to require analytical evaluation might not be detected using current UT standards.

Millstone Unit 1 inspectors performed an augmented UT examination for IGSCC in the welds in reactor system piping. The licensee used a newly developed ultrasonic transducer technology to supplement the original examinations. Before the examination, UT examiners from Millstone who were qualified under the IGSCC Coordination Plan demonstrated the adequacy of the new transducer technology by successfully passing the Appendix VIII performance demonstration test administered through the PDI program. During the augmented examination, the UT inspection personnel examined 264 of the 411 pipe welds and found that 35 welds had cracks. A review of examination records from 1984 through 1994 revealed 211 indications that were previously considered by Level III inspectors to be nonmetallurgical or geometric indications. During the 1995 inspection, 14 of the indications previously identified as nonmetallurgical or geometric were identified as flaws; 3 of these flaws developed through-wall leaks when they were mechanically buffed in preparation for repair by the NRC-approved overlay process. The Appendix VIII qualification by Millstone inspectors using normal IGSCC UT procedures increased the licensee's reliability in detection of IGSCC. The additionally demonstrated capability of the new transducer technology under the PDI-administered program clearly increased the level of confidence in the new transducer technology used to identify previous errors made in flaw disposition.

Although, the above experiences clearly depict the need for improvement by using performance demonstration methods in performing UT examinations of reactor vessels and piping, it should be noted that a safety concern does not exist which would warrant immediate backfitting of Appendix VIII in advance of the rulemaking that has been initiated. The staff has reached this conclusion based on consideration of defense-in-depth measures, Code margins in component design, and leakage monitoring systems. In addition, the staff has been requiring for some time now that selected inspections be performed using performance-based qualified techniques (e.g., IGSCC piping inspections).

Regulatory Requirements

10 CFR 50.55a requires that systems and components of boiling-water and pressurized-water reactors conform to the requirements of the ASME Code, Sections III and XI.

Appendix A to 10 CFR Part 50 Criterion 14 requires that the reactor coolant pressure boundary shall be designed, fabricated, erected, and tested so as to have an extremely low probability of abnormal leakage, of rapidly propagating failure, and of gross rupture.

Criterion XVI of Appendix B to 10 CFR Part 50 requires that measures shall be established to assure that conditions adverse to quality, such as failures, malfunctions, deficiencies, deviations, defective material and equipment, and nonconformances are promptly identified and corrected. In the case of significant conditions adverse to quality, the measures shall assure that the cause of the condition is determined and corrective action taken to preclude repetition. The identification of the significant condition adverse to quality, the cause of the condition, and the corrective action taken shall be documented and reported to appropriate levels of management.

Criterion II of Appendix B to 10 CFR Part 50 requires, in part, that a quality assurance program shall take into account the need for special controls, processes, test equipment, tools, and skills to attain the required quality and the need for verification of quality by inspection and test. It also requires that the program provide for indoctrination and training of personnel performing activities affecting quality, as necessary to assure that suitable proficiency is achieved and maintained.

Discussion

The qualification statistics from PDI discussed above and the issuance of the regulatory guide and staff reports highlight the fact that some UT systems satisfying ASME Code, Section XI amplitude-based UT requirements are less effective in identifying and characterizing certain types of flaws. The experiences at Browns Ferry Unit 3 and Millstone Unit 1 highlight the significant improvements in the effectiveness of UT systems when equipment, procedures, and examiners are qualified through a performance-demonstration program. Therefore, a significant improvement is gained in the effectiveness of UT systems qualified through performance demonstrations (e.g., Appendix VIII) over those satisfying conventional Section XI amplitude-based UT requirements.

The early and accurate detection of flaws in plants is important for maintaining the structural integrity and ensuring the safety function of safety-related systems and components. As plants age, improved reliability in inspection methods, more flexibility in utilizing advanced technology, and a better ability to detect new forms of degradation gain increased importance in ISI programs. The nuclear industry recognizes Appendix VIII as an improvement over the current ISI requirements, and the NRC staff finds that Appendix VIII criteria, as implemented by the PDI program, provide UT results that generally are superior to those of the 1989 (and earlier) Edition of Section XI of the ASME Code. The NRC staff finds that implementation of Appendix VIII criteria enhances the reliability of inspections and provides a significant improvement in the methods used to satisfy existing regulatory requirements and assure plant safety.

Some licensees have already submitted requests to utilize Appendix VIII performance demonstrations as an alternative examination for selective ASME Code, Section XI requirements. Licensees have also submitted requests to the staff to use Appendix VIII criteria in lieu of criteria in Regulatory Guide 1.150. Some licensees are using Appendix VIII concepts in developing alternatives to the IGSCC Coordination Plan, and the NRC staff has already approved the use of either the PDI program or the original IGSCC program for IGSCC qualification of examiners

(**Note:** Letter from W. T. Russell (NRC) to K. P. Donovan (Chairman, Boiling Water Reactor Owners' Group), "Transition From the IGSCC Qualification Program to the Performance Demonstration Initiative Program," March 1, 1996.)

In conclusion, the NRC staff has determined that using only existing ISI requirements for performing UT examinations might not provide reasonable assurance that flaws can be reliably detected and sized in certain areas. The staff considers cracks and flaws in the reactor vessel and other safety-related components to be a concern when the possibility exists for flaws exceeding the ASME Code, Section XI allowable flaw sizes not being reliably detected or sized. Adequate safety exists through defense-in-depth measures, leakage monitoring systems, and Code margins in component design; however, significant improvement in the ability to reliably detect and size flaws in reactor vessels and piping can be achieved using performance demonstration methods. In order to assess whether the margins required by the ASME Code, Section XI are adequately maintained and to ensure compliance with the applicable existing requirements identified above, the NRC has concluded that it is appropriate to request certain actions and information from the addressees, as indicated below.

Requested Actions

In consideration of the information and concerns addressed above, each addressee is requested to perform an evaluation to determine whether its current ISI program ensures that flaws in the reactor vessel and safety-related piping are reliably detected and sized.

If it is determined that flaws in the reactor vessel and safety-related piping cannot be reliably detected and sized, each addressee is expected to take appropriate corrective action in future inspections, in accordance with the requirements of Criteria II and XVI of Appendix B to 10 CFR Part 50, to improve the capability to reliably detect and size flaws.

Requested Information

Within 90 days of the date of this generic letter, addressees are requested to submit a written summary report that includes the following:

1. A brief description of the addressee's evaluation of its ISI program, its determination regarding the capability of its current program to reliably detect and size flaws, and corrective actions taken (if any) in response to the requested actions above.
2. If the addressee is not using and does not plan to use the criteria in Appendix VIII of the ASME Code Section XI or other performance-based methods for the qualification of ISI activities, then provide a discussion of any plans for ensuring the effectiveness of current UT systems in detecting and sizing flaws in the reactor vessel and safety-related piping.
3. If the addressee is using or plans to use Appendix VIII for the qualification of ISI activities, then discuss the extent to which the equipment, procedures, and examiners in your ISI program for the reactor vessel and safety-related piping are (or will be) qualified using Appendix VIII criteria or other performance-based methods. Include in this discussion a description of any alternate examination methods (i.e., IWA–2240 of ASME Code Section XI) in your ISI program that use Appendix VIII or other performance-based examination methods as allowed in applicable sections of 10 CFR 50.55a for inspecting the reactor vessel and safety-related piping.

Required Response

Within 30 days of the date of this generic letter, addressees are required to submit a written response indicating: (1) Whether or not the requested actions will be completed, (2) whether or not the requested information will be submitted, and (3) whether or not the requested information will be submitted within the requested time period.

Addressees who choose not to complete the requested actions, or choose not to submit the requested information, or are unable to satisfy the requested completion date, must describe in their response any alternative course of action that is proposed to be taken, including the basis for establishing the acceptability of the proposed alternative course of action. [For addressees that fail to have or implement appropriate qualification methods for future UT examinations where subsequent inspections find previously unidentified or improperly dispositioned flaws, the staff will consider whether such circumstances (a) are the result of failing to adequately take into account the need for special controls, skills and training needed to ensure suitable proficiency in the conduct of UT examinations contrary to the requirements of Criterion II, Quality

Assurance Program, of Appendix B "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants," of 10 CFR Part 50; and/or (b) represent inadequate corrective action for known inadequacies contrary to the requirements of Criterion XVI, Corrective Action, of Appendix B, of 10 CFR Part 50.]

Address the required written responses to the U.S. Nuclear Regulatory Commission, *ATTN:* Document Control Desk, Washington, D.C. 20555–0001, under oath or affirmation under the provisions of Section 182a, Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f). In addition, send a copy to the appropriate regional administrator.

Related Generic Communications

(1) Information Notice 96–32, "Implementation of 10 CFR 50.55a(g)(6)(ii)(A), Augmented Examination of Reactor Vessel," June 5, 1996.

(2) Information Notice 93–20, "Thermal Fatigue Cracking of Feedwater Piping to Steam Generators," March 24, 1993.

(3) Generic Letter 88–01, "NRC Position on IGSCC in BWR Austenitic Stainless Steel Piping," January 25, 1988.

Backfit Discussion

This generic letter transmits an information request pursuant to the provisions of Section 182a of the Atomic Energy Act of 1954, as amended, and 10 CFR 50.54(f) to determine if licensees are taking appropriate action to qualify future UT examinations. To the extent that the actions requested in this letter may result in corrective actions taken by addressees that are considered backfits, the backfits are justified under the compliance exception of the backfit rule, i.e., 10 CFR 50.109 (a)(4)(i).

Dated at Rockville, Maryland, this 23rd day of December, 1996.

For the Nuclear Regulatory Commission.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–38077; File No. SR–Amex–96–43]

Self-Regulatory Organizations; Order Granting Accelerated Approval of a Proposed Rule Change by the American Stock Exchange, Inc., Relating to Extending Trading Hours to Permit the Execution of Matched Orders for Exchange-Listed Securities Which Are Part of a Basket Trade Being Done in Large Part on the New York Stock Exchange's Crossing Session II

December 23, 1996.

I. Introduction

On November 12, 1996, the American Stock Exchange, Inc. ("Amex" or "Exchange") filed a proposed rule change with the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] to extend its trading hours to permit the execution of aggregate-price orders for Exchange-listed securities which are part of a basket trade being done in large part on the New York Stock Exchange's ("NYSE") Crossing Session II.

Notice of the proposal was published for comment and appeared in the **Federal Register** on November 26, 1996.[3] No comment letters were received on the proposed rule change. This order approves the Exchange's proposal, on an accelerated basis.

II. Description of the Proposal

When the Exchange implemented an After-Hours Trading ("AHT") facility for single-sided and matched closing price orders,[4] it determined that it would not, at that time, establish an after-hours crossing session for aggregate-price basket trades similar to the NYSE's Crossing Session II.[5] Some member organizations, however, have noted that the Exchange's lack of such a facility has impaired their ability to effect program trades which include Amex-listed stocks. For example, if a firm wanted to do an after-hours program trade based on the S&P 500 Index, it would cross the component stocks listed on the NYSE during Crossing Session II; it would cross those listed on Nasdaq in-house; but it would have to cross most of the Amex-listed component stocks overseas. Because most of the Amex-listed stocks included in the S&P 500 Index are not 19c–3 securities (that is, they were exchange-listed on or prior to April 26, 1979), Exchange Rule 5 (Off Board Trading) applies and prohibits member firms from acting as principal in an upstairs trade in these securities executed in the United States. Due to the time differences, the Exchange believes that executing the Amex component of the basket trade overseas creates administrative difficulties and increased costs for member firms engaging in these transactions.

The Exchange is proposing to create a facility to permit members and member organizations to execute on the Exchange, after normal trading hours, aggregate-price orders for Amex-listed securities which are part of a larger aggregate-price basket trade otherwise being done in the NYSE's Crossing Session II.[6] Operationally, the Exchange's AHT facility for aggregate-price orders would work in the same manner as the NYSE's Crossing Session II. The Exchange's AHT facility for aggregate-price orders would be available from 4 p.m. to 5:15 p.m. (New York p.m. (New York time). After the

[2] 17 CFR 240.19b–4.

[3] See Securities Exchange Act Release No. 37965 (November 19, 1996), 61 60135 (November 26, 1996) ("Release No. 37965").

[4] See Securities Exchange Act Release Nos. 29515 (August 2, 1991), 56 FR 37736 (August 8, 1991); 23263 (May 25, 1993), 58 FR 31558 (June 3, 1993); 33561 (February 1, 1994), 59 FR 5789 (February 8, 1994); and 33993 (May 2, 1994), 59 FR 23902 (May 9, 1994).

[5] As part of its overall after-hours trading plan, the NYSE created a facility for the execution of aggregate-price basket orders involving at least 15 NYSE-listed securities with an aggregate minimum value of one million dollars ("Crossing Session II"). In this facility, which is available from 4:00 p.m. to 5:15 p.m., New York time, a member transmits matched buy and sell orders to the NYSE on a facsimile form listing the number of stocks and shares to be traded and the total dollar value of the basket trade. Transactions effected during Crossing Session II are aggregated and reported on Tape A as an administrative message at the close of the session. Only the aggregate share volume and dollar amount of all programs executed during the session are reported. No reports are printed with respect to the individual stocks comprising the baskets. Notwithstanding the foregoing, members and member organizations effecting trades in Crossing Session II are required to submit to the NYSE's Market Surveillance by T+3 the names and the number of shares of each NYSE-listed stock comprising each basket. *See* Securities Exchange Act Release Nos. 33992 (May 2, 1994), 59 FR 23907 (May 9, 1994); and 29237 (May 31, 1991), 56 FR 24853 (June 3, 1991) ("NYSE Crossing Session II Approval Orders").

[6] The Exchange anticipates commencing operation of the facility no earlier than January 2, 1997. The Exchange will provide notice to, and educate, its membership regarding the rules of the facility prior to their implementation. See Letter from William Floyd-Jones, Assistant General Counsel, Legal & Regulatory Policy Division, Amex, to John Ayanian, Attorney, Office of Market Supervision ("OMS"), Division of Market Regulation ("Market Regulation"), Commission, dated December 18, 1996 ("Date of Implementation Letter").

close of the 9:30 a.m. to 4 p.m. trading session, dual Amex/NYSE members and member organizations using the facility would transmit to the NYSE Service Desk a facsimile form to which would specify the number of stocks, aggregate number of shares and the dollar value of the securities to be crossed. NYSE personnel will review the order, and if eligible, execute the NYSE portion of the basket. NYSE Service Desk personnel then will fax the order to the Amex Service Desk. Amex personnel will review the order and execute the Amex portion of the basket.[7] The trade would be executed, and a report transmitted by facsmile to the initiating firm. At the end of the session (5:15 p.m. New York time) the total number of shares[8] and the dollar value of all baskets traded during the session would be aggregated separately by Amex and NYSE personnel for their respective Exchange-listed and NYSE-listed components of the baskets, and the totals would be transmitted to the SIAC for publication on the "Tape" as administrative messages. A print of the NYSE listed portion of the basket would appear on Tape B reflecting the Exchange-listed portion of the basket transactions.

On T+3 members will report to the Exchange the names and number of shares of each Amex-listed stock included in the basket. On T+4, the Exchange will publish this information in its Daily Sales Report.

The Amex will waive all transaction fees in connection with the execution of aggregate price orders for Amex-listed securities which are part of an aggregate-price basket trade otherwise being done in the NYSE's Crossing Session II.

III. Commission Finding and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6(b)(5)[9] and 11A[10] of the Act. The Commission believes that the Exchange's proposal to extend its trading hours to permit the execution of matched orders for Exchange-listed securities which are part of a basket trade being done in large part on the NYSE Crossing Session II, is reasonably designed to promote just and equitable principles of trade, prevent fraudulent and manipulative acts and practices, and remove impediments to and perfect the mechanism of a free and open market and a national market system.

The Commission believes that the Exchange's proposal will benefit investors by providing members and member organizations the ability to cross the Amex component(s) of the larger basket trade on the Exchange's AHT facility. The Commission notes that for the Amex-listed portion of the basket to be eligible for execution as an aggregate price order on the Exchange's AHT facility, as proposed herein, the larger basket must be eligible for NYSE's Crossing Session II,[11] and submitted for execution as an aggregate-price order in that exchange's Off-Hours Trading Facility.

Although the execution of an aggregate-price order on the Exchange's AHT facility does not provide a traditional auction market for basket trades, the reality of the marketplace is that these trades currently are being effected off-exchange and, frequently, overseas. By bringing these institutional trades within the purview of U.S. regulatory bodies, the marketplace and the investing public generally benefits, for example, through the Commission and Exchange oversight, trade reporting, and consolidated surveillance.

The Amex has also requested exemptive relief from the requirement of Rule 11Aa3–1(b)(2)(iv) under the Act that the Exchange disseminate on a consolidated basis trading volume for each of the Amex-listed component securities in the aggregate-price order executed on the Exchange's AHT facility.[12] The Amex has proposed a plan under which the Exchange would collect the required trade detail information by T+3 and would publish this information in the Daily Sales Report on T+4. The Commission staff is currently reviewing the Exchange's request for exemptive relief from certain provisions of Rule 11Aa3–1(b)(2)(iv) under the Act. The Commission's approval of the proposed rule change is contingent upon the Commission's granting of the necessary Rule 11Aa3–1(b)(2)(iv) exemptive relief.

The Amex also requested an exemption from Rule 10a–1 under the Act to permit, subject to certain conditions, short sales of certain orders during the AHT session without complying with the "tick" provisions of the Rule.[13] The Commission is currently reviewing the Exchange's request.

The Commission expects the Exchange, through the use of its surveillance procedures, to monitor for, and report to the Commission, any patterns of manipulation or trading abuses or unusual trading activity resulting from the AHT facility.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. The Commission notes that Exchange represents that operationally, the Exchange's AHT facility for aggregate-price orders would work in the same manner as the NYSE's Crossing Session II, which the Commission approved in 1994.[14] The Commission also notes that the Exchange will implement the AHT facility for aggregate-price orders no earlier than January 2, 1997.[15] The Commission believes that by granting accelerated approval the Exchange may, in a timely manner, notify and educate its membership regarding the rules of the AHT facility approved in this release, prior to their implementation. Additionally, no comments were received on the proposal, which was subject to the full 21 day notice and comment period.[16]

Accordingly, the Commission believes it is consistent with Sections 6(b)(5) and 19(b)(2) of the Act to approve the proposed rule change on an accelerated basis.

IV. Conclusion

Based on the foregoing, the Commission finds that approval of the Exchange's proposal to extend its

BILLING CODE 8010–01–M

[Release No. 34–38080; File No. SR–CBOE–96–78]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the Chicago Board Options Exchange, Incorporated Relating to Circuit Breaker Halts

December 23, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 18, 1996, the Chicago Board Options Exchange, Incorporated ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change relating to certain market-wide circuit breaker provisions as described in Items I, II, and III below, which Items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposes to amend CBOE Rule 6.3B (Trading Halts Due to Extraordinary Market Volatility—"circuit breakers") to increase the levels of decline in the Dow Jones Industrial Average ("DJIA")[3] that would trigger a trading halt on the Exchange pursuant to that Rule.

The text of the proposed rule change is available at the Office of the Secretary, CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CBOE has prepared summaries, set for in sections (A), (B), and (C) below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to conform the circuit breaker trading halt procedures of the CBOE to the circuit breaker trading halt procedures of the New York Stock Exchange, Inc. ("NYSE"), as such procedures are currently proposed to be amended by the NYSE. CBOE Rule 6.3B, which sets forth the CBOE's circuit breaker trading halt procedures, currently contains substantially the same provisions as are contained in NYSE Rule 80B, which sets forth the NYSE's circuit breaker trading halt procedures. On December 11, 1996, the NYSE submitted a rule filing to the Commission designated as File No. SR–NYSE–96–38, which proposed to modify the NYSE's circuit breaker trading halt procedures by proposing to amend NYSE Rule 80B. The CBOE's proposed amendments to Rule 6.3B are intended to maintain the conformity between the circuit breaker trading halt procedures of the CBOE and the NYSE by proposing to amend Rule 6.3B in the same manner that the NYSE is proposing to amend NYSE Rule 80B in File No. SR–NYSE–96–38.

CBOE Rule 6.3B currently provides, in part, that if the DJIA falls 250 or more points below its previous trading day's closing value, trading in all securities on the Exchange will halt for thirty minutes. It further provides that, if on the same day the DJIA drops 400 or more points from its previous trading day's close, trading on the Exchange will halt for one hour. In conformity with the NYSE, the Exchange is now proposing to amend CBOE Rule 6.3B to increase the foregoing circuit breaker levels from 250 points to 350 points and from 400 points to 550 points.

In conformity with the NYSE, the adoption of amendments to CBOE Rule 6.3B would be contingent upon the adoption of amended rules or procedures substantively identical to CBOE Rule 6.3B by (i) all United States stock exchanges and the National Association of Securities Dealers with respect to the trading of stocks, stock options, and stock index options; and (ii) all United States futures exchanges with respect to the trading of stock index futures and options on such futures.

The CBOE's proposed amendments to Rule 6.3B will serve to maintain the coordinated approach of the NYSE, the CBOE, and other markets to trading halt procedures that are applicable during large, rapid market declines. Various studies of the October, 1987 market break noted that the stock, options, and futures markets are interrelated. And, in addition, the Exchange recognizes the Commission's desire to have coordinated mechanisms across these markets to deal with potential strains that may develop during periods of extreme downward volatility.[4] Such a coordinated approach is also in accordance with the recommendations contained in the Report of the Presidential Task Force on Market Mechanisms, which recommended, among other things, that circuit breaker mechanisms, in order to be effective, need to be coordinated across stock, stock index futures, and options markets in order to prevent intermarket problems of the kind experienced in October, 1987.[5]

2. Statutory Basis

The basis under the Act for this proposed rule change is the requirement under Section 6(b)(5) that an Exchange have rules that are designed to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The Exchange believes that amending Rule 6.3B is consistent with these objectives, in that an all-market circuit breaker trading halt requirement at appropriate levels can be

[5] See *Id.* (citing Report of the Presidential Task Force on Market Mechanisms).

expected to promote stability and investor confidence during a period of significant stress by providing market participants with a reasonable opportunity to become aware of and respond to significant price movements, thereby facilitating, in an orderly manner, the maintenance of an equilibrium between buying and selling interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Soliciation of Comments

Interest persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to File No. SR–CBOE–96–78 and should be submitted by January 21, 1997.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[6]

[Release No. 34–38082; File No. SR–CHX–96–27]

Self-Regulatory Organizations; Order Approving Proposed Rule Change by the Chicago Stock Exchange, Incorporated Relating to Permanent Approval of Its Pilot Program for Automatic Execution of Limit Orders

December 24, 1996.

I. Introduction

On October 15, 1996, the Chicago Stock Exchange, Incorporated ("CHX" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change seeking permanent approval of its system enhancement relating to the automatic execution of non-marketable limit orders.

Notice of the proposed rule change, together with the substance of the proposal, was provided by issuance of a release,[3] and by publication in the **Federal Register**.[4] No comments were received. This order approves the proposed rule change.

II. Description of the Proposal

The rule change approved today provides permanent approval of the Exchange's system enhancement relating to the automatic execution of non-marketable limit orders. On July 12, 1995, the Commission approved this system enhancement on a pilot basis, with an expiration date of July 31, 1996.[5] The pilot program was extended in a subsequent Commission approval order and is currently scheduled to expire on December 31, 1996.[6] In the Pilot Approval Order, as amended by the Pilot Extension Order, the Commission requested that the CHX provide a report to the Commission, by August 31, 1996, describing its experience with the pilot program. This report has been submitted to the Commission.

The proposed system enhancement ("Auto-Ex") is a feature of the Exchange's automated execution system ("MAX") that CHX specialists may voluntarily choose to activate to execute automatically non-marketable limit orders[7] on the specialist's book. Auto-Ex operates by comparing the size of the CHX-entered limit order against the amount of stock ahead of that order in the primary market when the issue is trading in the primary market at the limit price. The Auto-Ex System begins comparing CHX-entered limit orders when the order's limit price equals the bid (for a limit order to buy) or offer (for a limit order to sell) quoted in the primary market.[8] Thereafter, the Auto-Ex system keeps track of all prints in the primary market and automatically executes the limit order once the required size prints in the primary market.[9] As additional limit orders at the same price are received by the specialist, comparisons are made and entered based upon the shares ahead of those limit orders at the time of receipt, including shares ahead on the CHX. The Auto-Ex feature does not permit a limit order to be filled out of sequence.

The Auto-Ex feature executes limit orders in accordance with existing CHX

[4] See 61 FR 59263, November 21, 1996.

[5] See Securities Exchange Act Release No. 35962 (July 12, 1995), 60 FR 37115 (July 19, 1995) (File No. SR–CHX–95–11) ("Pilot Approval Order").

[6] See Securities Exchange Act Release No. 37442 (July 16, 1996), 61 FR 38491 (July 24, 1996) (File No. SR–CHX–96–18) ("Pilot Extension Order").

[7] A limit order is an order to buy or sell a stated amount of a security at a specified price or at a better price. A limit order is called "marketable" when the prevailing best offer (bid) is equal to or less (greater) than the limit buy (sell) order price.

[8] For example, if the primary market quotation is ¼ bid, ½ offered, 4,000 shares bid and 4,000 shares offered, and a CHX specialist receives a limit order to buy 2,000 shares for ⅛, that limit order will not be compared against the amount of stock ahead of the order in the primary market until such time as the ¼ bid is exhausted and the ⅛ bid becomes the best bid. At that time, the size which is disseminated with the ⅛ bid is the size against which the limit order is compared for Auto-Ex purposes.

[9] For example, assume a CHX specialist receives an agency limit order to buy 2,000 shares of ABC at ½. The primary market quotation is ½ bid, ¾ offered, 5,000 shares bid and CHX order. The Auto-Ex will automatically execute the entire CHX limit 5,000 shares offered, meaning there are 5,000 shares ahead of the order after 7,000 shares print at ½ or better in the primary market. However, when more than 5,000 but less than 7,000 shares print at ½ in the primary market, the order will be flagged with a flashing prompt to alert the specialist that the order may be due at least a partial fill. See CHX Article XX, Rule 37(a) governing primary market protection of certain limit orders.

rules.[10] Auto-Ex is available for all dually traded issues; however, specialists are permitted to choose Auto-Ex on an issue by issue basis.[11] Generally, however, Auto-Ex has been used by specialists for issues which, based on experience, have demonstrated reliable and accurate quotes in the primary market. Limit orders not subject to Auto-Ex will be "flagged" with a prompt to alert the specialist that a fill may be due. The proposal to establish an Auto-Ex feature applies only to non-marketable limit orders. It is not applicable to marketable limit orders or to market orders.

The Exchange states that the purpose of the proposed rule change is to further automate the CHX's trading floor functions, and to improve the CHX's performance in filling limit orders. By providing for automatic execution of limit orders in accordance with existing Exchange rules, the Exchange states that it is eliminating the need for the manual operation required of specialists in determining when and to what extent limit orders are due fills based on primary market prints. The Exchange notes that the manual effort expended by specialists in filling limit orders that are entitled to primary market protection is often time-consuming and can result in errors, particularly when there is heavy trading volume. The Exchange believes that the present proposal will, therefore, directly benefit customers because it will result in more timely fills while eliminating errors resulting from manual execution.

The Exchange also states that the Auto-Ex feature will not change or amend any CHX trading rules, nor will it cause or allow limit orders to be filled under different parameters than under existing rules. Auto-Ex only automates the manner in which limit orders are filled. The Exchange states that it will continue to monitor specialist execution of limit orders through the Market Regulation/Surveillance Department. In addition CHX specialists will continue to be responsible for their books to the same degree as they are now under the manual execution system for limit orders.

[10] Further, the Exchange has stated that the recent adoption of the Order Execution Obligations (Securities Exchange Act Release No. 37619 (August 29, 1996), 61 FR 48290 (September 12, 1996)) will have no impact or effect on the proposed rule change. See Letter from J. Craig Long, Foley & Lardner to Janice Mitnick, Division of Market Regulation, SEC, dated November 8, 1996.

[11] The CHX will limit a specialist's ability to activate and deactivate Auto-Ex by: (1) only permitting a specialist to deactivate Auto-Ex on a certain day each month, which is determined from time to time by the Exchange; and (2) requiring that issues remain on Auto-Ex for a minimum of five trading days.

III. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b) of the Act.[12] Specifically, the Commission believes the proposal is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, and, in general, to protect investors and the public interest. The Commission believes that the proposed rule change to provide for the automatic execution of non-marketable limit orders should result in prompt execution of such orders on the Exchange and reduce errors caused by manual execution of limit orders that are entitled to primary market protection, especially during periods of heavy trading volume.

In the Pilot Approval Order, the Commission noted several items to be addressed prior to implementation of the pilot on a permanent basis. The Commission sought clarification regarding the basis upon which issues would be added and removed from Auto-Ex. The Commission also requested clarification that manually-executed limit orders and Auto-Ex limit orders receive an identical quality of execution. Finally, the Commission expressed an interest regarding the length of time between a print in the primary market and the resulting fill on CHX for both issues included in Auto-Ex and those issues not included in Auto-Ex.

In order to address the items noted by the Commission, the Exchange submitted a report summarizing data gathered during the pilot period.[13] The Exchange stated that during the reporting period, five of the 348 issues participating in the pilot were removed. Of those issues removed, three had been added to the pilot in error[14] and two were removed at the specialist's request due to a high volume of activity on the primary market. According to the report submitted by the Exchange, specialists seem to be biased against including issues in Auto-Ex which generate large size orders. The Exchange stated that it believes this bias is due to the fact that the maximum quote size that CQS can disseminate is 99,900. For example, if a specialist on the primary market has a limit order on the book for 400,000, only 99,900 appears on the CHX system. Therefore, once the CHX system registered the execution of 99,900 shares on the primary market, executions would occur on Auto-Ex while more than 300,000 in limit orders still remained in the primary market limit order book. Further, these executions would occur when CHX rules did not yet require the order to be filled.[15] Therefore, to avoid automatic executions when an order fill was not yet required, some specialists for issues which generated larger size orders requested that those issues be removed from Auto-Ex.

The Exchange reported that the length of time between a print in the primary market and an Auto-Ex was less than one second. Further, according to the Exchange report, the length of time between a print in the primary market and a manual CHX order fill averaged 11.623 minutes. The Exchange stated in the report that fifty percent of the manually filled orders are executed in 1½ minutes or less. Although the submitted data appears to suggest that the execution of some manually-executed limit orders was delayed for several hours, the Exchange has confirmed that these orders were not executed late; rather, the prompt to execute was actually premature due to the fact that an order of more than 99,900 shares (in the primary market) was ahead of the CHX order.[16]

The Commission believes that the Exchange reports adequately addresses the potential issues identified by the Commission in the Pilot Approval Order. Specifically, the Commission finds that the report indicates that issues participating in Auto-Ex during the pilot period were added and removed in a fair and non-discriminatory manner. Further the Commission finds that it does not appear that the method of selection of issues for participation in Auto-Ex raised concerns regarding manipulation.

[12] 15 U.S.C. 78f(b).

[13] The report includes data gathered from April 7, 1996 through July 25, 1996. Phone conversation between David Rusoff, Foley & Lardner and Janice Mitnick, SEC on December 16, 1996.

[14] In one case, a stock ticker symbol was incorrectly entered. The other two errors resulted from outdated information. Generally, firms participating in the pilot requested that the Exchange include all of their specialists in the pilot. One error resulted from the addition of an issue marketed by a specialist who had was no longer with the firm requesting participation in AutoEx. Additionally, if a specialist chose to participate in AutoEx, the specialist usually placed all of his or her stocks in the pilot. One error resulted from the fact that the specialist who chose to participate AutoEx was no longer a market maker in the erroneously added stock. Phone conversation between David Rusoff, Foley & Lardner and Janice Mitnick, SEC on December 16, 1996.

[15] See CHX Article XX, Rule 37(a)(3)(c).

[16] See *Id.*

The only factor noted in the report which created a bias regarding the issues selected for inclusion in Auto-Ex appears to be the result of the size limitations of the CQS. As discussed above in detail, the size limitation of CQS, combined with issues which generate large orders, could result in fills being generated on Auto-Ex before the CHX rules require a fill to occur. Finally, the Commission finds that the report data indicates that executions on Auto-Ex are timely, occurring in 1½ minutes or less, and, in most cases, faster than manual executions for issues not included on Auto-Ex. As discussed above, the Commission believes that the proposed rule change should result in prompt execution of non-marketable limit orders and reduce errors caused by manual execution of limit orders that are entitled to primary market protection, especially during periods of heavy trading volume.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[17] that the proposed rule change (SR–CHX–96–27) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[18]

[Release No. 34–38078; File No. SR–NYSE–96–37]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of a Proposal by the New York Exchange, Inc. Regarding the Limitation of Liability for Use of Facilities

December 23, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 10, 1996, the New York Stock Exchange, Incorporated ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[17] 15 U.S.C. 78s(b)(2).

[18] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to clarify that transactions in baskets that include American Stock Exchange, Inc. ("Amex") listed securities effected through NYSE Crossing Session II are deemed to constitute use of Exchange facilities, as described in Article II, Section 6 of the NYSE Constitution. The text of the proposed rule change is available at the Office of the Secretary, the Exchange, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Section (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

NYSE Crossing Session II permits members and member organizations to cross multi-stock baskets between 4:00 p.m. and 5:15 p.m. New York time. Baskets must include at least 15 NYSE-listed stocks with an aggregate value of $1 million or more.

The Amex has filed with the Commission a proposed rule change to extend its trading hours to permit the execution of "aggregate-price orders" for Amex-listed securities which are part of a basket being done in large part through the exchange's Crossing Session II.[3] Once approved, the Amex rule change will allow dual NYSE/Amex members and member organizations contemporaneously to execute on the NYSE, the NYSE-listed portion of a basket and on the Amex, the Amex-listed portion of the basket.

To facilitate contemporaneous execution, the NYSE will accept the entire basket order and forward to the Amex the Amex-listed portion of the basket order, provided that the member or member organizations submitting the order is a member of both the NYSE and the Amex. The Amex will execute the Amex portion, report it to the "Tape" and back to the member or member organization, and facilitate any regulatory reports that may be required of the member or member organization with respect to the Amex portion.

The Exchange proposes to clarify that Article II, Section 6 of the NYSE Constitution shall, in addition to all other applications, also apply to any transaction, notice or communication effected through or arising in connection with NYSE Crossing Session II. This includes, but is not limited to, transactions, notices or communications involving a basket consisting of both Exchange-listed securities and securities listed on the Amex. This shall not preclude the applicability of any other provision of the Constitution or Rules that would serve to limit the liability of the Exchange for use by its members and member organizations of Exchange facilities.

The Exchange believes that the proposal is consistent with Section 6(b) of the Act in general and furthers the objectives of Section 6(b)(5) in particular in that it is designed to promote just and equitable principles of change, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change constitutes a stated interpretation with respect to the meaning, administration, or enforcement of an existing rule, it has become effective pursuant to section 19(b)(3)(A), and Rule 19b-4 thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and

[3] See Securities Exchange Act Release No. 37965 (November 19, 1996), 61 FR 60135 (November 26, 1996) (File No. SR–Amex–96–43).

[Release No. 34–38075; File No. SR–NYSE–96–35]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the New York Stock Exchange, Incorporated Relating to a One-Time Fee for Additional Specialist Principal Activity Reporting System ("SPAR") Feed Lines

December 23, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 5, 1996, the New York Stock Exchange, Incorporated ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[4] 17 CFR 200.30–3(a)(12).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule establishes a one-time fee for additional Specialist Principal Activity Reporting System ("SPAR") feeds. The proposed implementation date for the fee is December 9, 1996.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to respond to the needs of NYSE's constituents with respect to overall competitive market conditions and customer satisfaction.

The SPAR system provides the specialists with information about their daily trading activity. Due to current design limitations, a specialist can only receive information from one feed which the NYSE provides free of charge to any specialist firm that requests it. Since information is required by various locations, the NYSE has developed a system which can provide the information to up to four different remote member firm addresses. Any specialist firm requesting from one to three additional SPAR feeds would pay a one-time fee of $10,000.00 for the additional feeds. This charge will cover incremental design and development work required to support this effort, as well as any on-site communications work required at the member firm's location. Circuits and line costs, and any telecommunications maintenance are provided by other vendors and are the responsibility of each specialist firm, not the New York Stock Exchange.

2. Statutory Basis

The basis for the proposed rule change is the requirement under Section 6(b)(4) of the Act[1] that an Exchange have rules that provide for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its services.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change establishes or changes a due, fee, or other charge imposed by the Exchange and, therefore, has become effective upon filing pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4 thereunder.[2] At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No.

DEPARTMENT OF STATE

[Public Notice No. 2496]

Shipping Coordinating Committee; Subcommittee on Safety of Life at Sea and Associated Bodies Working Group on Stability and Load Lines and on Fishing Vessels Safety; Notice of Meeting

The Working Group on Stability and Load Lines and on Fishing Vessels Safety of the Subcommittee on Safety of Life at Sea will conduct an open meeting at 9 a.m. on Thursday, January 16, 1997, in Room 6103, at U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001. This meeting will discuss the upcoming 41st Session of the Subcommittee on stability and Load Lines and on Fishing Vessels Safety (SLF) and associated bodies of the International Maritime Organization (IMO) which will be held on January 26–30, 1998, at the IMO Headquarters in London, England.

Items of discussion will include the following:

a. Development of Model Stability Booklets and Loading Manuals at the IMO,

b. Harmonization of damage stability provisions in the IMO instruments,

c. Tanker stability follow up from SLF 40 and MSC 67, and

d. Safety aspects of ships engaged in a ballast water exchange.

Members of the public may attend this meeting up to the seating capacity of the room. Interested persons may seek information by writing: Mr. Paul Cojeen, U.S. Coast Guard Headquarters, Commandant (G–MSE–2), Room 1308, 2100 Second Street, SW., Washington, DC 20593–0001 or by calling (202) 267–2988.

Dated: December 26, 1996.

Russell A. LaMantia,

Chairman, Shipping Coordinating Committee.

BILLING CODE 4710–07–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notice of Meeting of the Industry Sector Advisory Committee for Aerospace Equipment (ISAC 1)

AGENCY: Office of the United States Trade Representative.

ACTION: Notice of meeting.

SUMMARY: The Industry Sector Advisory Committee for Aerospace Equipment (ISAC 1) will hold a meeting on January 15, 1997 from 9:00 a.m. to 2:00 p.m. The meeting will be open to the public from 11:45 a.m. to 12:05 p.m.

DATES: The meeting is scheduled for January 15, 1997, unless otherwise notified.

ADDRESSES: The meeting will be held at the Department of Commerce in Room 4830, located at 14th Street and Constitution Avenue, NW., Washington, DC, unless otherwise notified.

FOR FURTHER INFORMATION CONTACT: Fred Elliott, Department of Commerce, 14th St. and Constitution Ave., NW., Washington, DC 20230, (202) 482–1233 or Suzanna Kang, Office of the United States Trade Representative, 600 17th St. NW., Washington, DC 20508, (202) 395–6120.

SUPPLEMENTARY INFORMATION: The ISAC 1 will hold a meeting on January 15, 1997 from 9:00 a.m. to 2:00 p.m. The meeting will include a review and discussion of current issues which influence U.S. trade policy. Pursuant to Section 2155(f)(2) of Title 19 of the United States Code and Executive Order 11846 of March 27, 1975, the Office of the U.S. Trade Representative has determined that part of this meeting will be concerned with matters the disclosure of which would seriously compromise the development by the United States Government of trade policy, priorities, negotiating objectives or bargaining positions with respect to the operation of any trade agreement and other matters arising in connection with the development, implementation and administration of the trade policy of the United States. During the discussion of such matters, the meeting will be closed to the public from 9:00 a.m. to 11:45 a.m. and 12:05 p.m. to 2:00 p.m. The meeting will be open to the public and press from 11:45 a.m. to 12:05 p.m. when other trade policy issues will be discussed. Attendance during this part of the meeting is for observation only. Individuals who are not members of the committee will not be invited to comment.

Phyllis Shearer Jones,

Assistant United States Trade Representative, Intergovernmental Affairs and Public Liaison.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Reports, Forms and Recordkeeping Requirements Agency Information Collection Activity Under OMB Review

AGENCY: Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for reinstatement, without change, of a previously approved collection for which approval has expired. The ICR describes the nature of the information collection and its expected burden. The Federal Register Notice soliciting comments on the following collection of information was published on August 28, 1996 [61 FR 44392].

DATES: Comments must be submitted on or before January 30, 1997.

FOR FURTHER INFORMATION CONTACT: Edward Kosek, (202) 366–2590, and refer to the OMB Control Number.

SUPPLEMENTARY INFORMATION:

National Highway Traffic Safety Administration (NHTSA)

Title: 49 CFR Part 575—Consumer Information Regulations.

Type of Request: Reinstatement, without change, of a previously approved collection for which approval has expired.

OMB Control Number: 2127–0049.

Form Number: N/A.

Affected Public: Motor vehicle manufacturers.

Abstract: NHTSA must ensure that motor vehicle manufacturers comply with 49 CFR Part 575, Consumer Information Regulation Part 575.103—Truck-camper loading and Part 575.105—Utility Vehicles. Part 575.103 (Truck-camper loading) requires that manufacturers of light trucks that are capable of accommodating slide-in campers to provide information on the cargo weight rating and the longitudinal limits within which the center of gravity

for the cargo weight rating should be located. Part 575.105 (Utility vehicles) requires that manufacturers of utility vehicles affix a sticker in a prominent location alerting drivers that the particular handling and maneuvering characteristics of utility vehicles require special driving practices when these vehicles are operated.

Need and Use of the Information: In order to ensure that motor vehicle manufacturers are complying with 49 CFR Part 575, and to provide performance and safety information to new vehicle purchases.

Annual Estimated Burden: The total estimated annual burden is 225 hours.

ADDRESSES: Send comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725–17th Street, NW, Washington, DC 20503, Attention DOT Desk Officer.

Comments are Invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Issued in Washington, DC, on December 23, 1996.

Phillip A. Leach,

Clearance Officer, United States Department of Transportation.

BILLING CODE 4910–62–P

Surface Transportation Board

[STB Docket No. AB–480X]

K & E Railway Company—Abandonment Exemption—in Alfalfa, Garfield, and Grant Counties, OK, and Barber County, KS

AGENCY: Surface Transportation Board, DOT.

ACTION: Notice of exemption.

SUMMARY: Under 49 U.S.C. 10502, the Board exempts the abandonment by K & E Railway Company of its entire 57.69-mile rail line, between milepost 0.60, at or near Kiowa, in Barber County, KS, and milepost 56.98, at or near Blanton, in Garfield County, OK, and between milepost 299.88 and milepost 301.19, near Cherokee, in Alfalfa County, OK, from the prior approval requirements of 49 U.S.C. 10903, and the abandonment of 5.69 miles of the right-of-way between milepost 18.82 and milepost 23.20, and between milepost 299.88 and milepost 301.19, from the offer of financial assistance (OFA) requirements of 49 U.S.C. 10904 and the public use requirements of 49 U.S.C. 10905, subject to historic preservation and environmental conditions.

DATES: With respect to the two line segments exempted from 49 U.S.C. 10904–05, the exemption will be effective on December 31, 1996, and petitions to reopen must be filed by January 27, 1997. With respect to the remainder of the line, provided no formal expression of intent to file an OFA is received, this exemption will be effective on January 30, 1997, formal expressions of intent to file an OFA [1] under 49 CFR 1152.27(c)(2) and requests for a notice of interim trail use/rail banking under 49 CFR 1152.29 must be filed by January 10, 1997; petitions to stay must be filed by January 10, 1997; requests for public use conditions in conformity with 49 CFR 1152.28(a)(2) must be filed by January 21, 1997; and petitions to reopen must be filed by January 27, 1997.

ADDRESSES: Send pleadings referring to STB Docket No. AB-480X to: (1) Surface Transportation Board, Office of the Secretary, Case Control Branch, 1201 Constitution Ave., N.W., Washington, DC 20423, and (2) Petitioner's representative: Karl Morell, Ball Janik LLP, Suite 225, 1455 F St. N.W., Washington, D.C. 20005.

FOR FURTHER INFORMATION CONTACT: Beryl Gordon, (202) 927–5660. [TDD for the hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Board's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: DC News & Data, Inc., Room 2229, 1201 Constitution Avenue, N.W., Washington, DC 20423. Telephone: (202) 289 4357–4359. [Assistance for the hearing impaired is available through TDD services (202) 927–5721.]

Decided: December 23, 1996.

By the Board, Chairman Morgan, Vice Chairman Simmons, and Commissioner Owen.

Vernon A. Williams,

Secretary.

DEPARTMENT OF THE TREASURY

Customs Service

Extension of National Customs Automation Test Regarding Electronic Protest Filing

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: General notice.

SUMMARY: This notice announces Customs plan to extend the test of its electronic filing of protests and to expand the number of test ports. The test will not be opened to new participants at this time. The notice invites public comments concerning any aspect of the test.

EFFECTIVE DATE: The test of electronic filing of protests, which was scheduled to end on October 31, 1996, is now scheduled to extend through April, 1997.

ADDRESSES: Written comments regarding this notice or any aspect of the test of the electronic protest system should be addressed to the Chief, Commercial Compliance Branch, U.S. Customs Service, 1301 Constitution Avenue, N.W., Room 1313, Washington, D.C. 20229–0001.

FOR FURTHER INFORMATION CONTACT: For operational or policy issues: Neil Shannon (202)927–0300. For protest system or automation issues: Steve Linnemann (202) 927–0436.

SUPPLEMENTARY INFORMATION:

Background

On January 30, 1996, a document was published by Customs in the **Federal Register** (61 FR 3086) announcing, as part of the National Customs Automation Program (NCAP), a test regarding the electronic filing of protests. The test, which began on May 1, 1996 and was to last six months, involved transaction sets for the Automated Broker Interface (ABI) allowing the following to be filed electronically and their status to be tracked electronically:

(1) Protests against decisions of the Customs Service under 19 U.S.C. 1514;

(2) Claims for refunds of Customs duties or corrections of errors requiring reliquidation pursuant to 19 U.S.C. 1520(c) and (d); and

(3) Interventions in an importer's protest by an exporter or producer of merchandise from a country that is a party to the North American Free Trade Agreement under § 181.115 of the Customs Regulations.

A total of seventeen entities, consisting of importers, brokers, legal firms and sureties, volunteered to participate in the test. Six of these volunteers are currently operational. Eight ports were originally selected for the tests: Baltimore, Buffalo, Chicago, Los Angeles, Laredo, Los Angeles Airport, New York and Philadelphia.

Extension of Test

The purpose of this notice is to inform the public that Customs has extended the test of electronic filing and query of protests. The test is now extended through April 1997. While the test will not be opened to new participants at this time, Customs will consider expanding the number of ports at which electronic protests may be filed. Customs is considering expanding the test to one or more of the following ports: Charleston (South Carolina), Dallas, El Paso, Houston, Seattle, Miami and New Orleans.

Dated: December 24, 1996.

Albert W. Tennant,

Acting Assistant Commissioner, Office of Field Operations.

BILLING CODE 4820–02–P

DEPARTMENT OF VETERANS AFFAIRS

Agency Information Collection Activities: Proposed Collection; Comment

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: As part of its continuing effort to reduce paperwork and respondent burden, the Veterans Benefits Administration (VBA) invites the general public and other Federal agencies to comment on this information collection. This request for comment is being made pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13; 44 U.S.C. 3506(c)(2)(A)). Comments should address the accuracy of the burden estimates and ways to minimize the burden including the use of automated collection techniques or the use of other forms of information technology, as well as other relevant aspects of the information collection.

DATES: Written comments and recommendations on the proposal for the collection of information should be received on or before March 3, 1997.

ADDRESSES: Direct all written comments to Nancy J. Kessinger, Veterans Benefits Administration (20S52), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. All comments will become a matter of public record and will be summarized in the VBA request for Office of Management and Budget (OMB) approval. In this document VBA is soliciting comments concerning the following information collection:

OMB Control Number: 2900–0132.

Title and Form Number: Veteran's Application in Acquiring Specially Adapted Housing or Special Home Adaptation Grant, VA Form 26–4555.

Type of Review: Extension of a currently approved collection.

Need and Uses: The form is used to gather the necessary information to determine the veteran's eligibility to specially adapted housing or the special home adaptation grant.

Current Actions: Title 38, U.S.C., Sections 2101(a) and (b), authorizes VA grants for specially adapted housing and special housing adaptations for disabled veterans. The sections specifically outline those determinations that must be made by the VA before such a grant is approved for a particular veteran. VA Form 26–4555 is used to collect information that is necessary for VBA to meet the requirements.

Affected Public: Individuals or households.

Estimated Annual Burden: 133 hours.

Estimated Average Burden Per Respondent: 10 minutes.

Frequency of Response: On occasion.

Estimated Number of Respondents: 800.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form should be directed to Department of Veterans Affairs, Attn: Nancy J. Kessinger, Veterans Benefits Administration (20S52), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, Telephone (202) 273–7079 or FAX (202) 275–4884.

Dated: December 16, 1996.

By direction of the Secretary:

Donald L. Neilson,

Director, Information Management Service.

Proposed Information Collection Activity; Public Comment Request

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: As part of its continuing effort to reduce paperwork and respondent burden, Veterans Benefits Administration (VBA) invites the general public and other Federal agencies to comment on this information collection. This request for comment is being made pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13; 44 U.S.C. 3506(c)(2)(A)). Comments should address the accuracy of the burden estimates and ways to minimize the burden including the use of automated collection techniques or the use of other forms of information technology, as well as other relevant aspects of the information collection.

DATES: Written comments and recommendations on the proposal for the collection of information should be received on or before March 3, 1997.

ADDRESSES: Direct all written comments to Nancy J. Kessinger, Veterans Benefits Administration (20S52), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420. All comments will become a matter of public record and will be summarized in the VBA request for Office of Management and Budget (OMB) approval. In this document VBA is soliciting comments concerning the following information collection:

OMB Control Number: 2900–0073.

Title and Form Number: Enrollment Certification, VA Form 22–1999. (NOTE: A reference to VA Form 22–1999 also includes VA Forms 22–1999–1, 22–1999–2, and 22–1999–3 unless otherwise specified. VA Forms 22–1999–1, 22–1999–2, and 22–1999–3 contain the same information as VA Form 22–1999.)

Type of Review: Extension of a currently approved collection.

Need and Uses: The information collected on VA Form 22–1999 is used by the VA to determine the amount of educational benefits payable to the trainee during the period of enrollment or training and to determine whether the trainee has requested an advanced payment of benefits. Without the information, the VA would not have a basis upon which to make payment.

Current Actions: The VA is authorized to pay education benefits to veterans and other eligible persons pursuing approved programs of education under Title 38, U.S.C., Chapters 30, 32, and 35, Title 10, U.S.C., Chapter 1606, and Public Law 96–342, Sections 901 and 903. Educational institutions and job establishments are required to report information concerning the enrollment or reenrollment into training of veterans, service persons, reservists, and other eligible persons. In certain cases, the VA is authorized to make payment in advance if the trainee requests an advanced payment. In these cases, VA Form 22–1999 serves as the trainee's request for an advanced payment as well as the educational institution's report of the trainee's enrollment.

Affected Public: Business or other for-profit, not-for-profit institutions, and State, Local or Tribal Government.

Estimated Annual Burden: 110,344 hours.

Estimated Average Burden Per Respondent: 10 minutes.

Frequency of Response: On occasion (The number of responses per respondent will vary according to the number of trainees who receive VA benefits at the educational institution or job training establishment during a 12-month period).

Estimated Annual Responses: 662,068.

Estimated Number of Respondents: 7,481.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form should be directed to Department of Veterans Affairs, Attn: Nancy J. Kessinger, Veterans Benefits Administration (20S52), Department of Veterans Affairs, 810 Vermont Avenue, NW, Washington, DC 20420, Telephone (202) 273–7079 or FAX (202) 275–4884.

By direction of the Secretary.

Dated: December 16, 1996.

Donald L. Neilson,

Director, Information Management Service.

Department of Health and Human Services

Health Resources and Services Administration

Lists of Designated Primary Medical Care, Mental Health, and Dental Health Professional Shortage Areas; Notice

VOL 61 ISS 252 DE 31 1996 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Lists of Designated Primary Medical Care, Mental Health, and Dental Health Professional Shortage Areas

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: This notice provides lists of all areas, population groups, and facilities designated as primary medical care, mental health, and dental health professional shortage areas (HPSAs) as of September 30, 1996. HPSAs are designated or withdrawn by the Secretary of Health and Human Services (HHS) under the authority of section 332 of the Public Health Service (PHS) Act.

FOR FURTHER INFORMATION CONTACT: For further information on the HPSA designations listed below, or to request additional designations or withdrawals or reinstatement of a withdrawn designation, please contact Evan R. Arrindell, D.S.W., Director, Division of Shortage Designation, Bureau of Primary Health Care, Health Resources and Services Administration, 4350 East-West Highway, Bethesda, Maryland 20814 (301–594–0816).

SUPPLEMENTARY INFORMATION:

1. Background

Section 332 of the PHS Act provides that the Secretary of HHS shall designate HPSAs based on criteria established by regulation. HPSAs are defined in section 332 to include (1) urban and rural geographic areas, (2) population groups, and (3) facilities with shortages of health professionals. Section 332 further requires that the Secretary annually publish a list of the designated geographic areas, population groups, and facilities. The list of HPSAs is to be reviewed at least annually and revised as necessary. The Health Resources and Services Administration's (HRSA) Bureau of Primary Health Care (BPHC) has the responsibility for designating and updating HPSAs.

Public or private nonprofit entities are eligible to apply for assignment of National Health Service Corps (NHSC) personnel to provide primary health services in or to these HPSAs. NHSC health professionals with a service obligation may serve only in federally designated HPSAs. Programs with clinical training sites located in HPSAs are eligible to receive priority for certain residency training program grants administered by HRSA's Bureau of Health Professions.

Several programs administered by the Health Care Financing Administration also use the HPSA designation. Certain qualified providers in HPSAs are eligible for increased levels of Medicare and Medicaid reimbursement.

2. Development of the Designation and Withdrawal Lists

Criteria for designating HPSAs were published as final regulations (42 CFR Part 5) in 1980. Criteria were then defined for each of seven health professional types (primary medical care, dental, psychiatric, vision care, podiatric, pharmacy, and veterinary care). The criteria for correctional facility HPSAs were revised at 54 FR 8738 in 1989, and the criteria for psychiatric HPSAs were expanded to mental health HPSAs at 57 FR 2477 in 1992. The currently-funded PHS programs which use the HPSA designations involve only the primary medical care, mental health, or dental HPSAs.

Individual requests for designation or withdrawal of a particular area, population group, or a facility as a HPSA are received and reviewed continuously by HRSA's BPHC. The review process includes routine submission of such requests to the appropriate State Health Planning and Development Agency (SHPDA) and/or a unit of the State Health Department, the Governor, and other interested organizations and individuals for their comments and recommendations. Requests regarding primary medical care and mental health HPSAs are also submitted to the appropriate State medical society for comment, and dental HPSA requests are submitted to the appropriate State dental society.

Annually, lists of designated HPSAs are provided to all SHPDAs and/or State health departments, State medical and dental societies and others, together with a request to review and update the data on which the designations are based. Emphasis is placed on updating those designations which are more than 3 years old or where significant changes relevant to the designation criteria have occurred.

Recommendations for possible additions, continuations, revisions or withdrawals from the HPSA list are reviewed by the BPHC, and the review findings are provided by letter to the agency or individual requesting action or providing data, with copies to other interested organizations and individuals. These letters constitute the official notice of designation as a HPSA, rejection of recommendations for HPSA designation, revision of a HPSA designation, and/or advance notice of pending withdrawals from the HPSA list. Designations (or revisions of designations) are effective as of the date of the notification letter from BPHC. Proposed withdrawals become effective only after interested parties in the area affected have been afforded the opportunity to submit additional information to the BPHC in support of its continued or revised designation. If no new data are submitted or if the BPHC review confirms the proposed withdrawal, it becomes effective upon publication in the **Federal Register** of a list of HPSAs that does not include the proposed withdrawals.

This notice contains three lists of designated HPSAs. Each list (primary medical care, mental health, and dental) includes all those areas, population groups, and facilities which were designated HPSAs as of September 30, 1996. This notice incorporates the most recent annual review of designated HPSAs and supersedes the HPSA list published in the **Federal Register** on October 2, 1995.

3. Format of Lists

Each list of designated HPSAs (primary medical care, mental health, and dental) is arranged by State. Within each State, the list is first presented by county. If only a portion (or portions) of a county is (are) designated, or if the county is part of a larger designated service area, or if a population group residing in the county or a facility located in the county has been designated, the name of the service area, population group, or facility involved is listed under the county name. Counties which have a geographic HPSA designation in addition to one or more facility designations within the county are indicated by a (g) following the county name.

Following the county listing, a list of any designated service areas is presented, identifying their component parts—counties, towns, townships, census tracts (CTs), minor civil divisions (MCDs), census county divisions (CCDs), block numbering areas (BNAs), or magisterial districts, as defined by the Bureau of the Census. Those counties (or parts of counties included in service areas) which are classified as nonmetropolitan are indicated by an asterisk (*). "Nonmetropolitan" refers to those counties not included in the definition of metropolitan areas established by the Office of Management and Budget (OMB Bulletin 94–07 dated July 5, 1994).

Following the service area listing, a list of designated population groups (if any) is presented identifying each group and the geographic area wherein it resides. Following the population group listing, a list by name and location of any separately designated facilities (including prisons, correctional institutions, health centers, or hospitals) is presented.

In addition to the specific listings included in this notice, all Indian tribes which meet the definition of such tribes referenced in Section 4(d) of Public Law 94–437, the Indian Health Care Improvement Act of 1976, are automatically designated as population groups with primary medical care and dental health professional shortages.

4. Future Updates of Lists of Designated HPSAs

The lists of HPSAs below consist of all those which were designated as of September 30, 1996. It should be noted that additional HPSAs may have been designated by letter since September 30. The appropriate agencies and individuals have been or will be notified of these actions by letter.

Any designated HPSA listed below is subject to withdrawal from designation if new information received and confirmed by HRSA indicates that the relevant data for the area involved have significantly changed since its designation or that incorrect or incomplete data were used in making the original designation.

All requests for new designations, updates, or withdrawals should be based on the relevant criteria in regulations published at 42 CFR Part 5 (1995).

Dated: December 13, 1996.

Ciro V. Sumaya,

Administrator.
